CONTRACTORS' CONVENTION PRO- GRAM MATTERS NOW IN FINAL COURSE OF PREPARATION

As time draws on apace the building contracting forces of the State are beginning to focus their attention on the annual convention of the Associated Building Contractors of Indiana, planned for January 23, 24 and 25, at Michigan City.

Since the influences of the contractors' association, composed of the majority of the building operators of Indiana, through its affiliation with the various city contractors' bodies, is state wide more than ordinary interest attaches to the approaching meeting.

All phases of the contracting business and the conditions arising to affect same will be brought up for consideration and discussion, and various policies proposed that will tend to stabilize affairs in the building field in an effort to encourage construction operations to greater activity in 1923.

It is expected, from current indications, that there will be large delegations present from the northern Indiana cities, the larger cities and even the smaller communities of the State.

Details for the final program are now being worked out upon completion of which notice will be made in ample time preceding the convention.

CEMENT PRICES PER BARREL REDUCED

Announcements have been made the past week of a substantial reduction in the prices of cement. The reduction is 15 cents per barrel at plant.

INTEREST IN CIVIC MOVES BOUND TO PROFIT THE ARCHITECT- TURAL PROFESSION.

At Indianapolis the architects, members of the Architects' Association, are showing a keen interest in civic affairs as they pertain to better building moves. Some time ago, when the zoning proposals of the City Plan Commission were being made Mr. Lawrence Sheridan, city plan expert of the commission, appeared before the architects and explained the end that was being sought. Then he asked for expressions from the architects and at the conclusion invited expressions from the architects and said the City Plan Commission would at all times welcome the opinions of the architectural profession for consideration.

Then again, it was proposed to erect a new city market house and auditorium.

The architects believing that the scheme to construct such a building with an auditorium over the market, and at the same time use part of the second floor for market purposes, was against the best building tenets, so communicated with the city officials. Mr. John F. White, chairman of the market house committee, replied to the architects supporting the proposals of his colleagues. Another letter has been sent to Mr. White but the contents were withheld pending the pleasure of the recipient.

The point is this, though all the recommendations of the architects may not prove acceptable, nevertheless, the action of the members of the profession in various civic moves, especially along building and improvement lines will demonstrate to the public that the architects are not merely dreamers but are wide awake to the best interests of the cities in which they live.

MEANS ANOTHER SUBSTANTIAL TOTAL TO ADD TO INDIANA'S BIG BUILDING VOLUME FOR THE YEAR OF 1922

Traveling along at the fast clip that had been maintained right down through the entire year of 1922, December building operations, without a falter, came down the homestretch and under the wire with a great burst of speed, furnishing a grand setting for the finish of the great monthly building relay of the year.

Almost from the start back in January, 1922, each month that followed took up the running and set a fast building pace, outstepping that of the corresponding period in 1921. By the time the three-quarter pole was reached there was no doubt of the outcome of the race between 1921 and 1922, as far as Indiana was concerned. The latter year was out in the lead, breezing along under wraps, leaving the previous year hopelessly back in the ruck, and it was only a matter of conjecture as to how far out in front 1922 would finish. However, there was no let up, and soon after the stretch was reached the whip was applied as the distance to the wire narrowed, resulting in a whirlwind finish at a speed that even exceeded November's performance.

Reports from the building inspectors of Indiana's eight main cities show that the total aggregate of new building for which permits were granted in December amounted to \$5,298,423 as compared with \$2,627,835 for the corresponding period a year ago. This was a gain of 101.6%. At the same time the past month's estimated valuations ran 9.9% in advance of the November figures covering the same item. Then, too, there were 309 more building permits issued in December, 1922, than in December, 1921.

As for the individual city building performances last month, the positions in relation to the percentage of gain over the same period the previous year are: South Bend, 1086%; Evansville, 908%; Richmond, 549%; Hammond, 387%; Gary, 244.8%; Ft. Wayne, 53.9%. Two cities showed losses, Indianapolis with 7%, and Terre Haute with 36.4%.

The permit record for December is:

Cities.	Per.	1922.		1921.	
		Est. Val.	Per.	Est. Val.	Per.
Evansville	66	\$1,107,910	64	\$ 111,777	
Ft. Wayne	94	430,000	78	279,370	
Gary	25	312,750	26	90,704	
Hammond	30	340,250	25	69,850	
Indianapolis	610	1,729,503	488	1,863,104	
Richmond	32	177,590	27	27,350	
South Bend	204	1,144,670	85	97,938	
Terre Haute	76	55,750	35	87,742	
Total	1137	\$5,298,423	828	\$2,627,835

Work will consist of new copper set store fronts, vapor heating system, ventilating system, new floors, plastering, painting, redecorating, mill work and general interior alterations.

Kokomo: Gas Plant (complete modern plant, consisting of bldgs., waste heat boilers, gas holders, tanks, water gas sets). Owner, Kokomo Gas Co., Kokomo, Ind. Engineers, The Koppers Co., Pittsburgh, Pa. Start work in 30 days.

***Roanoke:** Consolidated High and Grade School: 14 class rooms. Jackson Twp., Huntington County, Ind. Architect, Everitt I. Brown, Studebaker Bank Bldg., Bluffton, Indiana. Owner, N. W. Van Arsdell, Trustee, Roanoke, Indiana. General contractor, L. W. Kimmel, Ponto, Indiana. Heating, plumbing and wiring. R. E. Fox, Markle, Indiana. Start work soon. Brick.

Sealed Propossal

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE.

NOTICE TO CONTRACTORS.

Notice is hereby given, That on the 24th day of January, 1923, at the Inglefield Community House, at Inglefield, in Scott Township, Vanderburgh County, Indiana, the Trustee of Scott School Township, Vanderburgh County, Indi-

ana, will receive sealed bids or proposals for the construction of a one-story and basement brick school building in said Scott Township, known as the Scott Township Joint High School and Elementary School, in accordance with the plans and specifications now on file in the office of said Trustee, R. R. Inglefield, Indiana, and in the office of Anderson & Stingle, architects, McCurdy Building, Evansville, Indiana. Said bids will be received up to eleven (11) o'clock A. M., on said 24th day of January, 1923.

Separate bids or proposals will be received on the several branches of work required to complete said school building, or combinations of the several branches will be received; bidders may also submit a single bid for the construction of the entire work.

The estimated cost of said construction is fifty-five thousand dollars (\$55,000).

Bids must be filed on the form as prescribed by the State Board of Accounts, and must be accompanied by a certified check equal to three (3) per cent of the bids submitted; said check to be forfeited to the Township Trustee in the event the successful bidder refuses or fails to enter into a proper contract for the construction of the work bid on and to furnish proper surety within three (3) days after the awarding of said contract to the said bidder. Said Trustee will examine said bids and award the contract for a construction to the lowest and best bidder therefor. Bids to provide for the furnishing of all labor and materials for the construction of said

school house, or the respective part of the same bid on, in accordance with the plans and specifications.

Notice is further given that said proposed school building is to be located at the intersection of the Base Line Road and State Road in said Scott Township, in the southeast quarter of the southeast quarter of section thirty-three (33), range ten (10) west, township four (4) south.

JAMES W. LITCHFIELD,
Trustee of Scott School Township.

A. C. Stone, Attorney for Trustee.
Dec. 30-Jan. 6th.

LODGE BUILDING. NOTICE TO CONTRACTORS.

Notice is hereby given that on the 24th day of January, 1923, at the Masonic Temple at Angola, Indiana, the Trustees of Angola Lodge No. 236 F. and A. M. will receive sealed proposals for the furnishing of all labor and material for the construction of a three story and basement, Commercial and Masonic Temple Building on the Owners' premises at Angola, Indiana, in accordance with the plans and specifications on file in the office of said Trustees and Guy Mahurin, Architect, Fort Wayne, Indiana.

The above proposals will be for the general contract only, and will not in-

clude the heating, plumbing and electric wiring contracts.

Bids will be received up until 2 p. m. and must be filed on forms furnished by the architect, addressed to Angola Lodge No. 236 F. and A. M. % Alphonso C. Wood, trustee, Angola, Ind., and shall be accompanied by a certified check equal to two (2%) per cent of the bids submitted, and made payable to Angola Lodge No. 236 F. and A. M. Said check to be submitted and held as a guarantee that if his bid is accepted, the bidder will enter into a proper contract for the construction of the work for which the bid was submitted within three (3) days after awarding of contract to said bidder.

The trustees reserve the right to reject any or all bids and to award the contract to the lowest and best bidder as may appear to the best interest of the owners.

Plans and specifications will be furnished by the architect upon receipt of a deposit of twenty-five (\$25.00) dollars for the plans and specifications to be for the exclusive use of the contractor until the time of letting. A refund of twenty (\$20.00) dollars will be given upon the return of the plans and specifications to the architect's office.

NO BETTER TIME THAN NOW.

Perhaps with the advent of the new year it would be advisable for those in the contracting business to take an inventory of that which was really achieved the past year; the business we did, the money made, also check up on the mistakes that could be credited to our accounts, and in the final analysis carefully consider what we all can do in the new year to benefit the contractors' business as a whole.

Nor in the retrospection must we fail to ask ourselves these questions. Have we done our best to make conditions under which we must work better, more pleasant, more harmonious? Have we given unto the local contractors' association the help and support it so well merits? Have we invited the outside contractor to become a member of our various associations here and there? Have we considered the rights of others, or have we rushed ahead regardless, selfishly, and created conditions that un contemplated would react as a boom-erang later to do injury to the industry? Have we realized that "the injury of one is the concern of all?" Have we conducted our business at all times in a spirit of malice toward none and charity for all? Then, in conclusion, have we all done our duty to put the contracting business on a higher plane where it will command the confidence and respect that it deserves?

Why not start out the new year with a determination to devote a part of our time, at least, to the upbuilding, betterment, and broadening of the scope of each local city contractors' association. It is only by concerted action that the contractors can hope to improve conditions, overcome impediments, and break down the barriers that would tend to retard the industry.

REACH ADJUSTMENT WITH CARPENTERS ON WAGE SCALE.

An agreement on the wage question for the coming year has been reached between the building trades employers and the carpenters in the Calumet District. It was more or less of a compromise due to the fact that the indications point to a good building year, and in order to retain the available local supply of workmen it was decided that it would be to the interest of the contractors to grant an increase in pay for cer-

tain modifications in the present working agreements. The contractors of the Calumet District put up a big fight on the wage problem last year, then held the bag, for when it came to letting contracts prospective owners, rather than stand by the local fighting contractors, turned around and gave their work to contractors who would tilt the wage scale seeming to utterly disregard the consideration of lower construction costs that the association contractors were attempting to bring about by refusing to pay advanced scale demands. If the owners don't care why should the contractors if by paying advanced wages they can secure better working agreements and conditions with the workmen? That was the motive that inspired the latest action in coming to terms with the carpenters.

CALUMET BUILDING PROGRESS.

Chas. Neidow, the undertaker, has purchased the lots formerly occupied by the Episcopal Church and is having plans made for a funeral home and chapel to be located on Rimbach Ave., west of Hohman street.

The First National Bank and the First Trust and Savings Bank were the successful bidders for the Central School ground, 233x193, corner Hohman and Fayette streets. They paid \$307,500 and are planning an eight story bank and office building on the site. It is one of the best corners in town.

Danner, Gohman & Meyers finally received the terra cotta contract for the Spragia Building. They have the second story about complete on this project.

And now we are going to have the Calumet River straightened, widened and deepened from the East Chicago Canal to Calumet Lake in Illinois. When completed, it will be big enough to allow the passage of two large lake steamers.

THE DAY OF OPPORTUNITY IS AT HAND.

Once again the contractors, like other business men, stand at the threshold of a new year, in fact, the latch has been raised and the door stands slightly ajar. Beyond is the haze of early morn, so to speak, enveloping, as it were, the business hopes of the contracting industry. Behind us, lies a record of wonderful achievement accomplished by the building forces in 1922. Everyone of us, contractors all, are ambitious to again scale the lofty volume heights attained during the past year. The level to which we rise will depend, to a great extent, upon our own efforts in an attempt to

hew a way that will make marked progress possible.

Contractors, as a class are soldiers of fortune, creatures of chance, not that the good contractors take hazardous chances or tempt Fate wantonly like a gambler with his dice, yet indirectly does chance, as marked by financial influences, the attitude of Labor, the rise and fall of prices, and the inclination of men to build, all conditional, sway the sphere in which he operates.

Hence, is it incumbent upon the contractors, both for the good of the great building industry and to their own interests to stand together and contend for conditions that will encourage building construction activity. Every allied interest working in the great building field, except the contractors, is organized strongly, yet the contractors here and there are prone to "go it alone," sniff at organized effort, and then wonder why the contracting forces have so little to say in the working out of the building progress.

Not one contractor, deeply imbued with the idea of organization, would countenance connivance, collusion or anything of a shady nature. However, they do preach and advocate a policy of unity and solidarity for the building contracting fraternity so that a solid front may be presented to retarding, inimical and selfish interests which, in their narrow, biased aims, forget that the ultimate success of the whole is dependent solely upon the success of each component part. In other words, the financial interests in the building world are dependent upon conditions that will make building investments attractive; the architect upon the ability of the owner to finance his project; the contractor upon the success of the architect to get his project started; the material supply man upon the effort of the contractor to keep building moving; Labor upon the degree of activity the other interests can create. There you are, let one of these elements through selfishness "gum the works" and all must suffer.

There must be harmony in each of the individual ranks that go to make up the army of the building industry.

The other interests have long sought that latter end and it is up to the contracting interests to do the same. It is this latter condition that organization among contractors will bring about, for, association will place contractors face to face, afford a better understanding, and, while not eliminating the sharp edge of competition, will give each man an even break, eradicating mistrust and selfishness, the two greatest enemies of the contractor.

Indiana has made a great forward step in the direction of organization amongst the contractors and it is up to those of the contractors, who believe in, and are convinced of the real mission of organization, to continue the effort not only in Indianapolis, Evansville, Fort Wayne, Hammond, South Bend and Terre Haute, but also in Muncie, Anderson, Kokomo, Marion, Lafayette, Vincennes and all the smaller cities even to the farthest corners of the state, not only in the highways, but down the by-ways.

No better time is offered than right now, at the dawn, and clear down through the year, the day, of 1923.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

JUST AN INKLING OF THE BIG STATE ARCHITECTS' MEETING NEXT SATURDAY.

Next Saturday, January 13, at Indianapolis is the day upon which the Indiana Society of Architects shines. It will be the occasion of the regular semi-annual meeting of the organization and the various committees in charge have planned to make it a real event in the annals of the Society.

Everything has been put in ship-shape for the event and all that remains to spell success is the arrival of a goodly crowd of architectural professional men from out over the State. There are two days in the year when the opportunity is offered all the Indiana architects to assemble collectively from all corners of the State, talk over professional matters, hob-nob and become better acquainted, and plan for the advancement of the profession. These two occasions are widely separated, one being held in June, the annual convention time, the other in mid-winter, usually in December. However, this year in order to get the architects together at the same time that the Annual Architectural Exhibit of Indiana Architects was held it was necessary to postpone the December meeting until January as that was the only time the galleries at the John Herron Art Institute, Indianapolis, could be secured for the exhibit.

Much time has been devoted to the arrangements for this semi-annual meeting and every Indiana architect who can possibly do so should avail himself of the opportunity to meet at Indianapolis with his professional colleagues of Hoosierdom.

The program for the day as laid out by the program and entertainment committees will follow this line.

All delegates will assemble at the Lincoln Hotel, Indianapolis, for registration. Then, at 12:30 p. m., there will be a mid-day luncheon and good-fellowship period. Following these opening exercises President Guy Mahurin, Ft. Wayne, will call a short business meeting for the discussion and disposal of matters affecting the profession, the fu-

ture of the Society, and general topics dealing with the practice of architecture in the State. It is the intention of those in charge of the meeting to make this business session a short and snappy one and eliminate any wearying and long drawn out attention to non-essential subjects.

The remaining portion of the afternoon is to be devoted to the entertainment of the visiting delegates and if the weather is propitious it is planned to motor the architects about the city to various points of interest. Then, too, those attending the meeting will go en masse to the John Herron Art Institute to view the Architectural Exhibit.

As a wind up to the features of the day there will be a big banquet at 6:30 p. m., in the Travertine Room of the Lincoln Hotel. This will be the largest thing of its kind ever attempted by the Indiana Society of Architects and a real treat is in store for those attending. There will be special decorations, this detail of the evening having been delegated to a committee under the leadership of Harry Fitton. The Entertainment Committee, of which Donald Graham is chairman, announced that there is a real surprise in store for the diners. First it is announced that there will be no loud or rough stuff, instead, it will be along the lines of refined diversion, providing the committee has the correct conception of the meaning of the word refined. Anyway, it will be the sort of entertainment that is 100% entertaining.

This evening attraction is to be a sort of jollification of the building industry as special invitations are to be extended to the contractors, engineers and draftsmen to meet and dine with the architects.

The whole will be an event well worth while attending and the Society has used its best efforts to arrange a real get-together affair. Don't overlook the date, Saturday, January 13th. If you entertain any superstitions throw them to the winds and slip into Indianapolis to give the "glad hand" to your fellow architects of Indiana.

THINK IT OVER.

One of the most important topics for discussion to be brought up at the semi-annual meeting of the I. S. A., next Saturday, will bear on the recently instituted plan of the organization to promote regional meetings in the various districts of the State at which the architects of those territories may get together and talk over the problems that arise in common to all members of the profession in Indiana.

To date two of these meetings have been held, one in Ft. Wayne, and the other at Terre Haute. Both gatherings were well attended and a keen interest taken by the architects in the matters that were brought up. So impressive was this interest, the pleasure of those attending at the chance to meet their fellow architects, and the spirit of harmony that prevailed, that the officers of the Society feel that a great good can be accomplished by the promulgation of the new line of action. It is the intention of the advocates of the regional meeting idea to establish certain prescribed districts in which the architects of those localities can form regional architectural clubs and meet, say, once a month here and there at the various cities in their districts. This will create a closer contact, a better intimacy, and an opportunity for the architects to advance the interests of the profession. It will also keep the architects in direct touch with vital local matters that have an influence on the practice. As it is now there are things that come up both for good and bad, but there is no concerted action by the architects of a community to get together on these matters, either to advance the good, or combat the inimical forces at work.

This regional club and meeting idea is worthy of the consideration of every Indiana architect and each should be prepared to express himself along this line of thought when the subject is brought up for discussion next Saturday at the big meeting at Indianapolis.

EVANSVILLE CONTRACTORS LIKE OTHERS ARE HOPING FOR FA- VORABLE CONDITIONS IN 1923.

In line with the record proportions assumed by local building activities, reports from all over the country indicate the volume of building construction work launched, when finally, accurately summed up will establish a national building record for the year of 1922.

Looking into the future, local builders are cherishing the hope and faith that the coming season's activity will assume even larger volume than that of the past year. However, things must be sized up squarely in the contemplation and anticipation and the contractors are not deceiving themselves or others. As seen by them, there is little or no prospect of any decrease in building construction costs. Material supply quotations have held steady to firm and strong in the local market and no break is expected in that direction. Nor can the labor wage be expected to decline to any extent if any, for there is a tendency toward higher demands in the larger cities, a feature that will also have its influence in the smaller communities. These latter places will have to stay in line on the wage matters as a means of protecting the local labor supply, otherwise the craftsmen will gravitate toward the higher wage sections.

The lack of an infusion of new blood into the ranks of the building trades mechanics because of certain Union restrictions on apprentices, and the tendency of contractors not to bother with teaching young men the trades is causing a serious depletion of the available supply of workmen. Not only are the big cities suffering from this source, but the smaller cities even more so, as the workmen, if able will go to the places where the big wages are being paid, a natural human trait.

This is a condition with which all contractors must reckon in 1923, and it is going to have a big bearing on the future of the building business. The attitude of Building Labor on the wage question will have a big influence on next year's volume of building construction, not only in Evansville and Indiana,

but all over the country. Labor can do its bit toward a big building year in 1923, or it can gum up the whole works.

CHIPS AND SHAVINGS.

A frame fabricating building is to be built by the Evansville Structural Supply company at Division street and Kerth avenue, about January 10. The building will be about 48 by 100 feet with one wing 48 feet square.

General Contractors Anderson and Veatch now winding up the remnants of a large volume of business put over in 1922, are preparing to launch another big building campaign the coming season.

Activity in the local building field has slowed down for the present though the contractors are figuring some promising prospects, and things should get back to a busy period before long.

GOOD WIND UP FOR A BIG YEAR.

Local business men in almost every line report 1922 as the best year from a point of receipts that they have ever had. Probably nothing will indicate the healthy condition of business in Fort Wayne at the start of the new year better than the report of the clearings of the local banks during the last week of the year. Clearings for the last week of the year were considerably in excess of those of the corresponding week last year.

Total for week	\$2,066,131.78
Same week 1921	1,648,679.25

Gain over same period	
a year ago	\$ 417,452.53

WORKMEN SOMEHOW ESCAPED WHEN BIG STEEL BEAM FELL.

A serious accident was narrowly averted on the new First National Bank Bldg., last week when a large steel beam that was being hoisted into place crashed to the ground. Three workmen who were riding the beam miraculously

escaped death though one of them was caught and his foot was badly crushed.

The exact cause of the crash was unknown to those employed about the work but it is believed that the chain, used in attaching the beam to the hoisting apparatus, slipped after the beam was started on its upward trip to a resting place in the structure.

LOOKS LIKE ANOTHER BOOST FOR HOME CONSTRUCTION IN 1923.

Faith in Ft. Wayne's home building field was evidenced a few days ago when papers of incorporation, at \$300,000 capital, were filed at Indianapolis by the W. E. Doud Building Co. Among the incorporators are to be found the names of many of Ft. Wayne's most prominent and influential financial and business men.

The purpose of the new company will be to finance and construct new residences.

CITY SOLONS CONSIDERING CITY PLAN AND ZONING LAWS.

The zoning law and city planning commission projects, endorsed some time ago by the Fort Wayne Real Estate board, is being considered by city officials. A meeting for the purpose of discussing the plan was held last week at the chamber of commerce.

No definite action was taken at the meeting although the city officials admitted that the purpose of the law and commission is commendable. The legality of the law in regards to certain phases, was questioned by the city attorney and this is one of the principal reasons that no action was taken. A further investigation of the law will be made and another meeting held within a short time.

KILL STREET WIDENING AND PROPERTY LINE MOVE SUG- GESTED FOR HARRISON ST.

The proposition proposed for widening and establishing specified building lines in Harrison street, along the zoning and city plan idea, through the downtown district was called off at a meeting of the Board of Works last week.

Following the meeting it was announced that the remonstrance against the proposed improvement was signed by 92 per cent of the property owners whose buildings would have been affected had the proposition been put through as an ordinance by the city council. In view of the heavy opposition presented the board simply rescinded all previous action covering the matter.

Remember

You can substantially reduce the cost of your compensation and liability insurance by insuring in the BUILDERS & MANUFACTURERS MUTUAL CASUALTY CO. (a strong company, organized and economically managed by contractors, and devoted exclusively to rendering a particular service and reducing the cost of insurance in building construction.)

SURPLUS OVER \$500,000.00

It will pay you to inquire of its rates and service.

MEETINGS.

Executive Committee meets second Tuesday each month.

Painter Contractors meet every Wednesday, 4.00 p. m.

Plasterer Contractors meet every Wednesday noon.

Mason Contractors Association meets every Thursday—1 P. M.

General Contractors meet second Friday each month.

PLANS ON FILE.

At 320 Peoples Bank Building,
Indianapolis.
None this week.

WAIVER OF LIEN.

None this week.

ATTENTION! ELECTION MONDAY.

Don't forget the annual election of the Building Contractors Association, at 320 Peoples Bank Bldg., next Monday, January 8th. The polls will be open from 11 a. m. to 3 p. m. Vote early!

There are two tickets in the field this year, a fact that should arouse much interest, cause some lively friendly competition, and draw out a heavy vote. The future of the association depends greatly upon its administration and every member should cast a ballot.

The tickets up for the consideration of the members are:

Regular Ticket.

President.....J. E. Hall
1st Vice President.....Robert Berner
2nd Vice President.....Wm. Carper
3rd Vice President.....Walter Wise
4th Vice President.....Robert Poehner
Treasurer.....O. A. Porter

Independent Ticket.

President.....Fred W. Jungclauss
1st Vice President.....Robert Berner
2nd Vice President.....Wm. Carper
3rd Vice President.....Walter Wise
4th Vice President.....Harry Callon, Jr.
Treasurer.....O. A. Porter

ALL PREVIOUS BUILDING RECORDS AT INDIANAPOLIS SMASHED BY 1922 ACTIVITY.

With a total of \$26,055,297 represented in building, a new record soaring above all former marks by a large margin, was set in Indianapolis this year, according to figures given out by Francis F. Hamilton, city building commissioner.

The valuation for 1921 was \$18,328,965, which shows an increase for this year of \$7,726,332.

The number of permits issued for construction by the commissioner this year

also exceeded those of 1921 by a large figure. A total of 13,581 were granted, an increase of 3,446 over last year.

In comparison with these figures, which demonstrate the almost phenomenal growth of the city, a set of figures showing the valuation of building operations and permits given out in 1918, was cited by the building commissioner. In that year, only 4,308 permits were issued representing a total valuation of \$4,558,676.

Many New Homes.

Included in the report covering the building bureau, were reports of inspectors working out of that office. These inspectors reported 1,790 elevator inspections; 1,122 smoke inspections and 19,704 electrical inspections.

Fred S. Beck, smoke inspector, reported also that eleven stacks have been installed this year, thirteen smoke consumers put in and twenty-two stokers installed.

Permits were issued for construction of twenty-two buildings costing \$100,000 or more, and twenty permits were granted for buildings costing between \$50,000 and \$100,000.

One point of interest in the building commissioner's report is that covering housing and he shows that a total of 4,353 new housing units were constructed during the year, which will accommodate that number of families. This includes 2,681 new dwelling houses.

Bureau Shows Profit.

The budget for the building bureau for 1922 called for appropriations of \$18,545, but \$29,196.35 was taken in in fees for issuing permits, which will allow the turning over of \$10,651.35 into the city's general treasury as a result of the year's work.

Permits were distributed as follows: One-story single dwellings, 1,546; two-story single dwellings, 463; one-story double dwellings, 159; two-story double dwellings, 513; stables, sheds, etc., 2,262; brick building, nonfireproof, 121; fireproof construction, 44; concrete, block, 229; tenement houses, 42; repairs, additions and alterations, frame, 6,770; repairs, additions and alterations, brick, 470, and miscellaneous, 962.

AWARD OF A MILLION DOLLAR BUILDING CONTRACT FEATURES FIRST WEEK OF 1923.

The new year, this week, got away from the scratch right at the pop of the gun, that is, as far as new building operations are concerned.

It isn't often that the dawn of the new year is enlivened by the letting of a \$1,000,000 contract, but, that is what happened the past week when the new Meyer-Kiser Bank and Office Building was awarded without a hitch.

Attached to the bottom of the contract is the name of the Bedford Stone & Construction Co., the successful bidders.

The new structure, to be located at 126-30 East Washington street, between Pennsylvania and Delaware streets, will be eleven stories high with ground dimensions of 60x200 ft. Terra cotta facing will be used. Structural steel frame with reinforced concrete floors will be the type of construction employed.

LULL IN RESIDENCE BUILDING PERMIT BUSINESS ENSUES.

There was quite a let up in the business of the city building inspectors' office the past two weeks, very few new permits being issued. This was in marked contrast to the rush just before Christmas when most every one in the building inspection department was kept busy writing out permits in answer to the applications that were made by an army of prospective residence builders.

The heavy demand put upon the clerks was occasioned by the provisions incorporated in the new zoning ordinance of the City Plan Commission which restricted building in the residence districts to so many square feet of living area for dwelling purposes. These restrictions had a great bearing on double house construction on the smaller lots and everyone who had such a structure in contemplation endeavored to secure a permit before the zoning ordinance went into effect. Though the permits were issued, it was provided that actual construction operations must be instituted within six weeks of the issuing date or the permit would be revoked. Thus is the great December residence permit rush accounted for.

CHANGE OF FIRM NAME MADE.

Announcement has just been made officially that the firm name of Wise Bros., mason contractors, Indianapolis, will hereafter be known as Walter W. Wise. There will be no change of address, the offices of the company are still to be maintained at 206 Indiana Trust Bldg., Washington street and Virginia Avenue.

BUILDING PERMITS

(\$4,500 and Over)

(Week of December 29 to January 4)
Private Garage: \$7,500. 1 sty. 50x113. 1152 Fairfield. Owner and builder, Jose-Kuhn Co., 1160 Fairfield.

the Act of March 3, 1879.

ENGINEERS OF THE STATE TO
GATHER AT INDIANAPOLIS
FOR THEIR ANNUAL
MEETING.

Indiana engineers from all sections of the state, and quite a few from without the borders, will gather at Indianapolis Thursday and Friday, January 18 and 19, that being the time fixed for the Forty-third Annual Convention of the Indiana Engineering Society.

Convention headquarters will be at the Lincoln Hotel, where all sessions, luncheons and the windup dinner dance, Friday evening, will be held.

The general meetings will be held on the fourteenth floor of the Lincoln as also will be a special engineering exhibit that has been arranged.

The official program for the two days' gathering as announced by Secretary Charles Brossman, is:

Registration

10:30 a. m., Thursday, January 18th.

Luncheon

Thursday, 12:00 o'clock noon, sharp—Indiana Engineering Society and American Association of Engineers, Dean A. A. Potter, presiding. E. W. McCullough, American Association of Engineers, Address by members of State Legislature.

Side Trip

Thursday, 2 p. m.—Excursion and inspection of Noblesville Light and Power Company's new automatic hydraulic power plant and dam on White river near Noblesville. Cars will leave traction station at 2:00 p. m. and at Noblesville, the society will be guests of Kiwanis Club, who will drive them to dam.

Smoker

Thursday, 7:45 p. m.—Travertine Room, Lincoln Hotel. Presiding, Chas. Brossman. Lecture and practical dem-

onstration of "Radio." D. J. Angus, Indianapolis, Ind. Professor R. V. Achatz, Purdue University, Lafayette, Ind.

Second Day Sessions

Friday, 9 a. m.—Presiding, R. C. Yoe-man. Secretary's report. Appointment of committees. Indianapolis, a smokeless city. Dr. I. H. Derby, Republic Creosoting Company, Indianapolis, Ind., (illustrated with stereopticon). "The Bates Experimental Road." Clifford Older, chief highway engineer, Illinois State Highway Commission, Springfield, Ill.

Discussion of Engineers' License Law, Chas. W. Cole, South Bend, Ind., member Engineers Registration Board.

Friday, 2 p. m.—Presiding, J. L. Elliott, Indianapolis. Committee reports.

"The Railroads and the Public," C. A. Paquette, chief engineer, C. C. & St. L. R. R., Indianapolis. "Hydraulic Power Development of the Tippecanoe River," Roger N. Freeman, consulting engineer, New York City. Super power plant of 100,000 K.W. capacity of the Central Indiana Power Company, by L. B. Andrus, chief engineer. "Power Plant Progress," Prof. A. W. Cole, Purdue University, Lafayette, Ind. Report, State Administrative Committee, Daniel B. Luten, chairman. Election of officers.

Friday, 6:30 p. m.—Annual dinner for members, friends and ladies. Indiana Engineering Society, Sciencetech Club and local engineering sections. Entertainment, music, dancing following the dinner.

BUILDING OPERATIONS IN INDIANA IN 1922 MADE FOR A VOLUME OF BUSINESS NEVER BEFORE ATTAINED BY THE CONSTRUCTION INDUSTRY OF THE STATE.

Some conception of the extent of building operations in Indiana in 1922 is possible when it is realized that the total estimated valuation of new building projects launched in the state's eight leading cities, according to the reports of the various city building inspectors, amounted to \$57,575,413. This amount is far ahead of any other figures, covering the same item, ever posted over a twelve months' period in Indiana, and it will take steady and continued effort in building construction endeavor in the years to come to top this great record.

The total of the eight cities for the past year when compared with the same item for 1921, \$36,299,023, shows an increase of 58.5%, and an 89.7% gain over the building volume of 1920.

The major portion of the 1922 business, 77.66%, was contributed by Indianapolis, South Bend and Ft. Wayne in this order, 45.36%, 17.54% and 16.76%, Indianapolis turning in \$26,110,607, South Bend, \$10,095,610, and Ft. Wayne, \$9,630,049. Evansville and Gary ran over the \$3,000,000 mark, while Hammond and Terre Haute more than reached the \$2,000,000 level. Little Richmond made a game struggle, but lacked \$237,734 of one million dollars.

In the matter of gains over 1921, Evansville showed the best percentage, to be followed by Richmond, South Bend, Ft. Wayne and Indianapolis, while Terre Haute and Gary, in the order named, showed percentage losses.

When one stops to consider that the total record of estimated valuations given above covers only eight cities in Indiana where complete building records are tabulated by city building inspection departments, and that there is a large area where such figures are not available in Indiana, such as small towns and rural districts where residences, factories, store and lodge buildings and modern consolidated township schools are built, it is reasonable to approximate an additional 20% of building to add to the above total which would mean that Indiana in 1922 did close to \$70,000,000 worth of new building construction work in the year just past.

The records show these building performances by the individual cities, covering the years of 1922 and 1921.

	—1922— Est. Valuation	—1921— Est. Valuation
Indianapolis	\$26,110,607	\$18,328,905
South Bend	10,095,610	4,149,122
Ft. Wayne	9,630,049	4,799,756
Evansville	3,069,734	1,303,367
Gary	3,001,308	3,181,852
Hammond	2,704,525	1,942,135
Terre Haute	2,201,314	2,214,128
Richmond	762,266	379,758
Total	\$57,575,413	\$36,299,023

Sealed Proposal

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

**LODGE BUILDING.
NOTICE TO CONTRACTORS.**

Notice is hereby given that on the 24th day of January, 1923, at the Masonic Temple at Angola, Indiana, the Trustees of Angola Lodge No. 236 F. and A. M. will receive sealed proposals for the furnishing of all labor and material for the construction of a three story and basement, Commercial and Masonic Temple Building on the Owners' premises at Angola, Indiana, in accordance with the plans and specifications

on file in the office of said Trustees and Guy Mahurin, Architect, Fort Wayne, Indiana.

The above proposals will be for the general contract only, and will not include the heating, plumbing and electric wiring contracts.

Bids will be received up until 2 p. m. and must be filed on forms furnished by the architect, addressed to Angola Lodge No. 236 F. and A. M. % Alphonso C. Wood, trustee, Angola, Ind., and shall be accompanied by a certified check equal to two (2%) per cent of the bids submitted, and made payable to Angola Lodge No. 236 F. and A. M. Said check to be submitted and held as a guarantee that if his bid is accepted, the bidder will enter into a proper contract for the construction of the work for which the bid was submitted within three (3) days after awarding of contract to said bidder.

The trustees reserve the right to reject any or all bids and to award the contract to the lowest and best bidder as may appear to the best interest of the owners.

Plans and specifications will be furnished by the architect upon receipt of a deposit of twenty-five (\$25.00) dollars for the exclusive use of the contractor until the time of letting. A refund of twenty (\$20.00) dollars will be given upon the return of the plans and specifications to the architect's office.

ALPHONSO C. WOOD, Trustee,
Angola, Ind.

GUY MAHURIN, Architect,
Fort Wayne, Ind.

Jan. 6-13.

**NOTICE TO CONTRACTORS
HOTEL BUILDING**

Notice is hereby given that the Paris Building Corporation will receive bids up until 2 p. m. on Tuesday, February 6, at the rooms of the Chamber of Commerce, at Paris, Illinois, for the erection and completion of Hotel Building to be built at Paris, Illinois.

Copies of the plans and specifications may be obtained by bidders upon application at the office of Johnson, Miller & Miller, Architects, No. 30 North Fifth Street, Terre Haute, Indiana.

Bidders will be required to make a deposit of \$10 with the Architects for each set of plans and specifications taken out of the office. This deposit will be returned to the bidders when the plans and specifications are returned to the Architects in good condition. If any prospective bidder fails to turn in a bid after taking out a set of plans, the Architects shall have the right to reserve out of the deposit sufficient amount to cover the cost of the blue prints.

All bids are to be made out on uniform bid blanks which will be furnished by the Architects. All bids to be considered must be accompanied by approved surety bond for not less than 10% of their bid, guaranteeing that the contract will be accepted and bond furnished by the party to whom the contract is awarded.

The owners reserve the right to reject any or all bids.

Dated this eighth day of January, Nineteen Hundred Twenty-three.

HIGGIN ALL METAL SCREENS

The frames are made of galvanized steel, enameled both inside and outside in any color desired.

They are only 7/16 inch thick and 1 1/8 inches wide, or about half the width and thickness of wood frames.

Owing to the durability of the frames, we use only non-rusting wire cloth woven from commercial bronze wire.

HIGGIN SCREEN DOORS

The screen doors reflect more clearly, perhaps, than any other one thing the quality of a screen installation. Higgin Doors are built to order. In width of rails, finish, and kind of wood used, they match the corresponding house doors.

Let us furnish without cost or obligation estimates of cost.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

STATE ARCHITECTS IN SESSION AT INDIANAPOLIS.

Today was architect's day at Indianapolis. They were scheduled to arrive from practically every section of Indiana, according to responses received throughout the past week at I. S. A. headquarters and a good representative crowd of the profession was expected to be on hand.

The occasion for this professional turn out was the semi-annual meeting of the Indiana Society of Architects, one of the really important gatherings of the year for the members of the architectural profession of the state, at which they are afforded the opportunity to get together in a body to discuss their problems both from a profession practice and business angle.

As a courtesy to the visiting architects, the members of the Indianapolis Architect's Association postponed their regular monthly meeting from January 10 to January 13, and were to meet with the Indiana Society in joint session.

As outlined, the program for the day was to be as follows:

Registration, Lincoln Hotel, 10 a. m. to 12:30 p. m.

Noon luncheon, Lincoln Hotel, 12:30 p. m.

Business meeting to follow luncheon.

Visit to John Herron Art Institute, 3 p. m., to view Annual Architectural Exhibit of Indiana architects.

Auto drives about the city, late afternoon, to points of interest if weather conditions were agreeable.

As a finale to the day's activity there is to be a 7:30 p. m. dinner and entertainment in the Travertine Room at the Lincoln Hotel for the architects and their friends.

Special stress was put upon the evening's affair, and while no advance notices, as to details, were advanced by Chairman Donald Graham and his committee, they did promise a good time for all those attending.

ARCHITECTURE AS AN ART.

Says H. Van Buren Magonigle, F. A. I. A., in the January issue of *The American Architect*: "It is well to have a hobby or two tied at one's door so that, when asked for a few words of review or prophecy or warning, one may vault easily into the saddle. The steed I choose for the present occasion is Architecture as an Art—not as a Business, not as a Science, not as a Theory of Life—as an art.

Thus mounted and lightly caracoling, I seem to see that the profession in this country has been drifting unconsciously away from the broad highway and bewildering and bemusing itself in excursions into the wilds and morasses of Business Getting and Efficiency, of the Routing of a Check or a product through Bank or Factory, of Emulation of the Business Man without his Training or Mental Habit, of Socialism and its Wriggling Brood, of all those things about which the men who built when Architecture was an Art never bothered their blessed heads, and whose products the Efficient Architect of the present day feverishly cribs because—is it Business, Scientific Management, and Social Problems take up so much of his time that there is none left for Design?

Should the Businesslike and Efficient Person the architect is so fast becoming, pause for breath and do as real Merchants do—Take Account of Stock, and see whether the dusty shelf from which Art has almost disappeared would better balance the other merchandise if put to use again?

A. I. A. BEATS SOCIETY TO LONG PROPOSED IDEA.

Have you noticed the lapel buttons some of the Indiana architects are wearing these days? Quite neat, eh?

What we meant to say was that the American Institute of Architects has recently gotten out quite an attractive coat lapel button, in gold and blue enamel for members. Several of the Indiana architects have secured the new insignia of the A. I. A. and are making good use of them.

STRONG FOR A LARGER ORGANIZATION.

Architect George W. Allen, chairman of the Membership Committee of the Society, writes in that one of the resolutions that he has made for the new year is to use his best efforts to add new members to the organization during 1923. Not bad, eh?

Some architects seem to entertain the idea that it is the purpose of the Society to dictate to the members of the profession how they should conduct their individual businesses. Only those who are members can appreciate the fallacy of this conception. The thing to do is to break down this misconception and convince every architect in Indiana that the sole purpose of the Society is to advance the profession as a whole, not one architect or a selected group.

The inspiration of Mr. Allen is most laudable. Why not every member resolve to aid him in the good work?

PREPARED TO ASSIST ON MECHANICAL PROBLEMS.

Announcement has just been made to the effect that W. A. Breining and H. C. Carroll, associated consulting engineers, 511 Traction Terminal Building, are now in a position to assist Indiana architects with their heating, ventilating, plumbing, electrical and power plant problems and layouts.

Mr. Breining, graduate of Illinois University, '14, specializes in design of mechanical equipment for various types of buildings.

His associate, Mr. Carroll, Cornell University, '03, has had nineteen years of power plant designing and operation.

Architect A. J. Capella, formerly of Evansville, Ind., has removed to Indianapolis, where he is now connected with the architectural firm of Herbert Foltz.

Architect Gilbert Karges, Evansville, has been on the sick list this week.

LAST MONTH'S BUILDING FIGURES SENT YEAR'S RECORD SOARING

When December kicked into the building permit columns, toting in over a million dollar estimated valuation for the construction work for which permits were granted during the month a grand finale to Evansville's building effort for 1922 was written into the city records. The December figures alone soared up not far from the whole total for the preceding eleven months, and then, again almost equaled the entire record for 1921, and also the total for 1920.

It was as the biblical saying goes, "the first shall be last and the last shall be first," for, January, 1922, was the lowest building month of the year, and December was the highest.

The other months' totals, composed mostly of residence and smaller types of construction, in the aggregate, piled up a sum amounting to \$1,961,824, to which December added \$1,107,910, making a total of \$3,069,734 for the year. This is a gain of 135.6% over the 1921 volume of business.

The monthly records for the two years are:

	1922	1921
Jan. -----	\$ 85,432	\$ 23,780
Feb. -----	98,058	28,005
Mar. -----	231,690	58,869
Apr. -----	230,889	43,941
May -----	276,690	281,205
June -----	243,375	80,163
July -----	155,040	193,132
Aug. -----	169,540	168,460
Sept. -----	111,704	116,730
Oct. -----	246,506	106,725
Nov. -----	112,900	90,580
Dec. -----	1,107,910	111,777
Total -----	\$3,069,734	\$1,303,367

CHIPS AND SHAVINGS

Things are booming over at the site of the new half million dollar Benjamin Bosse High School, where all footings have been placed and the concrete basement walls are now being poured. Preparations have been made to have

enough material on the grounds at all times to keep this project moving along through the winter so that, when spring arrives, the work can be rushed right through to completion.

As for the big Donaldson Arms Apartments, the contractors have the structure up to the second floor. According to the schedule mapped out it is hoped to have this project ready for occupancy about April 1st.

General contractor John Wilkins is starting a new \$12,000 home for Phillip Raphael at School and Taylor aves.

Anderson and Veatch, contractors, are now surveying Lincolnshire, the new restricted residence subdivision they will develop in the spring. Parkways, with boulevard features are planned throughout the section.

Bids for the city hall addition are to be received by the Board of Works January 29. Sort of a season opener, as it were. Local competition on this job is expected to be quite keen.

NEARLY TEN MILLION DOLLARS WORTH OF NEW BUILDING CONSTRUCTION IN 1922.

Now that 1922 has passed on into history, and the books for that period have been closed, not the least of the interesting accomplishments of Ft. Wayne for the past year was her building construction achievement. Never before in the history of the city, within one year, was such a large building program ever put into effect. Getting away to a mediocre start, during January and February, building construction operations began in March to really speed up when the records at the city building inspection department show that permits were granted for the erection of over half a million dollars worth of work. The next three months, April, May and June, saw the volume of business mount steadily until almost a million dollar monthly total estimated valuation on new projects was recorded in June. July activity slacked up to some extent and then in August there was a new outbreak that reached to over one and three-fifths of a million dollars. September went even

better, recording permits that totaled \$1,774,930, the best month of the year. On into and clear down through October extended the activity, rolling up a monthly total of \$1,383,445. Things slowed up in November, and more so in December, when the estimated investment in new buildings sank below the half million dollar mark, the first time such a thing had occurred in ten consecutive months.

Three individual monthly totals overtopped the highest monthly total hung up during 1921, and ten of the months showed individual gains over the corresponding periods of the previous year.

The grand total of the estimated valuation for new building construction in Ft. Wayne, in 1922 amounted to \$9,630,049, as against \$4,799,756 posted in 1921, a gain of 100.63%.

As shown by the records at the city hall the monthly building activity for the year of 1922 and that of 1921 is:

	1922.	1921.
Month. Est. Val.	Est. Val.	Est. Val.
Jan. -----	\$ 136,660	\$ 93,325
Feb. -----	191,035	208,600
Mar. -----	575,095	370,345
Apr. -----	582,335	275,802
May -----	702,485	420,978
June -----	903,455	308,735
July -----	715,735	355,628
Aug. -----	1,634,574	570,105
Sept. -----	1,774,930	327,343
Oct. -----	1,383,445	410,765
Nov. -----	600,300	1,178,760
Dec. -----	430,000	279,370
Total -----	\$9,630,049	\$4,799,756

TAKES THIRD PLACE IN STATE'S 1922 BUILDING RACE

A temporary let down in Ft. Wayne's new building activities during the month of December cost her the goal for which she had struggled throughout the year, that of runner up position in the great building construction race in Indiana.

It was a pregone conclusion that Indianapolis would out-rank all other Indiana cities in the volume of new building construction for the twelve months, and interest centered in placing of the other cities at the finish of the year. Place and show positions, it devolved after a few months, would go to either South Bend or Ft. Wayne. These two cities traveled along neck and neck with Ft. Wayne leading December 1st. Slowly but surely South Bend crept up on her and flashed across at the finish into second place with \$465,561, almost half a million dollars to spare.

The final check up shows:

South Bend ----- \$10,095,610
Ft. Wayne ----- 9,630,049

While losing to South Bend, Ft. Wayne was over \$6,000,000 ahead of her nearest competitor, Evansville.

WHAT THE MONTHLY BUILDING FIGURES AT INDIANAPOLIS SHOW.

A resume of the building figures turned in month by month at Indianapolis the past year shows that the best month in 1922 was May, then came July, both of which rolled up totals of over \$3,000,000 for building operations. April took third place, November, fourth; October, fifth; June, sixth; August, seventh; March, eighth; September, ninth; December, tenth; February, eleventh; January, twelfth.

The monthly record is:

	Est. Val. 1922	Est. Val. 1921
January	\$ 580,706	\$1,025,529
February	1,170,398	617,834
March	2,065,051	2,336,964
April	2,566,389	1,527,747
May	3,420,847	1,550,601
June	2,289,941	2,499,275
July	3,349,348	1,401,115
August	2,074,941	1,235,260
September	1,928,956	1,456,725
October	2,431,513	1,743,532
November	2,503,014	1,071,319
December	1,729,503	1,863,104
Total	\$26,110,607	\$18,329,005

LULL ON JUST NOW.

Just at present things are quiet around the local contractors' association headquarters. It is sort of a lull after the battle period and the builders are

taking time to get their breath after the big building task that was put up to them throughout the past year.

Never before in the history of the city were the building contractors ever called upon to meet such a demand as was put upon their working organizations and it was only by dint of constant effort that they were able to carry out their duty to the city.

Not the least of the contributing causes to Indianapolis' great building performance for 1922 was the effort put forth by the contractors to aid in making conditions as agreeable as possible by effecting working agreements with the building trades labor unions that caused satisfaction both to employer and employe, resulting in no strike difficulties, tie-ups or other misunderstandings to cause loss of time in the carrying out of building construction operations.

ELECTION RESULT.

When the votes were counted, after the annual election of officers of the Indianapolis Building Contractors' Association, Monday, January 8th, the official tabulation, according to tellers Charles Sedam and W. H. Cramer, showed these candidates elected.

President.....Fred W. Jungclaus
1st Vice President.....Robert Berner
2nd Vice President.....Wm. Carper
3rd Vice President.....Walter W. Wise
4th Vice President.....Robert Poehner
Treasurer.....O. A. Porter

A. B. C.'S BUSY AT THE STATE HOUSE.

Now that the State Legislature is in session it is interesting to know that the Associated Building Contractors of Indiana are right on the job to look after the state building contractors' interests and those of the general building construction industry as well.

Registration of lobbyists at the state house is going on right along and the latest information from that source reveals the fact that the A. B. C.'s of Indiana have registered the largest lobby so far recorded.

Those who have this matter in charge are composed of the Executive Committee of the State Assn., the officers, as provided by the constitution, and a special committee, 12 in all. They are:

F. W. Jungclaus.....Indianapolis, Ind.
C. C. Pierson.....Indianapolis, Ind.
W. W. Wise.....Indianapolis, Ind.
T. B. Hatfield.....Indianapolis, Ind.
Harry A. Fenton.....Indianapolis, Ind.
J. H. Owens.....Indianapolis, Ind.

Residence: (double). 1249-51 No. Jefferson. \$6,600. Earl Barnett, 1831 Gross Drive, Woodruff Place.

FINDING A LEVEL.

The national building labor situation is stabilizing, reports from sixty representative cities indicate. The runaway labor market that started to sky-rocket wages to unheard of heights in some trades has largely calmed down, due to the passing of the peak of building activity. In a few places inordinate labor costs prevail in the finishing trades but this condition is very temporary now.

A few widely scattered places report a temporary surplus of some mechanics but as yet all available skilled workmen are finding employment without difficulty. The outlook for next year's construction work is not bright from the labor supply viewpoint in regard to plasterers and bricklayers. All indications for another heavy building year are in sight and the probability is that much winter construction will be tried.—American Builder.

Monday evening.
Master plumbers every Thursday evening.**WHY STALL AROUND?**

Information that comes drifting in indicates that 1923, in all probability, will even outdo 1922 in the matter of building operations. Now, in order to take advantage of the promised opportunity, the contractors should exert every effort to effect satisfactory conditions under which to conduct their business. To that end they should see to it that their individual local city associations are in good working order and in shape to meet any and every demand that may be made upon them. The time to do this very thing is now, before the rush season arrives. It will require the united effort of the entire membership to shape such a course and then steer it.

One of the most important features to be taken care of pertains to working agreements which should be taken up and threshed out with the various crafts at the earliest possible moment so that the contractor, when it comes to estimating, can know with an assured degree of certainty just what labor costs will be, and not be called upon later to meet a wage raise after his bids on various projects have been submitted or the work started. A good mechanic sees to it that his tools are in proper condition before he starts to work, and the contractor should likewise see to it that his future working conditions are in a state that will enable him to progress with his building operations as rapidly as possible.

Somehow, contractors are prone to procrastinate in the matter of wage and working agreement settlements, yet, if they wait around until things pick up and everybody is busy the proper time and attention can not be given to this feature of the contractors' problems. It will not be many weeks until work will be bobbing up that will extend well into the new approaching building season, therefore, would it not be a good idea to get the slate clean and be fully prepared, as far as it is humanly possible, for the big building business that is lying out there in the offing.

TRYING TO LINE UP THE WHOLE CROWD

The Building Trades Council, Chicago, reorganized under the control of the unions that stood by the Landis Award, is trying to induce the outlaw building trades mechanics' unions to come into the fold and go along under the Landis Award conditions. The much talked of

award has till May, 31st, to run, and there is a great deal of speculation being made as to what will happen in building trades circles when the time limit on the judge's ruling expires.

SEEKING ANOTHER WAY AROUND

Quite a few of the Calumet contractors who have work under way have balked at the high cost and delay in plastering work and are contemplating using sheet rock in place of plaster. The application of the material under contemplation is much quicker and then, too, one don't have to wait around while it dries—so the interior trim can be installed.

NEVER NO REST

And now, to add to our troubles, the Legislature has gone into session. That crowd will have to be watched, too.

To the man on the sidelines it appears as if the state law making body could do a great deal of good and the members earn their money if some of the dead letter laws were repealed and some good comprehensive ones substituted. What is needed most are statutes that don't require all the judges and lawyers in Indiana in order to get a plain common sense interpretation.

NO "BARKER" NEEDED

Once, somewhere, we read that for quick crowd collecting Russia could not be beat. If that is so, America is running her a close second.

Let an accident happen, an argument start, a fakir come along, and immediately most any American street corner will be thronged by the curious. Even men working will draw the attention of the passer-by. The contractors on a new hotel building up this way, the other day, put a steam shovel to work gouging out the ground for the sub-structure and now it seems to be a favorite passtime with the citizens to collect and watch this steel monster chew away at its earthly meal.

LABOR PROGRAM.

The executive officers of the American Federation of Labor recently drafted the following program, which will be presented to the various State Legislatures this winter:

1. Enactment in other States of Workmen's Compensation Law similar to the Ohio State Fund Law.
2. Repeal of state constabulary laws.
3. Minimum wage laws for women in every state.
4. Repeal of industrial court laws.
5. Limitation, restriction or prohibition of issuance of injunctions in labor disputes.
6. Old age pension laws.

7. Repeal of all local or state laws restricting picketing.

8. Repeal of recently enacted laws making voluntary associations suable.

9. Compulsory unemployment insurance.

10. Specific legislation to protect against governmental intervention in the so-called "right to strike."

11. Setting aside powers of the judiciary, both Federal and State, to declare acts of legislature unconstitutional and giving legislators power to override judicial decisions.—Bulletin, N. B. T. E. Association.

ANDERSON CONTRACTORS ELECT OFFICERS.

Word from Anderson this week is to the effect that the Associated Building Contractors of that city at their annual election named these men to executive positions.

President A. J. Skeoch
Vice President Ben Wright
Secretary Blythe Johnson
Treasurer Harry Thomas
Director for three years, John Longacre

WE GIVE IT UP.

How is it that so many contractors are content to sit tight and let some one else do their thinking and fighting? Self-respect and a disposition to do what is right for themselves and their industry one would think would prompt them to step in and assume their just share of the responsibilities that they owe each other.—Monthly Bulletin, Bldg. Constn. Employers' Assn., Chicago.

DEMAND UNIVERSAL.

According to a recent issue of the Washington, D. C. Herald, after a survey of conditions in the building industry, apartments, hotels and office buildings are still very much in demand. Out of fifty principal cities reporting on their immediate building needs, forty express a strong demand for homes, twenty eight for apartment buildings, twenty-seven lack requisite hotels, twenty-two are cramped for office space, twenty need more warehouse facilities and eighteen demand additional industrial structures.—Monthly Bulletin, Building Construction Employers' Association, Chicago.

NATIONAL JURISDICTIONAL AWARDS BOARD MEETING POSTPONED TO FEBRUARY.

The next meeting of the National Board for Jurisdictional Awards which was tentatively set for January 22nd, has been deferred until February 5 or 12 next at Washington, D. C. It is probable that the metal trim controversy will again be taken up at this meeting and should this be so every contractor interested in the subject should see that his organization is properly represented at the re-hearing.

There are many other subjects of equal importance to contractors which will be reviewed by the board.

the Act of March 3, 1879.

NOW FOR THE CONVENTION OF STATE CONTRACTORS.

Everything is in readiness for the big event of the year in Indiana building contracting circles, the annual convention of the Associated Building Contractors of Indiana, scheduled for next week at Michigan City, January 23, 24 and 25.

This affair will be the fifth of its kind held by the State contractors and the first in northern Indiana, where the builders of that section have worked up a keen interest. Word from convention headquarters is that the contracting interests of the northern Indiana cities will be heavily represented and it is hoped the rest of the State will respond in kind.

The Michigan City contractors, backed by the local Chamber of Commerce, have spent weeks in preparation for handling the convention and have left no stone unturned to make this affair the best ever held by the State Association, notwithstanding the efforts that were put forth by Indianapolis and Evansville in previous years when those cities played host to the contractor delegates who gathered for their annual convention.

A real business program of a constructive nature has been arranged for the three day's period with sessions daily and a dinner to be given Wednesday evening, January 24th, by the Builders and Manufacturers Mutual Casualty Company of Chicago, at which all delegates will be guests. In addition there will be a smoker and entertainment Tuesday night for the convention guests, this affair to be sponsored by the Michigan City contractors. Then, too, there will be side trips about the city and surrounding territory to points of interest.

The convention and banquet will be held, and headquarters maintained, at the Spaulding Hotel, Michigan City's

new half-million dollar hotel. This will be the initial convention dedication for the new structure, the honor having been delegated to the contractors.

AT LEAST MAKING AN EFFORT IN THE RIGHT DIRECTION.

E. E. COLE, Secy.

Calumet Bldg. Trades Employers' Assn.,
Hammond.

The contractors' association of Michigan may be young, but it seems to be a sturdy little fellow, ready to walk in no toddling way, and with a power to think and act in the right direction. The association seems to have heard the call and to have seen the light with the result that it has pitched right in in an endeavor to meet the need of the hour.

All of which means that the Michigan contractors under the auspices of the association has organized a building trades school at Grand Rapids that is prepared to turn out one hundred and fifty good brick-layers every six months. Think what that is going to mean to the building industry of the State of Michigan? The selection of applicants for training is very carefully gone into, the preference is given to young married men of good habits.

It shows that the Michigan contractors are aware of the seriousness of the situation and are determined to do their part to ease things up. There is just one thing about it, the contractors must interest themselves in this matter and take steps to increase the building trades mechanics forces, especially the brick-layers and plasterers, or future building operations, and those that depend on them, are going to suffer seriously for a lack of men to handle the work. There don't seem to be much disposition on the part of the Unions to encourage apprentices to rehabilitate the ranks of the employes, instead, the Unions lean to the policy that a scarcity of men means high wages and that is what they are out for. However, the real seriousness of the existing conditions lies in the fact that eventually, ever-increasing wage scales are going to make construction costs so high that the man of ordinary means cannot afford to build, nor can he afford to buy newly constructed property. In the end it will mean stoppage of the ordinary lines of building construction, greater congestion in housing conditions, for people will be forced to double up in small quarters and then, too, man not being able to put a roof over his prospective family's head, will hold back from marrying.

Really, this lack of workmen problem

is a far reaching one and the sooner the contractors' associations go into it decidedly to work out a solution, the better it will be for them and the entire country. Here is a situation wherein the contractors, if they will, can not only work out their own salvation, but in doing so can be of inestimable service to their fellow citizens and the entire country. The question is, are the contractors willing by dint of sacrifice and effort willing to assume their real obligation to their country? Michigan contractors have answered this question in the affirmative. How many others in other parts of the country are willing to do likewise?

CONVENTION ACTIVITIES OF IN- DIANA BUILDING INTERESTS IN FULL BLAST.

Indiana building interests, the past week, made Indianapolis their Mecca, and swarmed into the capital city in large numbers to gather in annual conventions to discuss the outlook, business problems and policies to be followed the coming year.

The architects of the state started the ball rolling Saturday, January 13, with the calling to order of the semi-annual meeting of their state organization.

Next in order came the members of the Indiana Builders' Supply Association, who, to the number of several hundreds, met at the Claypool Hotel, January 15 and 16. In connection with this event the manufacturers of building materials and their representatives put on quite an extensive exhibit of various materials necessary to building construction operations.

With the exodus of the material supply men the Indiana Retail Lumber Dealers' Association cohorts, mustering some 400, put in their appearance for a two days' session, also at the Claypool, winding up their meeting with an elaborate banquet Thursday night.

Last, but not least, the Indiana Engineering Society, met Thursday and Friday, January 18 and 19, at the Lincoln Hotel. The engineers in addition to the business meetings, made a journey, in a body, to the new hydro-electric power plant at Noblesville, Ind., there to inspect this new project. A dinner dance Friday evening marked the wind-up of the engineers' gathering.

Next week will see the finish of the convention activities of the Indiana construction interests when the Associated Building Contractors of Indiana bring their three-day convention at Michigan City to a close.

Rushville: \$10,180. Phil Wilk, Auditor. Bids to close Feb. 5th at 2:00 p. m.

Salem: Road, \$27,105.80. Eli E. Batt, Auditor. Bids to close Feb. 5th at 2:00 p. m.

Sealed Propossal

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

NOTICE TO CONTRACTORS HOTEL BUILDING

Notice is hereby given that the Paris Building Corporation will receive bids up until 2 p. m. on Tuesday, February

13, at the rooms of the Chamber of Commerce, at Paris, Illinois, for the erection and completion of Hotel Building to be built at Paris, Illinois.

Copies of the plans and specifications may be obtained by bidders upon application at the office of Johnson, Miller & Miller, Architects, No. 30 North Fifth Street, Terre Haute, Indiana.

Bidders will be required to make a deposit of \$10 with the Architects for each set of plans and specifications taken out of the office. This deposit will be returned to the bidders when the plans and specifications are returned to the Architects in good condition. If any prospective bidder fails to turn in a bid after taking out a set of plans, the Architects shall have the right to reserve out of the deposit sufficient amount to cover the cost of the blue prints.

All bids are to be made out on uniform bid blanks which will be furnished by the Architects. All bids to be considered must be accompanied by approved surety bond for not less than 10% of their bid, guaranteeing that the contract will be accepted and bond furnished by the party to whom the contract is awarded.

The owners reserve the right to reject any or all bids.

Dated this eighth day of January, Nineteen Hundred Twenty-three.

MEETING NIGHTS

General meeting every third Tuesday evening.
General contractors meet second and fourth
Monday evening.
Master plumbers every Thursday evening.

REVERSE ENGLISH.

Bankers, lawyers and doctors, men of education and attainment, are not in it any more. A lather of whom we have knowledge, working in Chicago, is pulling down \$14.00 per day, with double time for Saturday afternoons and Sunday. He has been working right along, seven days a week, which effort nets him \$120.00 per week.

Who said anything about the poor down-trodden workman? The speaker is out of order. "Them days is gone forever."

MARK IT DOWN!
"GOING TO MICHIGAN CITY"
JANUARY 23, 24, 25
THAT'S
THE TIME FOR
THE
STATE CONTRACTORS MEET

ABSORBING INSPIRATION.

Chicago has had more or less attraction for the B. T. E. A., secretary the past two weeks. The other day he ran over to the Big City to get a slant at the building situation and outlook. While there he dropped in at the B. & M. headquarters, also at the offices of the A. B. C., of Illinois to find everybody busy and most optimistic as to the future. Then again on Wednesday, January 17th, he slipped over there again to attend the Builders & Manufacturers Mutual Casualty Co.'s annual banquet to Illinois builders. This affair was held at the Congress Hotel and was what Ring Lardner would laughingly dub stupendous, as one might say.

HIST!

The ripple of the babbling brook contains little music as compared with the hum or rumors that are filtering through the air in the Calumet District to play upon the contractors' ears. There is every indication that building will be active in this district almost from the first thaw. Many plans are now being prepared by the architects and should

begin to make their appearance for estimates along about February 15th, or the first of March. In addition to the regular types of building construction that go to make up a city's yearly building program there are many of the industrial plants in the Calumet section that will be enlarged and remodeled.

SOMEONE ALWAYS TAKING THE JOY OUT OF LIFE.

Things look pretty good over around where the new Ford plant is to be erected. They have a large force of men working as the steam shovels gouge out the big mouthfuls of earth and the teams and trucks cart it away. Some of us who journeyed over to the new industrial center thought there was a good future for the surrounding real estate and had about made up our minds to invest in some lots. That was as far as we got, the thought. When a most gracious salesman had elucidated upon the great advantages of his holdings, and got us all worked up, he played a scurvy trick on us by quoting his selling prices. Now we know just about how Jess Willard and Georges Carpentier felt when Jack Dempsey leaned his mit against them. Our contemplations and anticipations were smashed to smithereens. It dawned upon us that the inflation of values had beaten us to the site and that, instead of a lot, our much cherished deposits in the bank would just about purchase a post hole. Ho, hum! Now we "gotta" go back satisfied with the idea that our land holding conception was ill timed.

CALUMET BUILDING PROGRESS.

Charles Rhoades, he of home building fame, who has so often threatened to quit, has taken another breath, also a new partner in the person of a Mr. Graves, and has opened offices in quarters adjoining the B. T. E.'s A. where he will be always ready to talk shop to those desiring to build new homes, be the latter great or small.

Kelly Bros. are contemplating the erection of a garage and show room on S. Hohman St., the structure to be 1 sty. high with dimensions of 40x145 feet. It is estimated to cost \$15,000. Architect Mac Turner, who prepared the plans, is now receiving bids on the work.

AN ELEMENT TO CONSIDER.

How many contractors really consider the cost of their labor turnover. It may not be so great in the smaller cities as in the larger municipalities where the floater element is real and one that does count in building construction costs. However, even in the small cities, it must be reckoned with, and the follow-

ing article from the Bulletin of the Associated Building Contractors of Michigan, is worthy of thought from all contractors:

One of the large furniture factories in Grand Rapids in the period immediately following the war employed one thousand men. Fifteen per cent of these men left their jobs and another fifteen per cent was hired during each month, making a labor turnover of fifteen per cent.

The Employment Department estimated that the cost of this labor turnover was about \$30.00 per man, that is, it cost \$30.00 to take on a man and train him so that he could do the work of the man who had just left, making on this basis a cost of approximately \$50,000.00 per year.

The Employment Department was able to reduce this turnover, by changing the methods of handling the employees, to less than 5 per cent, saving this concern thirty to thirty-five thousand dollars a year.

Nobody knows what labor turnover costs in the building field. Men are going and coming most of the time and as one contractor expressed it, he has three crews, one coming, one going, and one on the job.

A large operator in Detroit, who keeps a record of labor turnover, estimated that on a contract they had just completed, the total turnover had been about 500 per cent.

This is an element of expense, and the contractor should study his job so as to employ the men as nearly continuously as possible. This would cut down the cost of the building and ultimately reduce the cost of all building.

If labor turnover costs money in a furniture factory it costs money in the building field. Study it and eliminate this part of the overhead as much as possible.

INDIANA BUILDERS!
MICHIGAN CITY EXPECTS YOU
JANUARY 23, 24, 25.
STATE A. B. C.'s CONVENTION
CONTRACTORS!

WINTER BUILDING.

One of the largest General Contractors in the East suggests that a good way to encourage early spring construction would be for the material dealers to make a discount on brick and other building materials purchased in January, February and March. They say that the Paint and Varnish Manufacturers have been doing this for years and find that it stimulates their sales considerably during these months. The department stores recognize the fact that low prices stimulates buying in off seasons, so why not have the material dealers try it for a period. A continuous building season the year around is what is needed just now considering the difficulty of obtaining both materials and skilled mechanics in the few months usually called the building season. (From Bulletin, Building Construction Employers' Association, Chicago.)

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

HIGGIN ALL METAL SCREENS

The frames are made of galvanized steel, enameled both inside and outside in any color desired.

They are only 7/16 inch thick and 1 1/8 inches wide, or about half the width and thickness of wood frames.

Owing to the durability of the frames, we use only non-rusting wire cloth woven from commercial bronze wire.

HIGGIN SCREEN DOORS

The screen doors reflect more clearly, perhaps, than any other one thing the quality of a screen installation. Higgin Doors are built to order. In width of rails, finish, and kind of wood used, they match the corresponding house doors.

Let us furnish without cost or obligation estimates of cost.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

MID-WINTER MEETING OF STATE ARCHITECTS SHOWS HEALTHY EXPANSION OF I. S. A.

The semi-annual meeting of the Indiana Society of Architects, which took place at Indianapolis, Saturday, January 13, was well attended, developed much of interest to those of the profession, and showed that the morale of the organization has strengthened greatly. Then, too, the various discussions were spirited, hinged greatly upon current conditions and impressed with the idea that the architectural profession of Indiana is really alive to the vital things that not only affect the practice in the state but the whole building industry of Indiana. It was very apparent that the Society is using its best efforts to cooperate with the other building interests for the advancement of building construction conditions and the things that appertain to them.

President Mahurin, Ft. Wayne, in his address to the members very modestly disclaimed any credit, under his administration, for having increased the progressive spirit of the Society and yet there is no denying the fact that certain policies instituted by President Mahurin and his Board of Directors have, to a considerable degree, awakened a new interest in the Society, injected a more militant and wide awake spirit in the organization, and attracted to it the notice of the Public. This latter feature is to be found in the desirable publicity that the daily press has given to the Society concerning regional meetings that have been held during the past year from time to time. Also, the press has, upon several occasions, looked favorably upon certain stands taken by the architects in public matters and has not only treated such actions from a general news value but has considered them worthy of editorial comment. This latter is a real tribute to the new spirit of militancy, a

dignified one, that has seized upon the Indiana Society of Architects.

Despite President Mahurin's modesty, an outside observer can not but feel that his administration to date has carried the I. S. of A. forward.

A most pleasing noon luncheon hour at the Lincoln Hotel, where the architects gathered in the Lincoln Room, marked the preliminary opening of Saturday's mid-winter meeting, after which there was a short business session when the chairmen of the several committees made reports showing a healthy and steady growth.

Mr. George W. Allen, in his report, advanced the pleasing information that a number of new members had been taken in, and added that more intensive efforts were to be made along this line of endeavor.

When called upon, Architect A. F. Wickes, chairman of the Legislative Committee, announced that, while the matter of an Architects' License Law had been dropped for the immediate future, the architects had taken advantage of the Engineers' License Law and 119 had registered under the 1921 act, this being a greater proportion, according to the numbers of the profession than the registration of the engineers themselves. It was further developed that now, since an attempt is to be made in the State Legislature to have this law repealed, the engineers themselves are looking to the architects for aid to combat the attack and retain the act on the statute books.

The matter of regional meetings came up for discussion next and Warren Miller, Terre Haute, briefly outlined what had been done in this direction and the seeming success of the venture. These meetings, two of them, one at Ft. Wayne, the other at Terre Haute, Mr. Miller showed, had attracted architects who never before had attended an I. S. of A. meeting, or shown any interest in its affairs. In addition, he called attention

to the desirable publicity these meetings had afforded in that the local papers, both in Terre Haute and Ft. Wayne, had carried front page "stories" of the event which had created the impression among citizens that the Society was a real live, wide awake, dignified organization. After some discussion it was decided to continue these regional meetings and the next one is to be held in Evansville in May.

At this juncture adjournment was taken and the architects in a body went to the John Herron Art Institute to view the Annual Architectural Exhibit of Indiana Architects, which, while not as large as the 1921 exhibit, was most creditable.

In the evening the architects reassembled at the Lincoln Hotel for a 6:30 p. m. dinner, during which the entertainment committee, of which Donald Graham is chairman, furnished a lively musical and vaudeville diversion.

Those present at the meeting were: E. F. Miller, Anderson; L. L. Johnson, Attica; Alfred Grindle, Bloomington; Harry Griffin, Karl Henkel and W. E. Hanson, Connersville; Harry E. Boyle, Evansville; Guy Mahurin, Ft. Wayne; Paul Werking, Richmond; Ewing Miller, W. H. Miller and C. E. Scott, Terre Haute; J. W. Gaddis, Vincennes; and these Indianapolis architects: Layton Allen, Herbert L. Bass, Oscar D. Bohlen, A. C. Bohlen, F. S. Cannon, K. Coffin, Robert Frost Daggett, Stephen Dark, W. K. Eldridge, Herbert Foltz, W. H. Gans, Merritt Harrison, Norman Hill, George Hoagland, W. H. Mac Lucas, O. Mueller, W. B. Parker, Anton Scherrer, Herman Scherrer, Wilbur Shook, L. A. Turnock, Fred Wallick. Visitors: Leslie Colvin, E. C. Hervey, Durr Friedley, Dan Lutten, Dewitt C. Moore, Secv. of the State Registration Board of Engineers and Land Surveyors, all of Indianapolis.

NEW CITY BUILDING CODE PLACED BEFORE REPRESENTATIVE CITIZENS.

Building construction requirements in Evansville are to be brought more up to date to meet changed conditions since the old building code, now in use, was put into effect in 1911. City Building Inspector Edward Kerth, who has been working on a new city code for some months past has completed his task and made a first formal presentation of the result of his labors at a meeting of the Chamber of Commerce, Wednesday. Representatives of all the allied interests concerned with building, including President George L. Miller of the local A. B. C.'s, were present.

Explaining the need for a new city building code, Inspector Kerth went into details as to the whys and wherefores of the new building regulations he proposes to submit to the city council for adoption as a law.

A brief digest of the city building inspector's report shows that the code, in its most important aspects covers; the extension of the fire limits; the plan for elimination of open vaults; new building materials; the elimination of shingle

be free of open vaults to comply with the code.

The regulations of the National Association of Fire Underwriters pertaining to industrial, mercantile and other buildings will be written into the code. The requirements of this document are widely different from the provisions of the existing code.

GROWING STRONGER ALL THE TIME.

Home building interests in Evansville are shaping plans for even a more active year than they put in in 1922. Contractors intimate that early inquiries in Evansville are in greater proportion than ever before and that the prospective builders of homes are so earnest in their intent that they have even gone to the extent, at this time, of looking into the financial arrangements. The tone back of this early contemplation is most encouraging and local builders are of the opinion that unless there are great upsets, tending toward heavy increased building construction costs in the material supply and labor fields, there will be a big spurt of activity right from the jump at the opening of the building season. Anyway, there are grounds for hope.

GROUNDS FOR PRIDE.

A little retrospection, permissible at this time of the year, going back over various building statistics from Indiana in the past two years, tends to make more impressive the building construction activity in Ft. Wayne carried on through 1922.

Taking as a basis certain figures as set forth in the building permit returns from the eight Indiana cities that issue permits and keep definite building records, comparison of Ft. Wayne's 1922 figures with these others does not dim the lustre of her performance, rather, does it intensify it and give a better conception of the extent of the volume of construction work launched in the Allen county seat during the past year.

For instance, of the entire total turned

in by the eight Indiana cities in 1922, Ft. Wayne contributed 15.8% of the whole. On the other hand, her last year total estimated valuation on new building construction equals 29.5% of the entire state total for 1920.

Nor does her effort the past year suffer by comparison when stacked up against the figures rolled up by Indianapolis the two preceding years. In this connection one must not overlook the wide divergence that exists between the total population of the two individual cities.

Indianapolis, in 1921, issued building permits amounting to the sum of \$18,328,965, and in 1922 Ft. Wayne, with her \$9,095,610 total, reached 49%, or almost one-half of what was done in Indianapolis the year before. Also, her 1922 volume of business amounted to 59.5% of that of the Hoosier Capital City in 1920.

Thus it can readily be understood why Ft. Wayne contractors are proud of their home city's building effort for the year of 1922.

JUST A LITTLE DIFFERENT IN FT. WAYNE.

While other cities may be building new homes for rental purposes the same can hardly be said for Ft. Wayne. During the past year hundreds of homes have been built locally either by the prospective owner direct or by those who are solely in the selling game. Very few of these new residences are for rent.

Such a condition has proved beneficial to the city in that the owner takes an intimate interest in the improvement and beautification of his immediate environment, while the renter does not, for it is ownership that induces pride. To appreciate the extent of the new home owners in Ft. Wayne one has to but take a ride about the suburban residential districts and he will be impressed by the evident care that is being lavished on the new home sites, a feature that is making Ft. Wayne residence districts second to none in the state as far as beauty is concerned.

roofs; and the regulation of industrial, mercantile, public buildings and other structures in which large numbers of people work and gather.

He explained the proposed fire limit boundaries. The new boundaries will practically double the present fire limit area.

Since the building code now in effect was drawn up in 1911, there have been 2,000 new building materials placed on the market. The new code will cover each of these materials, he stated.

A plan to rid the city of open vaults in four years from the date the code becomes effective, has been worked out. The city will be divided into four zones, and each year another of the zones must

PLANNING FOR SPECIAL CAR TO A. B. C.'s CONVENTION.

Arrangements are being made at Indianapolis with the Monon Railroad for a special car to carry the local delegation to Michigan City for the convention. Any contractors from out over the state who may wish to join the Indianapolis crowd and go to the convention city on this special car are invited to do so.

As now scheduled, this car will leave Indianapolis at 4:30 p. m., Monday, January 22. The fare to Michigan City from Indianapolis is \$5.85.

BOARD MEETING TO BE HELD JUST PREVIOUS TO THE CONVENTION

Special notice has been sent out by President Fred Jungclauss of the Associated Building Contractors of Indiana that there will be a meeting of the A. B. C. Executive Board at 9:30 A. M., January 23, at the Spaulding Hotel, Michigan City, just previous to the annual convention. There are some important business matters to be taken up also final consideration of certain points pertaining to the big annual event.

"YA-AS, RAWTHA."

Geel! It's tough the way things break for some fellows.

For instance, there was that convention of the Associated Building Contractors of Illinois in Chicago this week and the banquet at the Congress Hotel put on for them Wednesday night by the Builders and Manufacturers Mutual Casualty Co., of Chicago.

Now for the tough break, Walter Wise,

the well-known mason contractor of Indianapolis is also a city councilman.

Of late the skies have looked rather snow-laden and the "city fathers" in order to guard against the city getting snowed under have had under consideration the purchasing of a snow plow. Then came the decision to look over and examine such an implement at Chicago, and the city council went on a junket to the "Windy City." Not only that, but they went January 16th.

All of which led up to a situation where Walter was in a position to join the other Indianapolis contractors at the Illinois convention and the B. & M. affair.

TAKE IN ILLINOIS CONTRACTORS' CONVENTION AND BANQUET.

Quite a few Indiana contractors journeyed to Chicago Wednesday to attend the annual convention of the Associated Building Contractors of Illinois, and the Builders and Manufacturers Mutual Casualty Co., at the Congress Hotel.

The speakers for the evening were Hon. Henry J. Allen, Governor of Kansas and Opie Reid.

The Indianapolis men who were among those present were: Fred W. Jungclauss, president of the Building Contractors of Indianapolis, also chief executive of the Associated Building Contractors of Indiana, C. C. Pierson, secretary of the aforementioned organization; Harry Fenton, counselor of the A. B. C.'s of Indiana, and Walter Wise, chairman of the state building law codification committee.

INCREASED HOME CONSTRUCTION COSTS DUE TO BETTER LIVING STANDARD DEMANDS.

The volume of increases in building permits issued throughout the country in 1922 did not increase in proportion to the value of the increases in buildings erected and planned, thus indicating a universal tendency toward larger and more costly types of structures. Builders recognize the changes which are taking place in the standard of living in this country and are erecting structures to meet the changing requirements of people generally.

These facts are revealed in an analysis of reports received by S. W. Straus and company, from all parts of the country in the preparation of their national building survey.

The closing days of December witnessed an augmented demand for building permits in many important cities, illustrating a tendency toward increased activities for the new year. In New York city permits for more than \$6,000,000 in tenement house construction in the Borough of Manhattan alone were filed during the final days of the month.

In 115 of the leading cities of the country, representing more than 50 per cent of the country's population, the total estimated value of building permits, issued and applied for in December, exceeded \$160,900,000, the survey of S. W. Straus and company shows.

Throughout December the ratio of construction for residential buildings was about 37% of all types of structures. Sixty-two cities reported gains for the year of \$2,000,000 or more. The total value of building permits issued in the United States for December was in ex-

cess of \$250,000,000 and for the entire year approximately \$3,828,000,000.

RETAIL LUMBER MEN LOOK TO THE FUTURE WITH HOPE.

Marketing products, methods of advertising and service in planning of homes were three of the chief subjects discussed at the convention of the Retail Lumber Dealers' Association of Indiana, which opened at the Claypool hotel, Indianapolis, January 17, and continued through January 18th, closing with the annual dinner Thursday night.

Reports of officers and trade discussions by several speakers marked the general sessions and a note of optimism over the outlook for business expansion this year was generally sounded.

Clayton D. H. Root, secretary, of Crown Point, said that the association has 387 members, a gain of eighteen for the year.

President Willis Dye, Kokomo, stressed upon the need for continued co-operation amongst business men and referred to the Rotary, Kiwanis, Lions and Optimists Clubs who seek to spread the belief that as men serve their communities best they serve their own interests.

The various phases of the retail lumber business not only as it concerns that industry, but as it pertains to building, and its encouragement, were gone into by many prominent speakers from different sections of the country.

at the Post Office at Indianapolis, Indiana, under
the Act of March 3, 1879.

PROPOSED STATE BUILDING LEG- ISLATION INTRODUCED INTO THE SENATE THIS WEEK.

The much discussed move, long fostered by the Associated Building Contractors of Indiana having for its purpose the establishment of standard building construction regulation requirements throughout the state, took definite tangible form the past week in the shape of a legislative measure known as Senate Bill 140, that was introduced in the State Senate, referred to committee and later reported out favorably.

The passage of this bill would mean the codification of all the existing building laws under one standard, making for more convenience than now exists. It would also standardize the building construction regulations and requirements in all cities and localities in the State providing set minimum safety factors upon which to calculate.

This action is the outgrowth of a proposition advocated several years ago by E. Hill Turnock, Elkhart, former president of the Indiana Society of Architects, who had in mind the establishment of a State Building Code. At the time it was realized that to prepare such a code would require much time and effort, but the idea was favorably accepted.

The Associated Building Contractors of Indiana took kindly to the proposition and set about to devise a ways and means whereby the end sought might be attained at the least possible expense to the State.

That there might be co-operation amongst the Indiana building interests in this matter the Associated Building Contractors went into the possible merits of the scheme with The Indiana Society of Architects, the Indiana Engineering Society, the Indianapolis Chapter, American Association of Engineers, and the State Building Trades Unions Officials.

Endorsement was received on all sides and a special committee from each of these organizations was appointed to act in conjunction in the formulation of legislation along the proposed lines.

Several months have been spent by these special committees in working out a plan of action with the result that their final proposition to codify all the state building construction laws into one with an Administrative Council consisting of the Industrial Board, the State Fire Marshall and the State Board of Health, has met with the approval of public officials since it will not call for a new board or commission nor additional expense to the State.

It is constructive effort such as this that makes association and organization invaluable not only to the individual members, but to the building industry as a whole.

FOOD FOR THOUGHT.

E. E. COLE, Secy.
Calumet Building Trades Employers'
Association.

The coming year we believe will be a promising one in the building industry, providing wages and material don't advance. Building costs today are about 20% higher than they were last spring, due to a slight increase in material and advance in wages of certain tradesmen.

In Chicago the plastering of a house costs about as much as the lot. Houses that cost approximately \$500 to plaster in 1917 costs today \$2200, an advance of \$1700 in five years in plastering alone. If all other trades were advanced in proportion, you can readily see about what the ordinary dwelling would cost to build. It would cost \$18,000 to \$20,000 for the most ordinary house. Will conditions like this warrant prosperity? The average cost of homes sold in localities like Hammond range from \$6,000 to \$7,000 and unless they are kept within these bounds there is absolutely no demand. Where there is no demand there is no business.

The Contractor, Sub-Contractor and Builder is largely to blame for these conditions. There are too many of them in sympathy with their tradesmen and not in sympathy enough with the public or the poor devil that pays for all these outlandish prices.

The Contractor, Sub-Contractor and Builder is to blame inasmuch as he does not plan far enough ahead. He plans only for one or two jobs at a time and takes chances of conditions warranting

the third job. Is there any reason under the sun why one line of tradesmen should be held at a premium? No, absolutely not. Just because of the fact that a man is a plasterer is no reason why he should demand twice as much wages as another tradesman whose work plays just as important a part in the construction of a building. You say you've got to pay the plasterer these high rates of wages because they are scarce. That is true, the higher rate of wages you pay them the scarcer they will be, for the more they make the less they work. The plasterer is not the only tradesman in the building line whose trade at present is at a premium. Bricklayers won't work in the winter time, for they have made enough excess wages during the summer months to tide them over the winter and yet they will cry they can work only nine months out of the year. If bricklayers are working for John Smith under an agreement for \$1.06½ per hour, don't by all means, make his labor a premium by offering him \$1.25; that extra 19 cents an hour at the rate of 1,000 brick for a day's work, adds considerably to the cost of the building. Somebody pays for this, either the contractor or the owner.

The Contractor and Sub-Contractor are partially to blame for these conditions for they allow them to exist. They encourage it in many cases to a certain extent and do not look into the future. It is high time to wake up and protect future contracting interests by encouraging apprenticeship. Start in the New Year by employing apprentices; if you can't use them steady, they can probably be placed from time to time.

BIG TURNOUT OF STATE CONTRACTORS AT ANNUAL A. B. C.'s CONVENTION.

A hurried trip to Michigan City the past week revealed a fine, enthusiastic convention of the Associated Building Contractors of Indiana in progress at the Spaulding Hotel. The deliberations of that gathering were still under way at the time the Recorder went to press, hence, the brevity of this mention of the annual meeting. A complete report will be made in next week's issue.

Suffice it at this time to say that delegations were present from every Indiana city contractor's association affiliated with the State Contractors' organization with also a sprinkling of individual contractors from the lesser sized cities.

Michigan City was showing "the boys" one fine time.

CALUMET DISTRICT

CONSISTING OF

HAMMOND INDIANA HARBOR
EAST CHICAGO WHITINGBuilding Trades Employers'
Association.

Member State A. B. C.'s

J. Wesley Reed President
E. E. Cole Secretary108 Citizens National Bank Bldg.,
Hammond, Indiana**MEETING NIGHTS**General meeting every third Tuesday evening.
General contractors meet second and fourth
Monday evening.
Master plumbers every Thursday evening.**READY TO BACK ENTERPRISING
EFFORT**

Hammond citizens have awakened to the fact that a live progressive Chamber of Commerce is essential to the growth and well being of a progressive community, and growing city. For several years the C. of C. has been dormant, but under the leadership of a few enterprising citizens a re-organization has been effected; a man has been employed as secretary, who has the reputation of a "Go Getter," and a drive is being started to bring the membership up to a thousand, with encouraging results. There is no question as to the need of a live, progressive general business association here, and ample room to be of great service to the community. There are large problems constantly arising in this rapidly growing district that only a live Chamber of Commerce can properly handle. They can count on co-operation from the B. T. E's., A.

**TALK ABOUT WESTERN LAND
BOOMS.**

Wonders never cease and progress is seldom halted for long. A few short years ago the Sand Dunes of northern Indiana were considered a worthless tract of sand hills and swamps. They were inhabited only by train robbers, car barn bandits, horse thieves, hermits, wolves and skunks. Now, that there is a move on foot for the State to purchase the tract for a park and breathing place for the people in the congested districts, a few "Large Hearted" men are willing to sacrifice their holdings in the tract for the good of the cause for the paltry sum of One Thousand Dollars per acre.

**THERE WITH BOTH FEET UNDER
THE TABLE**

Sixteen of the Calumet District Contractors motored up to Chicago on January 17, to attend the Builders and Manufacturers Mutual Casualty Co.'s big banquet to contractors at the Congress Hotel.

By the way, not one of the crowd lost his way this year.

To get back to the banquet, it sure was some affair. The officials of the company are right there when it comes to entertaining guests.

The growth of the company in the past few years has been most remarkable, and if the membership continues to increase in like ratio it won't be long before the Coliseum at Chicago will be required to accommodate the crowd.

RAN TRUE TO FORM

On the run over to Chicago Rhoads and Graves copped the speed prize. It's the roads and graves that usually cop all speed contests in the long run. N'cest pas?

MORE LIKE OLD TIMES

Oh, yes. We almost forgot. Our old friend Charles Morrow, the Muncie war horse, once such a familiar figure around contractors' conventions, staged a come back and was at the B. & M. banquet at Chicago wearing the bells as usual.

He says he is still on the look out for the fellow who got away with the refreshments at Indianapolis several years ago.

CALUMET BUILDINGG PROGRESS

Architect Mac Turner has plans in course of preparation for a store building on E. State St., for W. C. Paxton. It will be 1 sty. high, 50x150 ft., and will cost \$20,000.

Danner, Gohman & Meyers, who have the contract for a store building for L. E. Granger on E. State St., have started the excavation work. This job is estimated at \$10,000.

Rhoads & Graves this week started construction on two frame bungalows on Waltham St., to cost \$6,000 each, and five on Blaine Ave., at \$5,000 each. They are starting early to be ready for the spring business.

E. E. COLE.

J. A. Gallivan Secretary

314 Main Street

**STRIKES IN THE BUILDING
INDUSTRY**

The building industry, although second in importance in this country, has the honor, if it may be called such, of having had the greatest number of strikes during the past decade. During this period 26,000 strikes have been declared, 2,700 of which were in the building industry. The metal trades is a close second with 2,600. New York heads the list of strikes with 2,196 for the last six years, or an average of 366 a year.

The above figures present a strong argument for the association idea. The majority of these strikes were made possible by the fact that the building trades men have a powerful organization. In order to cut down the number of labor disturbances, it is, therefore,

necessary that the employers devote more time and attention to the building up of their organization, local, state and national.—(Bulletin Nat'l. Assn. Bldg. Trades Employers.)

CONSTRUCTION OF CONTRACTS

The law requires that contracts must receive a reasonable interpretation, according to the intention of the parties at the time of executing them, if that intention can be ascertained from the language of the contract. Where the language of a contract is contradictory, obscure or ambiguous, or where its meaning is doubtful, so that it is susceptible of two constructions, one of which makes it fair, customary, and such as prudent men would naturally execute, while the other makes it inequitable, unusual, or such as reasonable men would not be likely to enter into, the interpretation which makes a rational and probable agreement must be preferred. If one construction would make it unreasonable, while another would do justice to both parties, the latter would be adopted.—(Associated Builders of Chicago, Monthly Bulletin.)

A SUGGESTION

We would suggest to the coal industry and the railways that the best way of adjusting their continual strikes on account of wages and working conditions would be to administer to the disgruntled labor leaders a dose similar to that given the bolsheviks in the building trades in Chicago by the Citizens' Committee.

The miners of Williamson County said to the coal operators, "You can't operate these mines except by union labor." The Building Trades Council told the contractors' association in Chicago that the building industry could never be carried on with men working open shop and yet there were fourteen thousand open shop men employed last year on the various jobs who did not belong to any union and Chicago went through the greatest building boom in its history; all because the intolerable provisions heretofore existing in the working agreements were eliminated by the Landis Award.—(Monthly Bulletin of Associated Builders of Chicago.)

BUT, THAT WAS IN ASIA

Mr. E. Alexander Powell in Harper's Magazine of November, 1922, tells of his travels in Asia. Thinking that some of our members may be interested in the way they do bricklaying we print the following excerpt.

A well-known politician was erecting a somewhat pretentious house in the same street as the American mission where I was staying, and every morning, when I was out for a stroll, I would pause and watch the masons at their work. The performance never varied. The man at the top of the ladder would sing out, in what he fondly believed to be a melodious tone, "Brother, in the name of Allah, toss me up a brick," whereupon the one below would mark his compliance with the request by chanting, "In the name of God, behold a brick, oh my brother." I have often heard bricklayers in America invoke the name of the Deity, but they used it in quite a different sense."

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

HIGGIN ALL METAL SCREENS

The frames are made of galvanized steel, enameled both inside and outside in any color desired.

They are only 7/16 inch thick and 1 1/8 inches wide, or about half the width and thickness of wood frames.

Owing to the durability of the frames, we use only non-rusting wire cloth woven from commercial bronze wire.

HIGGIN SCREEN DOORS

The screen doors reflect more clearly, perhaps, than any other one thing the quality of a screen installation. Higgin Doors are built to order. In width of rails, finish, and kind of wood used, they match the corresponding house doors.

Let us furnish without cost or obligation estimates of cost.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

AS SEEN BY OTHERS.

Objection was raised by some of the architects assembled at Indianapolis, January 13, to the way the War Memorial Commission has been handling the distribution of programs for the architectural competition and the I. S. A. went on record favoring an extension of the date on which sketches are to be in.

Some of the architects were inclined to put on the soft pedal, but others were for a definite stand on the issue.

The Indianapolis News in an editorial comment concerning the matter says:

It would be unfortunate if anything happened in connection with the competition to select an architect for the Indiana world war memorial that left any bad feeling or gave the public a wrong impression. The commission charged with the duty of choosing the advisory architect and approving his plans for the general competition is, we believe, acting in good faith. It realizes, as does the American Legion, that the world war memorial to be erected by the people of Indiana will stand for generations. When it is completed the commission and the public hopes that it will be distinctive among the world's tributes to valor and sacrifice.

The Indiana Society of Architects believes that the preliminary competition for the selection of an architect should not close March 15, as originally announced by the commission. The reason advanced for postponing the date to May 15 is that there has been discrimination among Indiana architects. There is no charge that this was intentional, but the society asserts that some members received details of the competition before others and that a few members have not yet been notified officially.

Rather than permit a situation to exist where there would be any criticism, whether justified or not, the commission may serve the larger interests by postponing the close of the competition to the time suggested. It is open to the

world because the state seeks the best design for the purpose intended. If an Indiana architect wins it will be a source of gratification, but it would be a violation of ethics to expect that favors should be granted to residents of the state. They ask nothing of the kind. What they ask is reasonable enough under the circumstances, and taken into consideration with the life of the memorial the delay would be slight.

**THE INDIANA ARCHITECT HAS
BEEN AND IS BEING BENE-
FITED BY I. S. OF A.**

There are possibly a few architects in Indiana who still can't "see" what an association of state architects means to the individual or the profession as a whole. Others there are who belong but take little interest in the organization, regarding it merely as a mythical something with not much more than a name. Still, there is a large percentage that knows and feels the importance to which the Indiana Society of Architects, as a body, has risen.

This much can be said, the organization is working all the time in the interest of the state architectural profession and really has accomplished some beneficial results. The policies followed and the action taken has attracted to the Society much favorable newspaper publicity, acquainting the public with the fact that the profession is constantly alive to current issues where the health and safety of the community is concerned as far as building and living conditions go.

In this matter of publicity, twice during the past year there was seemingly so much merit to the stand the architects, as a body, took that editorial comment was made by Indianapolis papers. Not only that but Ft. Wayne, Terre Haute and Evansville dailies have devoted considerable space to various moves by the I. S. of A.

Thus it is that the organization is working along constructive, progressive lines for the advancement of the profession.

Nor is that all, the I. S. A. is right

on the job even at this time at the State House while the Legislature is in session. It has a registered lobby, composed of Architects Charles Bacon, Fernor S. Cannon, A. A. Honeywell and Merritt Harrison, who is carefully scanning the various proposed bills, ready to protect the architectural profession, and co-operate with other building interests in the matter of the advancement of the building industry.

**ANYWAY THE DATE HAS BEEN
EXTENDED**

Though an attempt was made to withhold newspaper publicity on the War Memorial Competition until after a suitable resolution had been drafted and sent to the War Memorial Commission the matter was prematurely printed in the Indianapolis Star. Immediately a letter was sent to the Commission explaining the I. S. of A.'s position and regret at publication before arrival of resolution.

In answer to that communication the following letter has been received:

Indiana Society of Architects,
Indianapolis, Ind.

Attention Merritt Harrison, Secy.
Gentlemen:

Your favor of the 18th with Resolution passed at the last meeting of your Society reached me here today. I have been laid up for a short time with the flu.

I am sure the Board will understand your position in regard to the premature publicity and will attach no significance to it.

Copies of your resolution will be sent to Mr. Kimball and the matter taken up by the Board.

For your information the date of the competition has been set forward to April 16th, on the recommendation of Mr. Kimball. He requested this on January 4th and the Board concurred.

Sincerely Yours,
PAUL COMSTOCK,
Secretary.

ORGANIZATION AND CURRENT NEWS

EVANSVILLE

Associated Building Contractors
Member State A. B. C.

Geo. L. Miller.....President

Office, 411 Sycamore St.

THE OLD ORDER HAS PASSED

The new year has begun in Evansville with almost as much active building construction work in progress as was experienced during the late summer and fall months.

Part of this activity is due to the open winter and then, again, to the fact that the building public realizes that construction work can go forward in the winter with practically the same speed and efficiency as in the summer. It used to be that when the frosts set in everybody, who had in mind some building project, discarded all thought of actual construction, allowed the idea to go into hibernation, and then sat back to await the coming of the warm spring sun. That was not so many years ago.

Gradually those engaged in building construction began to realize that the lost time was quite an economic waste not only to the workmen, but to the contractor, as it disrupted his working organization, and also to general business as well since in many instances the projects were badly needed.

Evansville building interests, like those in other parts of the country realized the fallacy of the winter layoff, adopted all the latest methods and sought in various ways to encourage winter building. That the effort has not been in vain is attested by the building construction operations the contractors are carrying on right through the winter. That is why Evansville is building now in the heart of the heretofore dull months of the year.

CITY'S GROWTH REFLECTED BY THE BUILDING DEMAND

Most encouraging is a checking up of that in a building line which gives promise of early maturity in Evansville. The prospects are not made up of odds and ends, nor are they rumored contemplations, instead, they are substantial projects developed to the contract just awarded stage, taking bids, or plans nearing completion.

The class of work that is demanding the attention of the local contractors is of the better kind, wide and varied in its scope. There are in the assortment, quite a few industrial plants, schools, stores, warehouses, apartments and resi-

dences. It shows that the building volume is well balanced and is caused by a demand that can only originate from a steady and hearty growth of the city.

CHIPS AND SHAVINGS

In view of the fact that every indication points to much building in Evansville the coming season that new city building code got in at just about the right time.

With a \$500,000 apartment house and a half million dollar high school, both brand new, the city will be quite dressed up next summer. Both these projects are moving forward with satisfactory progress.

General contractors C. Kanzler & Son, are clearing the decks for real building action this summer.

Jacob Bippus and Sons have considerable work of a small nature under way and hope to get it all out of the way by the time the spring rush begins.

At the meeting of the stockholders of the Evansville Structural Supply Company held last week, J. Chester Vaught was elected president; H. N. Robinson, vice-president; Leo O. Fabian, secretary, and G. L. Miller, treasurer.

LOOKING FORWARD TO ANOTHER BIG YEAR

Prospective business in building construction for next season is good in Ft. Wayne, with indications for an early start in the spring. Though the city experienced a record building year in 1922, the fact that the city is growing right along with its building volume is expected to create as great or a greater amount of building work in the immediate future years.

At this time there are plans completed, or nearly so, for some large projects that bear every mark of going ahead the coming season and which are expected to be put out for bids soon.

Despite the fact that many hundreds of new homes were erected the past year the demand for them is still great which should lend a strong impetus for such building work in 1923. The late fall saw

some real activity in home site buying in the suburban districts and these new owners have shown every inclination to proceed with their contemplated residences when the building season opens up once more.

After sizing up the local situation Ft. Wayne contractors are extremely optimistic as regards future work for the year 1923.

BUILDING TRADES SCHOOLS BEING INSTITUTED IN MANY CITIES

The great building activity all over the country and the existing shortage of mechanics in many trades is bringing about the instituting of trade schools in many cities. This Exchange takes pride in having started the first plasterers school ever known in this country, and our plan of operation is being followed in other schools.

A bricklayers school is now being operated in Cleveland, Ohio, under the Smith Hughes law, with the school board in full control.

The employers of St. Paul and Minneapolis fifteen months ago subscribed \$6,000, with which funds they have since conducted a very successful bricklayers school on practical lines similar to that followed by this Exchange.

R. W. Crouch, secretary of the Builders Exchange of Fresno, was in town a few days ago gathering information for a plasterers school shortly to be established in that city. He was shown our school in full operation. Funds for the Fresno school are available and it is to be started at once. E. W. Olin of the Industrial Relations Committee furnished Crouch with full cost data on our 1921 school.

San Francisco has now turned out nearly 100 graduates from its five months old school, while our school here in Oakland has already turned out 31 graduates. The result of all these semi-skilled craftsmen coming into the field is being appreciated more each day, for these graduates are all capable of doing ordinary plastering work and the full-fledged journeymen are thus relieved for more skilled work on ornaments, mouldings, cement work, etc.

By next spring, when work is once more rushing, the graduates of today will be almost full-fledged journeymen and their help will indeed be valuable.

The National Association of Building Trades Employers in its October Bulletin, under an article headed "Trade Schools Everywhere," sums up the situation with this paragraph: "If there were apprentice schools everywhere the training of new mechanics would keep pace with the constantly increasing volume of construction.—Monthly Bulletin, Builders' Exchange, Oakland, Calif.

Remember

You can substantially reduce the cost of your compensation and liability insurance by insuring in the BUILDERS & MANUFACTURERS MUTUAL CASUALTY CO. (a strong company, organized and economically managed by contractors, and devoted exclusively to rendering a particular service and reducing the cost of insurance in building construction.)

MEETINGS.

Executive Committee meets second Tuesday each month.

Painter Contractors meet every Wednesday, 3:00 p. m.

Plasterer Contractors meet every Wednesday noon.

Mason Contractors Association meets every Thursday—1 P. M.

General Contractors meet second Friday each month.

PLANS ON FILE.

At 320 Peoples Bank Building, Indianapolis.

Plans and specifications are on file for a hotel at Paris, Ill., the Paris Building Co., W. T. Blackburn, Pres., Paris, Ill., is taking bids to close February 13th. Johnson, Miller and Miller, Terre Haute, Ind., are the architects.

WAIVER OF LIEN.

East Tenth Street Realty Co., a corp., as owner, and Thos. A. Winterrowd, as contractor, to erect a two-story business and apartment building and one-story garage for \$34,296.

EARLY ACTIVITY IN BUILDING MARKS THE NEW YEAR

Featuring building matters in Indianapolis the past week was the award of the contract for a five-story factory building, 98x120 ft., for the Indianapolis Glove Co. This building, to be of reinforced concrete, fireproof construction, went to the Wm. P. Junglaus Co. This is the second big contract to be let since the first of the year.

STATE CONTRACTORS' CONVENTION MAKES SELF FELT

There was a decided quiet prevailing around the headquarters of the Indianapolis Building Contractors' Association the past week. Secretary C. C. Pierson's office was deserted and many of the familiar faces seen frequently about headquarters were missing. Farther up the hall, the door of J. H. Owens' office, Field Representative for the Associated Building Contractors of Indiana, stood idly closed, locked.

There had been an exodus to Michigan City where the Fifth Annual Convention of the State Contractors' Association opened Tuesday, and extended on through Thursday.

The delegation from Indianapolis includes F. W. Junglaus, W. W. Wise, T. B. Hatfield, Arthur Sanford, James Hodgson, Fred Mack, H. A. Fenton, Joseph Hayes, C. C. Pierson and J. H. Owens.

ONCE IN A GREAT WHILE THIS REALLY HAPPENS

Many look upon a building operation as a real trial. Sometimes it is, other times it isn't.

However, that the whole may be accomplished with satisfaction through real service and effort on the part of the contractor we are herewith reproducing a letter that came to our attention by chance and which the writer gave us permission to use. It seemed an unusual missive and deserving of notice because of its unstinted acknowledgment of appreciation to the contractors for their effort.

Appreciation

Messrs. Conder & Culbertson,
City.

Gentlemen:

At a recent meeting of the Board of Trustees of the Central Avenue M. E. church, upon receiving the final report of our Building Committee, the writer was instructed by unanimous vote to express to you the appreciation and thanks of our Board for the very satisfactory way in which your firm has executed our contract. Our pastor and chairman of our building committee both bear witness with real pleasure to the painstaking care, the close attention to every detail, the uniform courtesy and desire to please evinced by yourselves and every one of your employees.

In a contract of this character—one involving so many alterations of old construction, and also new addition—it is so unique to have same completed without a single misunderstanding or argument and with an atmosphere of cheerful compliance prevailing the whole, our Board feels we owe you this unanimous expression of appreciation, accompanied by our best wishes for your continued success and larger prosperity.

It is a personal pleasure to the writer to carry out this order of our Board.

Yours very truly,

JAMES I. DISSETTE,
Chairman of the Board.

Jan. 11, 1923.

ANOTHER FINE OLD HOMESTEAD FALLS BEFORE THE DEMANDS OF THE GROWING CITY

And the building wave moves on out to the north. Before the rising, flowing tide of construction must go the old to make room for the oncoming new. Meridian Street, the old thoroughfare of homesteads in Indianapolis, has felt possibly more heavily, than any other street, the weight of the encroaching force that can not be stemmed, and under the pressure many old landmarks have given way. At the present writing the dismantling of the Atkins homestead, at 13th and Meridian streets, one of the elegant homes of former days, is under way. This fine old stone residence is in the passing to make room for a new \$250,000 automobile sales room for the Buick Co.

MEETINGS FROM NOW ON SHOULD BE WELL ATTENDED.

Another matter that contractors would do well to heed in the next few months, is attendance at their city association meetings. Heretofore, there

has been the cry, "I'm too busy;" "Couldn't get over the other night;" etc. Now that building activity is on the wane, and there will be matters to be threshed out of import to this year's affairs, all members should make it a point to attend when called.

Then on the other hand the officers of the associations would do well to call meetings with regularity. There are wage scales to be considered for this season, a matter that must not be overlooked. The sooner a start is made in that direction, and understandings reached, the better it will be for all concerned.

STOP! LISTEN! ACT!

Mister Good Member you should stop and think what it would mean to the Association if there were more in the same class with you. You can help keep in the ranks many perhaps careless members who forget their obligations; and again you can tell a whole lot of contractors about the association and add them to the ranks of good members.

MICHIGAN CITY CONVENTION OF STATE CONTRACTORS BEST EVER HELD.

Big Crowd Attends and Fine Program Marks the Three Days Session.

Another annual convention of the Associated Building Contractors of Indiana has come and gone, leaving in its wake happy memories, a feeling that there has been accomplishment to mark the existence of the state contractors body, that there was accomplishment achieved at Michigan City last week, and the feeling that the A. B. C.'s, as an association, has found itself and is more prepared than ever to go on to greater usefulness, backed as it is by a militant, aggressive, constructive policy endorsed by practically the whole building contracting fraternity of Indiana.

There may be those who are inclined to discount organization effort either through selfishness or ignorance. However, when one attends a convention of the kind such as was held in Michigan City, January 23, 24 and 25, he can not but be impressed by the seriousness, the earnestness, and the sincerity with which the representative building contracting element of the State, in convention assembled, openly, freely, takes up and discusses the problems that confront the industry in an endeavor to find the way out, the way that means for solution, progress, and the minimum of economic loss from retarding influences.

The recent meeting of the State A. B. C.'s in northern Indiana was unquestionably the most businesslike, the most representative, the most successful, and, last but not least, the most enjoyable ever held since the formation of the state association.

Though, geographically, access to the city by the lake was somewhat tedious for many out over the state that fact did not seem to affect the gathering. The contractors arrived from every section of Indiana and put in an early ap-

pearance, all eager to get down to the business at hand. All arrivals were met at both trains and interurban cars by the local contractors and conveyed in autos to the Spaulding Hotel, convention headquarters. If Michigan City did one thing any better than another it was the way she hung the "Welcome" sign out, not actually, but figuratively speaking.

Final plans of procedure for the convention were perfected at an executive board meeting at 9:30 A. M., Tuesday, January 23rd and then promptly at 10:30 A. M., President Fred W. Jungclaus, Indianapolis, called the three days' meeting to order, there being close to one hundred delegates present. Rev. J. K. Brennan of Trinity Episcopal Church, Michigan City, delivered the invocation, after which former Mayor Martin T. Krueger made an address of welcome that made all delegates feel right at home. President Jungclaus in response assured Mr. Krueger, members of the Chamber of Commerce, and the local contractors, that the men of the State A. B. C.'s appreciated the spirit in which they had been received and were pleased for the opportunity to visit Michigan City.

The remainder of the morning session was given over to committee appointments.

During the afternoon the various committees reported and further reports were made on the activities carried on by the local city associations throughout the year.

Tuesday evening there was a smoker and entertainment at the Chamber of Commerce for the visitors, an event that afforded an atmosphere of contagious good fellowship and much enjoyment.

The second day's session was opened with reports from the resolutions committee, all of which were accepted and adopted. Then followed a general discussion on state building affairs and conditions, which lasted till noon adjournment. The feature of the morning session was the report made by Walter Wise, Indianapolis, chairman of the State Building Code Committee, who set forth what had been done toward the formulating of such legislation and the steps that were being taken in an endeavor to secure its passage by the State Legislature. It has been introduced as Senate Bill 140 and Mr. Wise made a plea that all contractors get behind the bill and lend their support to secure its being written on the statute books.

Following the noon adjournment the delegates were again called into session, at which Attorney Harry Fenton spoke on the general legislative activities of the association and admonished the con-

tractors to stand back of the state body in its endeavors in that direction.

Frank L. Dykema, Grand Rapids, Mich., secretary of the Associated Building Employers of Michigan, was then introduced and after a few well chosen remarks of greeting, extended a cordial invitation to Indiana contractors to attend the state convention of the Michigan contractors in March.

Adjournment was then taken to allow for a site seeing trip that had been arranged by Secretary Greenbaum of the Michigan City Chamber of Commerce. This trip included the industrial section, the lake front and summer resort districts, and the State Penitentiary.

That evening the delegates were the guests of the Builders and Manufacturers Mutual Casualty Co. of Chicago at an elaborate banquet at the Spaulding Hotel. This was one of the real bright lights of the convention, a most enjoyable affair and reflected great credit on the host.

Wednesday morning brought the convention to a close with the election of officers and the selection of the site for next year's convention. Ft. Wayne was the city finally designated and these officers were named for the ensuing year: F. W. Jungclaus, of Indianapolis, president; A. E. Kemmer, of Lafayette, first vice-president; Max Irmscher, of Fort Wayne, second vice-president; Chiron C. Pierson, of Indianapolis, secretary and treasurer; J. H. Owens, field representative, and Harry Fenton, general counsel, both of Indianapolis, were reappointed.

As a fitting farewell to the visitors the Michigan City Rotary Club entertained them at a noon luncheon.

ROYALLY ENTERTAINED

Banquet and Entertainment Prove Convention Feature

Fit for a king.

That, briefly, most adequately, describes the well appointed banquet and elaborate evening's entertainment placed, by the Builders and Manufacturers Mutual Casualty Co., of Chicago, at the disposal of the visitors to the Fifth Annual Convention of the Associated Building Contractors of Indiana at Michigan City, January 24.

Hardly had the shades of night fallen when the doors to the artistic ball room at the new Spaulding Hotel, were opened wide; there was a burst of brilliant light accompanied by the soft strains of music from within. Slowly several hundred contractors and visitors filed into the room where flowers, beaming beneath a myriad of glistening lights, welcomed

them to inviting tables. It was a most entrancing environment.

Followed there a repast seldom equalled, never surpassed. And all the while an orchestra played selections of an enlivening nature that made it hard to hold one's feet still. By way of diversion a mixed quartette from Chicago interspersed vocal selections here and there throughout the program, music of a classical trend that carried a strong appeal and was highly appreciated. It was truly a musical treat as the voices of the women were clearly sweet while the male voices, rich in quality, added greatly to the melodious harmony.

Owing to the unavoidable absence of Mr. Andrew Lanquist, president of the insurance company, Mr. H. B. Barnard, treasurer, spoke in his stead, paying a

glowing tribute to the undying loyalty of Mr. Lanquist to the building industry and his unselfish devotion to the cause for the betterment, welfare and advancement of the contractor and contracting interests. Inspired by this motive Mr. Lanquist had conceived the mutual insurance idea for contractors and, that he had possessed the vision, Mr. Barnard referred to the growth of the company that Mr. Lanquist had founded.

A word of welcome and an invitation to return was extended to the visitors by Mr. E. G. Richter, president of the Michigan City Chamber of Commerce.

Another speaker was Earl F. Stokes, Webster City, Ia., secretary of the National Association of Builders' Exchanges, who recounted the aims of the national association.

Dr. Frederick E. Hopkins, pastor of the Presbyterian Church, Michigan City, delivered the main address of the evening, really a remarkable one. He took for his subject "The Swinging of the Pendulum," and to it likened the emotions of men and their actions, and events, as the cycles of time roll on. His remarks were not only entertaining but edifying.

Concluding the program appeared Harry Fenton, Indianapolis, who in his own inimitable way struck straight from the shoulder with a plea for greater organization effort.

All of which went to make up an evening, and a host not soon to be forgotten.

News of the Week

The asterisk (*) prefix to an item indicates additional information to report published in previous issue.

INDIANAPOLIS.

***Stores and Offices:** 4 sty. and bas., 70x200. (5 and 10 cent store) S. W. Corner Washington and Pennsylvania Sts., Indianapolis. Private plans. Owner, S. S. Kresge and Co., Detroit, Mich. HIGGIN ALL METAL SCREENS

The frames are made of galvanized steel, enameled both inside and outside in any color desired.

They are only 7/16 inch thick and 1 1/8 inches wide, or about half the width and thickness of wood frames.

Owing to the durability of the frames, we use only non-rusting wire cloth woven from commercial bronze wire.

HIGGIN SCREEN DOORS

The screen doors reflect more clearly, perhaps, than any other one thing the quality of a screen installation. Higgin Doors are built to order. In width of rails, finish, and kind of wood used, they match the corresponding house doors.

Let us furnish without cost or obligation estimates of cost.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

BIGGER, BROADER UNDERSTANDING IS THE NEW ORDER.

Times change, so do the ways of the world.

It was not so many years ago, in fact probably it is within the ken of most of us, that on the whole there was little love lost between the architect and the contractor. Both were essential, to a certain degree, to each other and yet, in many instances, there was somewhat of an antagonistic attitude assumed by each toward the other. Conversations led to the belief that these two sets of men were inclined to fight each other, that is, as far as business dealings went. Possibly there were men in both ranks which caused such a condition.

Be that as it may, an awakening seems to have come to the vast majority of these men that they are more or less dependent upon each other in furthering the interests of the great industry which they are a part. This reference is made advisedly, for the one plans the building and the other executes it, therefore, their interests are more or less mutual. The architect may be artistic, while the contractor leans to the materialistic, and yet, the consummation of a building operation affects them both. The marked progress of building construction activity spells for their success.

The advancement of right principles for the furthering of the industry means much to both architects and contractors and that realization seems to have come to these classes of men, the thinking ones among them.

When the Associated Building Contractors of Indiana, builders from every corner of the state, gathered at Michigan City last week in annual conference frequent reference of the highest sort was made to the earnest endeavor of the Indiana Society of Architects in its aim to co-operate with the contractors that building affairs in the state might be elevated to a higher plane. To the architects due credit and unstint-

ed praise was given for the aid they had been to the contractors in advancing constructive policies for the future guidance of the building industry. Especially was reference made to the co-operation extended to the contractors in their legislative endeavor and mention was made to the fact that while the Associated Building Contractors of Indiana were in session at Michigan City the Indiana Society of Architects had their representatives on guard at the State Legislature to look after certain matters in which the architects and contractors were co-operating.

At the banquet at the Spaulding Hotel, Wednesday evening, January 24th, these architects were present and heard the I. S. of A., referred to in no uncomplimentary tones, Charles Nicol, Lafayette; George W. Allen, Laporte, and G. W. Freyermuth, South Bend.

STRONG ARGUMENT, ADVANCED BY PROMINENT EDUCATOR FOR ARCHITECTURAL SERVICES.

The essential need by universities, colleges, other educational institutions and school authorities, for more definite planning under architectural guidance in caring for building programs was stressed upon strongly by Dr. Livingston Farrand, President of Cornell University, in an address at Indianapolis the past week. He said if more foresight was exercised in that direction and architectural services were made use of to provide definite units, well and efficiently planned, to care for future needs, not only would the institutions be ment of our educational institutions be greatly enhanced but the artistic environment also would be improved greatly, both lending attractiveness not to be denied.

Dr. Farrington held that it was hard to appraise the future growth of educational institutions or estimate the demand to which some of them might be subjected. In view of this fact he con-

tended that in planning for future contingencies architects should be retained and consulted, who by their experience, training, and knowledge, are in a position to produce comprehensive plans so laid out as to approximate that demand and care for it more efficiently than any other set of men, let alone a few directors, a board of trustees or board members, who come and go, building here or there with no definite end in view and merely an overcrowded condition to be met. As a result of the latter method so frequently employed in the past and even today we find many educational institutions a maze of buildings crowded into relatively small spaces, in many cases showing little regard for efficiency since certain structures bear little or no relation to each other except as they all go to make up the institution of which they are a part.

That Dr. Farrand was not biased or prejudiced against any particular university, school or college, rather that he condemned as a whole the hap-hazard building schemes resorted to to meet emergencies, is attested by the fact that for illustration he referred to his own institution and the building plan followed there in years past.

Originally Cornell University consisted of three buildings to care for 1,000 students. Little thought was given to future developments or requirements. Gradually the institution has grown, and from time to time the various boards of trustees have decided to build additional structures to meet the growing demand for more room. One set of trustees would conclude to erect a new building and would stick it here, another set later were required to build still farther and would place it in such a location on the campus as might happen to strike the fancy. That has been the procedure until today there are twenty-seven buildings in the entire group all just crowded in here, there and everywhere. Dr. Farrand contended that an architectural scheme so arranged years ago to care for possible future needs would more adequately have served the purpose of this great university of today, rather than the hit and miss building extension policy that has been followed.

ENCOURAGING REPORTS MADE BY RETURNING CONTRACTORS AND ARCHITECTS.

Local contractors and architects returning from their various state conventions report that the contracting and architectural interests of Indiana seem to be placing a new value on a more intimate touch with actual conditions and current influences as they bear upon the building industry. Both of the above interests have come to a realization, according to their actions, that there must be co-operation along legislative lines to protect the welfare of the whole building construction business, and that a further co-operation can be exerted to advantage in an endeavor to effect more propitious conditions that, in the end, will assure an increased building volume.

The contractors through their state organization, the Associated Building Contractors of Indiana, with which the Evansville A. B. C.'s are affiliated, is working twelve months in the year in conjunction with the local city associations to better both city and state-wide building conditions and to advance the industry. The state association is seeking to eliminate economic waste by the reduction of Labor trouble to a minimum, to increase the Labor supply by an encouragement of the employment of more apprentices, and generally to work for effects that are conducive to stability from which prospective builders may be inspired to build.

Just as the contractors are working to improve their industrial sphere so are the architects over the state seeking to elevate their professional standard and those things that, through the architectural profession, bear on better building conditions.

There can be no question but what the effort now being put forth by the state contracting and architectural interests in the direction of co-operation will mean a great deal in the future to the Indiana building construction industry.

CHIPS AND SHAVINGS.

Scarborough-Davies and Co., general contractors, with an increased capital, are prepared for an active year in 1923.

STATE CONTRACTORS EXPRESS THE OPINION THAT WAGE MATTERS WILL NOT BLOCK BUILDING THIS YEAR.

Authoritative information from around the country gleaned from surveys made by building financing concerns and some associations interested in building construction operations and activities indicates that wage scales for building trades mechanics will in all probability show little or no declines for the coming season, in fact, there is an inclination on the part of some contractor employers in parts of the country to grant slight advances. Except for these, wages seem to have assumed a fair degree of stability and are not expected to cause much dissension this spring to greatly retard the promising prospects that are in contemplation. There seems to be no inclination on the part of the employers or Labor to seek to effect any radical changes in the present wage standards.

Conversations with contractors from around Indiana attending the State A. B. C.'s convention at Michigan City last week merely verified reports already in that the enormous building volume in Indiana in 1922 had put a severe tax on the available supply of building trades mechanics in certain of the crafts, particularly bricklayers and plasterers. However, conditions in Indiana respecting these two trades are not out of the ordinary as there is a general scarcity of these two crafts throughout the country. This condition is due greatly to the fact that little or no attention has been given by the employers to the training of apprentices in these two lines of work.

As for the other building trades mechanics there seems to be a good supply, resulting in an elimination of premium wages and bonuses. This latter is an evil that should be eliminated and can be by the contractors themselves. Bonuses and premiums in remuneration to workmen can be traced to the selfishness of the contractor himself who stoops to such methods only because he needs men and don't give a hang for the other contractors, otherwise, he would not resort to this trick to steal men from

other jobs, wreck wage scale standards, and generally upset local conditions as regards wages.

However, Indiana contractors at Michigan City expressed the opinion that Labor was showing a tendency to play fair this coming spring in order to encourage continued building activity, and indications point to an early and satisfactory settlement of the wage adjustment for the 1923-1924 building season.

For the Ft. Wayne delegation of contractors, especially the older members, who journeyed to Michigan City last week to attend the big annual meeting of state contractors, there was more than mere convention interest, it was deeper than that and dated back to six years ago. Each year the A. B. C.'s convention means, to certain Ft. Wayne contractors, the reality of a dream. This dream in the beginning had for its motif the perfecting of a state of affairs whereby a big, broad spirit of co-operation might be instilled into the building contracting ranks of the state that better fellowship might exist amongst the builders, that a degree of affable understandings might prevail that would make it possible to work in unity for the promulgation of principles looking to the advancement of the building construction industry in Indiana, and also the protection of the contracting interests.

It was back in 1917 that seventeen Indiana contractors gathered in Ft. Wayne from various cities in the state and organized the Associated Building Contractors of Indiana. At first the growth of the organization was slow, it did not take hold at once, but in 1920 it had assumed such proportions that the second state meeting was held and aroused much interest. From that time on each annual convention has grown more important and drawn good crowds.

The gathering at Michigan City, January 23, 24 and 25 was by far the best since the State A. B. C.'s came into existence, there was a new tone, more serious than heretofore, and an evident desire to get down to real constructive policies.

Thus was the Michigan City demonstration most gratifying to those of the Ft. Wayne delegation who recalled the beginning in their city and the extent to which that early effort has spread, to interest ninety per cent of the building contractors in Indiana, and to be ceaselessly working all the time for the advancement of the industry and those things that will make for better conditions and better buildings.

No wonder Ft. Wayne contractors cherish a sentiment for these conventions, they mark the mile stones of progress of a move that started from Ft. Wayne and is moving on and on to real accomplishment.

General Contractors meet second Friday each month.

PLANS ON FILE.

At 320 Peoples Bank Building,
Indianapolis.

Plans and specifications are on file for a hotel at Paris, Ill., the Paris Building Co., W. T. Blackburn, Pres., Paris, Ill., is taking bids to close February 13th. Johnson, Miller and Miller, Terre Haute, Ind., are the architects.

WAIVER OF LIEN.

None this week.

BUILDING PENDULUM SLOWS
DOWN BUT CONTINUES TO
SWING.

Things were somewhat quiet in Indianapolis building circles the past week as far as the development of new projects was concerned, nevertheless, there are whisperings of contemplated work that promise well within a short time. A \$60,000 light manufacturing building was announced by Architects Bacon & Tislow for Herff-Jones Co., manufacturing jewelers, to be located at 14th and Illinois streets.

Bidding on new work was almost at a standstill. However, there were two nice contracts awarded on work figured last week and a big mill work contract placed. The J. G. Karstedt Construction Co., received the contract to erect a \$180,000 fireproof warehouse for the Allen A. Wilkinson Lumber Co., while the John A. Schumacher Co., carried off the contract for a fireproof factory for the G. J. Mayer Co., for which Vonnegut, Bohn & Mueller were the architects. The Schumacher Co., also was the successful bidder on the mill work and interior trim contract for the new Meyer-Kiser Bank and Office Building, an eleven-story structure on East Washington street.

CAN ENTERTAIN AS WELL AS HE
CAN BUILD.

Recounting features of the big annual convention of the Associated Building Contractors of Indiana at Michigan City

recently, the News of that city had this to say of that esteemed Indianapolis mason contractor, Mr. James A. Hodgson:

"Throughout the convention, Jimmy Hodgson, prominent mason contractor of Indianapolis, head of the firm of James Hodgson & Sons, was a bright and shining light. Jimmy is a Scotchman, talks a heatherish brogue and is proud of it. Whenever an opportunity presented itself, Jimmy got up and sang, 'She's the Lass for Me,' and 'Roaming in the Gloamin'."

"While not especially mentioned in the program for the evening, 'Jimmy' put over some stunts at the smoker, Tuesday night that went big and lent much to the enjoyment of the affair."

When this affable gentleman forsakes the trowel and the "running of the line" he has a fine repertoire of Scotch songs to fall back on.

AFTERTHOUGHTS.

Those Indianapolis contractors who took out time enough from the building game to journey to the State contractors' gathering at Michigan City last week are loud in their praise of the way in which the contractors up there assumed the role of host and proceeded to enact their part. If ever there was a sincere display of hospitality the Michigan City men put it across. They were constantly on the job to see that not a dull moment ensued, nor that an iota of lonesomeness might intervene.

When the Spaulding Hotel, convention headquarters, had become too customary there was always a horde of parked autos at the curb, manned by some business man of Michigan City, ready to convey the contractor guests about the city to points of interest.

Arrangements had been made for Wednesday afternoon for a real site seeing tour and promptly at three p. m., a long string of autos started out from the hotel. Industrial plants were visited, a long drive was made out along the lake front, and some idea of the formation of the famous Dunes was given to the contractors by a winding trip out through towering sand hills, some well wooded, others stripped by the high sweeping winds from the lake and in the process of shifting. As a finale to the afternoon's program a visit of the contractors, in a body, was made thru the State Penitentiary where a most impressive hour or so was spent.

In passing it is but proper to congratulate the Michigan City contractors upon their convention effort. Nor is that all, great credit is due the Chamber of Commerce, their hustling secretary Mr. W. K. Greenbaum, the business men and the Rotary Club for the unstinted co-operation they extended to their local contractors to make the convention a success, an event, the remembrance of which all visitors will store away in memory to call forth in the days to come and conjure over in happy recollection.

BUILDING PERMITS.

(\$4,500 and Over)

Week of January 25th to January 31st.

*Bank and Office Building: \$600,000, 128 E. Wash. St. Archt., Vonnegut,

MEETING NIGHTS

General meeting every third Tuesday evening.
General contractors meet second and fourth
Monday evening.
Master plumbers every Thursday evening.

CONVENTION IMPRESSIVE.

The contractors who were in a position to attend the State A. B. C.'s convention at Michigan City last week and did, were not only fortunate but were well repaid for their effort; those who, for one cause or another, failed to attend surely missed a treat. It was one of the best meetings of contractors that it has ever been our privilege to attend, and we have attended quite a few such gatherings.

There was ever present an undeniable spirit of good fellowship and every move made bespoke co-operation to a wonderful degree. That which has been done in the interest of the contractors and for the advancement of the whole building industry in the state by the Associated Building Contractors of Indiana can scarcely be realized except by those who were present at the convention and heard the reports of the officers and various committeemen.

If there was any one report that stood out above all the others it was the one made by Walter Wise, Indianapolis, chairman of the State Building Law Codification Committee. The effort put forth by Mr. Wise and his committee has resulted in the greatest constructive measure ever proposed by the State A. B. C.'s, a measure that has evolved into Senate Bill 140, now pending before the State Legislature, which, if passed, will mean a virtual state wide building code for Indiana. Regardless of the outcome of this bill every contractor in Indiana owes a vote of thanks to the members of this committee for their untiring efforts to perfect something really worth while to the building interests of the state. The reading of the committee's report convinced every auditor that in formulating the proposed legislation a vast amount of work had been required.

This bill has merit, the things that it provides for are actually needed and, as a mark of appreciation of the unselfish devotion of Mr. Wise and his colleagues to the welfare of the building industry, every association member contractor, and even the individual unaffiliated contractors, should get back of this proposed bill and work for its passage by the legislature.

Nor is that all, if the state law-makers see fit to write this legislation on the statute books it will be incumbent upon every city contractors' association and the individual members of the

State A. B. C.'s to see that the provisions therein incorporated are enforced.

This was but one thing that grew out of the convention, but it was really the biggest thing and tended to show that the building contracting forces are really reaching the point where they can be a unit when it comes to progressive-ness and a betterment of conditions.

INTENT GOOD BUT MUST LIVE UP TO IT.

Another good move was made by the assembled contractors when they voted that all members of the State A. B. C.'s should avail themselves of the opportunity to employ as many apprentices as possible. This was a good resolution and will bear living up to. There is only one way for the depleted labor market to be revamped and supplied and that is for the contractors themselves to buckle down and aim to make more mechanics themselves by employing and teaching apprentices who will in time become skilled mechanics with which to carry on the business.

As said before, this resolution is a good one. However, it must be lived up to otherwise it will be in vain. One thing must be born in mind, it is easy to resolve, but, to go back home and forget only means that all the high sounding protestations and well meaning impulses were empty, idle boastings, and heartless emotions consuming time that might otherwise have been profitably spent.

It would be interesting to have a report on apprentices along about next July.

REALLY A REMARKABLE EVENT.

It is not our custom to enthuse over a banquet, they are all more or less cut and dried events. However, after that affair that the Builders and Manufacturers Mutual Casualty Co. of Chicago put on at Michigan City for the entertainment and edification of the Indiana contractors we are forced to ecstatically remark that it was "Some Banquet," in the first place the menu was delicious, the music by the mixed quartette was superb, and the addresses delivered were not only good, they were remarkable. Really we wouldn't mind being a preacher if we could tell stories as Rev. Hopkins does.

The officers of the insurance company, YOUR company, deserve unstinted credit for the commendable way in which they turned the evening of January 24th into a period long to be remembered, undoubtedly never to be forgotten by those of us who experienced it.

HOSTS IN ALL THAT THE NAME IMPLIES.

Don't ever believe that the Calumet contractors were not over at Michigan City for the State A. B. C.'s convention. They were not only there, they enjoyed every minute of their stay, and would surely have regretted missing it now that they know what went on.

The local men who did journey across to their neighboring sister city were proud of the Michigan City contractors for the way they dispensed northern Indiana hospitality. The M. C. fellows

are a live bunch and the way they played host was a revelation. If they build as well as they entertain they must be some builders.

CALUMET BUILDING PROGRESS.

General Contractors Rhoades and Graves this week began the erection of two more bungalows, one on Blaine Ave. and the other on Dyer Boulevards.

The city of Hammond is contemplating erecting a fire station of the bungalow type on South Hohman St., plans for which are now being prepared by Architects J. T. Hutton & Son. Bids will be asked about February 15th. The building is estimated to cost \$15,000.

SMALLER CITY CONTRACTORS TURNED OUT WELL FOR STATE CONVENTION.

It was gratifying and inspiring to note the representation that the smaller cities had at the State A. B. C.'s convention at Michigan City last week. This feature only made more impressive the aliveness and up-to-dateness of the building contractors throughout the State and the desire of the smaller city contractor to be in closer touch with the pulse of the building industry. There was a time when organization was considered only as essential to the contractors and builders of the larger municipalities, but gradually the building construction industry advanced until the influences that ruled therein spread out to effect the operations in the entire state field, and there was but one way for the contractors in the broadening sphere to cope with the new order, that was by co-operating through association endeavor.

That the smaller city and town building contractors were awake to the issue is today attested by the local associations they have built up and their regular attendance at the conventions and other meetings held by the builders of the entire state.

Every year the interest of the smaller contractors seems to increase and the fact that they are eager to take the floor when discussions arise shows from their arguments that the problems they encounter are mutual to all builders whether they reside in the more thickly populated districts or in more or less rural communities.

The intent effort that Indiana contractors are making toward co-operation for the establishment of higher principles and the general advancement of progressive ideas for greater efficiency and expediency surely augurs well for the future.

Never has there been an Indiana contractor's convention that developed a more impressive serious atmosphere than that that was brought out at Michigan City.

STATE CONTRACTORS ADOPT IM- PORTANT RESOLUTIONS.

Decide on Greater Publicity and Take
Definite Stand As Regards
Apprentices.

Patent upon the function, future influence and further development of the Associated Building Contractors of Indiana as a real power for advancement in building construction circles, and as an instrument of latent and potential usefulness to the building contracting fraternity of the state was the attention focused on constructive policies to be inaugurated by the state body. As a result of such deliberation these resolutions were introduced, seconded and carried at the Michigan City convention.

"Resolved, that the various member associations use their efforts to place the purposes and advantages of the A. B. C. organization before various civic organizations and prospective builders of their respective communities."

"Resolved, that each member association report within 30 days after the convention the number of apprentices employed in the different crafts in each city."

"Resolved, that each member association do now pledge itself and agree to indenture as many apprentices in the various lines as possible.

Another resolution, while not so important as the above, aimed at more expediency and with a view to making it easier for a larger body of men to attend all convention sessions, was also adopted.

"Resolved, that the annual convention of the A. B. C. be limited to two days' time."

Further the contractors in the following manner expressed their pleasure at the way this year's convention had been handled.

"Resolved, that we go on record as keenly appreciating the well directed efforts on the part of the Michigan City association and the Chamber of Commerce for their splendid part in making our visit to this convention a pleasure and a success."

REMEDY OFFERED.

New Court in New York Promises to
Facilitate Industrial Employment
Disputes.

E. E. COLE, Secy.

Bldg. Trades Employers' Association,
Calumet District.

A new departure has been made in New York by the establishment of a Commercial Court, the aim being to find a short cut for the settlement of business disputes and quarrels.

This court should in a great measure remedy certain annoying conditions that arise from misunderstandings between the different building trades and between such trades and employers. The Arbitration Society of America has been launched in connection with the new court and the society has established a Tribunal of Justice, open to the public and the trades, for the settlement of all kinds of controversies excepting criminal and divorce matters. The arbitration decisions are binding. Disputes of a nature that, heretofore, have dragged through the courts from one to four years under the new order have been settled in from one day to a week according to the magnitude of the contributions, and such decisions have been reached at a nominal, reasonable cost. Then, too, the court proceedings have eliminated much of the red tape that was so much in evidence in former controversy settlements.

On the face of things this move appears to be a big step forward and one that other states well might adopt as it would have a tendency to eliminate long drawn out and costly litigation. The employment of such procedure in Labor controversies would eventually put a stop to long drawn out strikes and lock-outs and would create for better understandings and relations between employees and employers.

There is no reason to dispute the fact that here is a great opportunity for good in the movement as it would effect an economic saving. The loss of money and time now caused by labor disputes could be cut to a minimum and a great burden lifted from industry, especially in the building construction field.

UPWARD PRICE TREND PREDICTED FOR LUMBER.

Lumber dealers of Indianapolis are forecasting higher prices for the building year of 1923, with the increases already being quoted and the trend still upward. With the substantial advances already achieved and strongly held, prices are surging upward in about all of the principal soft and hard woods.

It is said at the Indianapolis retail yards that over the country generally there is the strongest demand that has been visible in the lumber market since the hectic season of 1919-20. While retailers have been opposing the advances, the increases not only hold, but promise to go higher.

"If a retail yard wants lumber, and all of them do, there is only one way to get it—order it and pay the price," said one retailer. "It means of course, the cost of building houses this year will be higher, yet the building movement is already going forward. We are very busy making estimates and closing orders for spring. Indianapolis had a great building year in 1922 and is going to have another in 1923."

The upward movement, in the soft-woods markets particularly, has been gradual thus far, but there is no denying that the pressure is heavy. The record showing of the Southern Pine Association's barometer for the week ended Friday, January 19, in which bookings of 127,000,000 feet by 129 mills is indicated, gives evidence of the flood of buying.

WELL-KNOWN BUILDING MAN BEREAVED.

Those of Indianapolis and Indiana building circles will regret to learn of the sudden death the past week of Mrs. George Moring, wife of the widely known fire door representative.

Mr. Moring, who for years was located at Indianapolis as representative of The Peele Co., fire door manufacturers of Brooklyn, N. Y., had been recently promoted to western sales manager of the company with headquarters at Chicago. Mr. and Mrs. Moring and their son George, Jr., were motoring through to Chicago when Mrs. Moring, who had been suffering from a cold was taken ill. A stop was made at Jamestown, Ind., with friends, and overnight Mrs. Moring was stricken with pneumonia. After a three-day illness she passed away. The news upon reaching Indianapolis created quite a shock and the sympathy of his many friends in the building business is extended to George and his son.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE. NOTICE TO CONTRACTORS.

Notice is hereby given that the School Board of Posey Township, Quercus Grove, Switzerland County, Indiana, will receive sealed bids at the office of the secretary in the town of Patriot until 2:30 P. M., February 26th, 1923, for the furnishing of all materials and performing all labor for the construction and completion of the grade school building to be located near the town of Quercus Grove, Switzerland County, Indiana, according to the plans and specifications now on file in the office of the secretary, also in the office of the State board of Accounts and the office of the Architect, Karl P. Henkel, 108 Heinemann Bldg., Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of \$15.00 to be held in escrow for the return of said plans and specification to the architect on or before March 8th, 1923, after which all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on form 96 bidding blanks. Each bid shall be accompanied by a certified check upon a solvent bank made payable to the treasurer, Mr. George Platt. In the amount of \$400.00 (four hundred dollars), tendered as a guarantee that the

bidder will, if awarded the contract, enter into bona fide agreement with the School Board of Quercus Grove, Indiana, for the contract and furnish sufficient bond of 100% of the contract price.

If for any reason whatsoever the bidder shall fail to enter into proper agreement, or fail to execute a proper bond the full amount of the certified check shall be retained by the School Board as liquidated damages. The estimate cost of this building is \$12,000.00.

The School Board reserves the right to reject any or all bids, and waive any defects or informality if deemed in the interest of the School Town of Quercus Grove, Indiana, so to do.

Dated this 6th day of February, 1923.

HIGGIN ALL METAL SCREENS

The frames are made of galvanized steel, enameled both inside and outside in any color desired.

They are only 7/16 inch thick and 1 1/8 inches wide, or about half the width and thickness of wood frames.

Owing to the durability of the frames, we use only non-rusting wire cloth woven from commercial bronze wire.

HIGGIN SCREEN DOORS

The screen doors reflect more clearly, perhaps, than any other one thing the quality of a screen installation. Higgin Doors are built to order. In width of rails, finish, and kind of wood used, they match the corresponding house doors.

Let us furnish without cost or obligation estimates of cost.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

REDUCTION OF BUILDING CONSTRUCTION COSTS HELD POSSIBLE.

Adoption of Standard National Small House Building Code Advocated.

Reduction in building costs it is contended will follow the adoption of the model building code for small dwellings just issued by the Department of Commerce, according to Architect D. Knickerbacker Boyd, member of the American Institute of Architects and head of the Structural Service Bureau, Philadelphia, Pa.

This code is the work of a committee of brilliant architects and engineers appointed by Herbert C. Hoover, and is the outgrowth of an investigation instituted by the United States Senate Committee in 1920 to investigate the high cost of building construction.

Senator William Calder, of New York, went to many cities to obtain data.

The net result of the inquiry was to give publicity to the fact that the majority of the building codes throughout the country insist on the use of an excess and wasteful amount of building material in the construction of all classes of buildings. When Mr. Hoover took office he set about providing a remedy for this state of affairs, and a model code providing a remedy covering the small house has just been issued.

The most striking of the excess requirements found was that in many cities the building code demanded a twelve-inch and even greater thickness for the outside walls of a brick house. A survey of the country by the United States Bureau of Standards disclosed the fact that in many large cities brick walls eight inches thick for the first and upper stories were being successfully used in countless thousands of houses. Cities compelling a greater thickness than this are adding an extra and needless burden to the cost of a brick house in the construction.

The new code, recognizing this, specifies solid eight-inch brick walls for the upper thirty feet, or thirty-five feet including the gable, of a residence. This height would include three full stories

above the ground and an attic. This recognition of the enormous strength of an eight-inch brick wall will bring the cost of a well-constructed brick home down to about that of so-called cheaper and less desirable substitutes in most sections of the country.

Attention is called to the fact that the new brick hollow wall is recognized in the code and is specified as desirable and safe for two-story and attic houses.

NO DIRECTORS MEETING THIS MONTH.

As previously decided at the January monthly meeting there will be no meeting of the Board of Directors of the I. S. A. in February.

The next directors meeting will be held at Indianapolis, Saturday, March 10th.

NEW PIPE ORGAN AT INDIANAPOLIS REALLY A REMARKABLE INSTRUMENT.

Indiana has one of the finest organs in the Middle West, a fact that may be of interest to the state architectural profession. It is located in the Tabernacle Presbyterian Church, 34th St. and Central Ave., Indianapolis' newest and most handsome house of worship.

The specification for this organ was drawn by John A. Bell, organ architect, of Pittsburg, Pa., who superintended its construction and installation.

Casavant Freres, of St. Hyacinthe, Quebec, one of the famous organ manufacturers of the world were the builders.

That some conception of the magnitude of the instrument may be obtained the following features are set forth:

This organ has four keyboards for the hand in addition to the usual pedal section, making five separate sections each of which is a separate organ in itself. Musicians will be interested in the technical details regarding these divisions.

The great organ, which contains ten stops, each with a complete set of pipes of seventy-three notes. In this organ are the "celestial harp" and the "French horn."

The swell organ, with eleven stops, each with seventy-three pipes. This section contains the "Oboe," "Vox Humana," "Vox Celeste" as well as other varieties of tones to make a completely balanced section.

The choir organ, with seven stops of seventy-three pipes, each including the "Clarinet," the "English Horn" and the "Concert Flute."

The echo organ, with six stops. In this organ are the "Cathedral Chimes," "Flute Celeste," "Vox Angelica" and "Vox Humana." The Vox Angelica stop produces an interesting and delicate string tone, produced by the use of two ranks of pipes.

The pedal organ, containing eight stops. Here is the foundation of the whole instrument, without which a large part of the volume would be lacking.

Each of the first four sections named is enclosed in a separate expression box which greatly increases the tone quality. The organ contains over 2500 pipes, thirty couplers and twenty-seven pistons placed under the various keyboards, for the purpose of operating the various stops in groups or singly. The modern piston enables the organist to change his combination without taking his hands off the keys. The action of the organ is electric and it is possible to play with ease the most rapid passages. A large blowing plant in the basement driven by an electric motor supplies the wind for the bellows of the organ.

ATTENTION OF INDIANAPOLIS ARCHITECTS.

The regular monthly meeting of the Indianapolis Architects Association will be held at the Artists' Club, When building, Wednesday, February 14, 8 p. m.

In addition to the regular program there will be an exhibit of the work of Artist Randolph Coats. The evening will conclude with a buffet lunch.

ORGANIZATION AND CURRENT NEWS

EVANSVILLE

Associated Building Contractors
Member State A. B. C.

Geo. L. Miller.....President

Office, 411 Sycamore St.

YEAR STARTS OFF WITH BIG BURST OF BUILDING IN EVANSVILLE.

Early indications, taking January building performance as a criterion, are that 1923 will be the biggest building year in the history of Evansville. This statement is based on the report of Building Inspector Ed. C. Kerth for the first month of the year. The reports strongly bear out the prediction of local building men that the year will see an unusual amount of building, mostly of the residential class.

During the month just past, forty-four residences were licensed, the total amount involved being \$119,250. These figures completely outstrip those of January, 1922, when fourteen houses were licensed at a total investment of \$49,800. The fact that only four months of 1922 saw residence totals greater than that of the first month of this year also indicates an unusual year. The building boom this year is calculated to begin in March. If this prediction is true, totals for the three or four months of the year in which the great amount of building is licensed will see figures never before thought of in Evansville. It is the opinion of building men that the pace started during January was not a temporary spurt, but that the stride will be maintained throughout the year.

All classes of buildings licensed during January, 1923, involved the expenditure of \$208,000. There were 116 permits issued. In January, 1922, 66 permits were issued for \$85,432 worth of work. This was a gain of 143.47 per cent over the corresponding period a year ago.

TOOK GOOD CARE OF EVANSVILLE'S INTERESTS.

Matt Hallenberger, Mike Elpers, and Phillip Kessler went to Michigan City as delegates from the Evansville A. B. C.'s, and gave them up there to understand "Etown" was still on the organization map. They had to admit that Evansville building operations during 1922 were not so brisk as might have been desired but their come back was "Watch Evansville next year."

The local A. B. C.'s did not make a lot of fuss last year but is holding together well and managed to keep conditions pretty well shaped up which, after all, is most essential.

BUILDING NEWS DAILY GATHERING IN VOLUME.

Prospects continue to grow brighter and brighter day after day, and week after week in Evansville.

Hardly a day passes that there is not a reminder in the local papers that under the surface building affairs are anything but dormant even though the midst of the winter is at hand. Contractors are in a cheerful mood looking forward to a busy season when spring comes. Why shouldn't they be, for the building news tells of new factories, schools, mercantile buildings, apartments and residences, bids for which are to be received soon, plans for which are in course of preparation or are being contemplated, the latter stage being substantiated by a strong tone.

CHIPS AND SHAVINGS.

Spirited bidding marked the endeavor of Evansville general contractors to land the contracts for two new residences for Fred Miller, Sr., and Fred Miller, Jr., the past week. Those figuring and their figures were: C. F. Kirves, \$36,476; C. Kanzler and Son, \$36,309; Jacob Bippus and Son, \$37,575; Anderson and Veach, \$43,818; Ed Dubber, \$36,540.

The general contract for an addition to the Krauss Laundry was recently awarded to John Wilkins. It is estimated to cost \$8,000.

HOPS OFF AT GOOD CLIP.

Ft. Wayne Building Soars at Start of the New Year.

The month of January was an exceptionally good month of home-building in Ft. Wayne, according to the report of the city building inspector. During the month permits were issued for 56 new homes, which is an unusual number for the month of January when building activities are as a rule very inactive. Ninety-nine building permits were issued during the month, with an estimated value of \$390,885. This fi-

gure is less than the estimate for December, but is much greater than the figures for January, 1921 and 1922. During the first month of 1921 the estimate reached but \$98,325 and during January, 1922 but \$136,660.

Some idea of the increased volumes of building business in Ft. Wayne for the first month of 1923 is brought out by the above comparison showing a 318 per cent gain over the corresponding period in 1921 and a 186 per cent gain over January last year.

STRUCTURE FOR EXCLUSIVE USE OF MEDICAL AND ALLIED PROFESSIONS PLANNED.

An office building of six or seven stories, to cost between \$200,000 and \$300,000, is to be erected by the Wayne Pharmacal company on property now owned by the company at the southeast corner of Berry and Ewing streets, according to final decision reached at the annual meeting of stockholders of the company. Work on the new building will be started this year and the building will be occupied by September of 1924, it is announced.

The building will be for the exclusive use of medical men, dentists and allied professions and will embody all the newer principles of professional office buildings. It will be constructed of reinforced concrete.

CAME THRU AS PER AGREEMENT.

Northern Indiana building contractors put in a good representation at the annual A. B. C.'s convention at Michigan City, living up to the promise made a year ago that if the convention was awarded to the northern end of the state the builders up there would be loyal in their support of the big meeting. When the time came Northern Indiana made good.

Ft. Wayne, Gary, Hammond, South Bend, Huntington, Kokomo, Lafayette, Peru, came through strong. Then too, central Indiana, represented by Indianapolis, Anderson and Muncie was on hand, while even the southern end of the state with Evansville, Terre Haute, Vincennes, Princeton and Scottsburg sent delegates to answer "present."

South Bend with eleven association members present, had the largest local delegation on hand, excepting Michigan City.

E. L. Danner, Kokomo, "old faithful," took three other of his colleagues along. Elmer never misses an A. B. C.'s meeting no matter where it is held.

Those from Ft. Wayne present were: Max Irmscher, Eph Dailey, John Kreidt and V. J. Cramer.

WAIVER OF LIEN.

None this week.

FURTHER PLEA MADE.

State Contractors Asked to Extend Organization Effort.

In speaking to the state contractors who gathered recently at Michigan City in annual convention, Attorney Harry Fenton, Indianapolis, counselor for the Associated Building Contractors of Indiana impressively and in no undecisive tones reminded his auditors that the hope of the builder in the successful pursuit of his business lay in the protection afforded him through organization. It is the power of numbers, the force of unity, a definite plan, he contended, only possible through association effort that will make it possible for the contractors to obtain and protect their rights. He referred to the men who had conceived the state association of contractors several years ago, to the men who had carried on the idea and those, today, who are sincerely striving, giving of their time and money, to effect policies that will further the progress of the industry. It had not been a vain attempt, Mr. Fenton said, for much headway had been made even to the extent of securing the assistance of the various component parts of the building industry in Indiana in moves toward advancement. This in itself is advancement over the old order. For illustration Mr. Fenton referred to the efforts that had been exerted by the officials of the State Architects' Society, the State Building Trades Council and the Engineers Association in conjunction with the State A. B. C.'s toward the securing of a State Building Code which had re-

sulted in Senate Bill, 140, a document Mr. Fenton declared to be the most needed progressive and constructive bill ever advanced by Indiana building interests.

The speaker pleaded earnestly for the co-operation of every contractor in Indiana in the endeavor that is being made by the Associated Building Contractors.

Nor did he neglect to call attention to the organization Labor ceaselessly is seeking to perfect while many contractors fail to heed the necessity for it though the other side constantly brings it into play against the contractor. Mr. Fenton reminded his hearers that possibly some day Building Labor might be united solidly in one big organization just as the Coal Mining Labor is, and concluded with "What will you do then if you are not organized?"

"There must be craft organization, you men must maintain such, but, for goodness sake, have your big associated state organization also, and back it to the limit," said Mr. Fenton.

"Then, too, there is the apprentice problem. I am glad you men have decided definitely to encourage the employment of apprentices. Though I am an attorney, I was an apprentice plumber once. Very few know that fact. I did learn to thread pipe but that was about as far as I got. You see my boss liked his beer and in learning the plumbing trade my chief duty was to rush the can! Now let's improve the environment for the boy when we stand by him and take him in to learn. We need more skilled workmen, we need the boys, it is up to you men to teach them that building may go on.

"Get back of your organization men, interest the other fellow in it, in the end it will return manifold benefits."

GAINS SHOWN ALL AROUND.

Reports just issued by the city building inspection department show that building activity in Indianapolis in January, 1923 was much more brisk than that of the corresponding periods of 1922 or 1921.

According to the latest announcement the comparative January figures for the three years are:

Year	Per	Est. Val.
1921	331	\$1,025,529
1922	403	580,706
1923	619	2,021,138

This shows a 249 per cent gain for 1923 over the January, 1922 figures and a 97 per cent gain over the same period in 1921. Again, there were 288 more permits issued during the past month than in January 1921 and 216 more than in January 1922.

Not a bad start for the new year!

NEW FIRM FORMED.

Mr. D. A. Stackhouse formerly with the General Builders Supply Co., for four years, recently formed a partnership with George Moring, with offices at 1130 Hume Mansur building, Indianapolis. The new firm will be known as the Moring-Stackhouse Co., and will carry a full line of fire resistive doors.

MEETING NIGHTS

General meeting every third Tuesday evening.
General contractors meet second and fourth
Monday evening.
Master plumbers every Thursday evening.

ATTENTION CONTRACTORS!

Here is a real opportunity for the contractors' association and individual contractors of Indiana.

Proposed legislation under the head of Senate Bill No. 151 has been introduced into the State Senate and is now under consideration.

This bill, if passed, would give an employer the absolute right to work with his employes without having to ask the permission of any Labor Union Business Agent or anyone else. It also provides that no employes be interfered with in their work by Labor representatives or anyone else.

Every contractors' association and each individual contractor in the State should get back of this bill and lend their combined support for the passage of this bill.

Senator Hill, the author of the bill in question, may be a farmer, but he has demonstrated that he is possessed of more good, old, common, horse-sense than some of the other law-makers who gather at the State House. More power to him!

"BALL, ONE!"

The Building Trades Council at Chicago grew most magnanimous and waited upon the contractors of that city to inform the latter that the Trades were willing to sign up at a uniform scale of \$1.25 per hour for all crafts.

Even when the Chicago contractors went so far as to get out their spy-glasses they couldn't see the proposition. It might be added it wasn't foggy or cloudy either.

AND JUST WHEN THE OLD OVER-COAT WAS ABOUT TO BE DISCARDED.

Zero weather swooped down over the Calumet for a spell and with an icy breath chilled everything but the coal men's ambitions and anticipations.

That was a scurvy trick when everybody was gloating because they believed old lady Nature had hidden the ground hogs shadow.

There is a dispute on now since some are holding that the said ground hog does not belong to any union, knows

nothing about an eight-hour day, and may have slipped out early before most of us were up and got a peep at a sun rise streak that filtered through the cloudy veil.

Be that as it may, its good and cold in northern Indiana. How is it over your way?

UNDER ADVISEMENT.

A committee from the Calumet Building Trades' Employers' Association met with a committee from the brick-layers' union February 1, and submitted to the latter the B. T. E. A., wage proposition for 1923-24. Since the craftsmen's committee did not have full power to act it will submit the contractors' offer to its local for instructions.

CALUMET BUILDING PROGRESS.

The Griffith School is to have a new heating plant, also four rooms and gymnasium addition. Architect Mac Turner is preparing the plans which will be out for bids about February 20th. Estimated cost \$40,000.

All because the bedrooms were too small to comply with the State law, the Dickson hotel project which was to have been let February 1, has been postponed. We didn't know the State was solitious about the traveler's comfort. There is not much rest in sleeping standing up, and it is nice to have room in which to turn over.

It's hard to get the contour of a house completed before it is snapped up. Rhodes & Graves who are building a \$12,000 bungalow on Dyer boulevard can back up that argument. That was their experience the past week.

NEW SPIRIT GRIPS THE MUNCIE CONTRACTORS' ORGANIZATION.

The Muncie A. B. C.'s, like many other organizations, though holding together in times of stress, has, in the serene moments of quietude and through periods when no untoward conditions have arisen to impede building operations, been inclined to grow careless and just allow matters to drift. The members just "rode" along a good deal like others giving little thought to preparedness under the supposition that when the occasion demanded sufficient force could be commanded to take care of the situation. The result has been that attendance at meetings fell off and finally the meetings themselves lagged, became irregular and then ceased. The men all held to their faith in organization and did not give up their membership, but, as said above, just allowed things to drift.

Just before the State A. B. C.'s, convention there was an attempt to get the local together again and a real meeting was held, the first in some time. There was a good attendance and it soon cropped out that interest was not dead, merely dormant.

The fallacy of the policy of lethargy that has been allowed to creep in has dawned upon the members and a determined effort is to be made to rehabilitate the Muncie Association and hold it on the job at all times. Since the delegates, Charles Rowe and Jerry Gallivan have returned from the Michigan City convention they have impressed the local contractors with the go-ahead spirit that is ruling the State A. B. C.'s, and Muncie means to follow just such a policy from now on.

NEW ELKS' TEMPLE PRODUCT OF LOCAL MEN, DEDICATED.

A fitting climax to the best building construction project started and completed in Muncie in 1922 marked the dedication ceremonies held at the new Elks Temple Sunday afternoon, January 28th. This lodge quarters, complete in every detail, costing \$250,000, is one of the best and handsomest homes of the Elks anywhere in Indiana, not only that, it is said to be the most elaborate of any lodge home in the central west. No effort was spared by the Muncie Elks, the architect or the contractor to achieve this end. There is a spacious lobby, a grand ball room, gymnasium, swimming pool, bowling alleys, committee and social rooms and a dormitory.

Prominent Elks from all over the state were on hand for the ceremonies which made the dream of years of Muncie Elks a reality.

The building, a most substantial addition to Muncie's structural values, is the product of local artisans of the building crafts, was designed and planned by Architects Houck & Smenner, local men, and erected by General Contractor Joe Snyder, the latter a member of the Associated Building Contractors of Muncie.

ACQUITTED THEMSELVES WITH GLORY.

Especial credit is due these men for the way they handled the arrangements for and "put across" the Michigan City end of the Fifth Annual Convention of the Associated Building Contractors of Indiana, held in that city in January.

Publicity Committee—Charles Leist, C. L. Mathias, Finance Committee—E. A. Simpson, H. H. Herbert, Henry Koelln. Entertainment Committee—Wm. E. Southard, J. C. Fendt, W. J. Krause. Automobile Committee—W. J. Krause, Vincent Milcarek. Decoration Committee—E. Blomquist, George Johnson, L. O. Ludwig, Albert Bader. Reception Committee—E. Blomquist, John Bartels, Howard Jones, W. L. Looker, Fred Telschow, John Chinske, Chas. L. Cushing, Vincent Milcarek, J. A. Kitchell, W. J. Krause, Raymond E. Olson. Registration Committee—Chas. Leist, chairman.

This crowd was par excellence when it came to looking after the welfare of the delegates and making them feel at home.

Fireproof, Insulating Building Products from Waste

By the **STOWELL PROCESS** waste materials, cinders, sawdust, old news papers, strawboard, and fibre boxes and cartons, can be converted into fireproof, acid-proof, cheap, strong, and durable building products such as:

Composition Lumber
Nonbearing Partition Blocks
Bakup Tile
Insulating Brick & Slabs
Pipe & Boiler Covering
Stucco Base
and
Sheets For Insulating
Walls, Roofs, Ceilings.

Advertising Rates Furnished on Application.

Advertising forms close Saturday of week pre-
ceding date of issue.

Entered as second class matter August 29, 1919,
at the Post Office at Indianapolis, Indiana, under
the Act of March 3, 1879.

EARLY INDICATIONS ARE THAT 1923 WILL OUTSTRIP 1922 IN BUILDING VOLUME.

Huge Totals of Late Attributed to Ex- tension of Operations Over An "All-Year-Season."

American building activity during 1923 will surpass all previous records with an estimated total expenditure of \$5,000,000,000 according to reports from architects, contractors and manufacturers of building materials.

It means that the 1922 volume will be exceeded by more than one billion dollars.

Tables prepared by the Architectural Forum from compilation of replies from 1,767 architects show that builders have carried their operations through the winter, maintaining an almost steady line from the heavy demand of the fall and winter months of 1922.

Dividing the total estimate in general groups it is seen that plans for schools, colleges and similar public structures lead the list with \$870,034,000. Apartments are next with \$662,885,000, and industrial buildings are third with \$548,037,000.

An interesting comparison is shown in the total for dwellings, which is \$414,132,000, almost as great as the total for offices and also for hotels.

Economic experts, studying the construction field, declare the basis for this unprecedented activity lies in the actual lengthening of the so-called "building season."

Building operations in 1922 reached unexpected heights during the summer and carried on through the fall and winter with little abatement. In many localities contractors completed work which in other years would have been carried over and, in mid-winter, accepted new contracts for prompt delivery.

The result has been far heavier orders for steel, cement, trim and other build-

ing materials from the very start of the year 1923 than at any time in the history of the country.

Contractors, realizing the advantages of maintaining their forces of workmen intact from season to season, have carried work right along except in extremely cold sections.

The early peak load of demand on freight traffic is expected to feel relief from this steady movement and manufacturers also have been able to pass along the benefits of the longer season.

Advertisements for contractors in current periodicals specify that contracts will be taken for sixty and ninety day delivery of homes, a hitherto unheard of thing thus early in the year. This means that materials and labor are promptly available and that wherever possible the work will be pushed to completion, forestalling the possibility of a builder being buried beneath a mass of unfilled contracts when the demands of the so-called building season are in full swing.

The greatest difficulty faced by the building industry in America has been the problem of the short season. Twelve months of proposed activity were forced into seven months or less.

Transportation became an acute problem affecting all basic industries. Building materials, coal, foodstuffs and other essentials were hopelessly tied up semi-annually.

The salvation rested in a spreading out of the traffic demands of the materials industry and lines affiliated with the construction field over a longer season.

During 1922 the first effective demonstration of these claims was given to the public and with a record start, 1923 is expected to clinch the argument.

INDIANA SHEET METAL CON- TRACTORS TO MEET NEXT WEEK AT TERRE HAUTE.

Fourth Annual Convention.

The fourth annual convention of the Sheet Metal Contractors of Indiana will be held at Terre Haute the coming week, February 21 and 22. Indications are that there will be several hundred contractors and men associated with the metal business at the two-days' session to be held at the Elks Club. In addition to the business meetings a banquet and theatre party have been arranged for the delegates.

FIRST BUILDING FIGURES IN INDIANA FOR THE NEW YEAR SHOW BIG GAINS OVER START MADE IN 1922.

As a starter, January, with her building returns from Indiana's eight leading cities, was right on the job and got away with a building volume that will aid, in the final accounting, to bring predictions true that the year of 1923 will see a greater building construction activity than was witnessed in 1922. When January, the hub of the fall and winter season, can turn in over a three million and a half dollars building total one is inclined to wonder what the future spring and summer months will do when weather conditions are propitious to building activity and operations are in full swing.

Last year was a record one for Indiana as regards building, but, even at that, the infant 1923 has the edge on the early days of 1922 since January, this year, has turned in a total estimated valuation greater by over a half a million dollars than the combined figures registered in January and February, last season. The gain for the past month over the corresponding period a year ago is 172.5%. There were also 538 more permits issued in January, 1923 than during the same period in 1922.

Of the eight cities listed seven of them showed substantial gains over the January, 1922 figures. At the head of the column rides little Richmond with a gain of 317%, to be followed in order by these others: Indianapolis, 249%; Gary, 234%; Hammond, 220.8%; Ft. Wayne, 186%; South Bend, 171.5%; Evansville, 143.47%. Terre Haute failed to "make the grade" and trailed with a 186% loss.

The official returns of the various city building inspectors for January are:

	1923	Per	Est. Val.	1922	Per	Est. Val.
Evansville	116		\$ 208,000	66		\$ 85,432
Ft. Wayne	99		390,885	42		136,660
Gary	30		158,200	17		47,206
Hammond	32		159,150	21		49,600
Indianapolis	619		2,021,138	403		580,706
Richmond			55,800			13,375
South Bend	254		471,777	106		173,762
Terre Haute	108		73,868	65		211,645
Total	1258		\$3,538,818	720		\$1,298,386

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE NOTICE TO BIDDERS.

Notice is hereby given, that on the 9th day of March, 1923, at the office of the Township Trustee, at Upland, Grant County, Indiana, at the hour of Two o'clock P. M., the undersigned Jefferson School Township, of Grant County, Indiana, will receive bids for the erection and construction of a one-story and basement brick High School and Grade School building, in the town of Upland, and for furnishing materials, and the performance of all labor required for the general construction of said building.

Separate bids will be received for the general contract, plumbing, heating and ventilating, and electric wiring of said building. All bids shall be in accordance with plans and specifications in detail in the office of Everett L. Brown, Architect, Bluffton, Indiana, and in the office of the State Board of Accounts, State House, Indianapolis, Indiana.

Separate bids will also be received for the repair of the school building at the town of Matthews, in said township, according to plans and specifications for plumbing on file in the office of Harry G. Bowstead, Architect, Glass Block, Marion, Indiana, and also in the office of the State Board of Accounts at the State House, Indianapolis, Indiana, and according to plans and specifications for heating and ventilating now on file in the office of Snider & Rotz, Merchants Bank Building, Indianapolis, Indiana, and also in the office of the State Board of Accounts, State House, Indianapolis, Indiana.

All bids must be submitted on forms as prescribed by the State Board of Accounts or they will not be considered and the right is expressly reserved to reject any or all bids. Each bidder must deposit with his bid a certified check made payable to Jefferson School Township, Grant County, Indiana, in an amount equal to five per centum of his bid. In the event the bidder fails and refuses to enter into a contract and bond, if a contract is awarded to him, within ten days after notice of the acceptance of his bid, said check, and the amount of money represented thereby shall become the property of said Jefferson School Township, which sum is agreed upon as liquidated damages for the failure of the bidder to enter into the contract and furnish bond for its faithful performance.

Each bid must be enclosed in an envelope and the name of the bidder and the class of the work named in the bid, placed on the outside thereof.

The said Jefferson School Township reserves the right to hold the lowest and best bids open until such time as it is able to sell bonds to cover the cost of said building.

The estimated cost of fully completing all of the above and foregoing work is: One Hundred Ten Thousand (\$110,000.00) Dollars. Plans and specifications of all of said work may be seen at the office of the Trustee, Upland, Indiana.

JEFFERSON SCHOOL TOWNSHIP, GRANT COUNTY, INDIANA,

By Ross Troyer, Trustee.

Feb. 17, 1923

SCHOOL HOUSE NOTICE TO CONTRACTORS.

Notice is hereby given that the School City of Lafayette, Indiana, Tippecanoe County, and the Board of Trustees thereof, will receive sealed bids at the office of the Said Board of Trustees, located in the Vocational Building, Southeast corner of Sixth and Columbia Streets, Lafayette, Indiana, until 10 o'clock A. M., March 8, 1923, at which time and place same will be opened, read and considered for the construction of an Annex to the Oakland Grade School Building, located at the intersection of Main and Kossuth Streets, and for the installation of the Heating and Ventilating System for said building, and for the installation of Plumbing and Sewer Systems for said building, and for the installation of an Electric Wiring System for said building, for uses of said school city, and to be constructed on site adjacent to present grade school, and according to plans and specifications as provided therefor by F. P. Riedel and T. A. Zink, Architects, No. 821-822 Lafayette Life Building, Lafayette, Indiana, and as further approved by the State Board of Health and State Board of Ac-

counts. Estimated cost of Building, Thirty-Five Thousand Dollars (\$35,000.00.)

The plans and specifications are on file for the inspection of bidders at the office of the Board of School Trustees, Lafayette, Indiana, and at the office of Riedel & Zink, Architects, and the State Board of Accounts. Copies are available to bidders for use at their own offices upon deposit with the Architects or Trustees, of Twenty-Five Dollars (\$25.00) to guarantee safe return of such plans and specifications. Bidders must familiarize themselves with such plans and specifications before bidding and no departure from the same will be considered. Proposals will be considered for:

1. General Construction of Building.
2. Heating and Ventilating.
3. Plumbing.
4. A Combination of Heating, Ventilating and Plumbing.
5. Electric Light, Wiring and Fixtures.

All bids shall be accompanied by the certified check of bidder in sum equal to at least five per cent (5%) of his gross bid or bids. Checks to be made payable to Treasurer of the Board. In case a bidder, whose bid shall be accepted, shall not, within five days after notice of such acceptance perform his bid by entering into a written contract with the Board, in the form satisfactory to the Board, to execute the work and construct and complete the building, and within that time secure the performance of his building contract by a bond in the form satisfactory to the Board, with Surety or Sureties to the approval of the Board, his certified check and the proceeds thereof shall be and remain the absolute property of the Board as liquidated damages for such failure it being impossible to estimate the amount of damages such failure would occasion to the Board.

All bids and proposals shall be upon forms prescribed by the State Board of Accounts. Unless bids are accompanied by certified check as above and upon forms as above no attention will be given same. Forms will be furnished by the Architects upon request.

The successful bidder will be required to enter into his written contract and also deliver his bond with approval surety to the School City of Lafayette, Indiana, in a sum equal to full amount of contract. The successful bidder will be required by the terms of this contract to enter into the active prosecution of his work immediately and complete said work at the time to be agreed upon. The Board of Trustees for the School City reserve the right to reject any and all bids without giving any reason therefor.

School City of Lafayette, Tippecanoe County, Indiana.

ALVA O. RESER, President.

HERMAN M. BAHLS, Secretary.

MRS. SARAH WESTFALL, Treasurer.

Feb. 17, 1923.

SCHOOL HOUSE. NOTICE TO CONTRACTORS.

Notice is hereby given that the School Board of Posey Township, Quercus Grove, Switzerland County, Indiana, will receive sealed bids at the office of the secretary in the town of Patriot until 2:30 P. M., March 5th, 1923, for the furnishing of all materials and performing all labor for the construction and completion of the grade school building to be located near the town of Quercus Grove, Switzerland County, Indiana, according to the plans and specifications now on file in the office of the secretary, also in the office of the State board of Accounts and the office of the Architect, Karl P. Henkel, 108 Heinemann Bldg., Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of \$15.00 to be held in escrow for the return of said plans and specification to the architect on or before March 8th, 1923, after which all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on form 96 bidding blanks. Each bid shall be accompanied by a certified check upon a solvent bank made payable to the treasurer, Mr. George Platt. In the

amount of \$400.00 (four hundred dollars), tendered as a guarantee that the bidder will, if awarded the contract, enter into bona fide agreement with the School Board of Quercus Grove, Indiana, for the contract and furnish sufficient bond of 100% of the contract price.

If for any reason whatsoever the bidder shall fail to enter into proper agreement, or fail to execute a proper bond the full amount of the certified check shall be retained by the School Board as liquidated damages. The estimate cost of this building is \$12,000.00.

The School Board reserves the right to reject any or all bids, and waive any defects or informality if deemed in the interest of the School Town of Quercus Grove, Indiana, so to do.

Dated this 6th day of February, 1923.

R. G. BUNGER, Pres.

GEO. PLATT, Treas.

CHAS. B. ROCHAT, Sec.

Members of the School Board of Posey Township and the Town of Quercus Grove, Switzerland County, Indiana.

SCHOOL HOUSE. NOTICE TO CONTRACTORS.

Notice is hereby given that the School Board of Posey Township, Switzerland County, Indiana, will receive sealed bids at the office of the secretary in the town of Patriot until 1:00 P. M., March 5th, 1923, for the furnishing of all materials and performing all labor for the construction and completion of the Patriot High School building to be located in the said town corporation of Patriot, Indiana, according to the plans and specifications now on file in the office of the State Board of Accounts and the office of the Architect, Karl P. Henkel, 108 Heinemann Bldg., Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of \$15.00 to be held in escrow for the return of said plans and specifications to the architect on or before March 8th, 1923, after which all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on form 96 bidding blanks. Each bid shall be accompanied by a certified check upon a solvent bank made payable to the treasurer, Mr. George Platt. In the amount of \$400.00 (four hundred dollars), tendered as a guarantee that the bidder will, if awarded contract, enter into bona fide agreement with the school board of Patriot, Indiana, for the contract and furnish sufficient bond of \$100% of the contract price.

If for any reason whatsoever the bidder shall fail to enter into proper agreement, or fail to execute a proper bond the full amount of the certified check shall be retained by the School Board as liquidated damages. The estimate cost of this building is \$14,500.00.

The School Board reserves the right to reject any or all bids and waive any defects or informality if deemed in the interest of the School Town of Patriot, Indiana, so to do.

Dated this 6th day of February, 1923.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

CITY PLAN LEADERS MEET AT LAFAYETTE.

Move Early Endorsed by Indiana Architects Growing Rapidly.

That the stand taken by many Indiana architects, dating back several years, favoring the promulgation and adoption of the city plan idea by municipalities was not a theoretical dream but a real practical scheme latent with great possibilities has been proven out by that which has followed. Elkhart and Gary, early espoused the scheme, then came along the 1921 State Legislature to pass a law enabling Indiana cities to create city plan commissions. Indianapolis and Evansville, Richmond and South Bend soon fell into line in this progressive move, and Ft. Wayne, Anderson and other cities are now contemplating just such action.

Some idea of the growth in favor of the proposition is evidenced by the meeting held at Lafayette, Wednesday and Thursday of this week when the "City Planners" had their day. Purdue University issued a call to the state leaders in the city planning movement for a conference that resulted in this week's gathering at the Tippecanoe County Seat. The meeting was held under the auspices of the school of civil engineering. Various mayors, city engineers, park superintendents and others vitally interested attended.

The program included an address by J. Clyde Hoffman, Indianapolis, attorney for the Indianapolis city plan commission, who spoke on "The Indiana City Planning and Zoning Laws." D. B. Davis, of Richmond, secretary of the Richmond planning commission, talked on "The Organization of a Planning Campaign." "The Advantage of a City Planning Campaign from the Standpoint of the Realtor," was discussed by E. M. Dickmon, of Evansville, secretary of the Evansville commission.

Harland Bartholomew, of St. Louis, city plan engineer at St. Louis, and consultant at South Bend and Evansville, dwelt on the past and future of city planning based on wide experience. Prof. Leonard S. Smith, of the University of Wisconsin, took for his subject "Housing and Its Relation to City Planning." Robert H. Whitten, city plan

engineer at Cleveland and consultant for Indianapolis, spoke on "Zoning Problems," and James H. Lowry, superintendent of parks at Indianapolis and landscape engineer, made an address on "Parks and Park Systems." A moving picture on zoning was an additional feature.

PLEASE GET BUSY.

All Indiana architects maintaining cost and office systems are requested to send in explanations of same and suggestions to Secy. Harrison of the I. S. A., so that the committee appointed to make a report on office systems for architects' offices at the annual meeting in June can get started on this work.

Any aid in this direction will be greatly appreciated.

BILL TO RESTORE POWER OF INSPECTION OF PUBLIC WORK TO STATE BOARD OF ACCOUNTS PASSED BY THE SENATE.

Proposed Law Holds Interest for All State Architects.

A proposed law, known as Senate Bill, 181, introduced by Senator W. K. Penrod, (Martin, Lawrence and Orange Counties, Republican) that carries with it much of interest to the state architects was passed by the Senate at Indianapolis the past week by a vote of 42 to 3.

This bill has to do with increasing of the powers of the State Board of Accounts and was designed to restore or strengthen findings taken from the board by a decision of the appellate court which ruled that the board had no legal right to go into the matter of examining plans and specifications for public buildings and other public improvements, or of investigating contracts made for same and their carrying out.

There was some lively discussion and considerable debate over the bill during which praise was bestowed upon those at the head of the Board of Accounts for the sincere effort that has been made

by the body to see that the State and tax-payers get what is coming to them. The Senate finally disposed of the bill by the above mentioned vote. It is now to be passed on to the House for final passage.

If the Penrod bill becomes a law it will permit examinations by the state board of accounts of all contracts for public works on petition of the taxpayers affected by the project, and will make it possible for the state board to examine public works as it did before the appellate court made its decision last spring. It is the first of these provisions that several senators termed as the "best hold-down on contractors that could be devised."

It gives the board the authority to examine and investigate contracts to determine whether the specifications are being followed, and if the contract is violated to report the findings to the attorney-general, who could institute proceedings to recover for the corporation affected.

SOCIAL FEATURE DISPLACES USUAL ROUTINE BUSINESS.

Indianapolis Architects in Regular Monthly Meeting.

In lieu of important or essential business matters to occupy the attention of members, those of the Indianapolis Architects Association who met at the Artists' Club Rooms, When Building, Wednesday night for the regular monthly session of the organization turned the affair into a social gathering and a most enjoyable evening was spent by the city architects. There were informal and impromptu discussions on various conditions as they pertain to architectural practice and building construction affairs, with here and there some joviality thrown in.

As an added feature to the meeting there was a pleasing exhibit of the paintings of Artist Randolph Coats in which much interest was shown.

Architect Maurice Thornton, who recently opened an office in Indianapolis was elected to membership in the association. The next meeting will be held Wednesday, March 14th, of which due notice will be made.

Office, 411 Sycamore St.

ALL IN THE DAY'S NEWS.

Hope of Evansville Contractors Thus Constantly Bolstered.

How do these sound? "Modern Three Story Building Planned"; "School First Unit of \$100,000 Building Program Soon Ready For Bids"; "Big Dairy Addition Contemplated"; "Elks' Home To Be Remodeled"; "Many New Homes Planned"; "Big Garage Bids To Be In February 21"; "Church Plans Ready for Contractors"; "Renewed Activity Apparent in Building Circles."

There you have the drift of one day's news as culled from a local paper published in Evansville. So far January, and February to date, have proved to be the most promising early season periods Evansville has experienced in years and there seems to be no let-up to the intention of prospective builders to get new projects started this year. The best part of the whole situation is that an early start in that direction has been made. This, under present indications, means to all intents and purposes that Evansville is in for a real building year.

Last year it was in reality home building that kept things moving in Evansville building circles, but in addition to this type of construction the 1923 building construction endeavor has assumed a much broader scope and is including structures of a larger and more diversified character.

Local contractors, already immersed in a flood of estimating are "going to it" with a vim inspired with confidence by the firm to strong note of determination that sounds back of the new work that is being placed before them to be figured.

CHIPS AND SHAVINGS.

Two homes are to be built at 1528 and 1530 Mulberry street by General Contractors Anderson and Veatch. The houses will cost about \$7,000 each. The company has just completed three houses at 1537, 1535 and 1517 Mulberry street.

Kessler and Riebenthaler, contractors are building a five-room brick bungalow for Louis Kessler on Outer First avenue. Cost will be about \$4,500.

John Wilkins, contractor, has started work on the addition to the plant of the Krauss Laundry. Foundations are being poured.

There were several nice projects for Evansville figured during the past week and it is hoped to award these contracts within the next few days.

Residents out in the West Heights District are clamoring for a school addition to consist of two rooms and a community hall.

And in the meantime local architects are busy getting out plans and preliminary sketches for prospective work, all of which indicates that the rumors going the rounds are not idle myths.

Workmen, likewise, have started in on Phil Raphael's new home on Madison avenue. This project is to arise under the supervision of contractor John Wilkins. The latter is also building a five-room bungalow for Guy Coleman.

Lumber, brick and steel from Evansville is being shipped regularly each week to construction work, outside the city, in the surrounding territory, in Indiana, Kentucky and Illinois.

IN GOOD POSITION TO PLAY HOST

Ft. Wayne To Be All Dressed Up For Next State Contractors' Convention.

The selection of Ft. Wayne as the site for the 1923 convention of the Associated Building Contractors of Indiana was timely, in that the city has done, and gives every promise of continuing to do, as much if not more building construction, in proportion to its size, as any other municipality in the country, standing well toward the head of the list in the matter of building business gains over previous years. The 1922 season was Ft. Wayne's record year she surpassing all previous building efforts put forth in any twelve month period since her establishment. Nor is that all, the new year has started out even more auspiciously than did last season and there are no indications that the gait is

to be slackened. Prospects are most promising and even have assumed, at this time, an early activity affording inspiring hope for the future.

When the state contractors gather in Ft. Wayne she is going to be able to show them some real building construction progress, projects that include everything from extensive home building operations to most modern school construction, industrial buildings, mercantile structures, commercial edifices, financial institutions and even large office buildings.

Ft. Wayne is proud of her building endeavor and welcomes the opportunity to impress upon the building contracting fraternity of the State the enormity of the volume of work that her local building forces have made possible.

WATCH US.

Early Activity In Realty Circles Promises Future Building.

If there is one thing that goes hand in hand with building construction it is real estate activity. Just let the latter drift into stagnation and see what happens to the former. Oh, well, Ft. Wayne should worry! For instance, note this,

Local real estate transactions have been extremely active during the past two months contrary to the usual drop off during December and January. Many real estate firms are reporting excellent records and are giving decidedly optimistic opinions for business conditions during the spring months.

Out in the suburban districts there has been much lot selling and owners have openly acknowledged that these were snapped up for home sites next spring and summer. In the down town districts many buildings have changed hands, the deals having been negotiated for the sole purpose of securing good business locations for new buildings. All of which has cast a bright gleam over building construction circles.

AWARD OF NEW CONTRACTS GETS UNDER WAY EARLY.

New work either actually started or about to be launched in Ft. Wayne is denoted by a number of contracts on buildings awarded during the past two weeks. The contracts include the work at the Y. W. C. A. building awarded to Fred Rump; a new store building for the Loos Grocery company awarded to Harry Kinder; an apartment building for Fred Fell awarded to J. Monroe; a factory building for the Dudlo Manufacturing company awarded to Buesching & Hagerman; a residence for Louis Mommer awarded to Pohlmeier & Miller; a store building for A. W. Manth awarded to Curdes Realty company.

STATE SENATE PASSES BUILDING CODE BILL.

Measure Sponsored by State Contractors' Association Finally Overcomes Opposition.

Especial interest to city and state contractors were the workings of the State Senate the past week, particularly those that pertained to Senate Bill, 140, introduced by Senator Harold Van Orman, Evansville, Ind., having to do with the creation of a non-salaried state building code commission, same to be known as "administrative building council of Indiana." Under the proposed law the council would be composed of chairman of the industrial board, secretary of state board of health, and state fire marshal with twelve appointive members.

This bill is the outgrowth of the effort that has been put forth jointly by the Associated Building Contractors of Indiana, the Indiana Society of Architects, the Indiana Engineering Society, the Indianapolis Chapter, American Assn. of Engineers and the State Building Trades Council in an endeavor to secure a State Building Code that will standardize building requirements throughout Indiana. These organizations have been working for months in order to whip the proposition in shape for introduction before the State Legislature. It has been characterized as the most progressive and constructive building legislation ever proposed by the Indiana building construction interests.

Senator VanOrman, explaining his bill, declared it did not create any new offices or new board, but merely consol-

idated the functions now exercised by the three state boards in the regulation of construction work.

Senator Walter S. Chambers, Democrat, opposed the bill. He insisted that the measure does create a new board, provides for new employes and provides for stringent regulations which, he asserted, would affect even the building of a double house. The bill would create a closed corporation and would exercise more power than any in the state, Senator Chambers declared.

Senator Harvey Harmon of Princeton asserted the measure would give the new board too great latitude in the interpretation of building rules. Senator Joseph E. Henley of Bloomington called the measure the "most dangerous before this Senate."

Though the bill experienced formidable opposition much of it was finally overcome and on the third reading the measure was passed by the Senate by a vote of 27 to 14, and will now be taken before the House for final passage.

BIG PROJECTS OUT FOR BIDS.

Two Made Their Appearance Recently and Another Expected in a Few Days.

They are still prying away at the lid at Indianapolis to get the "building construction jack in the box" to pop out to make everybody happy.

Plans have just been passed out to the local contractors for estimates for the construction of a general office building for Eli Lilly & Co., and also for an additional building at 725 N. Pennsylvania street, for the Young Women's Christian Association. The former structure is to be of fireproof construction, 5 stories, 50x180 feet. The association building will be 5 stories, 125x35x62 and is estimated to cost \$150,000.

Then, too, there is another good sized project for the down town business section, a four story store and office building to be erected by Kresge & Co., at Washington and Pennsylvania streets. Plans, which were prepared by the architectural department of the owner at Detroit, are expected to arrive in Indianapolis most any day now to be figured on by local contractors.

BLOW AIMED AT EMPLOYERS' LIABILITY ACT WARDED OFF IN THE SENATE THIS WEEK.

Move to Relieve Employer of Contractor of Injury Liability Postponed.

Another bill pertaining to contracting to which state senators directed their attention and action was senate Bill 10, designed to amend the employers' liability act to release employers of contractors from liability for injury to employes of the contractors.

Senator Weldon Lambert, favoring the measure, declared a farmer or citizen who engages a small contractor to erect a building or do other work should not be responsible, as he now is, for injury to employes of the contractor. Building trades unions in the state have opposed the bill on the ground that many smaller contractors are not financially able to assume the liability, and workers would be unprotected.

After a short discussion Wednesday

afternoon action on the proposed bill was indefinitely postponed by a 21 to 14 vote.

FEATURES OF THE WEEK IN INDIANAPOLIS CONTRACT AWARD ACTIVITY.

Several Nice Contracts Placed.

The best contracts awarded in Indianapolis the past week were signed up by the Wm. P. Jungclaus Co. and the John A. Schumacher Co. The first named firm picked off the contract for the erection of the Potter Fresh Air School, estimated to cost \$93,000.

While the other contract went to the local firm of Schumacher, the project to be erected is a factory building to be located at Warwood, W. Va., near Wheeling and is to be a factory for the U. S. Fibre Box Co., who has headquarters at Indianapolis.

Another feature of the week was the issuing of a building permit to the Allen A. Wilkinson Lumber Co., for the construction of a \$200,000 warehouse.

Hold Friendly Session.

Another meeting in the Calumet District the past week worthy of mention was that at which the B. T. E. A. directors met with representatives from the Building Trades Council and talked over building matters. The atmosphere of the gathering was most congenial and indicated a relationship that will tend toward a better understanding between the building trades employer and employee in the future, whereby the two may meet to discuss their differences and there will be "no waving of the bloody shirt."

Among other things referred to was the apprentice question and the Building Trades Council promised to co-operate with the B. T. E. A. in getting and training apprentices.

TIME TO SOFT PEDAL ON TAX INCREASES.

It appears to us that, if our representatives in the Legislature are wise, they will strenuously oppose any measure that will in any way increase the taxes on the homes. High taxes will do more to discourage and retard home building than almost any other item that enters into the cost and maintenance of a home.

As matters stand now, with a high city and county tax, and also the possibility of an assessment levy for special public improvements, there is a tax item so enormous to be considered that it really makes one hesitate to build and assume such a burden. Things have reached the stage where it is almost next to impossible, with construction costs where they are, to build a moderate priced home to rent, and get enough rent to care for the taxes and interest on the investment.

Men with money to invest are looking for other lines of investment that will net better returns on their money, than the building of homes. It also discourages the prospective home owner, as the man who purchases a \$5,000 home must pay big taxes which, together with his deferred payments, special assessments and interest, makes it almost impossible for a man of moderate income to pay for a home.

It would seem that any unnecessary expenditures of State or County funds, such as, for instance, the purchasing of a site for and building of a Junior Normal School when we, at the present time have ample facilities for the education of all the teachers that are needed if they were properly used, is another unnecessary move to increase the tax burden.

DIDN'T MEET WITH WARM APPLAUSE.

The weather man had no compassion for us natives of the Calumet District, in fact, he put on a mercury juggling stunt for which only the coal men applauded. Then he dropped the elusive metal and down it plunged to 10 below zero, but almost immediately rebounded and made us, who are not Esquimos, glad. No requests have been filed for a return engagement.

REALTORS AND CONTRACTORS DISCUSS CALUMET BUILDING PROSPECTS.

Members of the Board of Directors of the Building Trades Employers' Association of the Calumet District met at the Elks Club on Wednesday for luncheon with the members of the Hammond Real Estate Board. It was a sort of round table discussion at which attention was directed to general building conditions. Then, too, the matter of training and encouraging more apprentices for the building construction industry was gone into thoroughly. The Realtors pledged their support to the contractors and promised co-operation in all matters that will have for their purpose the best interests of the building industry.

CALUMET BUILDING PROGRESS.

McClay & Brady have been awarded the contract for the construction of a \$15,000 store building triangular shape, 67x90x112, on Sibley street.

The Hammond Dairy Co., is having plans prepared by Architect A. E. Berry & Co. for a new dairy and ice plant building. The structure, estimated to cost \$10,000, will be built at Akron, Ind.

General contractors Bates & Ahlborn picked off the contract for the Kelley Bros. garage in Hohman street.

SHALL 1920 BE REPEATED?Lesson Taught Then That Should Not
Be Forgotten This Season.

Among the things that stand out in making a 1923 forecast may be mentioned the following:

An unmistakable feeling of optimism with regard to all kinds of business.

A larger volume of winter building than has been seen in many years, it ever before.

A rising cost condition, which began timidly some months ago, but which threatens to pyramid into unwholesome inflation.

It seems impossible under present American conditions to separate prosperity from rising costs. Human nature is easily moved to buy when prices are going upward, even when it should be evident that prices are too high. On the other hand it is difficult to make sales at a time when prices are declining, even though good judgment tells us they are pretty low.

It is not too much to say that building wages are in the most chaotic condition since the war. The reaction from wage reduction measures of 1921 resulted in a breaking off of amicable relations between unions and employers in many cities and unmeasured reprisals by unions wherever they gained the upper hand. The result has been relatively high scales and (what is worse) scales that bear little relation to each other but rest simply on the coercive powers of the various unions.

Materials have also advanced under the stimulus of demand. The wonder is, under these conditions, that total building costs have not advanced more than they have. The relative economy that many owners are realizing can be credited to the improved efficiency of contracting organizations, which have undoubtedly been operating with less waste and with narrower margins of profit than ever before.

The burden of the next few months will continue to rest heavily upon the contractor. If he should lose his head and charge all the traffic will bear, we might see some such hectic period as that of early 1920, but the same kind of reaction would surely follow. It is evidently not possible to bring about any wholesale wage revision. Wage fights under existing conditions would cost more in lost time and bad blood than would be saved by possible reductions. All that can be hoped for is to hold the situation fairly level and to effect some realignments between crafts.

Liberal wage is the element of cost that should be paid least grudgingly. No dollar gets back into the channels of trade quicker than the dollar that goes in the pay envelope. No lasting prosperity can be based on anything but full pay envelopes and many of them. Removal of union restrictions on production is more important than hammering at wage scales. Even in seeking this end, direct methods may be unavailing. The trade school, encouragement to apprentices and the fostering of the open shop movement are the measures most likely to result in ultimate relief.

In brief, where last New Year found us searching for means to stimulate building, our chief care today must be to avoid the worst phases of a runaway building boom—the kind of boom that is inevitably followed by severe depression. Let us see if we have learned anything from our recent heights and depths of industrial fortune.—(February Bulletin, National Assn. Bldg. Trades Employers.)

BOOST THINGS ALONG

Encouragement of Building Now Will Relieve Congestion Later

Every encouragement should be given to a continuance of the present pace in construction work. The taking of early contracts, purchase, shipment and storage of materials for building projects will release the heavy grip of peak load demand and unbalanced seasonal activity which have held the American construction industry at its mercy for so many years.

The experience of 1922 and the progress shown thus far in the new year demonstrate amply the fallacy that any "season" for home building exists. It appears that 1923 will offer definite assurance of these facts which builders have attempted to impress upon the public for years.

If the transportation system can be kept at even keel, and the demands of traffic spread over a twelve months' period instead of approximately seven, while stocks are kept moving from the manufacturer to the job, America's annual building bill can be materially reduced in proportion to the amount of work done. Semi-annual congestion on railroads, affecting building materials, foodstuffs, coal and a great many other basic activities also will be cleared up.

That the railroads not only recognize this spreading demand but are planning active representation in the building boom itself is shown by reports of the Railway Age, which places the possible construction expenditures by roads at more than \$900,000,000 this year.

This estimate is based upon the actual budgets of thirty-one roads controlling 40 per cent of the nation's trackage, which show \$387,000,000 set aside for 1923 work. Much of this total will go

into stations, underpasses, viaducts, bridges, terminals and shops, and general betterments, the need for which has become acute.

An estimated quota of \$5,000,000,000 has been made for all building in the United States in 1923. This was based upon architects' reports to the Architectural Forum which received detailed statements from 1,767 architects in all sections of the country and assembled them by type of construction, by states and districts.

The result assures not only the biggest year for 1923, but that it will exceed 1922—a record-breaker in itself—by at least \$1,000,000,000.

There is no better time than now for the prospective builder to get his project started, for the contractor to buy his materials.

EXTENT OF PROSPERITY IN BUILD- ING UP TO THE CONTRACTORS.

Organization Offers The Surest Safe- guard.

E. E. COLE, Secy.

Calumet Building Trades Employers'
Association.

Every notice how gun-shy some fellows are when it comes to soliciting new association members? Meet the average member, ask how business is going and nine chances out of ten he'll say slow, not much doing; yet, ask that same man to get a new member and things change rapidly; invariably he's too busy.

More members are needed, more members are wanted not only in the Calumet District, but all over the State. Not only from a financial, but from a co-operative standpoint are larger associations necessary. There is much of truth in the adage, "United we stand, divided we fall." The time is not far off until the contractor will have to make known his stand.

Prosperity in the building industry this year will depend greatly upon the attitude of the contractor, and in his endeavor to exert an influence that will tend to assure conditions that will encourage building. The confidence of the Public must be gained first. The Public is not going to support building or the contractor unless the latter supports the Public by standing for reason, fair play and earnest return for the money expended. Prospective builders are not in a mood to be milched of their money

no matter how big a volume of construction business looms.

Prices must be right in the future, material quotations and Labor wages can't fluctuate at the drop of the hat. This element more than any other in the building field must be stabilized before people will be seized with the confidence to build.

Where in this issue will the contractor stand. He must come out squarely and fairly, otherwise he can't blame the Public, nor can he blame Labor.

The latter will demand and take all it thinks it can get, but the business can not afford to pay Labor more than it is worth. About 80 per cent of the cost of building is represented by Labor, that is when one considers Labor in the making of material, its handling and putting in place. That 80 per cent proportion ought to be stabilized when it comes to wages. Labor should be paid and paid well, by well is meant a fair, square price involving a fair square return of effort for that price.

That is a problem for the contractor to consider; how he meets it will determine this year's business when the books are closed. The surest solution is possible only through organization where men can stand together, pool their mutual interests and contend for that which is right and just. Contractors need just such an agency and until they all come to realize it they will be the prey of every selfish influence that besets the building construction business, their business.

Therefore, every contractor member of an association should get a new member, then another, and another.

IN CONTRACTING, LIKE IN SHOOT- ING, ONE MUST AIM CAREFULLY.

How Are Your Sights?

Business in building is to be had by those who go after it with prices that can be justified, and if business is dull for the contractor or the material man it may be worth while for him to devote some study on his bids or his prices and see if he has them down to the lowest level compatible with sound business methods. Conditions are improving and it is time for those who want business to go after it immediately.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

MEMORIAL BUILDING.

Notice to Building Contractors.

Notice is hereby given that the undersigned, the Board of Trustees of the Hancock County Soldiers' and Sailors' Memorial Building, of Hancock County, Indiana, will until the hour of 10:00 o'clock a. m., Wednesday, March 28, 1923, at the office of the Auditor of Hancock County, in the Court House in the City of Greenfield, Indiana, receive sealed bids for the erection, construction and completion of a "Memorial Building" all in accordance with the plans, specifications and profiles now on file in the office of the Auditor of Hancock County, Indiana, also in the office of McGuire and Shook, Architects, Rooms 320-322 Indiana Pythian Building, Indianapolis, Indiana, and the office of the State Board of Accounts, State House, Indianapolis, Indiana.

Bidders desiring duplicate copies of the plans, specifications and profiles for their personal use may obtain the same by depositing \$15.00 for the same, which deposit will be returned if the plans, specifications and profiles are returned in good condition on or before the time set for receiving bids.

Bids will be received according to the following classification to-wit:

First—For the general construction complete of the building exclusive of the heating, plumbing and electrical work.

Second—For the furnishing and installing of the heating and plumbing including all fixtures.

Third—For the furnishing and installing of all electrical wiring.

Fourth—If any one bidder desires he may present a bid covering all of the above, provided he sets out the unit bid on each of the above classifications.

All bids must be on forms prescribed by the State Board of Accounts and must be accompanied with a bond equal to the amount of the bid, made payable to the State of Indiana, conditioned on the faithful performance of the contract. Bids must also be accompanied with all affidavits required by law, also a certificate showing that the bidder has complied with Section 68, Workmen's Compensation Act.

At the time of letting contract the time for the completion of the work will be agreed upon.

The total cost of the work contemplated is estimated at \$70,000.00.

The Board of Trustees reserve the right to reject any and all bids.

GEORGE W. MOREHEAD,
J. WARD FLETCHER,
WILLIAM A. HOUGH,
J. W. TRITTIPO,
ROBERT F. REEVES,

Board of Trustees.

Make sure of a *permanent* roof

If you want your roof permanent, two things should be done:

1. Between your structure and the weather should be applied a continuous, unbroken layer absolutely impervious to water.
2. This unbroken layer should be held in place permanently.

A scientifically blended bitumen has at last been developed which fully meets these exacting requirements. You have probably noticed the series of articles about it in each issue of **The American Architect**. The name of this unique product is Viskalt.

HIGGIN ALL METAL SCREENS

The frames are made of galvanized steel, enameled both inside and outside in any color desired.

They are only 7/16 inch thick and 1 1/8 inches wide, or about half the width and thickness of wood frames.

Owing to the durability of the frames, we use only non-rusting wire cloth woven from commercial bronze wire.

HIGGIN SCREEN DOORS

The screen doors reflect more clearly, perhaps, than any other one thing the quality of a screen installation. Higgin Doors are built to order. In width of rails, finish, and kind of wood used, they match the corresponding house doors.

Let us furnish without cost or obligation estimates of cost.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

ARCHITECTS AND LAW MAKERS

Some Comments on Registration Laws

IRVING K. POND, F. A. I. A.
(In The American Architect)

As one with individualistic predilections views the so-called advance of the architectural profession during these recent years he must regret the growing tendency to circumscribe its practice with laws and rules and formulae. The laws are enacted by state legislatures. The rules are laid down by the architectural bodies themselves. The formulae are deduced by unemotional people who have a mechanical sort of imagination or who have taught so long in technical schools that to them hard and fast limitations are the breath of life. The geometricians who have "discovered" that triangles and circles and parallelograms, especially the diagonals of the latter, are the bases upon which to build all art forms, whether in two or three dimensions, are propagandizing the art world and endeavoring to fit all imaginative expression into their stiff and formal habiliments.

The rule makers are formulating codes and rules of action in an endeavor to make professionals gentlemen and ethical practitioners. I have no quarrel with those who are making this present effort along these lines and shall not have as long as social and business ethics generally are in their present unsatisfactory and chaotic condition. Until the individual begins to think in terms of the mass certain definitely presented standards would seem to be altogether desirable. Individuals who are socially and communally-minded find it profitable to come together and formulate the guiding principles of their social and professional intercourse. With this, as I say, I have no quarrel. But it is when an agglomeration of the pseudo-socially-minded begins to make laws in restraint not only of art expression but of a rational practice of an art that I begin to feel my gorge rise within me and I am ready for the quarrel. Certain of these pseudo-social and professional re-

formers are now aiming their blows at individual expression, by which alone can an art advance, though the blows are to be delivered by some powerful legal commission which it is hoped in some way to establish. Generally their hope for all advance in art methods or products lies in legal or legislative enactments, as if there were not at present plenty of restrictions on the individual along all lines, extending to the lines of self-expression even when self-expression implies a virtue and not a demonstration of selfishness.

I would not have the individual run counter to the best thought or emotion of the public; but I should like to be certain that legislatively established commissions would be competent instruments through which public thoughts and emotions could be voiced. As I have seen such commissions in operation, I have felt that they tended more and more to voice not the finer emotions of their public but the mediocre and the conventional.

Legislative enactments covering the licensing or registration of architects seem to me to have fallen far short of ministering to the development of real art or to a conservation of what is best in the public thought and taste. In fact, such laws, that is, those licensing and registering architects, must necessarily tend to throw the practice of art into the hands of mechanics and of mechanicians rather than into the hands of the emotionally endowed and thoughtful-minded artist. The reason given for the enactment of such laws is that public safety and health are thereby conserved. To me, public health and public safety, insofar as they have been endangered throughout the ages in a rational practice of architecture, are much less important factors in life than an encouragement of the public's love of and desire for beauty and comeliness. These latter are spiritual factors which need to be conserved: the former are merely physical factors which can be safeguarded in other ways than by the enactment of registration or license laws. But for the interposition of these laws we might have looked forward to

a time, and that at no great distance away, when the states and the nation itself would have been educated to the public's physical needs and would have safeguarded them by doing what certain municipalities already have done—that is, by establishing building codes, or a general building code modified by local conditions, which should control the physical aspects of building. With such a general building code, modified only as above, the public's health and safety would be insured by permitting a building to be erected from no set of plans which did not conform to the provisions of the code. If a building should fall in course of construction, or after construction, or if the sanitation should prove faulty and death or accident or sickness should occur as a consequence, the individual would have recourse against the architect in due process of law through the medium of the courts. It would be up to the architect whose building had collapsed and killed individuals to prove that he had not deviated in his plans from those accepted by the Building Commission or that, using due diligence, he had conformed to all the legal building requirements. If it can be shown that he has been remiss, civil damages or even the criminal charge of murder or manslaughter should lie against him.

The experience of past ages has shown that this method is entirely feasible and that no establishment of a privileged class or close corporation through legislative enactments is necessary to protect the public in the matters of health and safety.

PLEASE GET BUSY.

All Indiana architects maintaining cost and office systems are requested to send in explanations of same and suggestions to Secy. Harrison of the I. S. A., so that the committee appointed to make a report on office systems for architects' offices at the annual meeting in June can get started on this work.

Any aid in this direction will be greatly appreciated.

BIG BOOST GIVEN LOCAL EARLY SEASON BUILDING

Week's Permit Total Reaches Close to
Half a Million Dollars

Last week Evansville building activity took a decided brace as is evidenced by the record at the city building inspector's office, where statistics show that permits to the amount of \$405,663 were issued. It was one of the best weeks recorded locally for a long time, the more so because of the varied types of building construction launched. There have been larger weekly building totals but they were due to one or two extremely large projects. The work brought out last week consisted of numerous residences, a church, school, factory and several repairs and additions.

Notable among the permits were those for the addition to the city, \$50,000; St. Boniface Catholic school, \$86,488; St. Joseph Catholic school, \$50,000; General Cigar Company addition, \$50,000, and the addition to the Fred Miller Bakery and Ice Cream Company building, \$22,340.

TEMPORARY HALT CAUSED BY THE COLD SPELL

House Building Inquiries Continue to
Grow

Cold weather crept in recently to put a temporary halt to local building construction under way, but it don't seem to have chilled the enthusiasm or interest of the prospective building public. Preliminary inquiries continue to seep into the architects' and contractors' offices with frequent regularity. Especially is this true regarding home building presaging quite an extensive volume of this type of construction for the approaching 1923 building season.

BUILDING PRICES IN EVANSVILLE HOLDING STEADY

Renewed Activity Will Probably Cause
Advances

There has been considerable talk recently that the cost of building construction is swinging strongly upward, but,

according to those who deal in various building necessities in Evansville, there is no immediate cause for apprehension on this score, although practically all dealers agree that if the demand continues to grow there will come a time when the factories will be unable to meet it and then prices will ascend.

From all that can be learned, there have been no changes in the price of brick, but brick prices have been stabilized in Evansville for some time.

Retail costs of lumber have not advanced lately, but the wholesale prices have. Increasing demand naturally will cause prices to advance.

Prices on other building commodities, such as cement, cement blocks, roofing materials, electrical supplies and fixtures and builders hardware are quoted at strong in the Evansville market subject to probable increases as the demand grows.

CHIPS AND SHAVINGS.

Jacob Bippus and Sons, contractors, have started work on remodeling the former location of Neustadt Furniture Company, 307-9 Main street.

The outstanding feature of the past week in local building circles was the first step taken toward the construction of the new Catholic high school which will be erected on Lincoln avenue at the intersection of Bennighof avenue. Contractors secured estimates and plans for the building from the Clifford Shopbell Company, architects, and must have their bids in on the job on March 14.

BIG WORK ON VERGE OF BREAKING.

Close to Half Million Dollar Project
Figured As a Season Starter.

Local contractors, the larger operators, have been centering their attention on the big Masonic temple project figured recently. Estimates were asked and these are now in. Some revised estimates were desired as the figures ran a little high. It has been hinted that Max Irmscher and Son are low, but this could not be verified.

This project is one of the large ones

scheduled for maturity in 1923. It is estimated to cost \$450,000.

WANTED.

Architectural Draftsman—At once. Man capable and efficient. Please state experience, salary desired, reference and other details. Address Osterhage and Sutton, Citizens Trust Bldg., Vincennes, Ind.

HOME OWNERSHIP MOVE HOLDS ITS OWN IN JANUARY.

The home ownership boom which has been under way in Fort Wayne since early in 1922, is holding its own in 1923, as indicated by the January record. During the month approximately 53 new residences were started, in addition to the many purchases of homes already built.

CHURCH PROJECT SHAPING UP.

Bids to Be Asked This Spring.

Plans for the extensive addition to the First Evangelical Church have been approved and, according to the building committee, this project will be one that will be up for the early consideration of the contractors this spring.

As contemplated, the improvements will cost between \$80,000 and \$90,000, and will include a big Sunday school department. The addition will be most modern and will include provisions for four Sunday school departments. A big auditorium and kitchen are planned for the third floor of the structure.

APARTMENT HOUSE CONSTRUCTION LOOKED FOR LOCALLY.

City's Lack of This Type of Building
Expected to Cause Activity in
That Direction.

Much has been said about Ft. Wayne's industrial, mercantile, office and home building construction work and the prospect for another large volume of such for the coming season all of which is bright and cheering, and yet there is another type of city structure that, if carried out on a scale such as is followed in other growing American cities, will make for a nice additional volume of work.

Reference is made here to the Apartment or Flat Building. Ft. Wayne never has gone into this class of construction very heavily and there are those of the local building fraternity who expect a departure along that line before long. Some have predicted that the coming season will see the inauguration of considerable flat building locally with even an increasing volume of such projects the following years.

LOSS SUFFERED BY INDIANAPOLIS CONTRACTING CIRCLES.

Member of Prominent Building Firm
Stricken by the "Flu."

A cloud was cast over Indianapolis building construction circles the past week when death stalked in to claim William W. Wiese, secretary and treasurer of the firm of Latham and Walters, well-known and prominent general contractors.

Mr. Wiese was ill just a week his indisposition having its origin in a slight cold which developed into the "flu" to be followed by pneumonia which caused death Monday, February 19, 10 a. m.

The deceased had been connected with the firm of Latham and Walters since 1910 during which time many large building construction contracts were executed, the largest of which was the several million dollar addition and improvement to the Union Depot. Last summer the contract for the new State Reformatory at Pendleton, estimated to cost \$3,000,000, was taken on, the office detail of which was under the supervision of Mr. Wiese.

Prior to entering the local contracting field the deceased was master mechanic for the Big Four at the large Brightwood shops.

In the death of Mr. Wiese Indianapolis has suffered the loss of a sterling citizen, his associates a fine companion and building circles a most competent man. Sorrow is the portion of those left behind and their sympathy goes out to the bereaved family.

Burial took place Wednesday at 2 p. m.

NATIONAL BUILDERS' EXCHANGES STATE SHEET METAL MEN MEET HOLD ANNUAL CONVENTION. AT TERRE HAUTE.

C. C. Pierson Back From Meeting Reports Interesting Sessions.

Big Turnout for Annual Convention.

Secretary C. C. Pierson of the Indianapolis Building Contractors' Association, also the Associated Building Contractors of Indiana, spent the greater part of last week in Des Moines, Iowa, as a delegate from Indianapolis to the annual convention of the National Association of Builders' Exchanges. Having returned home he reports that the convention was well attended by representative contractors from all over the country, east, west, north and south.

The sessions were most interesting and the discussions covered many of the questions and problems that have been taken up and gone into by the A. B. C.'s of Indiana. Particular stress was laid upon the encouragement of the employment of more apprentices that more skilled workmen may be developed to meet the demand for mechanics that future building construction operations promise to create. Legislative activity was also discussed, especially from a national angle, to protect the country-wide interests of the building fraternity. Nor was the further advocacy for the extension of greater co-operating effort among contractors neglected. Strong pleas were advanced for action along that line as the best means of the protection of the contractors' rights.

Oklahoma City was chosen as the site for the 1924 convention. William F. Chew, Baltimore, Md., was elected president, and David T. Riffe, Pittsburgh, Pa., first vice-president.

NO NEED FOR CONTRACTORS TO WORRY.

State A. B. C's Watching Closely The Procedure of the Legislature.

The present session of the state legislature has held more than ordinary interest for the building construction interests this year. Legislation touching upon contracting, the practice of engineering and also indirectly touching upon the practice of architecture has been proposed.

The proposal for the establishment of a State Building Code Commission, backed by the building construction contractors, the state architects, engineers and Labor, is probably the most important of all the bills dealing with building that have been introduced. This bill, known as Senate Bill 140, has passed the Senate and is now up to the House for final disposition before being sent to the Governor for signature.

Then among the other bills are the ones that would give the Board of Accounts the legal power to inspect plans and specifications, contracts and buildings; various insurance measures; and one affecting the law providing for the registration of engineers and land surveyors.

From the standpoint of the contractors it will be interesting for them to know that the Associated Building Contractors of Indiana are looking after their interests in that Field Representative Owens has been on the job daily at the State House to watch the legislation proposed and the progress made.

Several hundred sheet metal men not only from Indianapolis, but from all parts of the State and the country gathered at Terre Haute, Wednesday and Thursday to attend the fourth annual convention of the Sheet Metal Contractors of Indiana. In addition to the contractor members of the association there were many sheet metal supply men and manufacturers' representatives, who go to compose the auxiliary to the association itself.

The convention, which covered a two-day period, was held at the Elks' Club on N. Eighth street, and was opened with an address of welcome by Mayor Ora Davis of Terre Haute, to which Joseph Gardner, Indianapolis, president of the state association responded. Other addresses were made by various men prominent in the trade, among whom was Edward A. Scott, New York, editor of The Sheet Metal Worker, who spoke on "Organization and Its Benefits."

Members, those of the auxiliary, and women visitors during the afternoon of the first day's session made an auto tour of the city, visiting various industrial plants engaged in the manufacture of sheet metal products. The evening was given over to a banquet and theatre party.

The second day's program consisted of business discussions, election of officers, and the selection of the site for the 1924 convention.

 Monday evening.
 Master plumbers every Thursday evening.

HERE'S ONE AESOP MISSED**It Took a Contractor to Work It Out**

Once in a nearby town there were several contractors who had, in times past felt that any man engaged in the same line of business as a competitor was their enemy—and it was poor business to fraternize in any way with the other fellow. However one man, more wise than the others, conceived the idea that it might be possible if the contractors would get together, talk over their problems, and council one with the other, it would be a benefit to them and good business procedure.

So, he started out to organize a contractors' association, where men in the same line of business could meet, get better acquainted, and perhaps assist each other. At first he met with but little success, but finally by persistence and hard work he induced a small number to take a chance and try it out. It was not very long before they discovered that they had many things in common and that they could be of great assistance to each other—not only in handling their labor difficulties, but in many other ways. They further realized that by being united they could work together as a unit and were thus enabled to overcome many difficulties that heretofore had appeared insurmountable. Then, too, by adopting policies of fairness and co-operation that followed the thought of live and let live they, individually, found out that the other fellow, though a competitor, was not past redemption, instead, he was not such "a bad egg" after all. Moral—You never can tell.

THE POOR COAL MAN!**It's a Hard Row He Has to Hoe**

Our attention has been called to the dire suffering that has been inflicted on the poor coal dealer by certain prevailing conditions that must make life a misery for him. The W. C. Atwater Company, whose business is that of selling and exporting coal, has declared a dividend of 1,300 per cent on its stock. Then, again, the invested capital is increased from \$100,000 to \$1,400,000.

Evidently this company has not been harrassed by any heavy losses and, could it be that coal sold at a small profit would make such a transaction possible? Does this not give a clew to the oft asked question, "why is it that coal is so high?" It hardly seems that the contention made, that the high wages paid the miners has caused coal prices to soar, is substantiated by such deals as above referred to. Looks as though there was a colored gentleman concealed somewhere in the coal pile, to modernize an old saying.

NOW WE KNOW HE SAW HIS SHADOW**Groundhog Got Out February 2 Before Most of Us Were Up**

That cold spell last week, with the mercury hovering around zero, and at one time dropping to six below, surely put a quietus on building operations in the Calumet District. Now everybody is waiting for the weather to moderate. When the sun peeped forth February 2nd just after sunrise and permitted Mr. Groundhog to get out before working hours it meant that the continuation of cold weather was going to give our contractors a few days in which to catch up on their estimating without having to burn the midnight oil. However, since oil or "juice" is so much cheaper than coal the contractors say they are inclined to favor the night work in preference to feeding a hungry furnace through the cold hours of the lengthening wintry days.

HARDLY A CHANCE**Too Much Hot Air in Circulation**

It has been suggested in the Calumet District that there is little probability of the fountains of oratory down at the State House at Indianapolis being frozen up by the cold spell.

CAUGHT IN THE MESH

The B. T. E. A. had to sort of limp along as best it could last week while the secretary was engaged in wrestling with the demon, "Flu," "Grippe," "Epizudic," or what ever one wishes to call the pesky indisposition that has inflicted itself on so many these days.

CALUMET BUILDING PROGRESS

Rhoads & Graves have the contract to build a five room cottage, 1 story 24x32 feet on N. Hohman street for D. Lenz, for \$5,000. This firm this week sold for \$6,500 a five room frame bungalow they are building on Waltham street.

Mr. Deutch of Gary was the low bidder on the Weise & Meyn apartment building. However, the bids were higher than the estimate, so the plans are to be revised and refigured.

NOTHING MORE IMPORTANT THAN REGULAR MEETINGS**Time Is Ripe for Contractors to Begin to Prepare Definite Policies for 1923**

What has become of the contractors' association meetings?

We must admit that in Muncie association affairs for some months had fallen away to such a hum-drum state that meetings just naturally followed suit and then snuffed out, as it were.

Since we have not heard much of meetings of contractors in Anderson, Kokomo, Evansville, Ft. Wayne, South Bend and the other cities we have wondered if the contractors in those places, too, have grown rather lax about this important feature of association endeavor?

Reference is frequently made to the organization of Labor on the other side of the fence and the unity and solidarity that is thus effected. Well, this much can be said of Labor, it does observe its meeting nights and does its best to keep interest alive not only in times of stress but in periods of quiet. It is always on the job, working things out, and planning in anticipation of the future.

On the other hand contractors are inclined to grow careless and then when emergencies arise they flock together and seek in a limited time to reach solutions.

The time is coming, and not far off, when the contractors will have problems to face. Why not resume regular meetings at once, begin to talk things over and lay plans for the future? It looks as if a big building season lies ahead, so, why longer put off till tomorrow that which could be done today? Why jeopardize the building promise by inviting delays when the season actually begins? The place to plan the policies that are to guide the contractors in 1923 is at association meetings, if such meetings are regular that much more can be accomplished. The time to begin is now, not next month or next spring.

Let's all begin at once, get out on the main line and have full steam up for a clear run when the time arrives to get building underway.

NEW INDUSTRY FOR MUNCIE

If things pan out as planned, Muncie will have a new institution in the establishment of a stock yards. Just recently the Farmers' National Stock Yards Co., was organized with a capital stock of \$100,000.

A local packing plant has been taken over and it is contemplated to build a modern stock yards in connection with same.

Representatives of eastern packing concerns will ship directly to the eastern markets from the local yards and a commission organization to assist the farmers in selling their stock has been formed.

ROOF-TILE

MANUFACTURE this attractive product in your locality. Scores of Plants are now making Walter Concretile. Big profits are possible with a small initial investment.

Our machines are easy to operate. Hundreds of Walter Concretile machines are in use by some of the largest contractors in this country.

The average roof-tile plant will have only \$5,000 capital invested.

HANDSOME AND IMPOSING PROJ-
ECT ATTRACTING ATTENTION

Hotel and Union Station Will Mean
Much to Ohio City's Future

Over 14,000,000 bricks, 130,000 barrels of cement and 27,750 tons of structural steel will be used in Cleveland's new Union Station, work on which has finally begun, following a recent court order empowering the terminals company to condemn the remaining land necessary.

Harry D. Jouett, who built the Grand Central Terminal, New York, is chief engineer of the Cleveland project.

Here is an estimated list of the important materials:

Excavation, 125,000 yards; structural steel, 27,750 tons; common brick, 10,000,000; face brick, 4,625,000; paving brick, 250,000; back-up tile, 4x8x12, 1,050,000; tile arches and partitions, 130,000 tons; concrete, 51,000 cubic yards; cement, 150,000 barrels.

The entire project, including Hotel Cleveland, already completed, will average thirteen stories in height and will cover ten city blocks.

Hotel Cleveland

Hotel Cleveland is the first completed unit of the terminal project and will become an integral part of the Union Station when finished. In addition to the 1,000 rooms in the present building, an 800-room addition must be added to take care of increased business, according to Manager Edward M. Buel.

The magnitude of the terminals project may be appreciated when one considers that one of the largest hotels in the United States will be but a part of it.

Other Features

The Cleveland Union Terminals project is a part of the largest railway development now under way in the United States.

It includes, among other things, a high level freight yard in Cleveland, which will do away with trucking much of

Cleveland's freight up from the river valley and lake shore. Rapid transit to outlying areas and large real estate developments are a part of the plan.

All electric interurban lines entering Cleveland will run into the station and will connect with all city lines under the same roof. All steam roads will be electrified within the city.

In order to obtain a belt line connecting all railroads and a right of way through the city, it was necessary to pur-

chase the entire Nickel Plate Railroad from Buffalo to Chicago.

To this system has since been added the Clover Leaf and Lake Erie and Western Railroads, and within the past few days the Interstate Commerce Commission has approved the consolidation under the same management of the Chesapeake & Ohio Railroad, and subsidiaries, which opens large coal fields in Kentucky and gives an outlet on the Atlantic seaboard at Norfolk, Va.

BY WAY OF ADVICE

Did You Ever Consider How You Can
Help Make Good Times?

Times are always as good as we help to make them.

Good business suggests keeping busy. It's better to be working twelve months a year than six or seven.

That's particularly true in the building industry. Because lively times in the building industry mean steady movement of a lot of materials other than those usually recognized as the basic ones.

And the basic ones, like cement, lumber, steel, sand and gravel or stone, are heavy and bulky. If everyone waits to fill his requirements for these materials until the railroads are choked with seasonal traffic, everyone will be wanting the same things at the same time and somebody will get left.

Don't add to the peak loads of the railroads by helping to make the peak higher. Whatever you are going to use in the building material line, buy and ship now while the railroads have some flexibility of facilities that will not be in evidence later.

VALUABLE WORK ON LUMBER USES READY FOR DISTRIBUTION.

The National Lumber Manufacturers Association, Washington, D. C., will distribute a series of volumes on "Lumber and its Utilization."

Altogether, there will be six volumes of five chapters each in these publications. The chapters will not be published serially in their sequential order either by chapter or volume number.

The titles of the other volumes are as follows: General Information; Timber Information; Lumber Information; Construction Information; Craft and Carpentry.

This series of publications when completed will constitute the most authentic and modern repository of information concerning lumber and its utilization. It is in no sense an advertising publication but is wholly a hand book of information for guidance in the use of lumber. It is free and hundreds of applications for chapters have already been received.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SHOP BUILDINGS NOTICE TO CONTRACTORS

Separate sealed bids will be received by the Board of School Commissioners of the City of Indianapolis, at the offices of the Board, 150 North Meridian Street, Indianapolis, Indiana, until 8 o'clock p. m., Tuesday, March 27, 1923, and then opened, for the following:

1. General contract on two buildings to be known as "No. 1 Shop Building, No. 2 Garage and Shops," to be located at the southwest corner of Vandev and Sixteenth Streets, in the city of Indianapolis, in accordance with the plans and specifications on file in the office of Donald Graham, Architect, 1128 Hume Mansur Building, Indianapolis, Indiana.

2. Installation of One Electric Freight Elevator in said buildings, according to plans and specifications prepared by Donald Graham, Architect.

3. Heating, Plumbing, Sewering and Water Supply; and Electrical Wiring and Fixtures, for said shop buildings, according to plans and specifications prepared by Snider & Rotz, Engineers, and on file in their office, 703 Merchants Bank Building, Indianapolis, Indiana.

Each proposal shall be in a sealed envelope, with writing thereon plainly indicating the character of the work to which proposal relates, as, for example, "Bid for General Contract, Shop Buildings."

The estimated cost of this building, including general contract, contracts for electric freight elevator, heating, plumbing, sewerage, ventilating and electric wiring, and all fees of architects and engineers, is \$86,000.00. All work must be completed within four months from the date of the signing of contract.

Plans and specifications for all of the above work are also on file at the office of the Business Director, 150 North Meridian Street, and at the offices of the Indiana State Board of Accounts.

All the bids must be made on blanks prepared by the Board, which blanks will be supplied by the architects, engineers or business director, upon application. These proposals must be accompanied by a check for 3 per cent of the maximum bid. The checks must be drawn payable to the order of the Board of School Commissioners of the City of Indianapolis, and must be certified good by a responsible bank or trust company of Indianapolis.

In case a bidder, whose bid shall be accepted, shall not, within five days after notice of such acceptance, perform his bid by entering into a written contract with the Board, in the form made part of the specifications, to execute the work and construct and complete the building and within that time secure the performance of his building contract by a bond, in the form made part of the specifications, with surety or sureties to the approval of the Board, his certified check and the proceeds thereof shall be and remain the absolute property of the Board as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to the Board.

The contractor will be required to execute and give bond, forms of which contract and bond are made a part of the specifications. Each contractor receiving copies of the plans and specifications will be required to deposit, as security for their return in good order, the sum of \$10.00. The right is reserved by the Board to reject any or all bids, and to refrain from accepting or rejecting bids not more than seven (7) days.

WALTER J. TWINAME,
Business Director.

Indianapolis, Indiana, February 28, 1923.
Mar. 3-10-17, 1923

SCHOOL HOUSE NOTICE TO CONTRACTORS.

Notice is hereby given that the School City of Lafayette, Indiana, Tippecanoe County, and the Board of Trustees thereof, will receive sealed bids at the office of the said School Board of Trustees, located in the Vocational Building, southeast corner of Sixth and Columbia Streets, Lafayette, Indiana, until 10 a. m. o'clock, Friday, March 23rd, 1923, at which time and place same will be opened, read and considered for the construction of a one story and basement Grade

School Building and Auditorium Annex known as the Lincoln School, located at the intersection of 14th and Salem Streets, and for the installation of the Heating and Ventilating System for said building and for the installation of Plumbing and Sewerage Systems for said building and for the installation of an Electric Wiring System for said building, for uses of said School City and to be constructed on site of the present Grade School, and according to plans and specifications as provided therefor by F. P. Riedel and T. A. Zink, Architects, 821-22-23 Lafayette Life Building, Lafayette, Indiana, and as further approved by the State Board of Health and the State Board of Accounts. Estimated cost of building and Auditorium, Fifty Thousand Dollars, (\$50,000.00).

The plans and specifications are on file for the inspection of bidders at the office of the Board of School Trustees, Lafayette, Indiana, and at the office of Riedel and Zink, Architects, and the State Board of Accounts. Copies are available to bidders for use at their own office upon deposit with the architects or Trustees of Twenty-five Dollars (\$25.00) to guarantee safe return of plans and specifications. Bidders must familiarize themselves with such plans and specifications before bidding and no departure from same will be considered. Proposals will be considered for:

No. 1—General Construction of Building.

No. 1-A—Construction of Auditorium Annex.

No. 2—Heating and Ventilating of School Building.

No. 1-C—Combined figure Heating, Ventilating, Plumbing and Sewerage of School Building.

No. A-AX—Heating and Ventilating of Auditorium Annex.

No. 2-TC—Total Combined Figure Heating, Ventilating, Plumbing and Sewerage of School Building and Auditorium Annex.

No. 3—Plumbing and Sewerage of School Building.

No. 1-C—See Combined Figure 1-C under Heating and Ventilating.

No. A-2—Plumbing and Sewerage of Auditorium Annex. See Combined figure under Heating and Ventilating.

No. 4—Electrical Wiring and Fixtures for School Building.

No. 1-A—Electrical Wiring and Fixtures for Auditorium Annex.

No. 1-C—Combined Figure for School Building and Auditorium.

All bids shall be accompanied by the certified check of bidder in sum equal to at least five per cent (5%) of his gross bid or bids. Checks to be made payable to Treasurer of the Board. In case a bidder, whose bid shall be accepted, shall not, within five days after notice of such acceptance perform his bid by entering into a written contract with the Board, in the form satisfactory to Board, to execute the work and construct and complete the building, and within that time secure the performance of his building contract by a bond in the form satisfactory to the Board, with surety or sureties to the approval of the Board, his certified check and the proceeds thereof shall be and remain the absolute property of the Board as liquidated damages for such failure it being impossible to estimate the amount of damages such failure would occasion to the Board.

All bids and proposals shall be upon forms prescribed by the State Board of Accounts. Unless bids are accompanied by certified check as above and upon forms as above no attention will be given same. Forms will be furnished by the Architects upon request.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved Surety to the School City of Lafayette, Indiana, in a sum equal to full amount of contract. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time to be agreed upon. The Board of Trustees for the School City reserve the right to reject any and all bids without giving any reason therefor.

School City of Lafayette, Tippecanoe County, Indiana.

ALVA O. RESER, President.

HERMAN M. BAHLIS, Secretary.

MRS. SARAH WESTFALL, Treasurer.

HIGGIN ALL METAL SCREENS

The frames are made of galvanized steel, enameled both inside and outside in any color desired.

They are only 7/16 inch thick and 1 1/8 inches wide, or about half the width and thickness of wood frames.

Owing to the durability of the frames, we use only non-rusting wire cloth woven from commercial bronze wire.

HIGGIN SCREEN DOORS

The screen doors reflect more clearly, perhaps, than any other one thing the quality of a screen installation. Higgin Doors are built to order. In width of rails, finish, and kind of wood used, they match the corresponding house doors.

Let us furnish without cost or obligation estimates of cost.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

SMALL HOUSE COMPETITION THAT SHOULD INTEREST INDIANA ARCHITECTURAL CIRCLES.

Indianapolis News Sponsoring Same.

As a means to assist prospective home builders of limited resources toward the goal of their ambition an architectural competition is to be staged at Indianapolis in connection with the Home Complete Exposition in that City, April 2 to 7. This competition is sponsored by the Indianapolis News acting in conjunction with the Lake Division, Architects' Small House Service Bureau.

Money prizes amounting to \$550 will be awarded to the winning plans as follows: First prize, \$200; second prize, \$150; third prize, \$125; fourth prize \$75.

Herbert Foltz, a fellow of the American Institute of Architects, and president of the Lake division of the architects' small house service bureau, will be the architectural advisor for the competition. A jury of awards has been selected, composed of Lee Huey, builder; Emerson W. Chaille, real estate man; Herbert L. Bass, architect; Fernor S. Cannon, architect; Edward B. Raub, chairman of the city plan commission, and Mrs. Felix T. McWhirter, club-woman.

Those Eligible.

The competition is open to all architects, architectural draftsmen and any persons who feel capable of designing and drawing plans that will meet the requirements set for in the rules to govern the test of art and skill.

It is provided that the design of the home, shall provide for a house of not less than 18,000 and not greater than 25,000 cubic feet. Such a house would meet the needs and desires of the average American family, it is said, and, in addition, would come within the financial ability of such families.

All-Year-Round Occupancy.

Those who enter the competition will be instructed that their designs may call for any kind of building material they select. The house must be designed for the all-year-round occupancy of the

average American family, "and therefore, the designer shall assume that the family is one of taste and refinement, and shall provide appropriate accommodations and conveniences."

The jury of awards in selecting the prize winners "will consider the architectural merit and ingenuity shown in the development of the plan. The design containing the fewest number of cubic feet, the fitness of the design to express the exterior medium used and the appropriateness of design to the site shall be the determining factors in the selection of the prize designs.

It is provided that the drawings be submitted to the architectural advisor at 843 Consolidated building, Indianapolis, Ind., under a system by which the name of the designer may not be known until after the jury of awards has made its selections.

Public May Register Choice.

The competition will close Thursday, March 29, by which time all designs must be submitted. The winners will be selected and announced shortly thereafter. An opportunity will be given the public, as it visits the home complete exposition, to register its choice of the designs. Such votes of course, will not affect the awarding of prizes, as the jury of awards already will have selected the winners of the prizes.

SOCIETY DIRECTORS TO MEET AGAIN AT INDIANAPOLIS MARCH 10.

After a two-months lay off the board of directors of the Indiana Society of Architects will get back on the job once more Saturday, March 10, at Indianapolis in regular session to consider business matters concerning the organization.

The directors have not been laying down on the job, instead, it was their interest in the Society's welfare that moved them in their decision to meet bi-monthly rather than every month. The facts that there was not a great amount of business that required immediate attention every four weeks, that it demanded of the directors considerable valuable time, and that the ex-

pense to the Society to bring the board together so often was no small item, all influenced the directors in concluding that bi-monthly meetings would answer the purpose in accomplishing that for which the sessions were intended.

The new order was put into effect at the semi-annual meeting of the Society at Indianapolis in January and the meeting next week, Saturday, March 10, will be the first under the new arrangements.

All members of the board of directors are urged to arrange their affairs so they can attend next week's meeting at Indianapolis so that all matters of importance can be disposed of and new ones gone into. If you have anything up your sleeve that you think would benefit the Society, the members, or the profession as a whole, bring it along and put it up to your fellow directors for their consideration.

Now that the State Building Code Commission Bill has been passed by the State Legislature, a bill for the passage of which the Society worked, the directors will take that matter up and decide on the future action of the Society in furthering the consummation of operation of the new legislation.

According to present arrangements Saturday's meeting will be the last until May, when the directors have planned to meet in Evansville at the invitation of the local architects down there.

PLEASE GET BUSY.

All Indiana architects maintaining cost and office systems are requested to send in explanations of same and suggestions to Secy. Harrison of the I. S. A., so that the committee appointed to make a report on office systems for architects' offices at the annual meeting in June can get started on this work.

Any aid in this direction will be greatly appreciated.

WAGE AGREEMENTS FOR 1923 NOW UP FOR ATTENTION

Evansville Gets Busy Early

Now that the building season has about worked itself around to the portal of spring, the thoughts of building men once more turn to the matter of wage scales for the new building year, the old scales expiring April 1.

Rather than wait till the last moment to thresh out this most important feature having a direct bearing on the future building activity, those of local building circles are now considering the subject.

Agreements have already been drawn up, all of which carry increases in wages over the last year scales paid the building trades in Evansville and these have been submitted to the contractors for consideration.

For several years past the building trades employers and employes of Evansville have simply worked along on verbal understandings, no signed wage articles having been effected. If the agreements now under consideration are consummated they will be the first that have been drawn up and signed in two years.

The conditions of the new agreements proposed by the building trades include a forty-four-hour week, time and a half for overtime and double time on Sundays, in addition to a raise on straight time.

The painters, electricians and plasterers are asking for an increase in the hourly wage of 14 cents, or \$1 per hour instead of 86 cents, the previous figure. Increases also are provided for in the agreements of the bricklayers and plumbers. The carpenters, too, are out for a \$1 per hour scale as against 86 cents paid in 1922.

NO HESITANCY IN GOING AFTER NEW WORK

Local Contractors by Modern Methods Get Old Work Out of the Way

The past week was an active one for local builders as many plans were put out by the architects for bids on contracts. Building matters are surely looking up and even now there is a great

impetus given the industry down here in the metropolis of "the Pocket." So rapid has been the improvement in the tone of local building that everybody is bending every effort to so arrange matters that no complications may arise to retard work when it actually gets under full swing. Even now the building activity in Evansville is far and away ahead of the usual midwinter volume. This is due mostly to the fact that there has been no customary winter lull; instead building construction operations started in October, November and December have been carried right on through with little loss of time. It used to be that contractors closed down the work just as soon as cold weather set in and everybody connected with the building business went into hibernation. However, things have changed; the Evansville contractor, like so many others in the colder climates, looks ahead nowadays and plans his fall operation so as to get it enclosed by the time bad weather sets in, and then he can keep his men going right along on the work on the inside, for he is enabled to heat the building under construction. Nor is that all, modern science has devised processes by which the contractor can even proceed with his concrete and brick work unless the weather conditions are too severe or the rains are too incessant to drive the men to shelter. By such methods the local contractors have been placed in a position where they have lost little or no time this year and have been enabled to get their old work so well along that they are now in shape to take care of the big volume of new work that is looming for early spring attention.

MOVE PLANNED TO BAN WOOD SHINGLES IN FT. WAYNE.

Fire Menace Condemns Old Style Type of Roofing.

Wooden shingles will be forbidden by law in this city in the future, if the plans of the board of safety and the mayor are carried through by the city council.

The plan to have the city council pass an ordinance forbidding the use of wooden shingles on all new buildings or in repair work was proposed last night

at the board of safety meeting after Assistant Fire Chief John Stahlhut reported that the department made 22 runs yesterday, practically all of which were caused by sparks from chimneys dropping on wooden roofs. The loss caused indirectly through the use of wooden shingles yesterday amounts to several thousand dollars, according to the fire chief's report.

It is planned to have the ordinance drawn by the city attorney within the near future and to present it for the consideration of the city council at an early meeting. Similar ordinances, as fire prevention measures, are in effect in practically all the larger cities and in many cities smaller than Fort Wayne.

LOCAL CONTRACTORS PUT IT OVER ANYWAY.

Ft. Wayne, like other cities, here and there about the country, was not without certain labor difficulties during the 1922 building season and there were those who were skeptical as to the outcome. There is no getting away from the fact that the existing conditions for a time worked a hardship and rather upset things for a few months. However, the contractors got a grip on things in time and went right ahead regardless to the greatest building season the city has ever known.

REALTY TRANSACTIONS TAKEN AS A GOOD SIGN.

There is considerable activity in the changing of titles of down town realty. Some of these deals are merely made for investment purposes while others pre-empt modern building construction of extensive proportions.

Regarding the latter there was a transaction on W. Wayne street that means the erection in the near future, of a large store and office building. The site was purchased by the Pidgeon Realty Co., and according to Mr. Pidgeon he has such faith in the future development of Ft. Wayne's business district and its extension west of Calhoun street, that he is planning to erect the aforementioned structure on the property just acquired. According to the architect's estimate the building and the location will cost in the neighborhood of \$200,000.

DIMENSION STUFF

Building prospects are moving slowly in the local field just at present, few jobs being out for bids, though the architects are working on a number of promising projects. However, no one is worrying about the lull which is only the natural sequence of the mid-winter season.

LEGISLATURE PASSES STATE BUILDING CODE BILL.

Governor's Signature Only Needed to Make It a Law.

One more hurdle, that safely negotiated, and Indiana will be possessed of legislation providing for a State Building Code and creating an administrative council to take over the work of the State Industrial Board, State Board of Health, and State Fire Marshal in connection with building.

The object of the new legislation is to standardize building construction requirements throughout the state, codify all the existing state building laws and provide for an administrative council to see that same is respected and followed.

This was the one big legislative activity upon which the Associated Building Contractors of Indiana centered its attention and now that the law has been passed by the legislature, marks the biggest constructive achievement the A. B. C.'s have ever accomplished.

A State Building Code was proposed by Architect E. Hill Turnock, Elkhart, some three years ago, then president of the Indiana Society of Architects, in an address before the annual convention of the State A. B. C.'s at Indianapolis. Following his proposal a motion was made and seconded that the state contractors endorse the idea. It was realized then that it would require considerable effort and time to whip things into shape. The following year after much thought a bill to provide for a state code was introduced into the legislature but got

caught in a late rush jam and failed to reach a third reading.

Then new steps were taken to provide for another try at the 1923 session of the legislature. The Indiana Society of Architects, the Engineers' Association, Labor and the State A. B. C.'s all interested in a State Building Code, appointed committees to act in conjunction in formulating a new bill.

In the first place state officials were approached to whom the proposed legislative effort was explained and it was found that they did not look upon the move with disfavor. Next the general committee, composed of representatives from the architects, engineers, contractors, and Labor organizations got together and through a long series of regular meetings covering many months worked out a bill that was finally introduced in the Senate by Senator Harold Van Orman, Evansville. It was reported favorably out of committee and when brought up for action met with some opposition which was finally overcome on the third reading when it passed the Senate 27 to 4. There still remained the House to be met but here opposition was almost nil and at the final reading was passed 71 to 6.

The bill, known as Senate Bill, 140, having passed both branches of the legislature has now been sent to the governor for his signature.

WAGE SCALE MATTERS TAKEN UP BY MASTER MASONS' ASSOCIATION.

Preliminary Negotiations Entered Into.

The Master Mason contractors of Indianapolis, realizing that the approaching building season promises to be a mighty busy one, has taken preliminary steps to help the good work along by getting in touch with the building trades crafts with whom they deal in an attempt to thresh out and settle upon wage scales for 1923.

Recently a meeting was arranged with representatives of the Hod-Carriers' Union, and after the masons had submitted their proposition calling for a slight wage increase, over which there was considerable discussion, the representatives of the workmen expressed themselves as favorable to the new wage.

Wednesday night of this week there was a meeting of the masons and bricklayers at which preliminaries were gone into relative to reaching a new wage scale agreement. While the matter was talked over that both sides might know just where the other stood no definite conclusions were reached. The only information advanced by those who attended the meeting was to the effect that the brick-layers are out for quite a substantial wage increase over last year's scale.

BUILDING PERMITS
(\$4,500 and Over)

Week of February 22 to March 1

Residence and Garage: \$23,000, 91 W. 43rd St. Owner, Marea F. Hare, 4270 N. Meridian St. General contract let to Realtor Building Co., Lemcke Bldg. Brk. veneer and frame.

Residence and Garage: \$20,000.00, 5001 N. Meridian St. Owner, Dr. J. J. Gramling, 3326 Clifton. Owner will

build by day labor. Brick veneer and frame, tile floor.

Residences (2 doubles), \$18,000.00, total, 2317-19 W. Washington and 402-04 N. Linwood. Owner and builder, Realtor Building Co., Lemcke Bldg. Start work at once.

Residence (double) and Garage: (2) \$18,000.00, both, 4809 and 4911 College. Owner and builder, Otis Kirkpatrick, 4151 Broadway. Start work at once. Owner builds and buys materials.

Residence: \$13,000.00, 2 sty. and bas., 2702 N. Pennsylvania. Archt., Chas. E. Bacon, Odd Fellows Bldg. Owner and builder, Ernest H. Pierson, 2934 Kenwood. Start work shortly. Owner will build and award separate contracts. Brick and hollow tile.

Store Building: \$11,000, 1 sty., 40x80, 3901 E. Washington. Owner, The Monarch Co. General contract let to Wakefield-Patton Co., 1238 W. 33rd St. Frame and brick.

Apartment Building: (4 Apts.), \$9,000, 2935-37 Boulevard Place. Owner, Rose A. Herr, 2937 Boulevard Place. General contract let to C. W. Eaton, 2841 Highland Ave.

Church: (addition), \$10,000.00, 2 sty., 29x41, 550 N. Rural St. Owner, Rt. Rev. Joseph Chartrand, 1347 N. Meridian St. General contract let to Michaelis Bros., 821 Parker Ave. Brick.

Residences (2), \$4,500 each, 607 and 615 W. 31st. Owner, Evelyn B. Schmidt, 635 W. 31st St. Day work.

Residences (2), \$4,000 each (3915 and 3919 Winthrop. Owner, Henry Kothe, Inc. Contract let to Chas. E. Smith.

Residence (double), \$8,000, 838-40 N. DeQuincy St. Owner, Daniel P. Shay, 625 Parker. General contract let to Emmett Johnson, 942 N. Tremont.

Milk Plant: \$7,000, 1 sty., 80x100, Moore and Christian Sts. Owner, Ideal Dairy Co. Contract let to B. F. Martz, at site.

Residence: \$7,000, 5025 Central. Owner, O. D. Parrish, 5018 Central Ave. Owner builds.

Garage: \$7,000, 1 sty., 40x102, 325 S. New Jersey. Owner, J. S. Cruse, 128 N. Delaware. Contract let to Atkins and Entwistle, at site. Concrete block. Excavating.

Residence: \$6,500, 406 Berkley Road. Owner, Southern Bldg. and Realty Co., at site. Excavating.

Residence (double), \$4,500, 2710-12 N. Dearborn. Owner, Kyrie E. Klepfer, 2321 Langley Ave. Excavating.

Residence: \$5,000, 5115 E. Mich. Owner, Kenneth E. Clark, 1462 S. Harding St. Excavating.

Residence: \$5,000, 5337 Central. Owner, Mary Schreiber. Contract let to Johnson and Rasener, at site. Excavating.

Residence: \$5,000, 5260 Broadway. Owner, A. E. Ward, 3056 Central. Day work. Excavating.

Residence: \$5,000, 714 N. Gladstone. Owner, J. A. Carr, 319 N. Gladstone. Excavating.

Residence: \$4,500, 2505 N. Talbott. Owner, A. L. Slaick, 2445 N. Delaware St. Excavating.

Residence: \$4,500, 2020 Mansfield. Owner, A. L. Burroughs, 645 Caldwell. Excavating.

Residence: \$4,500, 248 Eastern. Owner, Minnie M. Martin, 257 Eastern. Contract let to F. A. Loy, 408 N. Emerson. Excavating.

GOING UP!**Price Rises Beginning to Appear Here
and There in Building Circles**

As was predicted, the trend of things has proven out. Prosperity builders, for some time, have been advised to get their plans ready so as to let their contracts as early as possible in order to take advantage of the prevailing winter prices. This admonition was inspired by the general feeling that quotations were bound to advance and the prospective builder who acted early would be in line to save money on his building operation. Already the inclination upward has set in and the advance is a little sharper than was anticipated. Among the items showing increases in price are: Lumber, 10 to 15 per cent; cement, 10 per cent; glass, 30 per cent; hardware, 15 per cent; lead, 15 per cent; plaster, 25 per cent; plumbing supplies, 30 per cent. Indications point to a demand for a 20 per cent increase in wages by Labor. Common brick has not as yet shown any market advance in price but pressed brick shows a tendency to get in line with other building materials that are moving quotations upward.

In view of the fact that the advance has been fairly general all along the line since the first of the year, and at a time when building operations are not so brisk, one is led to believe that even further increases may be looked for when spring building actually gets under way and the rush sets in.

Just how much more of a tilt in prices the building business will stand and continue to grow in volume is a question that is causing considerable speculation among those who have the welfare of the industry at heart. So far the advances do not seem to have checked building operations. It seems as if people are more eager to build on a rising market than when a decline is holding sway.

As matters stand now, Labor prices are as high as during the war period and in some instances even higher. Many are wondering if material prices, too, will show a like tendency. All of which resolves itself into the one big question: How long will it be a paying proposition to build?

HOW DO THEY DO IT?**Dark Age Practices Pale Before Certain
Chicago Usages**

For ways that are dark and tricks that are there the Labor leaders of Chicago have them all skinned. A fellow named Killiher was shot, another by the name of McCarthy accused of the crime was exonerated by the coroner's jury. Perhaps it was considered as a case of good riddance.

"Big Tim" Murphy, who has a sentence to Leavenworth hanging over him, is lost somewhere in the big city and neither the United States marshals nor his bondsmen can locate him. The middle ages or the "underground" railroad had nothing on the modern enlightened day modes that are in practice in the great city on Lake Michigan.

LIKE THE POOR, ALWAYS WITH US**Hard to Shake Off Metal Trim Dispute**

According to the latest reports, the long extended dispute over which craft should handle metal trim is still with us and, what is more, promises to hang around still further.

This now famous and irritating subject has been decided several times only to bob up again with a rehearing. The case was scheduled for another consideration at a recent session of the National Board of Jurisdictional Awards and has now been postponed once more till the summer meeting of the board.

To a man up a tree it seems as if it was about time this controversy was settled. What is wanted is a final decision and a way and means that will compel the disputants to live up to that decision of the board so that building operations may progress without the constant fear that they will be held up by this ever recurring dispute of long standing.

CALUMET BUILDING PROGRESS

Danner, Gohman & Meyers, Hammond, with \$39,768 were the low bidders on the addition to the Ambridge school at Gary. Their figure did not include heating and plumbing.

General Contractor Frank G. Wall, East Chicago, was awarded the contract for the apartment building for J. H. McGuire. His bid, exclusive of heating and plumbing, was \$42,000.

No action has been taken on awarding the contract for the construction of the Weise & Meyn building. The bids are in under advisement. Someone has suggested that maybe the low bid was too low.

Cold, inclement weather has practically put a stop to all outside building work in the Calumet District.

E. E. COLE.

MUNCIE

Associated Building Contractors
Member State A. B. C.

Chas. Rowe President
J. A. Gallivan Secretary

314 Main Street

**1923 BUILDING PROGRAM GETS AN
EARLY START.**

Building activity in Muncie got under way once more with the launching of efforts toward the erection of the new \$700,000 Masonic Temple. The foundation for this structure was begun last summer and completed in the fall, and then further construction operations were held in abeyance. Just recently the contract for the erection of the structural steel was awarded, and bids for the erection of the remainder of the superstructure will be asked in about thirty days. Cuno Kiebele, Muncie, is the architect for this project.

BEGIN AT HOME.**Illinois Contractor Would Make Apprentices
of Builders' Sons.**

Since definite action, relative to encouraging the training and employment of apprentices in the building trades crafts, has been taken by the Associated Building Contractors of Indiana, Henry Erickson, Chicago contractor, has suggested a proposition that Indiana builders might do well to heed by way of backing up their acknowledged intention to encourage more apprentices.

Speaking before the A. B. C. of Illinois at their recent state convention, Mr. Erickson, proposed that the contractors see to it that their own sons be apprenticed in some building trade thereby setting examples to other American youths and thus rescue the building business from the disfavor from which it seems to have suffered at the hands of many of the present day boys. He said that the obstacles placed in the way of advancement by labor unions deterred many boys from entering building trades but that the advantages, nevertheless, were sufficient to attract many more if a good example were set.

That the apprentice question is a live one and worthy of the serious consideration of the contractors of Indiana is evidenced by the fact that the Illinois convention devoted lengthy attention to the subject, went into the matter of what is being done as regards training apprentices and the speakers advocated further extension of the apprenticeship idea.

BIG CONTRACT ABOUT TO POP.**Bids In On Another Big Project for
Muncie.**

Building construction interests of Muncie just now are centering their attention on the new \$250,000 gymnasium and auditorium for the Muncie branch, Indiana State Normal School. Bids were received this week and taken under advisement. The building, 2 stories high, will contain a spacious auditorium, two gymnasiums and 2 swimming pools.

Entered as second class matter August 29, 1919, at the Post Office at Indianapolis, Indiana, under the Act of March 3, 1879.

A SURE ENOUGH SIGN.

No Mistaking the Fact That Spring Is Near.

You hear folks mention signs of spring, the ground hog legend, first robins, sassafras peddlers, getting out the old fishing tackle, the sap beginning to run, etc., but the surest token of the approach of spring is when the newspapers begin to bubble with building wage scale agitation.

That being the case spring must be right at our threshold. The news dispatches from various sections of the country are beginning to pile in to tell

of wage scale conferences that have been called and settlements that have been effected here and there.

Each year this news means that preparations are in order to get squared away for the new building season. It is a question that must be disposed of and the sooner it is taken care of the better for all concerned.

The early information shows a general demand for an increased wage scale with employers in certain sections granting compromise figures.

With wages advancing and a trend toward increased material prices, construction costs in 1923 are bound to be higher than last season.

URGES BUILDING WORK AT ONCE.

The idea of putting off the erection of the home with the view to waiting for the fall in prices is poor economy according to an article appearing in a recent issue of "Architecture."

"Many are waiting for the 'inevitable' fall in building costs ever since the war ended, and many are waiting yet with the ever present indications that instead of going down costs are going up. One may read a lot about business cycles, about the influence of the amount of gold in the world, the shortages of labor, and what-not, but all these theories are worthless in the face of fact, and the fact is that waiting for a drop in building costs is like waiting for the core of the apples—There ain't going to be none."

Expect Volume of Work.

"There is every indication of an immense amount of building to be done for next year, and the architects are going to benefit thereby. No one would think of erecting a business building without the services of an experienced architect, and we hope that it will be made evident to the man in the street that he owes it to himself and his neighbor to have the new home he is thinking of building in the spring designed and directed by an architect. Our domestic architecture has been steadily improving; in fact in its larger aspects it is now the best in the world. But there is yet too little attention given to the design of the small house."

"The trouble with thousands of our small houses is that they are designed, if designed at all, with the notion of making a splurge-tawdriness and pre-tension are more thought of than good taste and firmness."

CONTINUED GAINS RULE FOR FEBRUARY IN THE INDIANA BUILDING CONSTRUCTION FIELD GREATLY INCREASING CURRENT YEAR'S VOLUME OF BUSINESS.

Running true to predictions building construction operations in Indiana, as evidenced by the reports made by the building inspectors of her eight leading cities, are piling up a volume that if continued at anywhere near the current ratio of gain will total figures for the year that will far outdistance any other like figures ever recorded in the State. Not only does the present evidence inspire such a statement but the tone of things and the prospects lend strength and confidence to a conviction that the end of 1923 will witness a verification of this forecast.

The first month of the new year turned in a remarkable total considering the time of the year, mid-winter. Those figures amounted to over three and a half million dollars, something unheard of in Indiana for January. Nor was that building activity a mere flash in the pan for February came right back with another three million dollar estimated valuation in new building work for which permits were granted during the month. With January and February tabulating such records one is inclined to wonder what will happen when the warm weather sets in.

Though February was 7% behind January in the matter of estimated valuations and not so many permits were issued as in the previous month, nevertheless, the latest total showed a 74% gain over February, 1922. Then, too, the total estimated amount of money put into new building for the first two months this year is 114% more than was invested in new work during the corresponding period in 1922.

Six of the eight cities returned nice percentage gains over their building performances a year ago, Hammond, Evansville and South Bend doing particularly well. The only places to fall behind were Terre Haute and Richmond, which failed by quite a margin to reach their February, 1922, totals.

According to the latest official returns Hammond did the unusual stunt of stepping out at the head of the building procession during February and hung up a 1,130% gain over the corresponding period last year. Next comes Evansville with a 359% increase, to be followed by South Bend, which showed a 306% gain. The other cities fell in line in this order, Gary, 144% gain; Ft. Wayne, 120% gain; Indianapolis, 36% gain. Terre Haute, 53% loss; Richmond, 122% loss.

The February totals for the eight cities this year and last year:

Cities	1923		1922	
	Per.	Est. Val.	Per.	Est. Val.
Evansville	94	\$ 450,898	92	\$ 98,138
Ft. Wayne	61	420,330	47	191,035
Gary	45	282,450	38	115,390
Hammond	23	431,375	19	35,050
Indianapolis	545	1,601,282	576	1,170,398
Richmond	22	29,626	24	66,000
South Bend	191	340,475	70	85,355
Terre Haute	63	49,515	83	111,814
Total	1044	\$3,273,476	949	\$1,873,180

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply a publicity from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the School Board in the Court House, Liberty, Indiana, until 2 o'clock P. M., Saturday, April 7th, 1923, by the Board of School Trustees of the consolidated School District of the School Town of Liberty and Center School Twps., Union County, Indiana for the construction of a new High School Building, and for alterations to the Liberty Grade School Building all in accordance with plans and specifications for same prepared by Wilson B. Parker, Architect, 620 State Life Bldg., Indianapolis, Indiana, now on file at this office and at the office of the School Board at Liberty, Indiana.

Separate bids will also be received at this time for the heating and ventilating, plumbing, and electric wiring, and fixtures for the new High School, Grade School remodeling, plumbing and heating of the grade school and the demolishing of the present High School Building.

All proposals to be in accordance with Form 10 of the State Board of Public Accounts and none will be considered unless complying with such forms. Proposals shall be enclosed in an envelope with name of bidder and class of work named in the proposal placed on the outside thereof, and all bids subject to the approval of the Indiana Tax Commission.

Each bidder must submit with his proposal a certified check from a reliable bank or trust company in a sum equal to the amount of 3% of each proposal, made payable to Dr. Franklin DuBois, president of the Board. In case any

bidder, whose bid shall be accepted shall not within 5 days after notice of acceptance enter into a written contract with the Board to perform the bid and secure the contract by a Surety Company Bond in the form and to the approval of the Board, his check and its proceeds shall be and remain the property of the Board as liquidated damages for such failure, and the bidder shall not be liable for anything beyond the proceeds of the check for such failure. The School Trustees reserve the right to reject any or all bids received for this work.

Plans and specifications may be obtained on application to Wilson B. Parker, Architect, 620 State Life Bldg., Indianapolis if accompanied by a check for \$10.00, which will be returned on receipt of the plans and specifications in good order.

Signed

FRANKLIN T. DUBOIS,
PHILLIP B. NYE,
HOWARD HIGGINS.

School Trustees of the Consolidated School District of Liberty School Town and Center School Township, Union County, Indiana.
March 10th, 1923

SHOP BUILDINGS NOTICE TO CONTRACTORS

Separate sealed bids will be received by the Board of School Commissioners of the City of Indianapolis, at the offices of the Board, 150 North Meridian Street, Indianapolis, Indiana, until 8 o'clock p. m., Tuesday, March 27, 1923, and then opened, for the following:

1. General contract on two buildings to be known as "No. 1 Shop Building, No. 2 Garage and Shops," to be located at the southwest corner of Yandes and Sixteenth Streets, in the city of Indianapolis, in accordance with the plans and specifications on file in the office of Donald Graham, Architect, 1128 Hume Mansur Building, Indianapolis, Indiana.

2. Installation of One Electric Freight Elevator in said buildings, according to plans and specifications prepared by Donald Graham, Architect.

3. Heating, Plumbing, Sewering and Water Supply; and Electrical Wiring and Fixtures, for said shop buildings, according to plans and specifications prepared by Snider & Rotz, Engineers, and on file in their office, 703 Merchants Bank Building, Indianapolis, Indiana.

Each proposal shall be in a sealed envelope, with writing thereon plainly indicating the character of the work to which proposal relates, as, for example, "Bid for General Contract, Shop Buildings."

The estimated cost of this building, including general contract, contracts for electric freight elevator, heating, plumbing, sewerage, ventilating and electric wiring, and all fees of architects and engineers, is \$86,000.00. All work must be completed within four months from the date of the signing of contract.

Plans and specifications for all of the above work are also on file at the office of the Business Director, 150 North Meridian Street, and at the offices of the Indiana State Board of Accounts.

All the bids must be made on blanks prepared by the Board, which blanks will be supplied by the architects, engineers or business director, upon application. These proposals must be accompanied by a check for 3 per cent of the maximum bid. The checks must be drawn payable to the order of the Board of School Commissioners of the City of Indianapolis, and must be certified good by a responsible bank or trust company of Indianapolis.

In case a bidder, whose bid shall be accepted, shall not, within five days after notice of such acceptance, perform his bid by entering into a written contract with the Board, in the form made part of the specifications, to execute the work and construct and complete the building and within that time secure the performance of his building contract by a bond, in the form made part of the specifications, with surety or sureties to the approval of the Board, his certified check and the proceeds thereof shall be and remain the absolute property of the Board as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to the Board.

The contractor will be required to execute and give bond, forms of which contract and bond are made a part of the specifications. Each contractor receiving copies of the plans and specifications will be required to deposit, as security for their return in good order, the sum of \$10.00. The right is reserved by the Board to reject any or all bids, and to refrain from accepting or rejecting bids not more than seven (7) days.

WALTER J. TWINAME,
Business Director.

Indianapolis, Indiana, February 28, 1923.

HIGGIN ALL METAL SCREENS

The frames are made of galvanized steel, enameled both inside and outside in any color desired.

They are only 7/16 inch thick and 1 1/8 inches wide, or about half the width and thickness of wood frames.

Owing to the durability of the frames, we use only non-rusting wire cloth woven from commercial bronze wire.

HIGGIN SCREEN DOORS

The screen doors reflect more clearly, perhaps, than any other one thing the quality of a screen installation. Higgin Doors are built to order. In width of rails, finish, and kind of wood used, they match the corresponding house doors.

Let us furnish without cost or obligation estimates of cost.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

BILL GIVING RIGHT TO STATE BOARD OF ACCOUNTS TO EXAMINE PLANS AND SPECIFICATIONS PASSED.

Conditional Clauses Contained.

Despite the strong opposition put up against it, and a staggering blow dealt when the House voted indefinite postponement of action, the Board of Accounts Bill came back strong with revised amendments and, under a suspension of rules, was passed by the legislature and has been signed by the governor.

This new legislation in a measure gives to the State Board of Accounts a power that the appellate court ruled some months ago it had no right to exercise, that of examining plans, specifications and contracts having to do with public building and improvement construction.

The original bill introduced by Senator Penrod, Lawrence and Orange counties, was passed by the Senate 42 to 4, but when it reached the House, a strong lobby which had been unsuccessful in gaining much opposition to the bill in the senate, worked nights and days on the house members, and when the bill came up the lobby showed its hand, and the bill was tucked away by a vote of 57 to 37 for indefinite postponement.

The lobby against the board of accounts bill consisted principally of contractors over the state, who were not anxious to have the accounts board get back the power of examining public roads and buildings and their plans and specifications.

To all intents and purposes the bill was killed, but the powers of the administration, it being one of the administration's measures, set to work at resuscitation and by certain revisions and amendments, succeeded in getting the

bill reintroduced under a suspension of the rules and after some fight it was passed in the closing hours of the Legislature.

The final measure as passed differs from the original Penrod bill by increasing the number of petitioners necessary to ask the state board of accounts to investigate local improvement projects or suspected malfeasance in office. The original measure provided that only ten petitioners be necessary to require an examination of any public contract. The new bill increases the number of petitioners to twenty-five.

DIRECTORS GATHER FOR REGULAR MEETING.

The Board of Directors of the Society are meeting in Indianapolis today at the Lincoln Hotel in bi-monthly session to consider matters that have come up since the last meeting in January.

While there was no outstanding feature requiring particular attention there was considerable routine business to be disposed of and preliminary arrangements to be talked over regarding the next meeting, of a regional nature to be held in Evansville in May.

ONE END TO WHICH IT LEADS.

Further Comment on Restrictive Architectural Legislation Shows Same to Possess a Back-Lash.

Since there has been so much agitation of recent years all over the country seeking to put across legislation that would require the licensing or registering of men who desired to practice as architects, and such legislative effort has been accomplished in some states, the following from the pen of Irving K. Pond, F. A. I. A., reprinted from the American Architect, is interesting in that it throws a new light on the subject and brings to the fore points seldom

considered or, if considered, generally ignored.

Mr. Pond, whose council is worthy of thought, since he occupies a prominent position in the architectural world, says:

"In this country twenty-four of the forty-eight states have enacted laws governing the practice of architecture. These laws vary in kind and quality and make the practice of the profession a burden to architects who, by right and necessity, are called upon to practice beyond the bounds of their own commonwealth. Imagine the case when all forty-eight states shall have their laws and the architect who is practicing generally in many states is called upon for a continual and increasing payment of taxes in these various states in which he does not reside; states which in shutting him out would lose spiritually if he were really an architect and imbued with the artist's ideal and endowed with rare emotionalism and possessed of the learning and experience which are factors in his professional equipment.

"I was pleased that during the last season the Royal Institute of British Architects was not swept off its feet in that it refused to endorse a proposed and powerfully propagandized scheme for the unification and registration. Registration in a way seemed, however, to appeal to the British architects; but my hope is that the current toward unification and registration being stemmed for a time, a really rational state of mind will prevail and that the practice of an art will not be limited to those only who can make good in an examination along purely physical and material lines.

"These years, since the war, have been chaotic and hysterical. I am going to continue to hope, almost against hope, that we may come to our senses and that formalists and legislators and commission makers may soon be expelled from the architectural field and the bars put up so that they never again may enter."

BUILDING WORK IN EVANSVILLE ASSUMES NEW IMPETUS

February Volume Shows Substantial Gains

Though the first two months of the year have generally been considered as dull periods for building construction owing to the fact that they fall in mid-winter, Evansville this year has upset all local precedents and rushed ahead at a building pace that has run up figures to make old-timers stop and wonder.

January got away from the scratch with a good burst of speed only to be followed by February, which took up the running where January left off and increased the monthly pace in the annual building relay.

The latest returns from City Building Inspector Ed Kerth's office show that ninety-four permits were issued during February for a total estimated valuation of \$450,898, a gain of 116 per cent over January this year and a 359 per cent advantage over February, 1922.

Early building activity in Evansville strengthens the belief that the city is at the threshold of the greatest building season in its history. The figures so far recorded during the months of January and February, 1923, show a total of \$659,098 estimated investment in new building as against \$183,570 for the same two months last year, a gain of 259 per cent. The future looks even brighter, holding as it does prospective work of encouraging promise.

ACTIVE OPERATIONS STARTED ON EVANSVILLE'S NEW RESTRICTED RESIDENCE DISTRICT

New Home Section to Be a Garden Spot

Evansville's new restricted suburban residence plat, "Lincolnshire," sponsored by Contractors Anderson and Veatch, promises rapid development this summer. The tract upon which fine homes are to be built is quite extensive and grading work has been started to get things in shape for active building construction operations as soon as possible.

Contracts for the new sewer system

throughout the tract have been awarded to J. L. Newman while the asphalt street paving work has been let to the Western Construction Co.

The streets are to be laid out as boulevards and all buildings are to be restricted to artistic single family residences. When completed Lincolnshire will compare favorably with the high grade modern residence districts of other cities.

CHIPS AND SHAVINGS.

General contractors Scarborough & Davies Co., have started work on the new \$40,000 ice cream factory for the Farmers' Dairy Co.

The remodeled store rooms at 307-309 Main street for the Phillips Co., was finished up by contractors J. Bippus & Son this week and turned over to the owners.

Estimating is going along at a merry clip, all local contractors being kept steadily at it by the new projects, plans for which are being turned out steadily by the architects.

CLIMBED TOWARD THE HALF MIL- LION DOLLAR MARK

Local Construction Work Going Merrily and Busily On

Further promise that 1923 will be a big building year in Fort Wayne was given recently when the figures for the estimated amount involved in local building activity for February amounted to \$420,330. The increase in building work can be noted by a comparison of the past month with February of last year when the estimate was \$191,035. Last month showed a substantial increase over January of this year, when the estimate reached \$390,885. Out of the sixty-one permits issued, a total of twenty-nine were for new homes. The majority of the remaining permits were for remodeling residences and for garages. The largest permit was for \$155,000 for the new McCulloch school building. The second largest was for \$40,000 for a factory building.

BIG HOME BUILDING PROGRAM IN PROSPECT.

The completion of the first units of the Fort Wayne plant of the International Harvester company will mark the beginning of the building program of the Greater Fort Wayne Development corporation. As the big plant nears completion steps are to be taken toward the erection of modern, moderate priced, homes to care for the thousands of employees who will find occupation there. This great home building scheme will probably be launched in 1923.

DIMENSION STUFF

Featuring current local building activity was the recent award of the contract for the construction of the new \$650,000 Masonic Temple on Washington street. The contract was given to W. S. Sheets.

Home building operations are showing renewed activity, indicating what may be expected when the real building season sets in.

Another big building construction operation broke the past week when awards were made for the erection of the new \$220,000 Plymouth Congregational Church. The general contract went to the Indiana Engineering and Construction Co., the heating, plumbing and ventilating to the Fort Wayne Plumbing and Heating Co. and the electric work to P. B. Arnold Co.

The Indiana Engineering and Construction Co. also picked off two other projects this week—a \$75,000 warehouse for Pettit's Storage Warehouse Co., and an office building for the Van Arnam Manufacturing Co.

Among other awards during the week was a \$30,000 factory building for the Perfection Biscuit Co., let to Max Irmscher & Sons.

General Contractors Buesching & Hagermann, who have the contract for a \$100,000 factory building for the Fort Wayne Box Co., have started work on this job. The building will be four stories high, 80x120.

And then, on top of the Masonic Temple start, comes the announcement that the Fort Wayne Shriners will soon be asking for bids on their contemplated new quarters estimated to cost half a million dollars.

Nor is that all, the local architects are unusually busy on plans and prospective prospects and when questioned express a decidedly optimistic view regarding the outlook for 1923.

WAIVER OF LIEN.

None filed with Marion County Recorder this week.

ANOTHER LARGE CONTRACT AWARDED.

Elks Million Dollar Club House to Add to Construction Activities.

Big construction operations in Indianapolis promise soon to be on in earnest. At the present time there is more than the usual amount of late winter building going on, some of which is of large proportions and in addition there are some really large projects about to be let.

Just this week another big contract was awarded when the W. P. Jungclaus Co. picked off the new Elks' Club House, estimated to cost, when completed \$900,000. The heating went to Freyn Bros., the plumbing to Callon Bros., and the electric work to Smith Electric Co.

The building, to be located at St. Clair and Meridian Sts., will be eight stories high, four of which are designed for club quarters and the remaining portion of the structure will be used for hotel purposes. It was stipulated in the provisions of the contract that the building is to be completed in thirteen months.

BUSINESS ANNOUNCEMENT.

Indianapolis Steel Firm Makes Known Change of Personnel.

Hetherington & Berner announces the resignation of Robert Berner from active connection with this company, to be effective March 17, 1923.

This company will continue the operation of all departments of its business as heretofore, including structural steel fabrication, foundry, pattern and machine work.

MORE HELP NEEDED.

Demand Upon Building Inspector's Office Growing Steadily.

The city officials would do well to give some heed to the building inspector's office where a heavy demand is being put upon the clerks and unless some more assistance is directed that way the office will be swamped before long. Chief Clerk Hays is doing his level best to keep up with the applications for building permits but even at that there is quite a congestion as the demand for permits is growing daily.

There are certain requirements called for in submitting plans to be passed on and applicants for permits can save themselves a lot of time and annoyance by presenting a set that will give measurements and a clear conception of the work to be done. Many people, even contractors, call at the inspector's office with drawings that are very vague, upon which the inspector can not pass and then these same people become miffed at no permit being forth coming when, in answer to certain essential inquiries, they simply say they imagine such and such things are to be done in the construction operation.

But, getting back to the original idea, more help in the building inspector's office would aid greatly since the applications for permits is going to be exceedingly heavy as soon as the weather opens up.

BUSINESS STRUCTURE FOR DOWN TOWN SECTION DRAWS ATTENTION.

Many Figuring Plans.

Plans have arrived from Detroit for another modern mercantile and office building to be erected in the heart of Indianapolis.

The building, to be four stories high with a frontage of seventy feet and a depth of 200 feet, is to be built at the southwestern corner of Washington and Pennsylvania street by the Kresge Company. The basement, first and part of the second floors will be used as quarters for a five and ten-cent store and the remaining part of the building will be fitted up as office suites.

The general contract is being estimated by the Bedford Stone and Construction Co., the Cornell Engineering Co. and the William P. Jungclaus Co., to say nothing of the subcontractors and numerous material men who are preparing estimates covering the branches of the work that is of interest to them.

MEETING NIGHTS

General meeting every third Tuesday evening.
General contractors meet second and fourth
Monday evening.
Master plumbers every Thursday evening.

MAY COME TO THIS.**High Wages Threaten to React.**

Indications are that the high wages being demanded by building and common labor in the Calumet District will in all probability act as a boomerang eventually to this element and the powers that be. Labor leaders, either are not wise enough to realize the situation or are just utterly disregarding future consequences. During the last month approximately 1,200 negroes have been brought into the Calumet District to work in the mills.

The Chicago Tribune reports that, on account of the high wages being paid in the Chicago District and other parts of the North, there is a big emigration of negroes from the Southern States to the industrial districts up North so much so that the southern planters, and manufacturers as well, are beginning to feel this exodus, as it is impossible to secure labor to take the place of the cheap colored help upon which they had come to depend. It is further argued that the colored men attracted by the high prices paid labor in the building industry will be drawn into the building field and brought into competition with the white labor in that industry.

While some contractors are loath to employ colored labor there are on the other hand many who will be glad to take advantage of the situation to secure cheaper labor. It has been found that some colored men make good building laborers, and if they can be procured at a lesser cost they will in time go a long way toward displacing white labor.

NOT WAITING TILL THE LAST MOMENT.

Having some business in Chicago the other day the secretary of the Calumet Building Trades Employers' Association took out time to drop in upon the boys at the Associated Builders' and the Builders and Manufacturers Casualty Co.'s headquarters, there to find the crowd exceedingly busy. The B. & M. are making some extensive changes in their office quarters in order to take care of an ever increasing volume of business.

SELDOM FAILS.**Laborers Now Drop Wrench in the Machinery.**

There most always is some sort of delay at the start just when one thinks that everything has been put in ship-shape.

Up here in the Calumet District the contractors thought they had everything prepared for a good get-away for the approaching building season when, "blam," "bing," "blooey," the laborers stepped to the fore with a demand for \$1.00 per hour for building laborers, and \$1.10 per hour for plasterers' tenderers. A meeting has been called for a general conference between the employers and the laborers and in the meantime everybody is waiting in expectancy to see "which way the cat will jump."

CALUMET BUILDING PROGRESS.

Plans are being prepared by Architects J. T. Hutton & Son for the construction of a 1 story building, 75x100 to contain four store rooms. The project is for Barialli Bros., tailors, and will be erected on W. State St. The same architect is working on plans for a garage and salesroom for Louis Roth on Hohman St., and a store building for Geo. Paxton on Hohman St. near Russell.

Architects A. C. Berry & Co. are taking bids on a 2 story apartment building to contain 9 flats. Floyd Hamacher is the owner. The building is estimated to cost \$30,000.

H. B. Prevo will build a store and flat building at Michigan St. and Howard Ave., estimated to cost \$17,000. Rhoades & Graves have the general contract for the construction.

General contractors Rhoades and Graves also have the contract for the erection of a 1 story garage for the Bauwens-Studebaker Sales Co., at Sohl St. and Plummer Ave. Estimated cost, \$18,000.

314 Main Street

REORGANIZATION MOVE STARTED.**Muncie Contractors Would Revive Organization Ideals and Influences.**

Efforts have been started that will have for a result a complete reorganization of the Muncie Associated Building Contractors. There was a time when the city was possessed of a red hot contractors' association, one that held regular meetings and was on the job all the time. Through periods of stress, the same old story every where, Muncie was no exception to the rule, the builders

came flocking in with their "griefs," pooled their troubles and sought to fight their way out shoulder to shoulder. Success and satisfactory compromises followed this demonstration of what could be accomplished through co-operation. Conditions then swing around to a more normal state and things moved along nicely. As has occurred innumerable times before in other localities, somehow, the contractors began to forget the organization tie that bound, became more or less careless of the fact that they all had a mutual interest in each other, that there were underlying fundamental elements, separate from the mere business of contracting, that held a mutual attraction for all building trades employers. These factors were separate and distinct from the regular business routine, they were the basic principles upon which success or failure depended, the foundation upon which the superstructure of the business itself was built, and a foundation, the component parts of which should be protected mutually by the employers.

With the forgetfulness that crept in came a luke warmness toward the organization resulting in desultory meetings, then no meetings at all. Disinterestedness bred a tendency to individuality, every man for himself, as it were.

There could be but one result, no meetings meant the membership just naturally lost interest, dues fell away to nothing and a general disintegration set in.

There are those in Muncie among the contractors who realize the seriousness of the situation and are seeking to preserve the traditions and aims of the local A. B. C.'s and to that end have revived the meetings to talk over plans for a revamping of the association so that the building trades employers may be brought back in line to protect, as a whole, their interests and that of the industry.

MUNCIE TO COME ACROSS.**Predicted She Will Do Her Bit Toward Building Volume This Season.**

It is a little early at present to predict Muncie's building volume for 1923 but there are several large sized projects that are sure to assume action before long, and as a starter they are inspiring optimism among the builders.

A prominent building construction operator of Muncie in sizing up the 1923 prospects said: "There is little or no evidence to expect any large commercial or mechanical building operations in the downtown business district, though there will be some remodeling and alterations but hardly on a large scale.

The Masons will undoubtedly erect a fine temple and the State Normal School has some good work in contemplation. It is possible that the industrial plants may build some additions which should help things along. Last season many new houses were erected in Muncie and continued effort in that direction is expected though a start on that type of work is not looked for until the weather really becomes settled."

His conclusion was, "Don't worry about Muncie, she will do her share of the building this year."

ROOF-TILE

MANUFACTURE this attractive product in your locality. Scores of Plants are now making Walter Concretile. Big profits are possible with a small initial investment.

Our machines are easy to operate. Hundreds of Walter Concretile machines are in use by some of the largest contractors in this country.

The average roof-tile plant will have only \$5,000 capital invested.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

CLUB HOUSE NOTICE TO CONTRACTORS

Bids will be received at the office of P. H. Martin in the city of Peru, Ind., at the hour of 10 a. m. on the 9th day of April, 1923, for the erection, remodeling and completion of the new Eagles' Home, Aerie No. 58, of Peru. Plans and specifications on file at the above named office can be had on and after March 19,

1923. Contract will be let to successful bidder on or before thirty days from above date. All bidders will be required to deposit a certified check payable to the Chairman of Board of Trustees in the amount of \$25 for the safe return of said plans and specifications. The right is reserved by said trustee to accept or reject any or all bids.

March 17 and 24, 1923.

SCIENCE HALL NOTICE TO BIDDERS.

Bids will be received by the Board of Trustees of the Indiana State Normal School at 8:00 p. m., April 9, 1923, at the office of The Eastern Division, Indiana State Normal School, Muncie, Ind., for the erection and completion of the North Wing of the Science Hall at the Eastern Division, Indiana State Normal School, Muncie, Ind. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5% of the amount of the bid. Bids must be made in accordance with provisions of specifications prepared by Kibele and Garrard, architects, Muncie, Ind. Copies of plans and specifications may be found at the office of the Dean of the Faculty of the Eastern Division, Indiana State Normal School, Muncie, Indiana; at the office of Kibele and Garrard, Architects, 335 The Johnson Building, Muncie, Ind., and at the office of the Registrar of the Indiana State Normal School, Terre Haute, Ind. The total estimated cost of the North Wing is \$60,000.00.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,

Helen C. Benbridge, Sec.

March 17-24-31, 1923.

HIGH SCHOOL BUILDING NOTICE TO CONTRACTORS.

The undersigned Board of School Trustees of the School City of Connersville, Indiana, hereby gives notice that on Tuesday, April 3, 1923, until 9:00 o'clock A. M., at the office of the Superintendent of City Schools in the High School Building in the City of Connersville, Indiana, they will receive sealed bids and proposals for the erection and completion of a new High School Building, and at the same time and place, will also receive sealed bids and proposals for the installation of the Heating and Ventilating, and the Plumbing and Sewering in said Building, all in accordance with the plans and specifications heretofore adopted and approved by said Board and which are now on file in the office of the Superintendent of City Schools in the City of Connersville, Indiana.

The estimated cost of the proposed building is Two Hundred Eighty Thousand Dollars (\$280,000.00).

All bids must be in writing, on forms provided therefor, delivered, signed and sealed, and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by certified check for Three Thousand Dollars (\$3,000.00); each bid for the Heating and Ventilating shall be accompanied by a certified check for One Thousand Dollars (\$1,000.00); and each bid for the Plumbing and Sewering shall be accompanied by a certified check for Seven Hundred Fifty Dollars (\$750.00). These checks must be made payable to the Board of School Trustees of the School City of Connersville, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by said Board of School Trustees for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bond,

then, he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of the School City of Connersville, Indiana.

Copies of said plans and specifications are on file in the office of The Elmer E. Dunlap Co., Architects, 1050 North Delaware Street, Indianapolis, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architects, upon the deposit of Fifty Dollars (\$50.00) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

EDWARD V. HAWKINS,
JOHN E. PAGE,
FRED C. NEAL,

Board of School Trustees of the School City of Connersville, Indiana.

March 17th to 24th, 1923.

SHOP BUILDINGS NOTICE TO CONTRACTORS

Separate sealed bids will be received by the Board of School Commissioners of the City of Indianapolis, at the offices of the Board, 150 North Meridian Street, Indianapolis, Indiana, until 8 o'clock p. m., Tuesday, March 27, 1923, and then opened, for the following:

1. General contract on two buildings to be known as "No. 1 Shop Building, No. 2 Garage and Shops," to be located at the southwest corner of Yandes and Sixteenth Streets, in the city of Indianapolis, in accordance with the plans and specifications on file in the office of Donald Graham, Architect, 1128 Hume Mansur Building, Indianapolis, Indiana.

2. Installation of One Electric Freight Elevator in said buildings, according to plans and specifications prepared by Donald Graham, Architect.

3. Heating, Plumbing, Sewering and Water Supply; and Electrical Wiring and Fixtures, for said shop buildings, according to plans and specifications prepared by Snider & Rotz, Engineers, and on file in their office, 703 Merchants Bank Building, Indianapolis, Indiana.

Each proposal shall be in a sealed envelope, with writing thereon plainly indicating the character of the work to which proposal relates, as, for example, "Bid for General Contract, Shop Buildings."

The estimated cost of this building, including general contract, contracts for electric freight elevator, heating, plumbing, sewerage, ventilating and electric wiring, and all fees of architects and engineers, is \$86,000.00. All work must be completed within four months from the date of the signing of contract.

Plans and specifications for all of the above work are also on file at the office of the Business Director, 150 North Meridian Street, and at the offices of the Indiana State Board of Accounts.

All the bids must be made on blanks prepared by the Board, which blanks will be supplied by the architects, engineers or business director, upon application. These proposals must be accompanied by a check for 3 per cent of the maximum bid. The checks must be drawn payable to the order of the Board of School Commissioners of the City of Indianapolis, and must be certified good by a responsible bank or trust company of Indianapolis.

In case a bidder, whose bid shall be accepted, shall not, within five days after notice of such acceptance, perform his bid by entering into a written contract with the Board, in the form made part of the specifications, to execute the work and construct and complete the building and within that time secure the performance of his building contract by a bond, in the form made part of the specifications, with surety or sureties to the approval of the Board, his certified check and the proceeds thereof shall be and remain the absolute property of the Board as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to the Board.

The contractor will be required to execute and give bond, forms of which contract and bond are made a part of the specifications. Each contractor receiving copies of the plans and specifications will be required to deposit, as security for their return in good order, the sum of \$10.00. The right is reserved by the Board to reject any or all bids, and to refrain from accepting or rejecting bids not more than seven (7) days.

WALTER J. TWINAME,
Business Director.

HIGGIN ALL METAL SCREENS

The frames are made of galvanized steel, enameled both inside and outside in any color desired.

They are only 7/16 inch thick and 1 1/8 inches wide, or about half the width and thickness of wood frames.

Owing to the durability of the frames, we use only non-rusting wire cloth woven from commercial bronze wire.

HIGGIN SCREEN DOORS

The screen doors reflect more clearly, perhaps, than any other one thing the quality of a screen installation. Higgin Doors are built to order. In width of rails, finish, and kind of wood used, they match the corresponding house doors.

Let us furnish without cost or obligation estimates of cost.

STATE BUILDING CODE LAW DRAWS ATTENTION OF I. S. OF A. DIRECTORS.

Chairman Cannon Reviews Legislative Activities for New Law.

Evidently less frequent meetings of the Board of Directors of the Indiana Society of Architects entailing less demand upon the valuable time of the board members is going to work out well with the result that just as much business will be transacted through the bi-monthly plan as was accomplished when meetings were held each month. It was no easy matter for the directors to drop their business and sacrifice time to rush in to meetings every month. Then, too, the expense was quite an item for the Society.

Under the new plan a meeting was held Saturday, March 10, at the Lincoln Hotel, these directors attending: Guy Mahurin, Ft. Wayne; A. F. Wickes, Gary; G. W. Allen, Laporte; W. D. Miller, Terre Haute; Charles Brossman, Wilson B. Parker and Merritt Harrison, also Fermor S. Cannon, Chmn. of the Building Code Committee, all of Indianapolis.

Attention of the directors was directed chiefly to the new State Building Code law just passed by the legislature, Fermor S. Cannon making a complete report of all action that resulted in the passage of the new legislation. In conclusion, Mr. Cannon said that, while it is generally conceded that the new law is the most constructive ever advanced by the building industry of Indiana, it was only through the complete co-operation exerted by the Indiana Society of Architects, the Engineers Association, the Associated Building Contractors of Indiana and the State Building Trades Council that made it possible to secure the passage of the new law.

The directors passed a resolution of appreciation and thanks for the efforts put forth by Architects Cannon, Bacon and Honeywell who composed the com-

mittee that represented the I. S. of A.

Secretary Harrison read a letter from E. C. Kemper, Executive Secretary of the A. I. A., in which an invitation was extended to the Society to send representatives to the Fifty-Sixth Annual Convention of the A. I. A., at Washington, D. C., May 16, 17 and 18.

It was moved and carried that the I. S. of A. co-operate with the Indianapolis Real Estate Board and hold the annual June meeting on such a date as to conform with the Architectural Exhibit of the Chicago Tribune Competition, which is to be held in Indianapolis some time that month.

New members taken into the Society Saturday were: Wayne Bell, Ft. Wayne; George V. Bedell, Indianapolis, and F. H. Ahlgrin, Michigan City.

Before adjournment the directors voted to hold their next meeting in Evansville in May, an invitation having been extended by the architects of that city.

RECORD SELDOM EQUALED

Architectural Firm at Indianapolis Through Three Generations Performs Seventy Years of Continuous Service

The passing of the present week marked an interesting event in the Indiana architectural field in that it rounded out the seventieth year of continuous service by one family in that field. Reference is made to the architectural firm of D. A. Bohlen & Son, Indianapolis, started away back in March, 1853, by D. A. Bohlen, who located in Indianapolis after a short stay in Cincinnati, following his immigration from Germany. He carried on the practice alone until 1885 when he admitted to partnership his son Oscar, now head of the firm. Associated with Mr. Bohlen is his son August, who entered the business upon his graduation from Cornell University in 1909. Mr. D. A. Bohlen, the originator of the firm, died in 1890,

and his son and grandson have continued his work establishing the name of Bohlen high in architectural circles. Mr. Oscar Bohlen is a member of the American Institute of Architects and both he and his son are members of the Indiana Society of Architects.

Monday, March 12, the firm representing three generations of the Bohlen family celebrated the seventieth anniversary of its organization in Indianapolis. During that period this family has contributed much to the architectural growth and beauty not only of Indianapolis but of various localities about the State.

Virtually all of the buildings for the Sisters of Providence, St. Mary-of-the-Woods, at Terre Haute, were erected by the Bohlen firm and a new dormitory, chapel and swimming pool are now being built there by the Bohlens. From the time of the elder Bohlen down to August the firm has done work for St. Mary-of-the-Woods.

Other notable buildings planned by the Bohlens include Tomlinson hall, Murat temple, Roberts Park Methodist Church, Aetna building, St. John's cathedral, old Indiana National bank, where the Woolworth store building stands; Pennway building, English hotel, Johnson building, Meridian Street Methodist Church, St. Vincent's Hospital, Little Sisters of the Poor school, shop unit, Arsenal Technical high school, St. Agnes academy, St. Joan of Arc school, Indianapolis fire headquarters building, Bartholomew county hospital, Decatur county hospital, First National bank, Lebanon, Ind.; Indiana National bank, and the Farmers Trust Company building.

At the present time the Bohlen firm is taking care of the architectural services involved in the erection of a \$2,000,000 project for the School of the Immaculate Heart of Mary at Detroit, Mich. This work consists of a dormitory, a liberal arts building, a chapel, a power house and minor buildings.

STATE PLUMBERS VISIT "THE POCKET"

Gathered for State Convention

Evansville the past week played host to the Sanitary Engineers of the State, the occasion being the twenty-sixth annual convention of the state body which convened Monday at the McCurdy Hotel and extended over a period of three days. In attendance at the gathering were several hundred plumbers from all over Indiana, their wives, and many representatives of plumbing supply firms.

Among subjects discussed were the following: How to conduct a local organization, trade schools and apprentices, business location, show windows as silent salesmen, arrangement of show rooms, arrangement of shop, advertising, mail order competition, accounting, inventory, bad accounts, charge system and record keeping.

Unique in its make-up, the Indiana Society of Sanitary Engineers has a Ladies' Auxiliary, the membership of which is composed of the wives of the members of the society, and the women hold regular annual sessions, too, in conjunction with the big convention.

As features to the meeting there were auto trips about the city, a theater party and a banquet and dance.

The annual election of officers for the ensuing year resulted in the re-election of J. A. Gallivan, Muncie, for president and the naming of these new men: A. C. Fandberg, Lafayette, vice-president; J. A. Lamure, Hammond, secretary-treasurer; O. H. Hoff, Brazil, sergeant at arms; Harry Newman, Evansville, and J. M. Freitag, Terre Haute, directors.

As for the next convention the matter of site was left to the board of directors.

MORE CAUSE FOR OPTIMISM

Evansville Business Stepping Right Along

Local clearing-house totals for the week ending March 10 showed an increase of \$1,016,328.66 over the corre-

sponding week last year. The totals this year were \$4,985,233.37. For the same period last year they were \$3,968,304.73.

TEAMSTERS RAISE PRICES

New Charge to Take Effect on and After April 1

Giving the advance in the upkeep of teams as a reason, Evansville teamsters engaged in excavating work have announced that after April 1 their prices will be \$8 per day of nine hours. This is a slight advance over the former prices charged.

CHIPS AND SHAVINGS

The Scarborough-Davies Co., general contractors, started work recently on the new \$50,000 garage for the Franklin Corporation.

The contract for the construction of a handsome new home on Riverside avenue for William Ingle has just been awarded to Anderson & Veatch. The house will be of stucco exterior and is estimated to cost \$30,000.

INCREASED BUILDING TREND SHOWN

Building Total Comparisons for Feb- ruary Prove Interesting

Figures they say don't lie. That being the case a reference to the official building returns for Fort Wayne for the month of February for the past five years not only shows that the building construction tide has been on the rise as the years rolled on, but impresses by its surging that it is billowing in at an ever gaining momentum.

In February, 1919, things were at a low stage, only \$32,810 being involved in new construction operations that month. The following corresponding period building construction showed a 231.8 per cent increase. In February, 1921 there was a gain of 535.7 per cent over February, 1919, and 92 per cent over February, 1920. The next year the same month showed a 480 per cent gain over February, 1919, but an 8.4 per cent loss from the figures of 1921. This year

building construction work for which permits were granted in February leaped away out in front with an 1,181.1 per cent gain over February, 1919, and an increase of 120 per cent over the same month the year previous.

To gain some idea of the increase in the volume of local building construction work for which permits were granted last month one has but to compare the February, 1923, figures with the total figures returned by the corresponding months from 1919 to 1922 inclusive. Such comparison shows that the February, 1923, volume lacked by 22.3 per cent of equaling the combined total of the other four Februaries.

The February building totals for the past five years in Fort Wayne are:

Year	Per.	Est. Val.
1919	23	\$ 32,810
1920	20	108,630
1921	57	208,600
1922	47	191,035
1923	61	420,330

DEMAND HEAVY

Need for Common Labor Grows

Brisk activity in building operations despite the earliness of the season has begun to make itself felt in Fort Wayne, where there has been created a heavy demand for common laborers, the contractors and builders being badly in need of same.

The free employment bureau has been of considerable aid in the matter of assisting the builders, having been able to place 125 common laborers during the week.

ALL BUSINESS THRIVING

Banking Circles in Fort Wayne Steadily Busy

While building is showing a healthy tone it is not alone, for the general business trend in Fort Wayne is equally good. Activity in banking circles, indicative of business growth and a healthy growth, continues steady.

The local bank clearings for last week showed a good volume of business going on daily, according to the daily report, which is as follows:

Monday	\$ 464,623.85
Tuesday	409,129.27
Wednesday	424,419.96
Thursday	506,485.82
Friday	325,248.02
Saturday	258,105.83
Total	\$2,388,012.74

Balance	\$ 225,737.36
Last week	2,713,743.55
Week last year	1,842,483.60

WAIVER OF LIEN. TURNING A RUMOR INSIDE OUT.

Cause for Uneasiness Shown Through Co-operation to Be Groundless.

Rumors now and then, a good deal as a comedian once described a cyclone, starting nowhere, going nowhere in particular and in a heck of a hurry to get there can stir things up pretty well and cause quite a lot of confusion unless run down and discredited by fact.

The word got around Indianapolis that the Kresge Co., Detroit, intended to ignore Indianapolis contractors' in awarding contracts for its new building at Washington and Pennsylvania Sts. The matter was taken up with the Chamber of Commerce and Secy. Reynolds got in touch with the Building Contractors Association, expressing the desire of the Chamber to co-operate to see that Indianapolis men and organizations should have every opportunity to sell their wares and services to those doing business.

Mr. Reynolds also wrote the Kresge Co. to inquire of its attitude toward the award of contracts. In reply he received the information that it was not the intention of the company to let the contract to a contractor outside of Indianapolis without giving the local men a chance to figure. At that time it was stated that arrangements were being made to submit plans to as many Indianapolis builders as might care to figure on the work.

Substantiating its declared stand in the matter the company did submit plans to local contractors, opened an Indianapolis office, and placed a building construction superintendent there to consult with the contractors.

The final result was that the general co-operation employed killed the disturbing rumor, created satisfaction and in the end developed to the point where, the past week, the general contract was

awarded to the Wm. P. Junglaus Co. of Indianapolis. The only reservation made by the owner was that he himself purchased some of the materials, such as cement, reinforcing steel and metal lath. Even the reinforcing steel was sold by an Indianapolis firm, Hugh J. Baker & Company.

Thus it was that organization and co-operation got down to the real truth, cleaned up what appeared to be an unfavorable situation and satisfied all concerned.

CARPENTERS' SCALE DECISION REACHED IN INDIANAPOLIS.

Craft and Employers Sign Up Working Agreements.

Good news emanates from Indianapolis this week glowing like nature awakening sunshine in the spring, nor, is it unlike sunshine at this season of the year when the drap, dark clouds of uncertain labor wage scale adjustments squalls hover about the horizon of the new building season.

Profiting by past years of bitter experience, when weeks and months were consumed in wage settlement alterations, the members of the Building Contractors Association got down to business early this year and though the previous wage scale does not expire until April 1, a satisfactory scale of 92½ cents per hour has been decided upon with the Carpenters Union and the working agreement, with very minor modifications, has been signed.

In the handling of this matter the carpenters' representatives displayed a most commendable and sensible attitude and, evidently imbued with the idea of encouraging building construction operations as far as it was within their power, did not ask for increase in their craft scale, instead, all they asked was that the 1922 scale be maintained. This attitude was most fair and is deserving of commendation. When one considers the numerical strength of the carpentering craft and its influence on the industry this early settlement of the carpenters' wage scale should have a far reaching effect in keeping building construction operations moving right along.

THERE'S A REASON.

Contractors' Headquarters a Busy Place These Days.

The approach of spring always brings with it the annual wage scale adjustment with its attendant hustle and bustle around the Building Contractors Association headquarters and right now things are buzzing at that locality.

Each hour, almost, each day is marked by the arrival and departure of craft representatives and contractor employers as they gather for committee meetings for wage negotiations, and then depart.

Except for the carpenters, no definite conclusions have been reached, but so far there has been no serious break between the employers and employees, in fact, negotiations are going on, to all intents and purposes, smoother than in years past. There are many who anticipate that by April 1st and May 1st, when various agreements expire practically all new wage scales and agreements will have been decided upon if not actually signed up.

**THINK WHAT MIGHT HAPPEN IF IT
MET OFTEN.**

It Could Be Worse.

Thank goodness that's over! Reference is made to the fact that another session of the State Legislature has come and gone.

Sometimes one is inclined to wonder if the state wouldn't be better off if the Legislature only met every four years instead of two. It is true that this body is a necessary part of our government and one that could not be dispensed with, and yet such frequent sessions as are customary now bring into existence new laws, or effect so many changes and modifications in the current statutes as to cause a condition that creates more or less confusion. Citizens no more get accustomed to operating under a certain set of laws than along comes the Legislature with a new set of statutes that seek to regulate most everything from the jump of a grasshopper clear on through to the solar system. Then, too, there is always the statesman with an improved taxation system hobby who yelps about a reduction of taxes and then proceeds to hang it on. Possibly, one of these days some of these pseudo expert economic geniuses will arise in our legislative halls and put across such stuff as will compel all citizens to wear meters to charge off the air they breathe.

Taxes in Indiana now have reached such a high level that in the Calumet District men are disposing of their property and are buying or building across the line in Illinois, where taxes are about two-thirds less.

Nor is that all. The most recent session of the Legislature has reached out for another grab and tacked a 2c a gallon gasoline tax on the poor dud who was foolish enough to buy a flivver in order to transport his family around so they could get a fresh breath of air out where the city dirt and smoke are unknown.

One thing is sure, this gasoline tax move won't cause the railroad and street car company officials any worry or loss of sleep unless the mirth that is theirs keeps them laughing uproariously as they think of the increased cost of operation that has been tacked on their competitors, the truck and jitney companies.

GOT NOWHERE.

There was a meeting between the representatives of the local B. T. E. A. and the Laborer's Union last week to reconsider the wage scale matter but, since the latter did not have full power to act no definite conclusions were reached.

CALUMET BUILDING PROGRESS.

The Weise & Meyn job on West State street was changed from store and hotel to a one-story store building 75x95, containing four rooms. Ahlborn and Bates got the contract.

When the bids were opened on the Bungalow Fire Station for the south side the low bidder was Guy Young, whose bid was \$2,000 above the estimate. The bids were taken under advisement.

Architect Mac Turner is making plans for Roland Piazza for a one story brick store building 70x80 on S. Hohman St.

The Gary contractors and the laborers over there had a run in last week all because the former wished to pay off with checks. When the contractors ignored the cash demand and insisted on using checks the Laborers' Union officials pulled the men off of the works.

In Hammond we had the same trouble but our association got behind the employers and stood for the check payment plan which continued to be used. That's what organization does.

General Contractors McClay & Brady secured the contract for the construction of a \$16,000 store and flat building on Calumet Ave. for the Hammond Electric Supply & Repair Co.

**MUNCIE SANITARY ENGINEERS
VISIT EVANSVILLE.**

Go to Attend Annual State Convention.

A good representative crowd of local plumbers, headed by J. A. Gallivan, president of the Indiana Society of Sanitary Engineers left for Evansville early in the week to attend the annual convention of the organization held in that city, Monday, Tuesday and Wednesday.

Muncie plumbers have always been active in the work of the State Sanitary Engineers and can always be counted on at the annual conventions.

It was the Muncie sanitary engineers who originated the idea of guaranteeing the workmanship of its members and seeing that all provisions of contracts taken by the individual members were lived up to.

**STORM PLAYED HAVOC WITH NEW
CONSTRUCTION OPERATION.****High Wind Tears Away Brick Wall.**

The high wind that swept the country Monday of this week leaving death and destruction in its wake over a wide expanse of territory, included Muncie in its itinerary and played havoc with the new construction work under way at the State Normal School.

Gripped by the gale that raged forty-five feet of brick work on the new Science Hall was torn from its moorings and toppled over. This was the greatest single item of damage in the county.

The southwest wing of the third floor, just completed last week end was leveled. The collapse of the wall was attributed to the fact that the mortar was still green, not having had time to set properly.

Eshelman & Son, of Anderson, the general contractors, were fully covered by insurance.

**NEGLECTED APPRENTICE PROBLEM PROMISES TO MAKE SELF
FELT THIS YEAR.****Wage Trend Upward One Effect.**

Evidently from the word coming in, not only from various points of Indiana but from all over the country, the building industry this season is going to feel more than ever the lack of apprentices in the building field, a feature that, years of neglect, may develop into a quite serious situation before the summer is over.

Muncie is no exception to the rule for the demand on the available supply of skilled building trades mechanics promises to be exceedingly heavy in view of the volume of work in prospect. Already the big cities are feeling the effect and are raising wages. The result is bound to tell in the smaller localities which, in self defense will be forced to increase wages to some extent in order to retain skilled help, for, the men, a large proportion of them, can not escape the wage lure the big cities hold out to them.

This season the natural law of supply and demand seems about to come into its own for there is a big demand in prospect with a limited supply of good mechanics to meet it. This latter condition is the result of the continued lethargy of the contractors regarding the induction of more apprentices into the building industry.

High wages do not make good mechanics, rather, it takes time and training to produce them and the building trades employers must acknowledge this fact and be willing to buckle down and assume their legitimate responsibility toward encouraging and training apprentices. When such a stand is taken the better off all will be whose interests are wrapped up in building. Prosperity in building depends on activity and that activity is more or less regulated by construction costs levels, they can mount just so high and beyond that point inertia sets in to effect the public, the architect, the contractor, the material man and the mechanic.

The apprentice problem is a far reaching one and one that concerns greatly the contractors who must determine to tackle it, the sooner the better, for the salvation of the building business.

NEW INDIANA BUILDING LAW.

Better Building Construction Supervision
Assured.

Though not, strictly speaking, a building code law, nevertheless, the one bill above all others up for passage at the recent session of the State Legislature in which the building industry of Indiana was most interested and upon which it centered its combined effort that it might be passed, and was, does provide for better building regulations and uniform standards throughout Indiana and administrative power to enforce same and also any present building statutes now on the books and any future ones.

When the matter of a building code was gone into it was found that there were some sixteen or more good state building laws, but the provision was lacking to administer same. The General Committee composed of representatives from the Associated Building Contractors of Indiana, the Indiana Society of Architects, Indiana Engineering Society and the Indiana State Building Trades Council then decided upon an idea to perfect a bill to provide for an administrative building council and prescribe its powers and duties. The idea was approved by an Administrative Committee consisting of the Chairman of the Industrial Board, the Secretary of the State Board of Health, and the State Fire Marshal.

The General Committee then set to work and by constant and untiring effort drafted a bill for passage that has resolved itself into a law that will be practical for and applicable to the State Building Industry. The members of the above building organizations should be proud of the result accomplished by their respective committees, for it was the tenacity and co-operation displayed by all parties to the General Committee that made it possible to prepare and secure the passage of a law that has

been labeled as the most progressive and constructive legislation ever sponsored by the State Building Construction Industry.

The bill, which follows, was introduced in the Senate January 18, 1923, by State Senator Harold Van Orman, Evansville, was passed both by the Senate and House, and was signed by Governor McCray, March 3, 1923, thus making it a law:

ENGROSSED SENATE BILL NO. 140

A Bill for an Act providing for an administrative building council and prescribing its powers and duties.

Section 1. Be it enacted by the General Assembly of the State of Indiana, There is hereby created a council which shall be known as the "Administrative Building Council of Indiana," which shall consist of the chairman of the industrial board, the secretary of the state board of health and the state fire marshal, which shall be known as the administrative committee of the building council, together with twelve appointive members, as hereinafter provided, which shall be known as the advisory committee of the building council. The members of the advisory committee shall be appointed or removed by the administrative committee with the approval of the governor, and a majority vote of the three members, together with an approval of the governor, shall be necessary to make any appointment or removal. The advisory committee shall be composed of three engineers, three architects, three contractors and three building mechanics, all of whom are representative of the building industry and engaged in actual practice and construction, submitted from the membership of their respective organizations; Indiana Engineering Society, Indiana Society of Architects, Associated Building Contractors of Indiana and jointly by the Indiana State Building Trades Council and Indiana State Council of Carpenters. One member from each of the groups of appointive members hereinbefore designated shall be appointed for a term of two years, one member for a term of three years, and one member for a term of four years. Thereafter all members shall be appointed for terms of four years. In making the original appointments, the administrative committee shall designate the terms of the respective appointees. All vacancies shall be filled by the administrative committee in the same manner as original appointments, for unexpired terms. In any case, each member appointed shall serve until his successor shall have been appointed and shall have qualified.

Sec. 2. Within thirty days after the

passage and publication of this act, the administrative committee shall meet and organize by the election of a chairman and a secretary, each of whom shall hold office for one year, at which time the committee shall make all appointments of the members of the advisory committee. Within thirty days after such appointments shall have been made, the advisory committee shall meet and organize by the election of a chairman and a secretary, each of whom shall hold office for one year. Annually thereafter, the administrative committee and the advisory committee shall each organize in a similar manner. The members of the respective committees shall serve without compensation, for any duties which they may be required to perform under the provisions of this act.

Sec. 3. The administrative building council of Indiana shall hold four regular quarterly meetings each year. The first meeting to be called not later than September 1, 1923, at which time the council shall adopt by-laws and rules not inconsistent with law, needed in performing its duty. The chairman, and secretary of the administrative committee, shall be chairman and secretary of the administrative building council. Special meetings of the council may be called at any time, by the chairman, by designating the date and the purpose of the called meeting in writing.

Sec. 4. It shall be the duty of the administrative committee and it shall have power, jurisdiction and authority; to administer, execute and enforce any and all laws now in force or hereafter enacted in this state relative to the construction, repair, or maintenance of places of employment and public buildings, as shall render the same safe and sanitary.

To ascertain, fix and order such reasonable standards, rules, regulations, classifications, approval of plans and specifications of places of employment and public buildings as shall be necessary to carry out the purpose of this act. The majority of the administrative committee shall constitute a quorum for the exercise of the powers or authority conferred upon it. In case of a vacancy the remaining two members of the administrative committee, shall exercise all the powers and authority of the administrative committee until such vacancy is filled.

Sec. 5. It shall be the duty of the advisory committee to co-operate with the administrative committee in an advisory capacity to furnish such information as may be necessary, and to carry out such duties that may be conferred upon it by the administrative committee. The advisory committee shall not have power

or authority to issue rules and regulations of its own volition, however: The committee may recommend to the administrative committee such rules and regulations as are deemed practical, applicable and considered necessary.

Sec. 6. Every employer and every owner of a place of employment or a public building now or hereafter constructed shall so construct, repair or maintain such place of employment or public building, and every architect, engineer or any one who designs a building shall so prepare the plans and specifications for the construction of such place of employment or public building, as to render the same safe and sanitary, in accordance with the rules and regulations as promulgated by the administrative committee.

Sec. 7. The administrative committee is hereby authorized and empowered to exercise such supervision of every place of employment and public buildings in the state as may be necessary adequately to enforce and administer all laws and all lawful orders requiring such places of employment or public buildings to be safe, sanitary and to secure the protection of the life, health, safety, and welfare of every employee in and every frequenter of such place of employment, and the safety of the public or tenants in any such public buildings.

Sec. 8. The administration of these rules and regulations shall be enforced in co-operation with local officials as defined in the statutes to mean building inspectors of every city; if there be no building inspector, then of the mayor, township trustee of every township, the board of trustees of every town and the board of commissioners of every county, who are required by law to enforce all orders, rules and regulations of the administrative committee which are germane to their respective duties. With the rules and regulations issued by the administrative committee as a basis, city ordinances may go more into detail if desired, or may contain more stringent requirements, provided the same do not conflict with any order of the administrative committee.

Sec. 9. Upon petition by any person that any place of employment or public building is not safe and sanitary, the administrative committee may proceed, with or without notice, to make such investigation as may be necessary to determine the fact of the complaint. After such hearing, as may be necessary, the administrative committee may enter such order relative thereto as may be necessary to render such place of employment or public building safe and sanitary. Whenever the administrative committee shall learn that any place of employment or public building is not

safe or sanitary, it may, of its own motion, summarily investigate the same, with or without notice, and enter such order as may be necessary relative thereto.

Sec. 10. The administrative committee may upon application of any employer or owner, grant such time, or such extension thereof, as may be reasonably necessary for compliance with any order.

Sec. 11. Any employer, owner, or other person in interest being dissatisfied with any order of the administrative committee may commence an action in the circuit court of jurisdiction against the administrative committee as defendant to vacate and set aside any such order on the ground that the order is unlawful, or that any such order is unreasonable, in which action the complaint shall be served with the summons.

Sec. 12. If any employer, owner or person shall violate any of the provisions of this act, or shall do any act prohibited therein, or shall fail to perform any duty lawfully enjoined, within the time prescribed by the administrative committee or shall fail, neglect or refuse to obey any lawful order given or made by the administrative committee or any judgment or decree made by any court in connection with the provisions of this act, for each such violation, failure or refusal, such employer, owner or other person upon conviction thereof shall be fined in any sum not less than ten dollars (\$10) nor more than one hundred dollars (\$100) for each offense.

Sec. 13. Except where the context clearly indicates a different meaning the terms used in this act shall be construed as follows: The phrase "place of employment" shall mean and include every place, whether indoors or out or under ground and the premises appurtenant thereto where either temporarily or permanently any industry, trade or business is carried on, or where any process or operation, directly or indirectly related to any industry, trade or business, is carried on, and where any person is directly or indirectly employed by another for direct or indirect gain or profit, but shall not include any place where persons are employed in agricultural pursuits.

The term "employer" shall mean and include every person, firm, corporation, agent, manager, representative or other person having control or custody of any employment, place of employment or of any employee.

The term "owner" shall mean and include every person, firm, corporation, state, county, town, city, manager, representative, officer, or other person or persons having ownership, control or custody of any place of employment or

public building, or the construction, repair or maintenance of any place of employment or public building, or who prepares plans and specifications for the construction of any place of employment or public building. The term "frequenter" shall mean and include every person, other than an employee, who may go in or be in a place of employment under circumstances which render him other than a trespasser. The term "order" shall mean and include any decision, rule, regulation, direction, requirement or standard of the administrative committee. The term "public building" shall mean and include any structure used in whole or in part as a place of resort, assemblage, lodging, trade, traffic, occupancy, or use by the public, or by two or more tenants.

Sec. 14. Nothing contained in the provisions of this act shall affect, amend, repeal or alter in any way the present building and housing laws of the state, but this act shall be deemed additional and supplemental thereto.

tion of a school building in Jackson Township, Rush County, Indiana.

At the same time and place bids will also be received for the installation of

(a) The installation of heating and ventilating system; (b) plumbing and sewerage system and (c) electrical work, all in accordance with the plans and specifications heretofore adopted and approved by said Trustee and the Advisory Board of said township, which plans and specifications are now on file in the office of said Trustee and of the State Board of Accounts.

The estimated cost of the proposed building completed is \$49,000.00. All bids must be in writing on forms prescribed by the law of the State of Indiana, and delivered to said Trustee on or before the time mentioned herein. Each bid on the general construction shall be accompanied by a certified check for \$500.00, payable to said Trustee; each bid for the heating and ventilating contract shall be accompanied by a certified check for \$300.00; each bid for the plumbing and sewerage disposal shall be accompanied by a certified check for \$200.00; each bid for the electric wiring shall be accompanied by the certified check for \$100.00. These checks to be held by said Trustee as a guarantee of good faith that the bidders will enter into a contract and execute a bond for the full amount of his bid, approved by said Trustee and Advisory Board, for the due performance thereof, if his bid is accepted. The checks of the unsuccessful bidders will be returned when the contract has been awarded and entered into. Should the successful bidder fail to enter into a contract and execute such bond he shall forfeit such certified checks as liquidated damages for the use and benefit of said township.

Plans and specifications may be examined at the office of the township Trustee and at the office of Karl P. Hinkle, Architect, 108 Heinsmann Building, Connersville, Indiana.

A deposit of \$15.00 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of said Architect, which amount will be returned in full in case the said plans are returned on the day of letting and a bona fide bid is submitted by the contractor. Should the bidder fail in one of said requirements only the sum of \$5.00 shall be refunded to him, but should he fail in the observance of both conditions he shall forfeit the full amount of said deposit.

Each bidder shall stamp or write his name on the back of the drawing or covering of the specification used by him in preparing his proposals.

Said contract will be let in four parts as stated above, to the lowest responsible bidder, who upon the award of a contract shall give a bond to the benefit of the Trustee and said board for the benefit of any person, persons or corporations, who shall suffer any loss or damage by the reason of such bidder failing or neglecting to perform the work awarded him by said Trustee and to pay for all labor or materials furnished him or any sub-contractors in the construction of said work.

The Trustee reserves the right to reject any and all bids.

Dated at Rushville, Indiana, this 20th day March, 1923.

HENRY W. BECKNER Trustee,
Jackson Township, Rush County, Indiana.
R. R. 6, Rushville, Indiana.

March 24th, 1923.

NOTICE OF BOND SALE.

Notice is hereby given that at 3:00 o'clock, P. M., on Wednesday, April 11, 1923, at the office of the County Superintendent of Schools, at Rushville, Indiana, Henry W. Beckner, as Trustee of Jackson Township, Rush County, Indiana, will offer for sale to the highest bidder an issue of \$51,000.00 of bonds of Jackson School Township, Rush County, Indiana.

Said bonds shall be 60 in number, dated March 1, 1923, of \$850.00 each and bearing interest at the rate of 5% per annum, payable semi-annually, two of which bonds shall be due and payable on August 1, 1924, and a like number and denomination shall become due and payable every six months thereafter until all of said bonds are paid. The first interest on said bonds shall be payable on August 1, 1924, and every six months thereafter and shall be evidenced by coupons attached to same and said bonds and interest shall be payable at the office of the Peoples National Bank, of Rushville, Indiana. Said bonds have been issued strictly in compliance with the law of the State of Indiana, and pursuant to an order of the Advisory Board of Jackson School Township, Rush County, Indiana, and duly entered of record on January 9, 1923, authorizing said bonds to be issued for the purpose of providing bonds for the construction of a school house in said township.

Said bonds will be sold according to law to the highest and best bidder for not less than par and face value; the right is reserved to reject any and all bids.

HENRY W. BECKNER, Trustee,
Jackson Township School, Rush County,
Indiana, R. R. 6, Rushville, Indiana.
March 24th, 31st, April 7th, 1923.

HOSPITAL NOTICE TO CONTRACTORS

Notice of letting contract for the new Nurses Home and Solarium for the F. J. Witham Memorial Hospital, Boone County, Indiana, including heating and ventilating, plumbing and sewage, electrical wiring and fixtures, etc., for the Board of Hospital, Trustees, of Boone County, Indiana. To be erected on lots cornering at Lebanon and Camp street, Lebanon, Indiana.

Separate sealed proposals will be received by the Board of Hospital Trustees at the Auditors Office, court house, Boone county, Indiana, until 2:30 p. m., Friday, April 6, 1923, and opened at the said time for the completion of said Nurses Home and Solarium, according to plans and specifications and detailed drawings now on file in the office of James Gardner at the Boone county State Bank, Lebanon, Indiana; also in the office of the auditor of Boone county in the court house at Lebanon, Indiana, Board of State Charities, State Board of Accounts, State House, Indianapolis. All bids must be in writing, sealed and with envelope endorsed giving bidder's name and the class of work bid upon and all bids will be opened and read publicly at the time and place fixed in this notice.

The Board of Trustees reserve the right to reject any and all bids and to take time to investigate the bids and the qualifications of the bidder.

Each bidder shall file with his bid the Statutory affidavits required by law in the State of Indiana and each bid shall be accompanied by a certified check equal to 3 per cent of the bid, made payable to the Board of Trustees, which check will be held as a guarantee of good faith that the bidder will enter into contract and execute a bond for the full amount of his work, approved by the Board of Trustees, for the due performance thereof if his bid or bids are accepted. The checks of those bidders who fail to be awarded contracts shall be returned to them when the contracts are let. Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for the use and benefit of the proper fund of the F. J. Witham Memorial Hospital, Boone county, Indiana.

Contractors may obtain plans and specifications from the office of Frost and Kellogg, Architects, Lebanon, Indiana.

All contractors to whom contracts have been awarded must furnish the Board of Hospital Trustees a certificate from the Industrial Board that the Workmen's Compensation Law of Indiana has been complied with.

Payment to the contractor shall be made upon estimates as the work progresses and the final payment shall be made as stated and fixed in the specifications for said work.

Frank O. Staton, Pres.
James Gardner, Sec.
Crayton McKinsey,
Rolla E. Williams.

March 24th, 1923

CLUB HOUSE NOTICE TO CONTRACTORS

Bids will be received at the office of P. H. Martin in the city of Peru, Ind., at the hour of 10 a. m. on the 9th day of April, 1923, for the erection, remodeling and completion of the new Eagles' Home, Aerie No. 58, of Peru. Plans and specifications on file at the above named office can be had on and after March 19, 1923. Contract will be let to successful bidder on or before thirty days from above date. All bidders will be required to deposit a certified check payable to the Chairman of Board of Trustees in the amount of \$25 for the safe return of said plans and specifications. The right is reserved by said trustee to accept or reject any or all bids.

March 17 and 24, 1923.

SCIENCE HALL NOTICE TO BIDDERS.

Bids will be received by the Board of Trustees of the Indiana State Normal School at 8:00 p. m., April 9, 1923, at the office of The Eastern Division, Indiana State Normal School, Muncie, Ind., for the erection and completion of the

North Wing of the Science Hall at the Eastern Division, Indiana State Normal School, Muncie, Ind. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5% of the amount of the bid. Bids must be made in accordance with provisions of specifications prepared by Kibele and Garrard, architects, Muncie, Ind. Copies of plans and specifications may be found at the office of the Dean of the Faculty of the Eastern Division, Indiana State Normal School, Muncie, Indiana; at the office of Kibele and Garrard, Architects, 335 The Johnson Building, Muncie, Ind., and at the office of the Registrar of the Indiana State Normal School, Terre Haute, Ind. The total estimated cost of the North Wing is \$60,000.00.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,

Helen C. Benbridge, Sec.

March 17-24-31, 1923.

HIGH SCHOOL BUILDING NOTICE TO CONTRACTORS.

The undersigned Board of School Trustees of the School City of Connersville, Indiana, hereby gives notice that on Tuesday, April 3, 1923, until 9:00 o'clock A. M., at the office of the Superintendent of City Schools in the High School Building in the City of Connersville, Indiana, they will receive sealed bids and proposals for the erection and completion of a new High School Building, and at the same time and place, will also receive sealed bids and proposals for the installation of the Heating and Ventilating, and the Plumbing and Sewering in said Building, all in accordance with the plans and specifications heretofore adopted and approved by said Board and which are now on file in the office of the Superintendent of City Schools in the City of Connersville, Indiana.

The estimated cost of the proposed building is Two Hundred Eighty Thousand Dollars (\$280,000.00).

All bids must be in writing, on forms provided therefor, delivered, signed and sealed, and in every respect must conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by certified check for Three Thousand Dollars - (\$3,000.00); each bid for the Heating and Ventilating shall be accompanied by a certified check for One Thousand Dollars (\$1,000.00); and each bid for the Plumbing and Sewering shall be accompanied by a certified check for Seven Hundred Fifty Dollars (\$750.00). These checks must be made payable to the Board of School Trustees of the School City of Connersville, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by said Board of School Trustees for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bond, then, he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of the School City of Connersville, Indiana.

Copies of said plans and specifications are on file in the office of The Elmer E. Dunlap Co., Architects, 1050 North Delaware Street, Indianapolis, Indiana.

Copies of said plans and specifications may be obtained from the office of the Architects, upon the deposit of Fifty Dollars (\$50.00) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

EDWARD V. HAWKINS,
JOHN E. PAGE,
FRED C. NEAL,

Board of School Trustees of the School City of Connersville, Indiana.
March 17th to 24th, 1923.

What kind of bitumen goes into your roof?

Most waterproofing bitumens look alike when they are being mopped on. But laboratory tests show in advance that some will outlast others.

You can now make sure beforehand that you get the most serviceable waterproofing. A scientifically blended bitumen has at last been developed which protects your buildings **permanently** with a continuous, unbroken layer absolutely impervious to water.

The name of this unique product is Viskalt. You have probably noticed the series of articles about it in each issue of *The American Architect*.

Viskalt

~Pliant Under Stress~

MEMBRANE ROOFS

provide a genuine weather armor for your structures. Viskalt is made by a firm backed by over fifty years of manufacturing experience—the Richardson Company of Lockland (Cincinnati), Ohio; Melrose Park (Chicago), Ill., and New Orleans, La.

ARCHITECTURAL CIRCLES ALL OVER THE STATE REPORTED BUSY.

Good Tone Back of Inquiries.

It is interesting to learn from the members of the Board of Directors of the Indiana Society of Architects who attended the regular board meeting recently held at Indianapolis that practically every section of the state is bristling with good live building prospects, substantial evidence to back up the many forecasts that have been made relative to a big building season ahead during the spring and summer of 1923.

At the meeting were well-known Indiana architects representing the north, south, east and west sections of the State and one and all reported that the outlook was most promising. The architects generally are reported to be very busy not only on plans, but in taking care of numerous inquiries from prospective builders.

While many preliminary jobs fall by the wayside long before reaching maturity, nevertheless, the architects say that the public generally seems to realize that construction costs can not be expected to come down or be cheap with shortages of labor prevalent, and that there is a good strong tone back of the inquiries now being made. Further, the architects say they do not look for any heavy activity until the new wage scales for 1923 are settled. Most contractors are holding back on estimating until wage decisions have been definitely made is the general condition prevailing at this time all over the state.

SMALL HOUSE COMPETITION DATE DRAWING NEAR TO CLOSING.

Prize List Inviting.

Don't forget, March 29th is the closing date for all plans to be submitted for the Small House Competition that is being staged by the Indianapolis News in conjunction with the Lake Division, Architects' Small House Bureau.

The competition is being held in con-

nection with the Home Complete Exposition to be held at the Coliseum, State Fair Grounds, Indianapolis, April 2 to 7, inclusive.

Money prizes amounting to \$550 will be awarded to the winning plans as follows: First prize, \$200; second prize, \$150; third prize, \$125; fourth prize, \$75.

Architect Herbert Foltz, Indianapolis, is the architectural advisor to the competition to be judged by a Jury of Awards, composed of architects, realtors, builders, and club women.

The idea of the competition is to develop plans for ideal moderate priced small homes of from 18,000 to 25,000 cubic feet, such as would meet the needs and desires of the average American family. The rules place no restrictions upon the kind of materials to be used, but the plans must provide for a structure allowing for all year occupancy.

All plans must be entered anonymous, so that the name of the competitor designer may not be known till after the jury makes known its awards.

All designs submitted will be placed on exhibit at the Home Complete Exposition.

The competition is open to all Indiana architects and draftsmen and though the closing date is still a few days off and there is no definite data on the number of competitors the inquiries indicate considerable interest has been aroused in the competition.

INVITATION DEMONSTRATES IN- TEREST OF A. I. A. IN STATE ARCHITECTS' BODIES.

Representation from I. S. of A. Asked
at Washington Convention.

The interest in State Architects' Societies and Associations taken by the American Institute of Architects is revealed by a recent communication received by the Indiana Society of Architects extending an invitation to send delegates to the A. I. A. annual convention at Washington, D. C., May 16, 17 and 18.

Several years ago the national organization of architects went on record as favoring the encouragement of the

organization of state architects' associations and since that time has worked to that end. The American Institute of Architects has kept in close touch with the Indiana Society of Architects and shown interest in the latter's development. In December, 1921, the A. I. A. conferred quite an honor upon the I. S. of A., by having its Board of Directors meet at Indianapolis upon invitation from the Indiana Society. Prominent architects from all over the U. S. gathered at the Hoosier Capital City upon that occasion, it being the biggest architectural professional event in the history of Indiana.

Last year the I. S. of A. sent delegates to the Chicago convention of the A. I. A. and this year is contemplating the same action when time for the Washington gathering rolls around.

While the delegates from the state societies have no voting power their participation in the discussions is welcomed. Such procedure places the state architects' organizations in intimate touch with the pulse and actions of the A. I. A., from which benefits are bound to accrue. The report of the delegates who go to Washington this year will make interesting material for the annual meeting of the Society in June.

The delegates are to be appointed by the Board of Directors at their May meeting.

ANNOUNCES OPENING OF OFFICE.

Architect Hadley Enters Indianapolis Field.

Elliott B. Hadley, architect, Indianapolis, has opened an office for the practice of architecture, at 600 State Life Building.

Mr. Hadley for five years was connected with the office of Architect Frank B. Hunter, and for two years was in the service of Architects Bass-Knowlton & Co., both Indianapolis firms.

Catalogs and building material samples will be very acceptable to Architect Hadley for filing purposes.

NOT WITHOUT EFFECT.

Evansville's Building Revival Makes Self Apparent.

Riding into second place, as regards its February building performance, compared with those of Indiana's eight leading cities, was a new position for Evansville, and the achievement was most gratifying to local building men. It is the first time in a long period that Evansville has overtopped Ft. Wayne and South Bend in the building race and edged in next to Indianapolis who, by nature of her size, affording much more extensive building operations, naturally can not be overhauled easily by the cities of much less population.

There are those in Evansville who believe that the city has at last struck her building gait, after a long stretch of desultory building, and will now be able to step right along with the other cities of her class. At least the prospects encourage such a view.

REACH WAGE AGREEMENT.

Contractors Agree to 90c per Hour With Hoisting Engineers.

The Evansville contractors have now gotten down to wage scale matters once more and as a result have reached an agreement with the hoisting engineers. The latter presented a new wage contract for 1923 calling for 90c per hour, which has been approved by the contractors.

INCREASED CONSTRUCTION COSTS EXPECTED LATER.

Renewed Activity to Have Effect.

Naturally with the prospect of a big building season ahead to create a heavy demand upon labor and the supply of building materials many are wondering to what extent this demand will have upon construction costs.

As far as Evansville is concerned the indications are that there will be advances in building trades mechanics wages and also in material prices. Already the unions in the building field have come forward with increased demands, and material prices which have held strong to firm all winter are almost sure to show the effect of a greater de-

mand caused by renewed building construction activity.

Lumber dealers in the local field claim that there is no cause for worry as regards their commodity prices in the immediate future as the yards are well stocked with material bought when prices were right. However, when the present stocks have been consumed it is intimated that prices may advance some as the new supply will have to be secured from a wholesale market that will be active due to the increasing spring and summer volume of business.

CHIPS AND SHAVINGS.

The offices of J. Bippus & Son and C. Kanzler & Son, both general contractors, managed to limp along the past week while Miss Rose Moehlenkamp and Miss Lulu Kern slipped away to Franklin, Ind., to attend the convention of the Federation of Business Women's Clubs. Incidentally they took out enough time while in Indianapolis to call at the office of the Construction Recorder to tell how busy Evansville was at building.

EARLY ACTION ON PROSPECTIVE BUILDING WILL GET THE BEST RESULTS.

One Best Bet Is to Beat the Rush.

It is acknowledged by everybody connected with building construction in Ft. Wayne that, to assure the consummation of the tremendous volume of building work that lies ahead for the city, a determined fight must be made against time. In this fight the prospective owner, as much as any one else, must do his part. There is a great deal of local building activity at present, and as the days and weeks roll on it is bound to be augmented. This ever increasing volume is going to put a heavy demand on the labor and material supply and this is where the prospective builder comes in, the man who starts his building early is going to get it finished in seasonable time, he will thus escape delays that probably will occur later when extensive construction operations cause more or less congestion owing to shortages of labor and heavy demands on building material supplies.

Interviews amongst the contractors

brought forth information that, summed up as a composite whole, is to this effect: "The local contractors have their working organizations in good shape and are in a position to handle work expediently if unreasonable demands are not made upon them. The fact can not be emphasized too strongly that any contractor must be allowed time to plan his work on any particular job, otherwise, if he is not given time in which to arrange his working details, plan for the distribution of his men to secure the maximum output, and figure out when he can have his apparatus, machinery and supplies ready for certain particular work, there will be a constant rushing and confusion resulting in costly and time-losing hinderances all of which will react on the whole project and the owner.

It is admitted that a man spending money for building work will receive better work at less cost by giving the contractor time rather than waiting till the last moment and then insisting on a rush job."

Building this year is going to put all those concerned on their mettle and as far as the prospective owner is concerned the situation just comes down to the old saying about "the early bird." He who plans early and gets his work under way is going to get his new project finished; he who waits will probably wait some more.

Nor is this any more applicable to Ft. Wayne than it is to other Indiana cities, they all are facing the promise of an unusually active building season just ahead.

LUTHERANS WOULD ERECT NEW INSTITUTE BUILDING.

Campaign for Funds Started.

Another promising prospect in the shape of a \$100,000 school has appeared above the building horizon of Ft. Wayne and though undoubtedly some distance off, nevertheless, time is fleeting and maturity may come soon to swell the local volume of building construction.

Local Lutherans have launched a campaign to raise \$100,000 to provide a structure for the Luther Institute. While no definite plans have been made the building committee is on the lookout for a desirable site.

BUILDING PROGRAM CONTEMP- PLATED BY Y. W. C. A.

Would Increase Capacity of the Present Structure.

The announcement was made the past week that an effort will be made to erect considerable of an addition to the local Y. W. C. A. Building. The project in mind would provide a new gymnasium, social rooms and additional dormitory space.

PLANS ON FILE.

None this week.

WAIVER OF LIEN.

None filed with Marion County Recorder this week.

NO WONDER LOCAL BUILDING FIGURES ARE MOUNTING.

Unusual Activity Apparent.

Recollect how the grass turns green, how the trees bud, and the flowers pop up over night in the spring? It is a wee bit too early yet to experience such demonstrations, therefore, recollect is used advisedly.

Well, the above was called to mind by drives about the city. Out in the suburbs where, heretofore, vacant lots graced the scenery a change has come. The scenes are being shifted rapidly, and almost over night new houses are springing up. It is really remarkable the amount of construction work that is going on at this time of year, brand new work, not merely remodeling and additions. Visitors who have gone about the city have been impressed by the evidence of building activity and have remarked about how much busier Indianapolis seems in a building construction way than other cities they have visited recently.

NEW COMPANY FOR HANDLING STRUCTURAL STEEL AND ORNAMENTAL IRON ENTERS INDIANA BUILDING FIELD.

Well Known Men Organize Another Steel and Iron Firm.

There is a new structural steel firm in the Indianapolis field, the Robert Berner Structural Steel Co., for which articles of incorporation were recently filed with the Secretary of State. The officers of the new concern are Robert Berner, president; R. H. Dickson, vice-president; A. W. Gage, secretary; F. C. Miller, treasurer, and F. W. Gronauer, estimator.

The president, Mr. Robert Berner, is well known to the contracting public and the building fraternity, having been connected with the Hetherington & Berner Co. for the last ten years in the capacity

of vice-president and has been active in the executive affairs of that company since 1900. He has been quite active in the affairs of the Building Contractors Association of Indianapolis and at the present time holds the office of First vice-president in that association.

The remainder of the executive personnel of the company are all well known to the building construction trade, they having been engaged in the local building field for from 15 to 23 years in the designing, fabrication and erection of structural steel.

Located at 401 S. Harding street, in a spacious shop 100 ft. by 200 ft., equipped with traveling crane and modern tools for the quick and economical fabrication of structural steel and ornamental iron, the new company is now prepared to handle contracts, in fact, is already in full operation.

EFFORT AT REORGANIZATION AT GARY ATTEMPTED.

Contractors Convinced Their Salvation Lies In That Direction.

Field Representative John H. Owens, of the Associated Building Contractors of Indiana, 326 Peoples Bank Bldg., Indianapolis, spent the past week at Gary in an attempt to aid the contractors of that city in a reorganization move.

The experience of the Gary contractors at organization has been sort of an in and out affair. They have labored along diligently, going good for a time only to hit a snag and then they would set about to salvage what they could from the wreck.

The sooner they can get together and exert a little co-operation effort amongst themselves the better off they and the building industry up there will be.

Gary's greatest difficulty has been the contractor who let his union card dominate his affairs. Such men would ride along with the contractors' organization until some contention arose with the Building Trades Unions and then rather than fight they just got weak kneed, threw up the sponge, and layed down, while the Unions counted them out. Though calling themselves contractors they shirked the responsibilities that devolve upon the employer, and sought the easiest way out. As a result, the organization of which they were members just naturally blew up and they themselves were contented to piddle along at mechanic's wages while the contracting business, tossed about by billows of uncertainty, suffered, as did the real contractors, the public and the employees who felt the decline of active operations which gave way under the chaotic state.

Tired of such conditions certain contractors of Gary, in an effort to stabilize things and induce a healthy building atmosphere, have determined to organize, hence, Mr. Owens' sojourn to that city. He also dropped in to pay the Building Trades Employers' Association at Hammond a visit and size up building affairs there.

BUILDING PERMITS

(\$4,500 and Over)
March 14th to March 22nd.

Stores and Offices: \$187,650.00. Wash. & Penn. Owner, S. S. Kresge Co., Detroit, Michigan. General contract let to William P. Jungclaus & Co. Excavating.

MEETING NIGHTS

General meeting every third Tuesday evening.
General contractors meet second and fourth
Monday evening.
Master plumbers every Thursday evening.

'T WAS EVER THUS**Maybe Some Day There Will Be a Different Story**

One would be led to believe and, believing, naturally suppose that there would be no trouble to keep the contractors interested and enthusiastic in the support of an organization that has for its prime purpose the working out of conditions that will safeguard their interests and be of benefit to their business; further, as their interests are, in the main, mutual it would seem that these same contractors would be inclined to stand united and be eager to promote their interests by working for and backing up an organization that had its for aim greater protection for them and their business.

The labor unions know full well the benefits to be derived from organization, consequently they are very careful in promoting same that they may better guard their interests. If the contractors were as zealous in protecting their interests they would have a good strong working organization, too, in every city and town of any size in the state.

However, a different spirit regarding organization seems to rule the majority of contractors; so long as there is trouble and danger threatens their business the building trades employers are inclined to lean toward organization and take an active interest in it, but just as soon as the trouble blows over, danger departs, and things settle down to normal once more the contractors, many of them, forget all the benefits that have been secured through unity of purpose, are inclined to grow careless and neglectful of their organization. The result is that they grow lax in their attendance at meetings, haven't time to serve on committees, and quite a few of them fail to pay their dues. In the end there are a few faithful members who are left to carry the burden and keep the organization alive until such time as new perils arise to threaten the building contracting industry and then the careless contractors come rushing back pell mell, shouting for help, expecting service and protection such as only organization can afford.

It is hard to impress upon these slackers that organization must have support all the time; that the officers are continually on the job even, in many in-

stances, sacrificing their time in the work of watching to see that the interests of the contractors are not assailed by inimical forces that would endanger and impede the continued active building construction operations; that it is only through ceaseless effort of this kind on the part of the officers that assures favorable conditions under which the contractor is enabled to work. Mayhap, some day, the light will dawn upon the contractors as to the direction in which their salvation lies, at least it is to be hoped so.

A VERY POOR LINE**Weather Man Took No Orders on Samples Displayed**

Building construction operations were sort of called off in the Calumet district the past week while the weatherman, uninvited, butted in with his samples which he put on display. He had a little bit of everything in his kit as far as weather goes, but there was nothing that carried with it any appeal and what he expected to accomplish by his untimely intrusion is beyond our ken. His display of goods was about the worst we have ever been called upon to gaze at; there was rain, wind, sleet, snow and ice, fog, clouds and absolutely nothing to cheer or warm. The worst of it was that he insisted on sticking around with his abominable assortment. If he will only drop in again soon with a lot of sunshine goods the whole contracting fraternity will be only too pleased to have him tarry as long as he wishes.

CALUMET BUILDING PROGRESS

The word is out that plans are being prepared for three large apartment houses to be built this season on the South Side.

General Contractor Guy Young was the successful bidder on the new city fire station on South Hohman street. The building to be of the bungalow type to conform to the environment is estimated to cost \$16,165.

EFFECT BROUGHT ABOUT BY WINTER BUILDING MAKES SPRING CONDITIONS PROPITIOUS**Indiana Building Prospects Never Brighter**

The building construction industry in Muncie and throughout Indiana has been aided greatly the past winter by the open weather that prevailed, enabling contractors to get away from the annual old style winter lay-off and, instead, keep right on with their building construction

operations. There have been very few days lost since last the sun started south ushering in the fall and winter seasons. The result has been that the builders were in a position to carry on any work that came up and are in shape to take on new projects that arise without having their affairs all cluttered up with a lot of delayed building.

Building trades mechanics, too, have had employment generally continuously through the winter period and have reaped a harvest at high wages, there having been little or no lost time.

Nor is it stretching a point to attribute the activity toward building this early to the confidence that has been inspired in the prospective builder by the fact that he has seen no lull in building construction operations. In years gone by people were inclined to wait for a time to see if the other fellow was game enough to take a chance and go ahead. That waiting tendency had quite a bearing on the building business and many is the time that the influence extended even into the summer before building operations really got into full swing.

It is hard to recall when a spring building season in Indiana dawned under more propitious conditions, with the impetus back of building as it is this year.

Such conditions as have ruled have aided in catching up, to some extent, to the much delayed building program, and have made it possible to release for the new building season a supply of labor that otherwise would have been required to finish up the old work had there not been the winter building such as prevailed the past few months.

There seems but one impediment to the successful pursuit of a most promising building season in 1923 and that has to do with the building trades' labor attitude. If this element, realizing the vast amount of work in prospect, inclines toward taking advantage of conditions and runs amuck with excessive wage demands a most promising situation will be materially altered. Construction costs are high and any great wage increases will but send them higher to scare away investment capital to other fields. Should such come to pass the present building bubble will burst into a thousand glooms, to leave the contractors, employees and the whole building industry caught in a vacuum of inertia, and all the good that winter building has done will be wiped out.

If there ever was a time for a display of discretion in Indiana building construction history now is the time for it.

SOME SUCH CALLS IN THE BUILDING BUSINESS**Ferryman Took No Chances**

At an early morning hour an old ferryman was awakened by the call of someone wanting to cross the river. He answered and received the reply, "Yes, suh, boss, I wants to cross the river, but I ain't got no money." The ferryman replied, "Well, it makes damn little difference as to which side of the river you're on if you ain't got no money." This little fable is to impress upon your mind the importance of investigating a man's credit before soliciting his business.—Monthly Bulletin, Associated Builders of Chicago.

SCIENCE HALL NOTICE TO BIDDERS.

Bids will be received by the Board of Trustees of the Indiana State Normal School at 8:00 p. m., April 9, 1923, at the office of The Eastern Division, Indiana State Normal School, Muncie, Ind., for the erection and completion of the North Wing of the Science Hall at the Eastern Division, Indiana State Normal School, Muncie, Ind. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5% of the amount of the bid. Bids must be made in accordance with provisions of specifications prepared by Kibele and Garrard, architects, Muncie, Ind. Copies of plans and specifications may be found at the office of the Dean of the Faculty of the Eastern Division, Indiana State Normal School, Muncie, Indiana; at the office of Kibele and Garrard, Architects, 335 The Johnson Building, Muncie, Ind., and at the office of the Registrar of the Indiana State Normal School, Terre Haute, Ind. The total estimated cost of the North Wing is \$60,000.00.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
Helen C. Benbridge, Sec.
March 17-24-31, 1923.

HOSPITAL NOTICE TO CONTRACTORS

Notice of letting contract for the new Nurses Home and Solarium for the F. J. Witham Memorial Hospital, Boone County, Indiana, including heating and ventilating, plumbing and sewage, electrical wiring and fixtures, etc., for the Board of Hospital Trustees, of Boone County, Indiana. To be erected on lots cornering at Lebanon and Camp street, Lebanon, Indiana.

Separate sealed proposals will be received by the Board of Hospital Trustees at the Auditors Office, court house, Boone county, Indiana, until 2:30 p. m., Friday, April 6, 1923, and opened at the said time for the completion of said Nurses Home and Solarium, according to plans and specifications and detailed drawings now on file in the office of James Gardner at the Boone county

State Bank, Lebanon, Indiana; also in the office of the auditor of Boone county in the court house at Lebanon, Indiana, Board of State Charities, State Board of Accounts, State House, Indianapolis. All bids must be in writing, sealed and with envelope endorsed giving bidder's name and the class of work bid upon and all bids will be opened and read publicly at the time and place fixed in this notice.

The Board of Trustees reserve the right to reject any and all bids and to take time to investigate the bids and the qualifications of the bidder.

Each bidder shall file with his bid the Statutory affidavits required by law in the State of Indiana and each bid shall be accompanied by a certified check equal to 3 per cent of the bid, made payable to the Board of Trustees, which check will be held as a guarantee of good faith that the bidder will enter into contract and execute a bond for the full amount of his work, approved by the Board of Trustees, for the due performance thereof if his bid or bids are accepted. The checks of those bidders who fail to be awarded contracts shall be returned to them when the contracts are let. Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified check as liquidated damages for the use and benefit of the proper fund of the F. J. Witham Memorial Hospital, Boone county, Indiana.

Contractors may obtain plans and specifications from the office of Frost and Kellogg, Architects, Lebanon, Indiana.

All contractors to whom contracts have been awarded must furnish the Board of Hospital Trustees a certificate from the Industrial Board that the Workmen's Compensation Law of Indiana has been complied with.

Payment to the contractor shall be made upon estimates as the work progresses and the final payment shall be made as stated and fixed in the specifications for said work.

Frank O. Staton, Pres.
James Gardner, Sec.
Crayton McKinsey,
Rolla E. Williams.

March 24th, 1923

NOTICE OF BOND SALE.

Notice is hereby given that a 3:00 o'clock, P. M., on Wednesday, April 11, 1923, at the office of the County Superintendent of Schools, at Rushville, Indiana, Henry W. Beckner, as Trustee of Jackson Township, Rush County, Indiana, will offer for sale to the highest bidder an issue of \$51,000.00 of bonds of Jackson School Township, Rush County, Indiana.

Said bonds shall be 60 in number, dated March 1, 1923, of \$850.00 each and bearing interest at the rate of 5% per annum, payable semi-annually, two of which bonds shall be due and payable on August 1, 1924, and a like number and denomination shall become due and payable every six months thereafter until all of said bonds are paid. The first interest on said bonds shall be payable on August 1, 1924, and every six months thereafter and shall be evidenced by coupons attached to same and said bonds and interest shall be payable at the office of the Peoples National Bank, of Rushville, Indiana. Said bonds have been issued strictly in compliance with the law of the State of Indiana, and pursuant to an order of the Advisory Board of Jackson School Township, Rush County, Indiana, and duly entered of record on January 9, 1923, authorizing said bonds to be issued for the purpose of providing bonds for the construction of a school house in said township.

Said bonds will be sold according to law to the highest and best bidder for not less than par and face value; the right is reserved to reject any and all bids.

HENRY W. BECKNER, Trustee,
Jackson Township School, Rush County,
Indiana, R. R. 6, Rushville, Indiana.
March 24th, 31st, April 7th, 1923.

JUNIOR HIGH SCHOOL, GYMNASIUM NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Richmond, Indiana, by its Board of Trustees, will receive sealed bids at the office of said Board, southeast corner of North Eighth and B streets, Richmond, Indiana, until 10 o'clock a. m., of Friday, April 13th, 1923, at which time and place the same will be publicly opened, read and considered for the construction of Gymnasium and Assembly Room and for the construction of heating system, ventilating system, electric wiring and plumbing, for said building, on site therefor, South Twenty-second and South Twenty-third, and South B streets, in said School City, and all by and according to the plans and specifications adopted therefor as prepared by Perkins, Fellows & Hamilton, architects, 814 Tower Court, Chicago, Illinois; and as further approved by the State Board of Health and by State Board of Accounts, of State of Indiana.

The plans and specifications are on file for the inspection of bidders at the office of said Board of Trustees, and at the office of said architects; and copies are available upon application to architects, and deposit of Ten Dollars to insure return of the same, and additional copies are available upon like application and upon payment of Fifteen Dollars per set to cover cost of printing and forwarding.

All items of masonry, carpentry, plastering, iron work, painting, glazing, sheet-metal work, roofing, special flooring, etc., will be included and considered in the general contract in one proposal.

All items of plumbing, sewerage, heating system, ventilating system, and electric wiring will be separately considered in separate proposals, or the bidder may include all of the same in his general proposal, but in so doing the same items must be separately stated, and the amount and proportion of the general bid represented by these special items shall be indicated upon the bid.

The each bid of the each contractor shall be accompanied by the certified check of the bidder in sum equal to five per centum of proposal, same payable to School City of Richmond, Indiana, and same is subject to being declared forfeited to School City of Richmond as liquidated damages, in case the bidder withdraws his bid after same is opened, upon the consent of said Board of Trustees, or if successful bidder fails to enter into contract if same is to him awarded, or if successful bidder fails upon entering into contract to accompany same with approved surety bond of Surety company authorized to do business in the State of Indiana, in guaranty of compliance with contract. Checks of unsuccessful bidders will be to them returned.

All bids and proposals shall be upon forms prescribed by the State Board of Accounts of Indiana, or the equivalent of such form; and unless same are upon such forms and accompanied by required check, no attention can be given to same.

The estimated cost of all of the proposed construction is within the sum of Forty Thousand Dollars; said building approximately the size of 60 feet by 80 feet.

The successful bidder will be required to enter into his written contract in the forms approved by the State Board of Accounts, and also to deliver his Surety Company bond in an amount equal to the amount of his contract, such Surety Company to be one authorized to do business in the State of Indiana.

The Surety bonds to be given by contractors shall be bonds written in the City of Richmond, Indiana, by authorized agents of surety companies maintaining such resident agents in said City.

The Board of Trustees of the School City of Richmond, Indiana, in its receiving bids, reserves the right to reject any and all bids.

SCHOOL HOUSE NOTICE TO CONTRACTORS.

Notice is hereby given that sealed bids will be received by the undersigned Trustee and Advisory Board of Jackson Township, Decatur County, Indiana, at the office of Tremain & Turner in Greensburg, Indiana, until Ten o'clock A. M., on the 18th day of April, 1923; for the erection and completion of a Township School Building; all in accordance with the plans and specifications heretofore adopted and approved therefor by the said Trustee and Advisory Board, and which are now on file in the office of the said Trustee of Jackson Township, Decatur County, Indiana, and in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and in the office of The Elmer E. Dunlap Co., Architects, 1050 N. Delaware St., Indianapolis, Indiana.

At the same time and place bids will also be received for installation of the Electric Wiring and Bell System; Plumbing and Sewering; and Heating and Ventilating plant for the above building.

The estimated cost of all of the above contracts is \$60,000.00.

All bids must be in writing, on Form No. 96 as prescribed by the State Board of Accounts; delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by a certified check for \$2,500.00; each bid for Electric Wiring and Bell System by a certified check for \$200.00; and each bid for Heating and Ventilating, and Plumbing and Sewering by a certified check for \$1,000.00.

Contractors may submit bids on any part or all of above work, or on any combination of two or more of above items.

Certified checks must be made payable to the Township Trustee of Jackson Township, Decatur County, Indiana; and will be held by him as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by the Trustee, for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded.

Should the successful bidder or bidders fail to enter into such a contract and execute such bond within ten days, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of said Jackson Township, Decatur County, Indiana.

Copies of the plans and specifications may be obtained at the office of the Architects upon deposit of Twenty-five Dollars (\$25.00) for each set, said deposit to be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved by the said Trustee to reject any or all bids.

A. C. MONCRIEF, Trustee.
William Barton,
Harry Irwin,
Ernest G. Sims,

Advisory Board, Jackson Township,
Decatur County, Indiana.

March 31, April 7th-14th.

GRADE SCHOOL

NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Frankfort, Indiana, Clinton County, and the Board of Trustees thereof, will receive sealed bids at the office of the said Board of Trustees, located in the library building, northwest corner of Clinton and Columbia streets, Frankfort, Indiana, until 10 o'clock A. M., Tuesday, April 10th, 1923, at which time and place same will be opened, read and considered for the construction of a new Ward School Building, including heating, ventilating, plumbing, wiring, clock and signal system and lighting fixtures, for use of said school city, and to be constructed on lots and lands now owned by the School City of Frankfort and located in said city, and all by and according to plans and specifications as provided therefor and as further approval by the State Board of Health and State Board of Accounts. Estimated cost of building, \$80,000.00.

The plans and specifications are on file for the inspection of bidders at the office of the Board of School Trustees, Frankfort, Indiana, and at the office of Rodney W. Leonard, Architect, 309 Peoples Life Building, Frankfort, Indiana. Copies are available to bidders for use at their own offices upon deposit with the Architect or Trustee of \$20.00 to guarantee safe return of same on or before opening of bids. Bidders must familiarize themselves with such plans and specifications before bidding and no departure from the same will be considered.

Bidders in submission of bids will submit same as follows:

1. On general contract.
2. On heating and ventilating.
3. On plumbing.
4. On electric wiring, clock and signal systems and lighting fixtures.
5. For all the work inclusive and as comprehended complete by the plans and specifications.

In this way the bidder only being required to submit his bid for such portion or portions of the total work as he may desire.

All bids shall be accompanied by the certified check of the bidder in sum equal to at least 5 per cent of his gross bid or bids, conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder, according to proposal. Checks to be made payable to Treasurer of Board.

All bids and proposals shall be upon the forms prescribed by the State Board of Accounts. Unless bids are accompanied by certified checks as above and upon forms as above, no attention will be given same.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety to the School City of Frankfort, Indiana, in a sum equal to full amount of contract as usually conditioned. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in general conditions of the specifications. The Board of Trustees for the School City reserve the right to reject any and all bids without giving any reason therefor.

"Your Individual Prestige Can Never Be Greater Than the Prestige of the Profession to Which You Belong"

USUALLY AN EXPENSIVE SAVING.

Passing Up Architectural Service Usually Entails "Grief" in the End.

By F. W. Ives,
Agricultural Engineer

Good friend, you do not pull your own teeth. Nor do you try to fill them. You go to the nearest dentist and let him do it.

The maker of building plans, the architect, is a somewhat rarer bird, with very little of the advantage of the dentist in dealing with people driven to him by sheer painful necessity. But, just the same, those who do not go to the architect at first generally have the bitter experience of being stung by their own lack of knowledge in the long run.

The architect who can not save you the amount of his fee on a building, in terms of convenience therein on materials and workmanship, is not worthy of his hire. If he is a good architect, his period of study and preliminary training is fully as long as that of the average dentist, lawyer and undertaker, to say nothing of the plumber, brickmason and carpenter; and his help is often worth many times its cost.

Yet how often do we pass by the architect's service because we feel that it adds just that much expense to the house, and, besides, we can get plans for nothing, anyway! As a matter of fact, it usually costs more not to have an architect than it does to have one. A few typical examples will show what I mean: A student whom we will call Jackson lived on a farm. He sat in classes and heard the warning of an instructor about the cost of plumbing, chimneys and stairways carelessly planned or not planned at all.

The next summer Jackson and his father decided to build a "modern" house, plumbing and "everything." A local carpenter, a good builder, helped them make a plan of a house something like one they had seen a picture of in some magazine. The plans were drawn on a pine board. After the frame was up, the partitions in, and the roof on, they went to town to get a plumber to figure on the necessary piping. On account of the awkward arrangement and

relation of bathroom, kitchen and laundry, long leads of pipe were necessary. The plumber's estimate was \$1,200 for the job.

In despair, Jackson came to his former instructor and wanted to know if the plumber was robbing them. The instructor went over the rough sketches of the floor plans and showed Jackson where a few changes made in the start would have saved just half of the plumber's bill.

When asked why they had not employed an architect, Jackson stated that the plans would have cost \$300, and that would have been too much. The following example in arithmetic enlightened him, as it may some others:

\$1,200 estimated cost of plumbing.

600 estimated saving by careful plan.

600 loss by not having plan.
300 architect's fee.

\$300 net saving had architect been employed.

There were other items that would have made the house more livable, and where a direct saving of about \$600 could have been made. Furthermore, an estimate of cost could have been made in advance.

Another man, anxious to save, bought a set of ready-made plans for 50 cents. An architect had asked him \$200. The house was a square, two-story affair of rather common arrangement. The frame was erected, the partitions set on both floors without considering the stairway or chimneys, these sometime being left to the last in construction.

The day came when these necessary elements were to be built, and it was discovered that two separate plans had been used—one of the first floor and another for the second floor—two sets of plans of the same outside dimension having been mixed. The cost of making the necessary changes amounted to \$560 in labor and material. Your own arithmetic applied here will show you that the architect's plans would have saved not less than \$360 on this one item alone.

A good farmer obtained free plans from an equipment company. He took them to some local contractors for estimates. The lowest bid was \$6,000. This

looked rather high to him, and he sought the services of a barn architect. By cutting out needless equipment, the barn was reduced in size, increased in efficiency and animal comfort, and new bids received were accepted at \$4,800. After deducting the architect's fee, this farmer had saved nearly \$1,000.

These examples are typical of many that have come to the writer's attention, and may be verified by names and dates. They are given in hope that others will profit by them.

Any building worth building is worth planning and an estimate of cost and specifications, even if it be a dog house or a gate. A knowledge of cost in advance will save many a hard-earned dollar. It is the only check on a dishonest contractor, and a protection for the honest contractor as well as the owner.

A plan allows for change in the building before it is built. Changes in masonry, framing, plastering, etc., are much more expensive than erasing lines on a drawing.

Somehow I feel that if you pull your own teeth—why, then draw your own plans; the results will be much the same.—(From Farm & Fireside, issue of April.)

MUST STAND IDLY ON THE SIDE LINES.

Architects Watch While Others Play the
Game Bearing On the Future
Building Business.

Very important to the architectural practice are the wage negotiations now in progress between the building trades employers and the mechanics since upon the outcome and settlement of the wage scales depends, to a large extent, the degree of activity that will mark future building operations.

It is true that while the architects are not directly connected with these negotiations and have no place in the deliberations, at the same time, the trend of wages, if greatly upward, will vitally effect the architects' business if owners balk at too greatly increased construction costs caused by high wages and also advanced material quotations.

BIG HIGH SCHOOL BEING RUSHED.

Activity Assures Completion on Time

Since the foundations for the new half million dollar Bosse High School have been completed all attention of the contractors has been turned to the task of rearing the brick walls which, in some places, have been carried up to the second floor line. Every effort is being exerted toward getting the required materials on the site so that there may not be any unnecessary delays in the future construction operations. At the present time there are a hundred or more building trades mechanics on the job daily. When completed, scheduled for opening next fall, this will be Evansville's finest school structure and will compare favorably with the best in the country.

ALL HAVING A BENEFICIAL EFFECT ON THE INDUSTRY.

Evansville Reaping the Harvest Sown During the Winter.

Keeping up with expectations and predictions, the building business locally is forging right ahead with operations started moving forward actively, new contracts being awarded weekly, plenty of estimating being asked for to keep the spare time of the contractors occupied, and, further, the local architects are continuing to prepare numerous plans for the future consideration of the builders. It has been years since such a promising season for building has been the lot of Evansville, nor is it easy to recall when there was such an early spring activity in building circles. This latter condition is traced to the fact that winter building ruled strong in southern Indiana, there having been practically no let-up since late last fall. Hence, as spring neared there was not the customary waiting for a restoration of confidence, or, for the other fellow to start his work first.

The assurance with which prospective builders have fallen into line with a determination to proceed with their projects can be attributed to the morale that was established by the awarding of contracts, during the winter, for the construction of several projects each of

which will total half a million dollars or more. Beyond these big projects the nature of the other work inclined to smaller proportions, residences, small store buildings, some flats and almost innumerable remodelings and additions of all classes of buildings. While these projects individually were not of unusual importance, nevertheless, collectively they have gone to swell a volume that has meant hundreds of thousands of dollars to the building industry of Evansville, afforded an employment feature carrying weight and the effect created by the great evidence of activity was of incalculable value.

CHIPS AND SHAVINGS.

George L. Miller & Sons, general contractors, will soon begin the erection of a new home for Dr. V. Jordan on Howard street, also one for Mr. Killias on Blackford avenue.

Wm. Abeler was successful in bidding off the general contract for the construction of a \$45,000 store building on Main street, for the Handy Furniture Co.

YES, BUSINESS IS GOOD IN FORT WAYNE

Bank Clearings Tell Pleasing Story

The notable gain that Fort Wayne bank clearings have been showing every week was in evidence again last week in the report of the local clearing house. There were only two days out of the six when the clearings totaled less than \$300,000, and on these two days, Thursday and Saturday, the amount was close to \$300,000. The total for the week was \$2,229,593.99. The week's total was \$30,000 more than the previous week, and over \$750,000 more than the corresponding week of last year.

LITTLE NORTHERN INDIANA CITY TAKES TO HOME BUILDING ENCOURAGEMENT

Would Increase Housing Facilities

Lots has been, and is being, said about home building operations and efforts to encourage same in the larger cities, but one hears very little about what the

smaller cities are doing in the same direction.

Just as the greater municipalities are cramped for housing facilities, so are the cities of lesser degree. Many of them actually have been up against it good and strong and as a consequence of not having sufficient homes to care for new citizens have suffered in that their growth has been stunted and where there were industries they have been put to it to get additional hands to take care of increased business.

All of which accentuates the enterprising spirit that has cropped out at Kendallville, Fort Wayne's little neighbor to the north a few miles, where some sixty citizens have formed the Kendallville Home Building Corporation with a capital of \$50,000 to promote new home construction operations by helping to finance prospective home builders who wish to own their homes. It is thus that Kendallville will seek to increase her housing facilities and to make for a better city.

Here's hoping the scheme prospers and thereby our neighbor.

NEW SECRETARY NAMED

Eph Dailey Makes Business Change

At a recent meeting of the members of the Fort Wayne Builders' Exchange some changes were voted chief of which was the election of a new secretary, Mr. E. F. Oelschlager, of the Fort Wayne Plumbing & Heating Co. The new secretary succeeds Eph Dailey, who for a number of years looked after the secretarial duties of the Fort Wayne Exchange and was active in the affairs of the Associated Building Contractors of Indiana.

Owing to the fact that Mr. Dailey has made a new business connection which will require his undivided attention a new secretary was named to look after the interests of the local Exchange.

DIMENSION STUFF

Along in the train of new residence information advanced during the week was the announcement that H. H. Rogers, prominent local optician, will award contracts next week for the construction of a modern duplex of colonial type to be erected on Jackson Street, near Wayne, same to cost \$13,000.

A move, having for its ultimate purpose the erection of a school on the South Side, was made recently by the congregation of the Emmaus Lutheran Church when seven lots on South Webster St. were purchased for a school site. The maturity of the permanent structure is some distance off. In the meantime a temporary building will be built or a portable school will be erected on the site.

EVERY REASON TO EXPECT NEW HIGH BUILDING FIGURES AT INDIANAPOLIS THIS SEASON

Present Year's Operations Already Far Ahead of Those Previous Corresponding Periods

New construction in Indianapolis in 1923 promises to attain a new high record that may stand for years to come, not only as to number of jobs completed and as to the money involved, but also as to the scope it embraces. The speed attained in new building operations within the last fifteen months has been so rapid that many veteran builders and contractors have ceased talking in hundreds of thousands and have taken up figures beginning with millions.

The cost of a building campaign in Indianapolis these days must be figured in the tens of millions rather than in the hundreds of thousands.

The building season in Indianapolis for the year 1923, right from the first week in January, opened actively. In fact, new building operations have been developing from the very first day of the year—never stopped entirely for the cold weather—and now, the first week of spring, finds the season several weeks ahead of the schedule. The number of new dwellings already completed this year stands out as a new record as to number.

The indications this year give promise, according to local contractors, architects and officials of companies financing new home building work, of eclipsing in volume and figures the high marks of 1922. This applies not only to dwelling house construction, but also to construction of factories, warehouses, apartment buildings and public work. But this is not all promise, quite a volume already is under construction, while another sizable amount of new building work has been contracted for, with actual construction a matter of days or weeks ahead.

According to an official of one of the city's big building and loan associations, there is every reason for the belief that more new homes will be erected in Indianapolis this year than in any former year of the city's history. This official places an estimate of \$10,000,000 for new homes to be completed during the present year. That would be a new high record. Some there are who are inclined to believe even this estimate will be topped.

While the lesser contractors are swamped with a demand for figures on new dwelling construction prospects, the large contracting firms are busily engaged in compiling estimates on big work, such as warehouses, business structures and industrial buildings. Nor is this the end, on beyond is looming a still greater volume of prospective work. So much for the future outlook.

Construction work already started since the first of the year and which has been financed represents a combined cost of several millions of dollars and includes two large office buildings and five or six large apartment houses.

Contrary to the expectations of many builders who, after last year's vast program, ventured predictions of a letup in construction under the impression that Indianapolis had cared for its most urgent needs, the demand for new houses, apartment buildings, industrial and business buildings continued to expand rather than to contract.

The belief is confidently expressed these days in building trade circles that the rate of new construction will continue at the present pace throughout the year. There is only two factors which may become a deterring influence, and these relate to mounting costs of materials and labor. In some cities this rise in costs has begun to be noted and may soon be expected locally to some extent, the degree of which it would be hard to hazard a guess.

PITTSBURGH CONTRACTORS, HOD CARRIERS AND BUILDING LABORERS REACH AGREEMENTS

From Pittsburgh, Pa., comes the information that an agreement has been signed there between the Building Trades Employers' Association and the Hod Carriers, Building and Common Laborers.

The agreement calls for \$1 per hour for Hod Carriers beginning March 16, 1923, and common laborers' wage is the old rate until April 1. From April 1 to July 1, 1923, common laborers' wage will be 60 cents per hour and from July 1, 1923, to March 1, 1924, the wages will be 70 cents per hour.

BIG CONTRACT LET, ANOTHER ABOUT TO BE AWARDED

Of special interest to contracting circles of Indianapolis the past week was the award of the general contract to the W. P. Junglaus Co. for the erection of a new \$200,000 annex to the Y. W. C. A.

Also the announcement was made that Charles Wacker was low bidder, at \$67,200, on the general contract for the construction of two shop buildings for the Board of Education.

Hammond, Indiana**MEETING NIGHTS**General meeting every third Tuesday evening.
General contractors meet second and fourth
Monday evening.
Master plumbers every Thursday evening.**INTERESTING INFORMATION IM-
PARTED TO CALUMET
CONTRACTORS.****Effect of State A. B. C. Grows More
Apparent All the Time.**

At the regular monthly meeting of the Building Trades Employer's Association of the Calumet District a splendid and most interesting report was made by Field Representative J. H. Owens of the Associated Building Contractors of Indiana on the work the organization has done and that which it is seeking to accomplish not only for the contractors but for the advancement of the building industry of the State. He also recounted the trend of conditions encountered in the various localities, included in his itinerary a summing up of which amounts to one of the most promising outlooks, all things taken into consideration that has been held forth to the Indiana building business in years.

There are breaks here and there and differences of opinions and yet there is a good spirit of co-operation amongst the contractors being manifested that is getting results, it may seem slow, yet the result is undeniable, all of which is attributable to the influence of the A. B. C.'s of Indiana.

GARY CONTRACTORS GET STARTED**New Association Launched.**

Hearing and harkening to the call from Gary, Mr. Henry Morris, Hammond, Secretary E. E. Cole of the B. T. E. A., and Field Representative J. H. Owens, motored over to Hammond's sister city Thursday, March 22, and took an active part in an attempt to organize a contractor's association at that place. There were 25 contractors present at the meeting at which a tentative organization was formed with J. J. Verplank named as temporary president and A. E. Deutsch, temporary secretary. Committees were also named to make a drive for more members and March 29th was named as the next meeting night, when reports are to be made and a permanent organization effected. In the meantime, a newly appointed committee, named Thursday night, is to meet with the Hod Carriers' and Building Laborers' representatives to talk over the increased wage demands being made by those workmen.

The Gary men present appeared enthusiastic over the latest move and seem determined to organize with the view of burying personalities and individual business interests in an endeavor to work for the good of the whole industry rather than from a selfish point of view. If the Gary builders will hold fast to that purpose, the greatest good for the greatest number, it will not be long before achievements will reward their efforts.

Gary offers a good field for association effort, as there has been too much of individualism over there and not enough co-operation effort among the contractors. Hammond, in her feeble way stands ready at all times to aid if possible the new association.

PLAYS MISSIONARY.**State A. B. C. Field Man Seeks to Bol-
ster Up Calumet Association.**

Having started the ball rolling at Gary, and given the situation the once over at Hammond, Mr. Owens, in company with Secretary Cole of the B. T. E. A., spent three days of missionary work in the Calumet District in an endeavor to pep up the local contractors. Many calls were made and many promises advanced by the various builders to become active workers in association affairs. Now, as to the outcome, that remains to be seen, but the State Field Representative surely did his part and his visit is bound to yield benefits.

"Jack" is always welcome, the latch string is always out to him and Hammond will be looking forward expectantly to his return.

CALUMET BUILDING PROGRESS.

Though considerable of the new work has fallen by the wayside for one reason or another nobody seems discouraged, in fact, the contractors are rushing right ahead estimating and—hoping. Most of them have little or no time to sleep, eat or to attend meetings.

AT IT AGAIN.**Everyone Awaiting the Flip of the Coin
As It Were.**

The annual period of wondering has rolled around again, that period which always precedes the dawn of the new building season. Everyone in the construction industry has his eyes, aspirations and hopes centered on the future and has been buoyed up and encouraged by the ever growing evidence of a large contemplated volume of prospective business in the building field a large proportion of which is bound to mature with anything like favorable conditions prevailing.

It is relative to the conditions where the wondering comes in. There are two most important elements that must fig-

ure on future ruling conditions, wage scales and material supply prices. What will Labor demand in the way of wages, and where will quotations on materials go? There is every indication that the demand for building is going to be heavy, in fact, it has already set in and its effect is making itself felt at this early date. Herein lies the crux to the future of building, if a little reason is exerted by both Labor and the building supply manufacturers, well and good, but if selfishness and avarice creeps in and demands are made upon the prospective builders' financial resources, regardlessly, them gradually, if not precipitately, the great promising building volume now held forth will show a big shrinkage.

Building operations are almost wholly investment propositions and they must be attractive to draw capital, otherwise, the latter will turn to other more lucrative fields. Building can stand just so much pressure to develop and beyond that point becomes stunted as to volume.

A country wide demand for building as is prevalent will tax both the Labor and material supply and increases in construction costs must follow, such will be only the natural result, but, every one is wondering what the increase will be.

Labor and the material men can make or break the building volume in 1923, the question is will they be satisfied with reasonable profits, or, set about to "kill the goose that lays the golden egg" as has been done now and then in years past.

This is a matter about which Muncie builders and architects, like those of Indiana and all over the country are much concerned. Hence, the wondering.

DEEPLY ENGROSSED.**Building Contractors and Mechanics
Threshing Out Wage Scale
Matters.**

While Indiana contractors are wrestling with wage scale matters they are having lots of company, according to reports from around the country, for that seems to be the favorite indoor sport these days. It is to be hoped that these indoor preliminaries will be conducive to a lot of outdoor action later on.

It seems the universal tendency of the Labor wage demand for 1923 is upward though some of the crafts do not appear to be overly unreasonable. The larger cities in quite a few instances have already signed up at increased scales with various crafts, a feature that the smaller localities will have to reckon with as the influence will be felt and will have to be met to some extent in order to protect the local building trades labor supply.

The carpenters at Indianapolis are to be commended for their attitude in signing up for 92½ cents per hour, the past season's scale. It showed foresight on their part in an attempt to encourage building and the fact that they did not bost their scale should have a beneficial effect in keeping the big volume of residential building construction moving. The conservative action of the Indianapolis carpenters might well be emulated by the other crafts as a means of assuring active building operations carrying with them steady employment for all building trades mechanics.

The **PERFECTION SMOKELESS BOILER** with its downdraft furnace, brick lined fire box and steel casing is all that the name implies. These features make it the best of all smokeless boilers, both in theory as well as actual use.

TITUSVILLE PERFECTION SMOKELESS BOILERS

These boilers are made in sizes 40 to 200 H.P. in working pressures from 15 to 150 pounds A.S.M.E. Code, for power and heating. They are especially adapted to installations where the space is limited. Our catalogue No. 81 giving full description will be mailed to anyone interested.

TYPICALLY REPRESENTATIVE

As Such State Contractors' Association
Seeks Only for Betterment of Indiana
Building Construction Industry

J. H. OWENS

Field Representative of the Associated
Building Contractors of Indiana.

What are the great major industries
upon which the wealth and the stability
of the nation are founded?

Agriculture, construction, manufactur-
ing, transportation, communication and
mining.

What about the construction industry?

It is second only to agriculture—
viewed from the standpoint of the yearly
volume of dollars and cents involved in
all of its branches, and is entitled to rank
first when measured by the number of
men who are dependent upon the indus-
try for a livelihood. Basing the figures
upon a careful survey by the United
States Department of Commerce, the
number of workers who, together with
their families, depend upon the construc-
tion industry for a livelihood, totals
more than eleven million persons, or
about 10 per cent of the population of
the United States.

One of the greatest needs of mankind
is shelter, in order to comply with the
requirements of modern civilization all
food, clothing and machinery for the
manufacturing and preparing of same
are made under shelter. The construc-
tion industry is called upon to satisfy
these demands.

The Associated Building Contractors
of Indiana whose membership is com-
posed of both general and subcontractors
of all branches of the business is truly
an organization that represents this
great industry. The association is ever
watchful of the interest of its members,
and seeking to serve every member's in-
terest in the greatest possible manner by
striving for uniform methods of prac-

tice; by inculcating principles of justice
and equity to govern dealings between
themselves and others connected with the
business; by advocating helpful legisla-
tion, regulations and rules, that will help
place the industry as a whole upon the
plane of which it is rightly entitled to
occupy.

To accomplish the greatest good, it is
necessary that the contractors present a
united front and realize the responsibili-
ties placed upon them in caring for the
business of the industry of which they
are dependent upon for a livelihood. There
should be no division in the ranks of
the contractors in this state. It is the
division of efforts that has kept the
contracting fraternity in the background.
It is the failure of the contractors to pre-
sent a united front that has made the
various organizations they have to deal
with the more powerful. Petty jealous-
ies and miserably small funds ought not
to be allowed to exist, and we feel that
we have only to call your attention to
the great advantages to be derived from
a union of strength, in order for you to
see how imperative it is that we stand
together, all working for the common
good of the industry.

Membership in the association is not a
matter of selfish concern. It is an un-
selfish consideration and determination
to aid the association in the perpetuation
of its principles and policies, and to
maintain the benefits gained through col-
lective effort. To make your efforts ef-
fective, you must co-operate with your
business associates. If contractors do
not do this they deny themselves the sup-
port that others can convey to them, and
they deprive their business associates of
strength and co-operation that can, with
little effort and expense, be contributed
to the mutual advantage of all concerned.

PERMANENT REORGANIZATION OF CONTRACTORS EFFECTED AT GARY

Builders There Make New Start

The building contractors of Gary, after
floundering around on a go-as-you-please
basis for a year or more following the
dissolution of their Builders' Exchange,
have seen the error of their way and de-
termined on a return to co-operative
principles. The result has been the re-
organization of an association of a per-
manent nature.

At a recent meeting all this was
brought about and these officers elected:
President, John Anderson; first vice-
president, Albert Patch; second vice-
president, W. H. Williams; third vice-
president, F. Hall; secretary and treas-
urer, E. F. Cramer.

In the organization detail it was
unanimously voted to adopt the uniform
constitution and by-laws as advocated by
the Associated Building Contractors of
Indiana.

TO BUILD GREATER ORGANIZATION.

State A. B. C.'s to Enlist Aid of Various
City Associations.

The Associated Building Contractors
of Indiana having accomplished what it
set out to do, secure the passage of a
State Building Administrative Council
Law to provide for the enforcement of
building laws and regulations and the
establishment of standard uniform build-
ing construction requirements through-
out Indiana, has now turned its atten-
tion to its own internal affairs once
more with the view of enlarging and
strengthening the organization.

The legislative activity of the State A.
B. C. in the interest of the new state
building law was untiring and in full co-
operation with the organizations of the
architects, engineers, and Labor, a co-
operation that made the new legislation
possible. It is the first time such co-
ordination of action was ever attempted
by these combined interests of the build-
ing industry in Indiana and goes to prove
that organized effort along constructive
lines and for a progressive principle will
get results when the selfish element is
discarded.

That is the aim of the State A. B. C.'s,
an organization that stands on the prin-
ciple of all for one and one for all, the
greatest good for the greatest numbers,
and with such ideals in mind is deserv-
ing of the support of all Indiana con-
tractors.

Having proved its ability to do things
of a real constructive nature its mem-
bers and the new ones to come can ex-
pect further worth while achievements.
There is no question but that the A. B.
C.'s of Indiana has done more for the
contracting fraternity and construction
industry of the state than any other
state contractors' association in the coun-
try has accomplished in its own indi-
vidual locality.

ENTERS NEW FIELD.

Indianapolis Material Man Severs Old
Connections.

George Jackson, formerly with the
Jackson Supply Co., Indianapolis, has
severed his connection with that firm
and is now located at 49 S. Capitol ave-
nue, representing firms engaged in the
marketing of fuel saving equipment.

Sealed Proposals.

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

NOTICE OF BOND SALE.

Notice is hereby given that a 3:00 o'clock, P. M., on Wednesday, April 11, 1923, at the office of the County Superintendent of Schools, at Rushville, Indiana, Henry W. Beckner, as Trustee of Jackson Township, Rush County, Indiana, will offer for sale to the highest bidder an issue of \$51,000.00 of bonds of Jackson School Township, Rush County, Indiana.

Said bonds shall be 60 in number, dated March 1, 1923, of \$850.00 each and bearing interest at the rate of 5% per annum, payable semi-annually, two of which bonds shall be due and payable on August 1, 1924, and a like number and denomination shall become due and payable every six months thereafter until all of said bonds are paid. The first interest on said bonds shall be payable on August 1, 1924, and every six months thereafter and shall be evidenced by coupons attached to same and said bonds and interest shall be payable at the office of the Peoples National Bank, of Rushville, Indiana. Said bonds have been issued strictly in compliance with the law of the State of Indiana, and pursuant to an order of the Advisory Board of Jackson School Township, Rush County, Indiana, and duly entered of record on January 9, 1923, authorizing said bonds to be issued for the purpose of providing bonds for the construction of a school house in said township.

Said bonds will be sold according to law to the highest and best bidder for not less than par and face value; the right is reserved to reject any and all bids.

HENRY W. BECKNER, Trustee,
Jackson Township School, Rush County,
Indiana, R. R. 6, Rushville, Indiana.
March 24th, 31st, April 7th, 1923.

SCHOOL HOUSE

NOTICE TO CONTRACTORS.

Notice is hereby given that sealed bids will be received by the undersigned Trustee and Advisory Board of Jackson Township, Decatur County, Indiana, at the office of Tremain & Turner in Greensburg, Indiana, until Ten o'clock A. M., on the 18th day of April, 1923; for the erection and completion of a Township School Building; all in accordance with the plans and specifications heretofore adopted and approved therefor by the said Trustee and Advisory Board, and which are now on file in the office of the said Trustee of Jackson Township, Decatur County, Indiana, and in the office of the State Board of Accounts, State House, Indianapolis, Indiana, and in the office of The Elmer E. Dunlap Co., Architects, 1050 N. Delaware St., Indianapolis, Indiana.

At the same time and place bids will also be received for installation of the Electric Wiring

and Bell System; Plumbing and Sewering; and Heating and Ventilating plant for the above building.

The estimated cost of all of the above contracts is \$60,000.00.

All bids must be in writing, on Form No. 96 as prescribed by the State Board of Accounts; delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid for the General Construction shall be accompanied by a certified check for \$2,500.00; each bid for Electric Wiring and Bell System by a certified check for \$200.00; and each bid for Heating and Ventilating, and Plumbing and Sewering by a certified check for \$1,000.00.

Contractors may submit bids on any part or all of above work, or on any combination of two or more of above items.

Certified checks must be made payable to the Township Trustee of Jackson Township, Decatur County, Indiana; and will be held by him as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute a bond for the full amount of his bid, approved by the Trustee, for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded.

Should the successful bidder or bidders fail to enter into such a contract and execute such bond within ten days, then he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of said Jackson Township, Decatur County, Indiana.

Copies of the plans and specifications may be obtained at the office of the Architects upon deposit of Twenty-five Dollars (\$25.00) for each set, said deposit to be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved by the said Trustee to reject any or all bids.

A. C. MONCRIEF, Trustee.

William Barton,

Harry Irwin,

Ernest G. Sims,

Advisory Board, Jackson Township,
Decatur County, Indiana.

March 31, April 7th-14th.

PAROCHIAL SCHOOL.

NOTICE TO CONTRACTORS.

Sealed proposals will be received April 23d at 7:00 p. m., at the office of Rev. John A. McCarthy, pastor of St. Ann's Roman Catholic Congregation, 612 Wabash Ave., Lafayette, Ind., for the general construction of a new 2 story and basement school with auditorium; also bids for 2 pipe vacuum heating system, plumbing, sewerage, electric wiring and fixtures for the above building and a Sisters' House, the Rectory and the Church. Plans on file at the office of the architect, Riedel and Zink, Lafayette Life Bldg., Lafayette, Ind., and at the office of the pastor at his residence, 612 Wabash Ave.

First.

Joseph M. Kellogg and Mason C. Abbitt, Uni-
versity of Kansas, Lawrence, Kas.

Second.

R. Karl Galbraith, 3107 Central avenue,
Indianapolis.

president of the Lake division of the Architects' Small House Service Bureau; Emerson Chaille, member, and Edward B. Raub, chairman of the city plan commission; Mr. Huey, of the L. C. Huey Building Company, and Mrs. Felix T. McWhirter, Indianapolis clubwoman. Herbert Foltz, president of the bureau, was architectural advisor of the competition.

As regards the awarding the first prize to Mr. Harrison, that which influenced most was, that although following a somewhat stereotyped plan, showing in the opinion of the committee, that certain principles, already worked out as to arrangement to provide the greatest cubage, have been standardized and must be adhered to, Mr. Harrison added modern embellishments with a touch of originality that gave his work distinction and placed it in the category of a real creation. Moreover the committee found in the ground arrangement, which sought proper blends, and effects, along with utility and economy, provision for real attractiveness. In none of the details of the general scheme was a point overlooked that would mark an improvement over old styles and old plans. It was a work well done, the committee said.

Architect Cannon, ex-president of the I. S. of A., a member of the award committee commenting upon the winning design said:

"House design No. 12, winner of the first prize, is that of the old Dutch colonial type with modern embellishments to make it consistent with present-day requirements. It is typically and essentially American, one that any American citizen would feel at home in, would be proud to live in. The architect followed a more or less stereotyped plan, which shows there are fundamental principles that must be adhered to. However, its modern handling has given it all the elements of attractiveness possible from the one central idea—it has accomplished that or at least made provision for it.

"With economy, utility, beauty and convenience among the considerations in making the awards, the design won the first prize on its merits. In consideration of the economy element the committee saw in the design opportunity for the best combination in usage of ma-

terials for effects in arrangement to provide the greatest area of floor space and cubage, and adaptability to lot area."

The plans submitted were placed on exhibition at the Home Complete Show and drew much attention, calling forth much favorable comment.

BOARD LEAVES NAMES OF ELIGIBLES FOR APPOINTMENTS TO PRESIDENT MAHURIN.

Announcement Expected Shortly.

Though the Board of Directors of the Society listened with interest to Architect Cannon's report on the legislative activity that resulted in the passage of the new Administrative Building Council Law and were gratified that provision was made for representation of architects in the new council no appointments were made to fill the new positions. Instead, it was thought best to allow more time for the consideration of this matter and it was voted to leave the appointments up to President Mahurin, who announced that he would make known his decision as soon as he could give the matter the proper thought.

The interest taken by the organizations of the building industry who sponsored and fought for the new law is to be rewarded in that the statute provides specifically that the advisory committee, to be appointed by the administrative committee with the approval of the governor, shall be composed of three engineers, three architects, three contractors, and three building trades mechanics, all of whom must be representatives of the building industry and engaged in actual practice and construction, and must be submitted from the membership of their respective organizations; Indiana Engineering Society, Indiana Society of Architects, Associated Building Contractors of Indiana and jointly by Indiana State Building Trades Council and Indiana State Council of Carpenters. This will give the Indiana Society of Architects a direct say in the administration of the new law and recognizes the organization in a way never before accorded it.

The new law is the direct result of that for which the I. S. of A. has stood for years, co-operation amongst those of the building industry for the general good, safety and welfare of the Public.

No little interest centered in the Small House Competition just held at Indianapolis by the Indianapolis News and the Small House Service Bureau, A. I. A., Lake Division, in conjunction with the Home Complete Exposition which opened at the Fair Grounds, April 2nd, and continued through the week. There were twenty-three designs submitted, they coming in from Indianapolis, East Chicago, Evansville, Detroit, Mich.; Lawrence, Kas.; Pittsburgh, Pa., and Windsor, Ontario, Canada.

The aim of the competition was to obtain designs for small houses that would meet the requirements of the builder of limited means and to promote the idea of the necessity of architectural planning if improved standards for American homes was to be sought.

Those back of the competition were greatly gratified by the interest shown which resulted in really meritorious, practical plans covering the requirements set forth in the program making the work of the award committee in reaching a decision no easy task.

The committee making the award was composed of: Herbert L. Bass, Indianapolis architect; Fermor S. Cannon, vice-

BEST MARCH FOR BUILDING IN SIX YEARS.

Work Though of Small Nature, Makes Good Aggregate Volume.

The trend of building construction operations in Evansville in March ran more toward small projects and though there were 209 building permits issued by City Building Inspector Kerth, as against 94 in February, the total estimated valuation placed on the new work only amounted to \$272,365 as against \$450,893 for the February work.

This falling off was due to the fact that no new projects of any large extent came up for consideration, instead, the March activity was directed to house construction, of which type there was considerable, and to remodeling and addition effort.

At that, though falling behind the February, 1923 valuation, the March building volume ran ahead of that of a year ago to the extent of \$40,675, was greatly in excess of the figures for the same item recorded in March, 1921, and was a better valuation, except for two, than turned by any month during the whole year of 1922. The May and December, 1922, total estimated valuations were the only ones to surpass the March, 1923 total.

Going back over the records the latest figures reported are found to be the best recorded by any March since 1918.

Years	Per.	Est. Val.
1918	82	\$ 42,880
1919	82	54,125
1920	85	69,635
1921	130	59,404
1919	97	54,125
1923	209	272,365

MASTER PLUMBERS AND THE UNION SETTLE WAGE QUESTION

Master Craftsmen Announce Agreement at a Scale of \$1.12½ an Hour

Master plumbers of Evansville have reached and signed an agreement with the union plumbers calling for a wage scale of \$1.12½ per hour to be in effect till April 1, 1924.

Union plumbers will work eight hours with Saturday half-holidays.

The old scale, providing 95 cents an hour expired April 1 at midnight.

Members of the master plumbers who negotiated the contract were H. G. Newman, Albert Grant, Ben Newman and Harry Grant.

MORE HOMES NEEDED

Survey Shows Such to Be the Case at Evansville

Despite the great forward strides of Evansville in the direction of home building a survey by the Housing Committee on Community Welfare, made at a meeting with City Building Inspector Edward Kerth, showed that some 200 new homes are needed to replace intolerable habitations occupied by some citizens. Most of the latter are colored and it was pointed out that most of the dilapidated quarters should be razed.

The committee further recommended that a building association be formed to take care of the financial arrangements necessary to erect at least 300 new dwellings.

APPROVE BIG BUILDING PROGRAM.

Board of Education Would Relieve Local School Congestion, Thereby Increasing the 1923 Building Volume.

Not only have increased and steady building construction activities evidenced the rapid progression of Fort Wayne the past few years but there is another good barometer to indicate the growth of the city. The latter is nothing more nor less than the great demand that has been put upon the local school system.

As a matter of interest to the local building fraternity it has been announced by the Board of Education that quite a building extension program, under contemplation for some time, has been approved and will be pushed this year. The new work proposed consists of a 30-room grade building on the South Side, a 24-room addition in Lakeside, a \$225,000 building in Forest Park, 16-room addition at the James Smart School, 16-room addition in the Adams District, 6-room addition to the Franklin School, 4-room building in the Rolling

Mill District. The estimated cost of this entire building program is set forth at \$975,500.

NO BETTER EVIDENCE OF CITY'S RAPID STRIDE FORWARD.

Building Figures for March Carry Conviction.

Building projects in Fort Wayne for the month of March show a volume in total estimate for improvements that runs close to a million and half dollars. That carries near to the total of one and three-quarter millions last September, the largest month in the city's history. There can be stated nothing to gainsay the widespread and deep gratification in Fort Wayne that the proportion of those operations which is devoted to industrial and commercial building is so large, but there is an equal if not a surpassing satisfaction that the records for the month just closed exhibit so large a proportion for home building. During the month permits for the building of 155 homes were issued. That is evidence that the demand for homes is great and will in large degree be met. Fort Wayne's growth is rapid. The recent census bureau estimate sets down a gain of more than seven thousand population in the last three years. The probability is that the census figures are actually short of the fact. The demand for homes is insistent. If the supply shall approximate that demand the city's growth is going to have an increased ratio which the census estimates, computed upon past performances, will scarcely keep up with. An analysis of the March records in building discloses that the type of homes mostly projected is of that type mostly needed; the kind of homes which reflects the coming of new people to the city. That this is to be a notable year for building in Fort Wayne was amply forecasted before the year began. It is no surprise to find it so at the outset, but that it was expected does not in the least diminish the pleasure felt in the event which confirms prediction.

DIMENSION STUFF.

The growing volume of local building construction work has whittled the common labor supply down to nothing, making this one element exceedingly scarce under a heavy demand.

The issuing of building permits over at the city building inspection department continues active under a steady movement of house building.

HALT CALLED

Failure to Reach Wage Agreements Causes Let Up in Immediate Building Operations

Spring building construction work which was making a fine beginning in Indianapolis, with prospects of continuing through the building season of 1923 was in part stopped this week when unions in six building trades walked out, after failing to come to terms on new wage scale agreements with contractors. The old wage scales expired at midnight last Saturday night.

The workers who walked out yesterday were union plasterers, painters, electricians, iron workers, lathers and hoisting engineers. While these unions failed to reach agreements with employers, the scales were signed by five other unions—carpenters, cement finishers, sheet metal workers, plumbers and asbestos workers.

The agreement with the cement finishers makes no change in working conditions, but gives ten cents an hour increase in wages, bringing the pay to \$1.10 an hour for foremen, and five cents more, or 95 cents an hour, for journeymen.

About 250 electricians struck for a minimum wage of \$1.22½ an hour, while some contractors said their men were demanding \$1.25 an hour, which the employers refuse to pay. Charles Lutz, of the electricians' wage committee, said the men would be willing to return to work at once at a temporary scale of \$1.10, and continue negotiations. Some changes in working conditions are also desired.

Several large downtown buildings in process of construction are mostly affected by the strikes. It has been predicted that the walk-outs would be of short duration.

The strikes caught Indianapolis in the stride of what promises to be the greatest building year in the city's history.

MAINTAINING EARLY PACE

Total Building Valuations to Date Continue to Run 100 Per Cent Ahead of Same for Like Period in 1922

The March building permit figures issued by F. F. Hamilton, city building commissioner, made the new high record for that month, the total valuations being \$3,028,839, compared to \$2,065,051 for March last year. The month which just closed also reached the third highest mark of any month in the last two years, only May and June of last year going higher.

There were 1,438 permits granted for new building construction work in March as against 1,218 issued in March, 1922.

The figures compiled by the building commissioner for the first three months this year gives the total valuations at \$6,651,259, compared to \$3,816,155 for the period of last year.

BACK AT THE BIG A. B. C. GAME
ONCE MORE MENDING FENCES

State Field Representative Looking Over the Premises

The little old room at 326 Peoples Bank Building, Indianapolis, cozy, and busy most of the time, headquarters of the Associated Building Contractors of Indiana, has been rather drab and lonely the past few months owing to the matters out on the road that have required the attention and presence of Field Representative Owens, and, what is more, the prospect is that the same conditions will continue to rule for several weeks more.

"Jack," following an active campaign around the State House while the Legislature was in session, began early in March to turn his attention once more to the affiliated local city associations and found quite a lot to do. Since March 7 he has been traveling considerably, having visited these cities and intending to visit others: Lafayette, March 7; Evansville, March 11 and 12; Gary, March 19 and 22; Hammond, March 20 and 21; Muncie, April 2; Terre Haute, April 6; Michigan City, April 16; Hammond, April 17; Gary, April 19. It is also probable that he will drop in on South Bend and Fort Wayne before long.

WELL-KNOWN MASON CONTRACTOR SUCCUMBS.

Death Invades Ranks of Mason Contractors At Indianapolis.

The Indianapolis Master Mason Contractors' Association lost one of its charter members and earnest adherents, and the local building industry a sterling contractor this week when E. M. Stevens, 921 E. Maple Road Blvd., answered the summons of Death at his home, April 4. Funeral services, attended by the members of the association of which he was a member for years, were held Friday, April 6, from his late home. Interment was made at Crown Hill. Mr. Stevens is survived by a widow and two sons to whom the sympathy of the contracting fraternity is extended in their dark hour of loss.

BUILDING PERMITS.

(\$5,000 and Over)

Week of March 29th to April 5th.

Elks Lodge Building: 9 sty. 86x168. Owner, Elks Lodge, general contractor, Wm. P. Jungclauss Co., 825 Mass. Ave. Permit issued for \$570,900. Excavating.

SKY GROWS CLOUDY

Demand of Calumet Building Labor Dims Otherwise Bright Glow

It looks as if the contractors of East Chicago, Gary, Hammond, Indiana Harbor and Whiting were in for a siege at the hands of common building labor. A meeting was held last week at the B. T. E. A. headquarters at Hammond, attended by builders from the above named cities, to discuss the situation resulting from the insistent demand of common labor for a wage of \$1 per hour.

This element in the building field, hardly termed a craft, has not only made its demand but has refused to appoint a committee to meet with the contractors to talk matters over in an attempt to reach a settlement. Common labor has apparently taken the stand for \$1 per hour or nothing.

At the conference at Hammond the contractors thoroughly analyzed the situation and unanimously decided to appoint committees to make a canvas of the contractors in the Calumet District and seek to prevail upon all builders to stand back of the Hammond and Gary associations in the effort not only to protect the contractors but the building industry from unreasonable and exorbitant wage demands that threaten to run construction costs up to a point where they will knock off a large proportion of a most promising volume of building construction work.

The consensus of opinion of those at the meeting was that the demand of the laborers is excessive and the arbitrary stand taken by them is most unreasonable. The contractors who attended decided to stand by whatever action was deemed best by the Hammond and Gary associations.

Secretary Cole was called upon for a report relative to what had been done in an effort to effect an adjustment or settlement of the difference through the Building Trades Council.

The final outcome of the meeting was that the contractors voted to notify the Building Trades Councils at Hammond and Gary that the contractors of the Calumet District will continue to pay the 1922 scale to common building labor until such time as the labor councils appoint a committee to thresh out the altercation and a settlement is reached. If the employers' and employees' commit-

tee fail to reach an agreement it has been suggested that the matter be put up to arbitration by an impartial board and that all wages be paid on the agreed basis from a time to be fixed by agreement or arbitration.

TEAMING EMPLOYERS MAKE OFFER.

Set Teamsters' Wages at Sixty Cents Per Hour.

Team owners meeting at the Chamber of Commerce rooms have sent out the proclamation that 60c per hour is the limit that they intend to pay teamsters this season.

B. T. E. A. OF HAMMOND AND NEIGHBORING CITIES EXTENDS FELICITATIONS TO GARY.

Just to look in on the proceedings, and as a demonstration of Hammond's good will, Joe Wolf and Secretary E. E. Cole, went over to Gary, March 29th, when the contractors of that section got together and organized a permanent building contractors' association. Following the election of officers quite a few applications for membership were passed upon favorably.

The new association has quite a task ahead of it before it gets to working smoothly, but if the spirit of enthusiasm counts for anything the Gary organization will be heard from before long.

The best wishes of the B. T. E. A., of Hammond and the Calumet District are back of the newly born Gary A. B. C.'s in the big work they have set out to accomplish.

NEW RECORD.

Hammond Building for March Reaches New High Mark.

Hammond made a fine record for building activity in March, 1923, according to the figures of city building inspector Henry Vis. During the month just past more permits were issued than in any one month last year and also far exceeded the number of permits granted by the city for any month of March the past five years.

As far as estimated valuations are concerned, those for March, 1923, stand out prominently above like figures tabulated for corresponding periods since 1919, and even top any one monthly estimated valuation recorded throughout the year of 1922.

The March building figures for Hammond the past five years are:

Years	Per.	Est. Val.
1919 -----	55	\$ 78,675
1920 -----	26	99,050
1921 -----	58	514,475
1922 -----	72	187,725
1923 -----	119	606,225

The old robin that has camped in our cherry trees every summer showed up Sunday. He was all humped up Monday morning and crabbed and fussy as could be. Can't blame him much since the mercury was only 10 above.

WAGE TROUBLES CROPPING OUT

Annual Flurry On

Strike news seems to be quite prevalent in the Indiana building field at present, hardly an untoward circumstance, but nevertheless interesting since the time for expiring wage scales has arrived. These breaks are a good deal like the spring freshets, everyone expects them, the only question is how great will they be in their extent.

Well, the start has been made. At Anderson the steamfitters are out, having demanded an increase from 80 cents to \$1 per hour. The employers have offered 85 cents and the matter is now being threshed out. At the same city the electricians are asking for an advance from 75 cents to 90 cents an hour.

From northern Indiana comes the word that, when the building trades employers refused to meet in toto the demands of several of the crafts for advanced wages, all bricklaying, excavating and plastering is at a standstill.

Terre Haute was threatened until the brick masons agreed to continue work under the old scale, which expired March 31, until a readjustment is effected. The bricklayers want a 22½-cent increase to the \$1.15 present scale. Hod carriers were granted 80 cents per hour, a 5-cent advance. Other agreements do not expire till May 1.

PERHAPS THE AUTHOR HAD THE BUILDING INDUSTRY IN MIND

At Least One Might So Believe

Two fool jackasses, say get this dope,
Were tied together with a piece of rope.
Said one to the other, "You come my way
While I take a nibble at this new mown
hay."

"I won't," said the other, "You come with
me,

For I, too, have some hay you see."
So they got nowhere, just stumped the
dirt,

And, oh, by golly, how that rope did
hurt.

They faced about, these stubborn mules,
And said, "We are nothing but two hu-
man fools.

Let's pull together. I'll go your way,
Then you come mine, and we'll both eat
hay."

And they ate their hay and they liked it,
too;

And swore to be comrades ever true.

And as the sun went down, they were
heard to bray,

"This is the end of a perfect day."

NEW SECRETARY NAMED FOR RE- CENTLY REORGANIZED SOUTH BEND BUILDERS' EX- CHANGE

Announcement from South Bend is to the effect that the contractors up there, in preparation for what promises to be an unprecedented building season, are building a strong organization and mean to take every precaution to encourage the activity that has seized upon the building industry in that city.

The old contractors' association has been completely reorganized along broader lines and is to be known hereafter as the South Bend Builders' Exchange.

One of the first steps taken was to secure a new secretary who could give all his time to the Exchange and look after the mutual interests of the membership and the contracting fraternity as a whole. After due consideration, the man selected for the position was Mr. E. H. Hyman, for three years secretary of the Evansville Chamber of Commerce, and who also held a like station with the Muncie Chamber of Commerce for two years. The new secretary's past experience in business organizations is expected to stand him in good stead in his new field, ultimately resulting in a powerful Builders' Exchange for South Bend.

The headquarters of the new organization will be located at Rooms 9, 10 and 11, Warner Block.

Scheduled for Thursday evening, April 19, is a membership banquet to be held at the new LaSalle Hotel.

AN UNSOLICITED PRONOUNCEMENT.

Terre Haute Bank Acknowledges Publicly Achievement of Local Builders.

There is a much overused, much abused word that has been pretty well

worn threadbare while being carelessly handled about in an effort to attract and catch business and that word is "service." However, there is no getting away from the fact that it has lost none of its real meaning when properly applied.

No better confirmation of that latter contention could be better illustrated than by an incident that just recently occurred at Terre Haute.

Some months ago the Terre Haute Trust Co. conceived the idea of making extensive improvements to its eight story bank and office building and turned to the local building industrial field, contractors and mechanics, for the execution of the work. That no mistake was made, and that real service was rendered to the satisfaction of the owner, is evidenced by the following full page advertisement that was inserted in a Terre Haute paper by the trust company all unbeknown to the contractors and building trades mechanics employed on the work.

100% LOCAL LABOR.

The work done on the remodeled Terre Haute Trust Co., building was executed by Terre Haute men—all of whom were members of various union labor crafts, and employed by members of the

Associated Building Contractors.

A few words of explanation regarding the Associated Building Contractors:

The object of this organization is the protection of the building industry and improvement of building conditions in the City of Terre Haute, Indiana, through the co-operation of employers connected with the industry so that a full knowledge of conditions and a strong, sympathetic bond of fellowship may be established, thereby securing unity of action and effort in the accomplishment of a common purpose.

Coming as a surprise as it did to the local building fraternity, both contractor and mechanic, it created easily understood gratification.

The immediate inference to be drawn from this unsolicited acknowledgement

of achievement by the local building crafts is to the effect that when men get together, co-operate to the fullest extent for accomplishment, stand shoulder to shoulder, not for combination and connivance, but to render real service to the public, they are bound to be recognized as worthy and will command the respect of the community to which they belong, and a respect to which rightfully they are entitled.

KURMAN CO. MOVES TO LARGER QUARTERS.

Installs Attractive Brick Displays.

Greatly increased business, the result of the heavy demand for brick that has been brought about by the great wave of building construction activity that is sweeping over Indiana, is responsible for the move that has been made by Wm. A. and Edward Kurman, the Kurman Brick Co., who have moved from 1017 to 1122 Hume-Mansur Building, Indianapolis.

In the new quarters attractive brick panel displays have been layed up to give to the architect, contractor and prospective builder a clear conception of the ultimate effect to be obtained by the use of various types of face brick.

The Kurman Company has among the many large jobs sold, the new State Reformatory at Pendleton, Ind., (a \$3,000,000 brick order), the million dollar Elks' Building, Indianapolis, Wm. Penn Apartments, Indianapolis, Tuberculosis Sanitarium, Rockville, and numerous schools and other public and private building projects about the State.

ATTENTION TO SWEDES ATTRACTED.

Strikes in That Country Cause Mechanics to Look to America.

The report has come from Sweden that on account of the great strike in the lumber and paper mills in that country there is an exodus from that field to the United States of good mechanics and laborers the word having been noised around that big wages are being paid in this country. It is announced that within the last few weeks 8,000 mechanics have left Sweden, and at all ports the steamship companies are exceedingly busy booking passengers to the U. S. Estimations have been advanced that within the next few months from forty to fifty thousand Swedes will make their entry into this country. These men are said to be good mechanics, are strong, healthy and thrifty, all traits that make for good citizenship.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that Liberty School Township in Union County, Indiana, by Byron B. Nickels, the Trustee of said Township, and the Advisory Board thereof, will receive sealed bids at the office of said Trustee at the school house in the Village of Dunlapville in said school township in Union County in the State of Indiana, on Monday, the 7th day of May, 1923, at 1 o'clock P. M., of said day, for the construction of a new elementary grade school building in Liberty Township, Union County, State of Indiana. At the same time and place bids will also be received for the installation of:

- (a) The heating and ventilating system;
- (b) The plumbing and sewerage system;
- (c) The electric work and electric plant;

all in accordance with the plans and specifications heretofore adopted and approved by the Trustee and the Advisory Board of said township, which plans and specifications are now on file in the office of the Township Trustee and in the office of the State Board of Accounts. Said building to be a one-story brick building and basement to be located upon the following described real estate belonging to said school township in Liberty Township, Union County, State of Indiana:

Beginning at the southeast corner of the northwest quarter of Section 28, Township 11, north, Range 2 west, running thence west 4 chains and 45 links; thence north 5 chains and 87 links; thence east 4 chains and 45 links; thence south

Terre Haute, Indianapolis & Eastern Traction Company

Hourly, local and fast limited service between Indianapolis, Terre Haute, Brazil, Greencastle, Sullivan, Clinton Park, Paris, Ill., Martinsville, Danville, Lebanon, Frankfort, Lafayette, Greenfield, Knightstown, Newcastle, Richmond, Crawfordsville and intermediate points.

Thru service between Indianapolis and Dayton, O. Direct connection at Dayton for all Ohio points reached via electric lines. Fast freight trains daily between all points.

Dispatch freight shipments handled on all passenger cars. The up-to-date way of handling RUSH SHIPMENTS.

TRAVEL THE ELECTRIC WAY

5 chains and 87 links to the place of beginning, containing 3 acres, more or less.

The estimated cost of the proposed building completed is \$28,500.00. All bids must be in writing on forms prescribed by the laws of the State of Indiana, and delivered to the Trustee on or before the time mentioned herein. Each bid on the general construction shall be accompanied by the certified check of the bidder in the sum of \$500.00, payable to said Trustee. Each bid for the heating and ventilating installation shall be accompanied by the certified check of the bidder in the sum of \$300.00. Each bid for the plumbing and sewerage installation shall be accompanied by the certified check of the bidder for the sum of \$200.00. Each bid for the electric work and electric plant shall be accompanied by the certified check of the bidder for the sum of \$200.00. These certified checks to be held by said trustee as a guarantee of good faith the bidder will enter into a contract and execute a bond for the full amount of his bid, approved by the Trustee and Advisory Board, for the due performance thereof, if his bid is accepted. The checks of the unsuccessful bidders will be returned to them when the contracts are awarded and entered into. Should the successful bidder fail to enter into a contract and execute said bond, he shall forfeit said certified checks as liquidated damages for the use and benefit of said township. The plans and specifications may be examined at the office of the Township Trustee and at the office of Architect Karl P. Henkle, 103-110 Heinemann Bldg., Connorsville, Indiana. A deposit of \$15.00 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of said architect, which amount will be returned in full in case the same are returned on the day of the letting and a bona fide bid is submitted by the contractor. Should the bidder fail in one requirement only, the sum of Five (\$5.00) Dollars only shall be returned to him, but should he fail in the observance of both conditions, he shall forfeit the whole amount of said deposit. Each bidder shall stamp or write his name on the back of the drawing or cover of the specifications used by him in preparing his proposals. Said contract will be let in four parts as stated above, to the lowest responsible bidder who, upon the award of a contract, shall give a bond to the approval of the Trustee and Advisory Board for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of such bidder failing or neglecting to perform the work awarded him by such Trustee, and to pay for all labor and materials furnished him or any of said contractors in the construction of said work. The bidder shall have the right and privilege in connection with his bid for the general construction of said building, to make a bid for the purchase of the old school building located upon the above described real estate. The trustee reserves the right to reject any and all bids.

Dated this 10th day of April, 1923.

BYRON B. NICKELS,

Trustee of Liberty School Township,
Union County, Indiana.

Postoffice address, Liberty, Indiana, R. F. D.
No. 5.

April 14-21-28, 1923

SCHOOL HOUSE

NOTICE TO CONTRACTORS.

Notice is hereby given, That the School Township of Posey, Fayette County, Indiana, by the Trustee and the Advisory Board thereof, will re-

ceive sealed bids at the office of the said trustee, in the Director's Room of the Bentonville State Bank, at Bentonville, Indiana, until 1:00 o'clock P. M., on Saturday, April 28th, 1923, for the construction of an addition to, and alterations in, and for the installation of a heating and ventilating system, the installation of additions to the plumbing and sewerage system and for the installation of an electric wiring system, all in and to the Consolidated High School building at Bentonville, Fayette County, Indiana; all bids shall include all necessary labor, materials and supplies necessary to the complete construction or installation of that part of the work bid on, and all strictly in accordance with the plans and specifications provided therefor, which have been properly accepted and are now on file in the office of the said trustee. Bidders will submit their bids as follows:

(1) For general construction of addition (General Contract).

(2) For installation of heating and ventilating system complete.

(3) For installation of additions to plumbing and sewerage system.

(4) For installation of electric wiring system complete.

(5) For the whole or any combination of contracts.

The estimate cost of the construction as a whole is Forty Thousand (\$40,000.00) Dollars.

All bids must be in writing on forms provided therefor, delivered, signed and sealed, and in every respect conform to the laws of the State of Indiana. Each bid for the general construction must be accompanied by a certified check or draft, payable to the order of Lewis Rayl, trustee Posey School Township, in the amount of Five Hundred (\$500.00) Dollars, and copies of the plans and specifications therefor may be had at the office of the Architect Harry M. Griffin, 108 McFarlan Building, Connorsville, Indiana, by making a deposit of \$15.00 for each set. All bids for the installation of heating and ventilating system must be accompanied by a similar check or draft for \$300.00, bids for the installation of additions to the plumbing and sewerage system by a check or draft for \$50.00, and bids for the installation of an electric wiring system by a check or draft for \$50.00, and copies of the plans and specifications therefor may be had at the office of Charles Ammerman, 529 Occidental Building, Indianapolis, Indiana, by making a deposit of \$10.00 for any set; the checks accompanying the bids are with the understanding that said check or draft shall remain the absolute property of said School Township, unless the successful bidder shall, within ten days after notice of the unconditional acceptance of his bid, enter into a written contract, secured by bond in the full amount of his contract, to the approval of the trustee and Advisory Board, for the faithful performance thereof; When the contracts are awarded the checks of all unsuccessful bidders will be returned to them. All deposits made for plans and specifications will be returned on receipt of the same in good condition, on or before the hour set for the receiving of bids.

The right is expressly reserved to reject any and all bids.

LEWIS RAYL,

Trustee Posey School Township, Fayette
County, Indiana. Address Bentonville, In-
diana, Route No. 1.

G. ANDREW GOLDEN,
Connorsville, Indiana.
Attorney for Trustee.

April 14th.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of Indiana Construction Recorder, published weekly at Indianapolis, Indiana, for April 1, 1923, State of Indiana, County of Marion, as:

Before me, a notary in and for the state and county aforesaid, personally appeared Donald Campbell, who, having been duly sworn according to law, deposes and says that he is the publisher of the Indiana Construction Recorder, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the name and address of the publisher, editor, managing editor and business manager are:

Publisher, Donald Campbell, Indianapolis, Indiana; editor, Donald Campbell, Indianapolis, Indiana; managing editor, none; business manager, Donald Campbell, Indianapolis, Indiana.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation give its name and the names and addresses of stockholders owning or holding 1 per cent. or more of the total amount of stock.) Donald Campbell, Indianapolis, Indiana.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is ———, (This information is required from daily publication only.)

DONALD CAMPBELL, Publisher.

Sworn to and subscribed before me this second day of April, 1923.

(SEAL) JUNE STEELE, Notary Public.
(My commission expires December 22, 1924.)

STATE CONTRACTORS' ASSOCIATION ACKNOWLEDGES AID
EXTENDED BY STATE ARCHITECTS' SOCIETY.

INDIANAPOLIS CHAPTER AMERICAN ASSOCIATION OF ENGINEERS EXTENDS INVITATION TO I. S. OF A.

Would Entertain Architects.

An Aftermath of Legislative Activity.

As an acknowledgment of the effort put forth by the Indiana Society of Architects toward the securing of the passage of Senate Bill No. 140 (the Administrative Building Council Law), and as a token of appreciation of the co-operation extended by the architects to that end, Fernor S. Cannon, chairman of the I. S. A. State Building Code Committee, has received a letter from the Associated Building Contractors of Indiana.

The communication, written by John H. Owens, Field Representative of the A. B. C.'s of Ind., expresses the satisfaction and gratification of the contractors at the unstinted support given by the architects to secure a progressive and constructive state law that will tend to establish state-wide standardized building construction requirements and regulations.

Commenting on that which has been achieved, Mr. Owens says:

"Only through the correlation of ideas and the co-ordination of efforts of all parties interested was it possible to promulgate, prepare and pass such a law, which has been pronounced one of the most constructive measures ever attempted by those who represent the building industry.

Your committee at all times worked in harmony with the general committee, and endeavored to express their opinions in terms of working for the interest of the industry as a whole rather than representing a single organization thereby, and only, through the display of this unselfish spirit, and the proper regard for others was it possible to attain the results so much desired."

It is to be hoped that the feeling indicated in this letter from the State A. B. C.'s is but a forerunner of closer relationships that will exist in the future between the various elements of the building industries of Indiana for the attainment of greater and greater constructive moves for the advancement of the industry as a whole.

An invitation has been extended to the members of the Indiana Society of Architects, their families and friends to meet with the Indianapolis Chapter, American Association of Engineers, at the Indianapolis Chamber of Commerce, 7th Floor, Friday, April 20, 8 p. m.

The Chapter has arranged to have Mr. Frank Yeigh, one of America's foremost travel lecturers, from the Bureau of Commercial Economics, Washington, D. C., to give his widely known lecture, "Trailing the Hudson's Bay Posts." This lecture takes about one and a quarter hours and is continuously illustrated by a marvelous series of moving and still pictures, most of them in color.

This lecture is not only educational, but is intensely interesting. All of us know more or less of the famous posts and men of the old Hudson's Bay Company. The romance of that great fighting, commercial organization, the grandeur of the lakes, woods, and streams, the picturesqueness of the "couer du bois," the hardships, the adventures, the lure of those hardy pioneers and their present day followers, are all brought out most vividly.

Following the lecture there will be a social period the aim of which will be to better acquaint the technical men of Indianapolis and Indiana with each other.

All Indianapolis and Indiana architects who can arrange to attend the above meeting will please notify Secy. Harrison by April 17, so he can inform the engineers that proper accommodations can be provided.

SUMMER TOUR OF EUROPE IS PLANNED FOR ARCHITECTURAL STUDENTS

American students of architecture will be interested in the opportunity offered to them by the Institute of International Education to study the development of architecture in Europe next summer under Professor Albert C. Phelps, profes-

sor of architecture in the College of Architecture, Cornell University. Professor Phelps will be a member of the faculty of the Art Students' Tour which has been organized for the summer of 1923 under the sponsorship of the Institute; other members will be Miss Edith A. Abbot of the Metropolitan Museum of Art, New York City, as a lecturer on the history and appreciation of painting and sculpture; Mr. John C. Tidden of Rice Institute, Texas, as instructor in painting and lecturer on the fine arts from the standpoint of the creative artist, and others whose names will be announced later.

The group will sail from New York on June 30, 1923, on the Cunarder "Saxonia." Professor Phelps will lecture during each day of the transatlantic voyage, as a means of sketching in the broader outlines of the development of architecture and of preparing for the more specific lectures during the land portion of the trip. His lectures on shipboard will be illustrated by stereopticon slides from the collection of the Cornell College of Architecture.

After landing at Cherbourg, the group will visit Paris and Versailles, Rome, Perugia, Assisi, Florence, Venice, Milan, Ghent and Bruges, Brussels and Antwerp, the Dutch cities of Amsterdam, Haarlem and The Hague, and finally England. The return voyage will be by the "Saxonia," due to arrive in New York September 4.

The Institute of International Education, under whose auspices the Art Students' Tour has been organized, has for many years been carrying on an important work characterized by such activities as exchange scholarships, exchange professorships, etc. During the last two years it has been extended to include also European travel for college students, organized so as to permit students to travel more inexpensively, more conveniently, and with greater educational return, than they could do otherwise.

Complete information may be secured from the Institute of International Education or from Irwin Smith, 30 East Forty-second street, New York City.

EVANSVILLE BUILDING OPERATIONS AND CONDITIONS RULING JUST AS WAS FORECASTED

Great Activity Prevailing

To date every prediction made late last winter regarding building construction activity in Evansville when spring came has come true. First and foremost indications pointed to an unusually large volume of building operations, and men close to the pulse of the industry freely forecasted that just such a volume would come to pass as soon as the weather grew favorable to active work. All this has materialized and Evansville is enjoying one of the greatest building periods in her history. Not only that, but promising prospects continue to pile high promising still greater activity as the weeks roll on.

The employment situation for building trades mechanics was never better, for there is most every kind of construction operation, from large ones down to small additions and repairs, going on. Every craft is going at full speed.

Then, further, there were those who saw that increased building operations would bring increased material prices and wage demands and so announced their opinions. The wage demands have materialized as expected and in a few instances have been granted. As for greater material costs Evansville can not hope to escape them when they have already become an actuality in other parts of the country.

Construction costs are bound to advance, they can't help it, for the law of supply and demand is sure to affect things. The enormous awakening of building construction is not local but universal throughout the country, creating a terrific demand both upon the building material supply market and the ranks of the available supply of skilled building labor.

Brickwork on the new half million dollars Benjamin Bosse high school at Washington and Harlan avenues has been completed to the second story on

the eastern section, and arrangements are being made to increase the force of men as work progresses.

Preliminary plans are being considered by the congregation of Bethel Evangelical church for a Sunday school hall adjoining the church at Jefferson avenue and Garvin street. A \$100,000 building fund is now being raised for the above purpose.

There is hardly any end to the new home building campaign that is on in Evansville. Hardly a section of the city, unless it be right down town, is free from new houses springing up. Contractors are busy estimating more of these homes and the local architects are steadily engaged in preparing plans for still more of them.

CARPENTER CONTRACTORS NAME NEW OFFICERS.

All Set for a Big Year.

At the annual election of officers the members of the Ft. Wayne Builders' Association, made up of the carpenter contractors, named these men:

Albert Weinman, President.
Martin Hockmeyer, Vice-President.
James Mullen, Treasurer.

The newly elected officers are from the ranks of the younger contractors and are expected to instill new impetus to the organization. Though the older heads are as much interested as ever in the Builders Association they have decided to sit back and give the young men a chance at organization effort.

TO MAKE INSURANCE FEATURE OF THE EXCHANGE STRONGER.

Eph Dailey Put in Charge of That Branch of Organization Effort.

The Ft. Wayne Builders' Exchange has established an insurance department and placed Eph P. Dailey at the head. Mr. Dailey, who had served five years as secretary of the exchange will devote his time almost exclusively to the new department and Mr. Oelschlaeger was

named to the post made vacant by the former secretary's elevation. Thus, though moving on Mr. Dailey will always be on hand for council when needed.

As regards the insurance feature, it has grown to such an extent that it required more attention, hence, the change of secretaries to enable Mr. Dailey to look after that end. He will be located at Exchange headquarters and be on the job at all times.

JUST SHORT OF ONE AND A HALF MILLION DOLLARS.

Greatest March Building Record in Ft. Wayne's History.

"Coming events cast their shadows" is rather a moth-eaten saying, yet, nevertheless true. That being the case, how does this augur? When a recapitulation was made at the passing of March, 1923, it was found that during that period 281 building permits had been issued for a total estimated valuation of \$1,450,000, marking one of the very best building months in Ft. Wayne in years, only a few monthly totals made during the great record making year of 1922 exceeding last month's figures. With such a burst of building at the very dawn of the spring building season the question naturally arises, to what proportions will the building construction volume swell when the season gets into full swing?

In March, 1923, Ft. Wayne granted 101 more permits than during the corresponding period the year previous, while the gain in the amount of money involved was \$876,625 or 156.9%.

WOULD CREATE NEW FIRE PREVENTATIVE ZONES.

Action Considered a Necessity.

Hardly a week passes that some evidence does not crop out to impress with the fact that Ft. Wayne's great building strides are carrying the city forward rapidly to the point where modern means must be employed to protect the city, insure it against increased hazards, brought about by constant growth, and assure the welfare of the citizens to the greatest degree possible.

The past week there was introduced before the city council an ordinance that if passed, will place restrictions on downtown building construction. The new move would provide a new fire zone necessitating fire resistive buildings in certain districts and semi-fireproof structures in other less congested sections. The designated territories comprise the real business heart of the city.

WAGE SCALE MATTERS AT INDIANAPOLIS.**Many Crafts Sign Up.**

The building construction situation at Indianapolis, rather seriously threatened a week or so ago, has been brought around to a fairly favorable condition that at least should carry the early stages of building operations along at an uninterrupted pace.

There was a time when the annual readjustment of wage scales looked as if it might cause considerable trouble, but by diligent effort, and sticking right to the task before it, the Building Contractors Association succeeded in reaching satisfactory figures with most of the crafts resulting in signed agreements.

At the present time all the crafts, except the electricians, lathers and plasterers, have fallen into line. As regards the three who are still out there seems to be quite a difference of opinion between the employers and the men as to what the wages should be with chances for an early settlement somewhat removed.

The iron workers stood off for a time not on the matter of wages, but for the insertion of a clause in the agreement that would have made the agreement applicable all over the State. The Indianapolis contractors contended they had no right to thus extend the Indianapolis wage scale throughout the State and stood solidly against such a proposition. Finally the iron workers waived their demand and signed up.

The scales so far agreed upon for 1923 are:

	Per Hr.
Crafts	
Asbestos workers	\$.90
Bricklayers	1.35
Carpenters	.92½
Cement workers	.95
Hod carriers	.72 to .75
Hoisting engineers	1.15 to 1.25
Iron workers (to May 1)	1.17½
Iron workers (after May 1)	1.25
Painters	.97½
Plumbers	1.22½
Sheet metal workers	.97½

**COMPARISONS MAKE MARCH
BUILDING AT INDIANAPOLIS
A REMARKABLE PERFORMANCE.**

**Easily Outstrips Previous Records for
Early Spring Activity.**

Interesting in more ways than one were the new building construction figures registered at Indianapolis for the month of March this year. First and foremost, both the number of permits issued and the total estimated valuation covering the same were far in excess of any other building record ever made by March since the city was established. Then, too, the steady advance that has been made from year to year in building construction operations in March was greatly increased over corresponding periods in previous years. When one considers that the real building season has just begun the March performance is all the more remarkable.

The volume of business transacted during the month just past showed a gain of 800% over the volume for March, 1918; 472% over March, 1919; 264% over March, 1920; 29% over March, 1921; 46% over March, 1922.

Building figures for the month of March for the past six years at Indianapolis are:

Year	Per	Est. Val.
1918	462	\$ 334,719
1919	606	529,314
1920	714	831,454
1921	1091	2,336,964
1922	1218	2,065,051
1923	1438	3,028,839

CERTAIN LABOR SHORTAGES SEEN

**Lack of Apprentices Gives Rise to Same
Old Condition.**

In view of the fact that early evidence forecasts a big building season for Indianapolis in 1923 quite a few of the local contractors who were approached on the matter of labor supply expressed the opinion that in all probability the labor question was going to be a real one for the contractors to meet. Lack of a good apprentice training system has caused a dearth of skilled mechanics and the supply of same has not kept pace with the ever growing demand caused by the great revival of building construction. There are two causes for this condition, first the inclination of the contractor to not want to be bothered with apprentices, and on the other hand certain restrictive apprenticeship meas-

ures enforced by the Unions. The lack of interest shown by the building trades employers was no incentive to the Unions to encourage the employment of apprentices.

As seen from the present angle there will be no scarcity of common labor, carpenters and some of the other trades, but, a serious shortage of brick layers and plasterers is expected when the big spring and summer building operations open up.

All the talk of encouraging more apprentices, that year after year has filtered through the air from time to time, seems to have accomplished no more than an echo and while few new men were being taken on at the same time the ranks of the skilled mechanics were being depleted by one cause or another. Nor can any remedy for this growing menace of dwindling supply be looked for until the contractors assume a determined stand on the apprentice question and take a hold of it with a will using their every effort to re-vamp their forces by training young men into a skilled stage to carry on building in its various ramifications.

BUILDING PERMITS.

(\$5,000 and Over)

Week of April 5th to April 12th.

Residences (2) \$17,000 each, 1353 and 1361 E. 38th St. Owner, Laban C. Johnson, 3414 Birchwood Ave. Owner will build by day labor. Brick veneer; also 1 residence at 3404 Fall Creek Blvd., to cost \$10,000.

Residences (4) \$16,000 each, 46th and Meridian. Owner, Fred W. Jenkins, 4221 Central Ave. Owner will build by day labor.

Residences (2) \$12,500 each, 4402 and 4404 Central. Owner, John W. Castor (Marion County Recorder), Court House. Owner will build by day labor. Brick veneer.

Commercial Bldg. (rem.), \$14,000, 117 S. Meridian. Owner, McKee Realty Co., 117 S. Meridian. General contract let to Jos. Sertell, American Central Life Bldg.

Residence: \$9,000, 540-42 N. Gray St. Owner, C. L. Elder, c/o Van Camp Hdw. & Iron Co. General contract let to Realtor Building Co., Lemcke Bldg.

Residence: \$10,000 (double), 4214-16 Ruckle. Owner, George W. Kiefner, c/o Chas. W. Lauer and Co., State Life Bldg. General contract let to Realtor Bldg. Co., Lemcke Bldg.

Residence (double), \$8,000, 5807-09 E. Wash. Owner, George Hitz, 28 S. Delaware St. General contract let to Roy S. Towell, at site.

Residence: \$8,500, 5479 Hibben. Owner, Walter L. Carey, 5928 University Ave., general contract let to Edw. Newell, at site.

Residence: \$8,000 (double), 5222-24 College. Owner, Hal Gary, 4155 Park. Day work.

Residences (4): \$4,500 each, 5115-16-19-40 Carrollton. Owner, R. H. Shelhorn, 111 Monument Circle.

Residence: \$9,000. Owner, Wm. E. Davis, c/o contractor; general contract let to Ora C. Pierson, 5445 N. Delaware St.

LABOR TROUBLE.**Hod Carriers and Laborers Still Bucking the Game.**

Things are still at sixes and sevens concerning the hod carriers' and building laborers' wages in the Calumet District. Though representatives from the B. T. E. A. of Hammond and the A. B. C.'s of Gary have met twice with committees from the Hod Carriers' and Laborers' District Council no settlement or agreement has been arrived at.

The employers have offered plasterers' tenders 95c per hour, and hod carriers and building laborers 85 cents, both 10c increases over the old scale. The men are holding out for \$1.10 and \$1.00 per hour respectively.

As a result of the dispute the contractors are now using non-union laborers and because of such action the plumbers and electricians have walked out on some of the work where the non-union men were employed. However, the brick layers and carpenters are living up to their agreements and are sticking regardless of the latest turn of events.

The prospects appeared rather rosey last Thursday for a settlement, but when the joint committee meeting got under way the employes crowd went up in the air and—blooey, it was all off again. It is to be regretted that the honest-to-goodness working men in the labor organizations must play second fiddle to the radicals who somehow usurp the reins and seek to drive ahead wildly trampling the others under foot. It has been our experience that many of these radicals are mere trouble makers, men who don't give a hang about working, but do revel in stirring up trouble and depend upon their ability in that direction to draw support from the rabble to hold their positions of power.

Some entertain a prejudice as to meeting with colored men, in fact, certain men in the B. T. E. A., have not been above it and yet, Thursday night, as far as deportment, reason and language were concerned the negroes proved they could at least be gentlemen in comparison with tactics employed by some of the white men present.

HOLE SOON PLUGGED.**Intimidation Succeeds Only to Fail.**

The descent of a Labor delegation upon the new hotel job in Hammond the other day succeeded in frightening some of the colored laborers off the work, but

their places were soon filled by white men and some Mexicans and the building operation is progressing.

IF NOT ONE THING IT IS ANOTHER.**Building Industry Sorely Beset.**

Talk about handicaps, first the ground hog had his fling, then the weather man butted in, and now Labor has come up stage to gum up the building performance. So far it is not "curtain" yet. It's a pretty big show to try to bust up.

METTLE TRIED.**Gary Builders United.**

One thing has been proved; the Gary contractors have a real organization nowadays, one that is wide awake, full of earnestness, and alive to the situation. The new association is receiving the support it is entitled to and this is going to prove most beneficial as time wears on. Certain things have arisen of late that has aroused the fighting blood of the Gary contractor who refuses to be used as a buffer to every whim and selfish motive that may seize upon Labor.

CALUMET BUILDING PROGRESS.

Architects A. C. Berry & Co., continue to keep the horizon bright. At present they are engaged in getting out plans for a \$25,000 residence for John Jarnouski, the road contractor. They also have plans for a \$35,000 bank and office building for the Lansing Bank at Lansing, Ill.

The steel reinforcing for the first floor of the new hotel having been placed the contractors have put their force to work pouring the concrete.

CLEANING UP OLD ACCOUNTS.**Muncie Contractors Reorganizing.**

A new start is under way by the Muncie contractors.

The former local A. B. C.'s got into a bad way through lack of attendance at meetings, luke warm interest and the old, old bug-bear, failure to pay dues. Then came a general losing sight of the real motive of organization, co-operative effort. Out of this chaos sprang dissatisfaction and dissolution.

There are those contractors in Muncie who realize the value of the holding together of the building trades employers for the protection of the building industry through a stand for right, sound and progressive principles and are striving to that end.

To forget by-gones and wipe the slate clean, a drive is being made to clean up all the old business and obligations of the association. That accomplished, an effort to reorganize on a more earnest

basis is to be made with the purpose of building up a strong membership from men who possess the vision and business acumen to appreciate what solidarity in their ranks will mean to the future of building.

MUNCIE BUILDING RECORDS TO BE AVAILABLE HEREAFTER.**March Does Fairly Well.**

Possessed of a building code which provides for and makes it compulsory now to take out building construction permits when new work is to be started, Muncie is in a position to keep a more authentic tab on her building operations, a method such as is in vogue in the larger cities in Indiana. This building inspection will also mean better building and more protection for the owner.

Though there is no record of the building started locally for the same period in 1922, March figures this year show that there were 54 building permits granted, representing an estimated investment of \$89,775, which is considered a fair beginning for the new season at hand. There were no really large projects started in March, the building construction operations consisting of residences, alterations, additions and repairs.

It will be interesting to note from now on the actual trend of Muncie building from month to month as set forth by the official figures to be kept by the city.

A REAL PROBLEM.**Muncie, Like Other Cities Her Size, Has Something to Figure Out.**

Building conditions in Muncie are affected at the present time mostly by the labor situation. There is an absolute shortage in the labor supply with the result that wages are giving every indication of an upward trend. Such is not surprising as the big cities with their liberal scales are holding out a lure for the building mechanic in the small city that to many is irresistible. As a matter of self-defense the latter places, like Muncie, are practically compelled to advance wages sharply to offset the influence which is allowed to grow, would deplete the local labor supply and leave prospective owner contractor, material supply man, architect and the city, in its needed building expansion, to suffer. There is but one way for the small city to assure itself of an available skilled labor supply for building operations and that is to pay a wage that will hold the building mechanics at home. That is what Muncie and her like must do, hence, the wage trend.

On the other hand, these advanced wages make themselves felt in building construction costs, and already this effect is getting in its work as there is a strong complaint cropping out against high building costs. Just to what extent this phase of the case will go there is none to say, though there are those who predict that it will decrease greatly an otherwise promising prospect.

In the meantime, people interested in building, and those who are anxious to see Muncie go ahead, are hoping a happy medium may be reached that will assure to the city a good share of new building operations in 1923.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that Liberty School Township in Union County, Indiana, by Byron B. Nickels, the Trustee of said Township, and the Advisory Board thereof, will receive sealed bids at the office of said Trustee at the school house in the Village of Dunlapsville in said school township in Union County in the State of Indiana, on Monday, the 7th day of May, 1923, at 1 o'clock P. M., of said day, for the construction of a new elementary grade school building in Liberty Township, Union County, State of Indiana. At the same time and place bids will also be received for the installation of:

- (a) The heating and ventilating system;
- (b) The plumbing and sewerage system;
- (c) The electric work and electric plant;

all in accordance with the plans and specifications heretofore adopted and approved by the Trustee and the Advisory Board of said township, which plans and specifications are now on file in the office of the Township Trustee and in the office of the State Board of Accounts. Said building to be a one-story brick building and basement to be located upon the following described real estate belonging to said school township in Liberty Township, Union County, State of Indiana:

Beginning at the southeast corner of the northwest quarter of Section 28, Township 11, north, Range 2 west, running thence west 4 chains and 45 links; thence north 5 chains and 87 links; thence east 4 chains and 45 links; thence south 5 chains and 87 links to the place of beginning, containing 3 acres, more or less.

The estimated cost of the proposed building completed is \$28,500.00. All bids must be in writing on forms prescribed by the laws of the State of Indiana, and delivered to the Trustee on or before the time mentioned herein. Each bid on the general construction shall be accompanied by the certified check of the bidder in the sum of \$500.00, payable to said Trustee. Each bid for the heating and ventilating installation shall be accompanied by the certified check of the bidder in the sum of \$300.00. Each bid for

the plumbing and sewerage installation shall be accompanied by the certified check of the bidder for the sum of \$200.00. Each bid for the electric work and electric plant shall be accompanied by the certified check of the bidder for the sum of \$200.00. These certified checks to be held by said trustee as a guarantee of good faith the bidder will enter into a contract and execute a bond for the full amount of his bid, approved by the Trustee and Advisory Board, for the due performance thereof, if his bid is accepted. The checks of the unsuccessful bidders will be returned to them when the contracts are awarded and entered into. Should the successful bidder fail to enter into a contract and execute said bond, he shall forfeit said certified checks as liquidated damages for the use and benefit of said township. The plans and specifications may be examined at the office of the Township Trustee and at the office of Architect Karl P. Henkle, 108-110 Heinemann Bldg., Connerville, Indiana. A deposit of \$15.00 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of said architect, which amount will be returned in full in case the same are returned on the day of the letting and a bona fide bid is submitted by the contractor. Should the bidder fail in one requirement only, the sum of Five (\$5.00) Dollars only shall be returned to him, but should he fail in the observance of both conditions, he shall forfeit the whole amount of said deposit. Each bidder shall stamp or write his name on the back of the drawing or cover of the specifications used by him in preparing his proposals. Said contract will be let in four parts as stated above, to the lowest responsible bidder who, upon the award of a contract, shall give a bond to the approval of the Trustee and Advisory Board for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of such bidder failing or neglecting to perform the work awarded him by such Trustee, and to pay for all labor and materials furnished him or any of said contractors in the construction of said work. The bidder shall have the right and privilege in connection with his bid for the general construction of said building, to make a bid for the purchase of the old school building located upon the above described real estate. The trustee reserves the right to reject any and all bids.

Dated this 10th day of April, 1923.

BYRON B. NICKELS,

Trustee of Liberty School Township,
Union County, Indiana.

April 14-21-28, 1923

HOSPITAL BUILDING NOTICE TO CONTRACTORS

Notice is hereby given that the Hospital Board of Cass County, Indiana, will receive sealed bids at the office of the Cass County Auditor in the Court House at Logansport, Indiana, until ten o'clock a. m., Tuesday, May 8, 1923, at which time and place same will be opened, read and considered for the construction of a hospital building and for the installation of the heating and ventilating system of said building, and for installation of plumbing, sewer and gas system for said building, and for the installation of electric wiring and apparatus system for said building, and for an elevator and dumb waiter system for said building, for use as a general hospital for the

said county and all by and according to plans and specifications as provided therefor. Estimated cost of building (\$120,000.00).

The plans and specifications are on file for the inspection of bidders at the office of said County Auditor and at the office of Rodney W. Leonard, Architect, Room 309 People's Life Building, Frankfort, Indiana.

Bidders in submission of bids will submit same as follows:

1. For construction of building (general contract) or
2. For the installation complete of heating and ventilating system or
3. For the installation complete of plumbing, gas and sewer, or
4. For installation complete of electric wiring and apparatus system, or
5. For installation complete of elevator and dumb waiter, or
6. For all work inclusive and as complete by the plans and specifications.

In this way the bidder only being required to submit his bid for such portion or portions of the total work as he may desire.

All bids shall be accompanied by an approval bond of the bidder in sum equal to full amount of his gross bid or bids, conditioned upon his entering into a written contract with said Board of Trustees if he is the successful bidder, according to proposal.

All bids and proposals shall be upon the forms prescribed by the State Board of Accounts. Unless bids are accompanied by a bond as above and upon forms as above no attention will be given same.

The successful bidder will be required to enter into a written contract with said Board of Trustees. Contract as usually conditioned. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in general conditions of the specifications.

The Board of Trustees for Cass County reserve the right to reject any and all bids without giving any reason therefor.

BOARD OF TRUSTEES, CASS COUNTY

HOSPITAL:

JOHN T. ELLIOTT, President.

GEORGE A. RAUB, Secretary.

WILLARD WINN, Trustee.

EMERSON B. KITCHEL, Trustee.

April 21, 1923.

NOTICE TO BIDDERS ON THE UNDERGROUND STEAM DISTRIBUTION SYSTEM KNOWN AS PART 1 OF THE NEW SERVICE PLANT FOR THE INDIANA STATE SOLDIERS HOME.

Please note the following instructions governing the filing of proposals and the awarding of contracts:

Sealed proposals to the Board of Trustees of the Indiana State Soldiers Home for the furnishing of labor and materials for a new underground steam distribution system, in accordance with the plans and specifications prepared by R. W. Noiland, consulting engineer, will be received by the Board of Trustees, c/o Secretary of the Board, Mrs. Caroline B. Morrison, at 422 North Seventh Street, Lafayette, Indiana, up to 10 a. m. on the 10th day of May, 1923, at which time the bids will be publicly opened in the Board's room in the Commandant's residence at the Indiana State Soldiers Home.

One main proposal and one sub-proposal shall be

made and if both proposals are accepted, two separate and distinct contracts for the work will be executed. The proposals shall be as follows:

Proposal No. 1

This proposal shall include all labor and material for a complete underground steam distribution system as shown on the plans and specified.

Proposal No. 1A, Trenching and Backfilling

This proposal shall include all labor and materials included in the paragraph in the specifications headed Trenching and Backfilling.

The trustees reserve the right to reject any and all bids.

A Bidder's Bond is to accompany each and every bid.

The successful bidders will each be required to execute a contract on a form provided by the Board of Trustees. Each successful contractor will also be required to furnish satisfactory Surety Company's Bond to the amount of the Contract Price to secure the fulfillment of the Contract.

Plans and specifications relating to any of the above work may be consulted daily at the Commandant's Office at the Indiana State Soldiers' Home.

All communications and references to the above proposals or contracts should be addressed to the undersigned:

BOARD OF TRUSTEES, STATE SOLDIERS'

HOME, c/o Sec. of the Board, Mrs. Caroline B. Morrison, 422 No. 7th St., Lafayette, Indiana.

(Each bidder is required to furnish a check for fifteen dollars (\$15.00), made payable to the engineer, upon receipt of the plans and specifications, to guarantee the return of the plans and specifications. This check will be returned to the bidder when the plans and specifications used for making up the bids are returned to the engineer. The plans and specifications must be turned in with the bid.)

April 21-28; May 5, 1923.

POWER HOUSE EQUIPMENT NOTICE TO BIDDERS.

Bids will be received by the Board of Trustees of the Indiana State Normal School at 8:00 P. M., May 7, at the Roberts Hotel, Muncie, Ind., for the erection and completion of a power house, tunnel, etc., at the Eastern Division, Indiana State Normal School, Muncie, Indiana. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by a certified check equal to five (5%) per cent of the amount of the bid. Separate bids must be received for the following items: First, for the erection of the power house, estimated cost \$26,500.00; second, for the construction of the pipe tunnel, estimated cost, \$17,500.00; third, for the erection of the chimney, estimated cost, \$6,500.00; fourth, for the main steam supply and return pipes, estimated cost \$14,000.00; fifth, for furnishing and erecting two boilers, estimated cost \$15,000.00. Bids must be made in accordance with provisions of specifications prepared by Kibele & Gerard, Architects, Muncie, Indiana. Copies of plans and specifications may be found at the office of the Dean of the Faculty, Eastern Division, Indiana State Normal School, Muncie, Indiana; at the office of Kibele & Gerard, Architects, 335 The Johnson Building, Muncie, Indiana, and at the office of the Registrar of the Indiana State Normal School, Terre Haute, Indiana.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,

Helen C. Benbridge, Secretary.

Viskalt

~Pliant Under Stress~

MEMBRANE ROOFS

Proof Against Leaks in Spite of Strain

Your buildings, as you know, require a certain amount of flexibility in each part so as to care for strains and stresses due to wind pressure, ground movement, unusual loads, seasoning. Especially important is this flexibility in the waterproofing bitumen used.

Up to the present time, however, much damage has been done to otherwise excellent structures because the waterproofing cracked and broke down under strain. To overcome this defect, a waterproofing bitumen, Viskalt, has been developed which in spite of strain is flexible and proof against leaks.

Viskalt insures a **permanent** waterproof covering for your structures. It is made by a firm backed by over fifty years of manufacturing experience—The Richardson Company of Lockland, (Cincinnati) Ohio.

For complete details and estimates, consult any good roofing contractor.

WAR MEMORIAL ARCHITECTURAL COMPETITION CLOSED THIS WEEK

Numerous Plans Submitted

The attention of professional architectural circles all over the country during the latter part of this week has been centered on Indianapolis, where the selection of an architect to plan the \$2,000,000 World War Memorial has been hanging in the balance.

That the best in the way of design and construction might be secured for this notable structure the War Memorial Commission months ago decided upon an architectural competition along a given program with Thomas R. Kimball, Omaha, Neb., past president of the American Institute of Architects, acting as architectural adviser. Those entering the competition were required to furnish proof of their qualifications and competency to handle such a large commission if selected.

Milton Bennett Medary, Jr., architect of Philadelphia, Pa.; Henry Bacon, architect of New York, and Charles Adams Platt, painting and landscape expert and architect of New York were named to act as a judging and an awarding committee. All contestants were required to submit plans not later than April 16.

As a result of the above arrangements twenty-six sets of plans were submitted. The members of the award jury, together with Mr. Kimball, assembled at Indianapolis the past week and Tuesday entered upon their task, the finale of which will be to award to some architect one of the largest single architectural commissions ever given out in Indiana.

The plans were taken to the John Herron Art Institute, Indianapolis, where it consumed practically a full day to unpack and hang the array of drawings. More than 1,700 square feet of wall display space was required for the hanging of the exhibits.

It was generally agreed that it would take from three to four days to review and judge the work submitted by the competitors.

The room in which the plans were displayed was closed to all except members of the jury until an award decision was reached. At the conclusion of the work of the judges the plans will be put on display for the edification of the public.

Members of the jury naturally at first refused to comment upon the plans, but Mr. Kimball, advisory expert to the commission, who was in charge of the contest, declared the designs submitted set a new high mark for originality of treatment, beauty of design and practicability.

The winning architect will receive an award of \$120,000 for his work, \$12,000 of which will be paid immediately upon signing of the contract. The second winner in the contest will be given a cash award of \$10,000 and the third of \$7,500. The jurors will each receive \$2,000 and expenses for their services.

THAT \$60,000,000 DOOR

Fifteen Years in the Making

(Boston News Bureau)

A hollow sheet metal door with metal trim, hung on hinges like any other door, plain-looking and simply fashioned, has caused a bitter squabble fifteen years long and country-wide, and has cost thus far \$60,000,000. The fight may end—and it may not—on May 21 next.

The court created to settle just such controversies is to make a "final" decision on that date. But the same court rendered a "final" decision two years ago, and the wrangle went on just the same.

It involves the whole building industry. The carpenters "claim" that door, and their union has 300,000 of the 800,000 members in the building trades department of the American Federation of Labor. The sheet metal workers also "claim" the door and their union has only 25,000 members. The national board of jurisdictional awards was created expressly to settle such disputes.

The question at issue is: Whose job is it to hang a metal door? The board two years ago gave it to the little union, whereupon the big union withdrew from the department while staying in the federation. The big union officially instructed its members everywhere to strike against any contractor who assigned sheet metal workers to hang metal doors.

More than that, when the carpenters, for example, quit a job in Cleveland for this reason and no other, they also were ordered off all other jobs in charge of the same contractor not only in Cleveland

but in other cities scattered about the United States; no matter whether the doors on a job in Memphis or Seattle or Baltimore were metal or wood, the carpenters walked out. The owners of a theater in Cleveland were hurt in that way to the extent of \$500,000.

Such confusion might easily result in chaos throughout the industry. To head off threatened anarchy both the American Federation of Labor and the contractors asked the board to open this case again. At the new hearings the carpenters' claims were presented not by the artisans themselves but by manufacturers of metal doors and some contractors. The president of the carpenters' union appeared only as an accredited observer. The president of the sheet metal workers affirmed the intention of his union to abide by any decision the board makes. On that subject the head of the carpenters' union is mute. If the board ratifies its former decision the carpenters will be confronted with an ugly dilemma. Will they quietly submit? Or will they risk upsetting all the building trades?

The money losses inflicted on owners, workers and public by this prolonged struggle foot up to an enormous sum. It has caused numerous strikes and lock-outs. The metal door business now amounts to \$7,000,000 a year, but the makers claim it would be \$70,000,000 were it not that the builders and architects specify wooden instead of metal doors in order to avoid "trouble."

Compared with the total number of workmen in the building trades and the aggregate amount involved in the industry the metal door figures in men and money are trivial. But the stakes really at issue in this altercation are vast.

NEXT DIRECTORS' MEETING SET FOR MAY 12 AT EVANSVILLE

Will Be a Regional Affair

Plans are being made to hold the next meeting of the Board of Directors of the Indiana Society of Architects at Evansville, Ind., Saturday, May 12.

This is in accordance with the policy outlined at the last annual meeting when it was decided to hold bi-monthly meetings, first at Indianapolis and then every other one in some other Indiana city, either by selection or invitation.

NEW WORK CONTINUES TO DEVELOP AS OLDER BUILDING OPERATIONS REACH MATURITY

Things Swinging Along Nicely

Here and there about the city prospective owners continue to contemplate and anticipate prospective building operations spelling for continued construction operations right on through spring and summer in a volume far beyond that to which Evansville has ordinarily been accustomed.

Every week new projects talked about some time back are developing actively, first in the architects' offices and then moving on for the attention of the local contractors. The latter have had very little spare time so far this season as the work appearing for estimates has shown no let up. Then, too, the awarding of contracts has been quite brisk, necessitating immediate attention in order to get the work under way.

It has been a real open season for Evansville building trades mechanics, who have had no trouble whatever in finding employment; in fact, right now the city, if anything, could use more building craftsmen if they were available.

SEEK TO OVERCOME THE HOUSING SHORTAGE

Commission Organized

A building program that would greatly relieve the shortage of houses is to be the main object of the work of a recently appointed housing commission in Evansville. It is planned to secure the formation of a corporation that would build enough houses to take care of the shortage existing. The cost of constructing such a number of houses is estimated by some as high as \$1,000,000.

Appointment of committee chairmen who will have charge of different phases of the work of the housing commission were appointed at a meeting at city hall.

M. S. Sonntag, president of the American Trust and Savings Bank, was named chairman of the committee which will work out a tentative plan. A. L. Holland was named chairman of the publicity committee.

CHIPS AND SHAVINGS.

General contractors Anderson & Veatch have contracted with J. W. Johnson and also Miss Sarah Vickery for the construction of two fine new residences in Lincolnshire, the new restricted residential sub-division.

Geo. L. Miller & Son, general contractors, started this week on the erection of nine new residences in Miller Terrace.

While building has been active in Evansville and the new work has developed with rapidity there has been little or no trouble as regards the ability of the local material supply men to keep up with the contractors in keeping material on hand for their use when needed.

John Wilkins has the contract for the building of a new \$9,000 home for Mrs. Geo. Brose, 1025 S. Second St.

Ed Dubber has put a force to work on the remodeling of a home for Wm. Ben-nighof.

General Contractors C. Kanzler and Son are busy on a various assortment of construction jobs ranging from new residences down to remodeling projects.

Foundations are being put in for the new store for the Handy Furniture Co.

THE FUTURE AS WELL AS THE PRESENT TO BE CARED FOR BY FT. WAYNE.

Move On to Establish Building Lines in Business District.

Not forgetting the future, in the present day rush of improvement, but looking ahead with the idea of providing adequate facilities for handling the business of a Greater Ft. Wayne when the occasion demands city officials, in accordance with prevailing city plan ideas, would establish building lines on East and West Main Street, as far as new building construction is concerned to provide for future widening of the street.

A resolution establishing a building line five feet back on each side of the street from the present line is being prepared.

Petitions asking for such an establishment of building lines are now being circulated by Main Street property owners.

All of which means that Ft. Wayne is wide awake to a greater and greater development, and is not to be caught napping.

ENDORSE BIG SCHOOL BUILDING CONSTRUCTION PROGRAM.

To Spend Practically a Million Dollars on New Structures.

The city council committee of the whole met with the school board members this week in the city council chamber and approved the \$979,500 school building program proposed by the school trustees. Of the amount named it is proposed, according to the program, to expend \$287,000 on the Lakeside school; \$175,000 on the James Smart school; \$287,500 on the Harrison Hill school; \$150,000 on the Adams school; \$50,000 on the Rolling Mill school and \$30,000 on the Franklin school.

OTHER CONSTRUCTION EFFORTS TO MAKE FOR FURTHER BUILDING.

While building construction, because of its unusual volume has had the call in Ft. Wayne's activities for the year there is another form of construction that has done much for the city's welfare. The latter item covers public improvements and gives every indication of going onward with a greater impetus next season. There are overhead crossing matters, new boulevards, paving and sewer extension improvements which, if consummated, will mean a great deal toward continued building activity in 1923.

HANG UP ANOTHER RECORD.

Residential Building Permits for One Day Greatest Ever.

A new record was established in the local building inspector's office last Saturday when permits were issued for 37 new homes in addition to permits for other buildings.

A low bid may mean no profits.

The word minimum on the wage rate really means no set wage rate.

The National Jurisdictional Awards Board meets at Washington next month. All contractors should read the disputes coming before it.

THREE CRAFTS STILL OUT AT INDIANAPOLIS.

Contractors and Men Divided Regarding Working Conditions.

There was no change in the Indianapolis wage scale adjustment situation during the past week from that which prevailed a week ago. Though all the other building trades crafts have reached understandings and signed agreements with the employers, the electricians, plasterers and lathers have failed to reach agreements with the Building Contractors' Association and are continuing their strike.

According to Secretary Pierson the contractors have advanced no wage proposals to the unions that are out. The differences that exist between the men and the bosses hinge on the matter of conditions rather than the wage figures. The unions who are out desire to run in a lot of helpers on jobs when they are not needed, the contractors contend, hence, the break.

There are about 300 union electricians in the city, and their strike has stopped work since April 1 on four or five large office buildings in the downtown district.

Wage increases were made the first of the month in the other building trades, these unions, including the carpenters and bricklayers, went back to work. Contractors say that the effect of the wage increases on building costs have not been determined as yet, but that it is certain that the higher wages will boost the cost of building to a higher level than has prevailed during the last two years. If costs reach a point where there is a general cessation of building and the union men are forced

into idleness the workmen will have only themselves to blame, the contractors say.

SCHOOL AUTHORITIES AT INDIANAPOLIS DECIDE ON EXTENSIVE BUILDING SCHEME.**Eight New Structures Proposed.**

A school building expansion program that will call for an estimated expenditure of \$1,385,000 was approved this week at Indianapolis and active steps are to be taken at once by the Board of School Commissioners to get the work under way.

The program calls for eight structures, providing in all 82 new rooms, as follows:

School No. 38, eight-room addition and remodeling, \$179,865.

School No. 62, ten-room building, \$189,750.

School No. 67, ten-room building, \$208,239.

School No. 79, eight-room building, \$171,500; or possibly twelve-room building \$193,500.

School No. 76, sixteen-room building, \$232,020.

School No. 30, ten-room building, \$130,963.

School No. 23, eight-room addition, \$55,500.

School No. 75, twelve-room building, \$218,245.

When completed the buildings will offer facilities for accommodating 3,444 additional pupils.

SCARCITY OF PLASTERERS MAKES THEIR STRIKE THE MOST SERIOUS.**Means Jam Later On.**

With the plasterers out now there is a possibility that in a few months there will be quite a building jam at Indianapolis, for, there is much plastering work on projects started months ago that should be gotten out of the way now to make room for that which will come later.

Of all the crafts the local building industry can least afford is a lay out by the plasterers. This is the one trade in which there is a great scarcity of mechanics due to the fact that the apprentice restrictive clause enforced by this particular union is very strong and, too, the boss plasterers have made little or no effort to take on new apprentices. Realizing at last the growing dearth of skilled plasterers it was just the past winter that the National Master Plasterers' Association at its annual convention went on record insisting on all members taking on their full quota of apprentices in order to as soon as possible replenish the supply of plasterer craftsmen.

Since there is known to be a scarcity of plasterers, not only in Indianapolis, but in Indiana and the country generally, it is realized that all time lost now is going to make things just that much harder later on to handle the work that will have to be done in order to get this year's building out of the way.

1923 BUILDING PERMITS SMASH ALL RECORDS.

One billion and a quarter dollars worth of building permits, the greatest amount for a similar period in the nation's history, were taken out throughout the country during January, February and March, S. W. Strauss & Co. announced today. All records for March alone were broken, \$420,851,343 worth of work being authorized in 205 cities, a gain of \$161,357,012 or 62 per cent over March of last year.

Thus it can be seen that Indianapolis, by transacting the great volume of building construction work she has to date this year, has more than held her own for her percentage of gain over last year's corresponding period is even greater than the general average of gain.

FRONTAL ATTACK AND SAPPING PLAY HAVOC WITH DEFENSE.

Heavy Odds Thrown Against Calumet Contractors.

One thing is certain; when pressure is brought to bear four ways on "the thin valiant line" of determined contractors, holding out for conditions that would protect the building industry and lend assurance to the possibility of a greater volume of work in the end, continued resistance assumes the aspect of fool-hardiness.

Each spring there is a hue and cry about increased construction costs when Labor steps forth for more wages. Prospective owners utter a wail of lament, financial men threaten to have nothing to do with promoting construction work, architects wring their hands and bemoan the fact that advancing costs will wreck their prospects, and then, the contractor steps in to block the effort to send wage scales soaring, believing that such action on his part is necessary to hold things to even keel.

This check on Labor brings construction operations to a halt with a jolt, crafts walk out and strikes ensue. Suddenly the contractor finds the attack has veered to himself, Labor is pounding all along his front and from the rear he finds contractors outside his association aiding his assailants by capitulating to the advanced wage levy that is being made by Labor. From the rear the contractor feels another thrust, for owners and architects whose work is delayed by the wage battle begin hammering on the defense lines in desperation, seeming to reckon not with the future.

The foregoing sums up the present situation in Hammond. Under a combined attack from Labor, outside contractors, impatient owners and architects many of the contractors on the firing line have been mowed down or forced to give ground with the result that they have been compelled to give in to the advanced wage demands of building laborers. Outside contractors who announced they would not make those wage concessions shut down over night or for a few days and then backed up, flopped, as it were, and did the very thing they said they wouldn't. There are some of our members still fighting as they have their work in such shape that it can't be tied up, and are employing non-union laborers.

Skilled mechanics are more or less justified in having a say about building, but, when ordinary laborers, unskilled, who never cared to devote time to learning, or in mastering a trade, can step

in and hold up the great building industry, rule or ruin it, by contending that they are entitled to \$1.00 per hour, as much as skilled mechanics draw, something is radically wrong, and, because some contractors would fight this wrong they are left to hold "the bag."

SALE RESIDENCES RATHER THAN RENTAL HOMES HURT.

Hammond Suffers As Do Other Cities From Above Condition.

What Hammond needs mostly in the way of building is rental residences. She could use to advantage five hundred plain, substantial, five or six-room, cottages that would rent at a figure that the working man could afford to pay without being cramped.

There are any number of home builders in Hammond, but they all build to sell operations that don't fill the exigency that exists. There is a great shortage of homes to rent and the people in need of places to live all do not have the ready money to make a first payment necessary on a new home purchase.

Many new citizens arriving in Hammond want to get located and size up conditions before they wish to plunge into a home purchasing deal. During the period of thinking things over they must have a place in which to live. As matters stand now they arrive, hunt for a place to rent only to fail and then move on to some city that can offer rental facilities.

Rental homes would afford a better labor supply, increase the population, make business better and generally rebound to the city's benefit.

CALUMET BUILDING PROGRESS.

General contractor F. G. Wall, East Chicago was awarded the contract by W. H. Hutton, for the erection of a three-story flat building, to contain 15 apartments. The estimated cost is \$65,000.

Among our active contractors is J. Wesley Reed, who in addition to the construction of a pretty brick veneer bungalow for Mrs. P. J. Golden on Summer street, is building a store building at Hohman and Hanover streets for W. C. Paxton, the lumber man. The structure will cost approximately \$20,000.

SEEMS TO EXTEND TO THE ENDS OF THE EARTH.

Apprentice Problem More Than Local.

While the building trades employers in Muncie, Indiana, and in fact, all over the United States have been more or less exercised over the apprentice problem, it seems that even beyond our shores means for supplying future skilled

workmen is a subject that is being given careful consideration.

Down in the antipodes, in Australia, to be exact, the government has gone into the apprentice question thoroughly according to the Chicago Journal, which in an issue of recent date said:

"The Australian government has laid the foundation for future supply of good workmen is a subject that is being given system by which the interests of all the parties concerned are taken care of. The pay, care, instruction and amusement of apprentices are prescribed in carefully prepared laws. In certain specific districts, instruction from a state or continuation trade school, approved by the authorities, must be given for not less than five hours a week for not less than three years, and this must be given on the time of the employer. If the apprentice elects to take such course in his own time, allowance must be made for it upon his term of apprenticeship. Apprentices must be allowed all holidays or paid for their services upon such days at the rate allowed for adult workmen. All disputes between apprentices and employers must be settled by the board, which has power to prescribe a punishment in the shape of a fine."

JUST WHY?

Always Seems Something to Beset Building When Prospects Grow Bright.

Why discourage building?

Every effort is being made in other lines of business, according to information filtering in from about the country, to guard against depression and to that end everything is being done to nurse business along by all kinds of encouragement. One thing is certain, if other businesses had behind them at this time the impetus that the building construction industry has the encouragement, effort to carry it forward would be just as great that the golden opportunity might be prolonged indefinitely.

However, when building starts and shows signs of turning in a great volume in the future there are certain influences that get to work to reap a harvest regardless of consequences.

Indications are appearing that considerable of the contemplated building projected earlier in the season will not go ahead on account of the tendency to advance wage scales and material supply prices. There have been wage advances practically all along the line and though material prices have increased there are rumors of still other added advances to come.

Such conditions are having a strong tendency to slow up building operations and though there is so much work already under way that there is no great danger of a period of idleness, nevertheless, there will be a reaction later, if not this season, next year.

But why choke off a business proposition that runs into billions just to satisfy the spirit of greed? Building needs encouragement, it needs the establishment of conditions that inspire confidence, and above all must have an attraction for investment capital. The greatest negative influence to building construction operations are mounting construction costs and yet there are those who seemingly refuse to realize or acknowledge the danger that their actions threaten.

Indiana Architects

Make more sure the awarding of the contracts on your public building projects by placing the legal advertisements for bids in the

INDIANA CONSTRUCTION RECORDER

because,

this paper reaches more building contractors (all kinds,) and material supply men all over the State than any other publication in Indiana.

Entered as second class matter August 29, 1919,
at the Post Office at Indianapolis, Indiana, under
the Act of March 3, 1879.

BUILDING VOLUME IN INDIANA IN MARCH WAS THE GREATEST EVER
PUT ACROSS DURING A SINGLE MONTH.

The March building figures from ten Indiana cities rolled up a total last month that far exceeds any other monthly building performance ever recorded in the State. Close to six and a half million dollars was the highest estimated amount ever turned in for permits granted by the city building inspection departments in Indiana over a month's period, and then March, 1923 stepped in, ran its course and rolled up the large sum of \$9,029,671 as against \$3,788,118 for the corresponding period in 1922.

Every city in the list showed a good business and gained greatly over last year's figures for the same time. South Bend headed the list with a gain of 508.7%, next came Gary with 496.5% with other gains as follows: Elkhart, 225.7%; Hammond, 222.9%; Richmond, 172.6%; Terre Haute, 157%; Ft. Wayne, 152%; Evansville 52.9%, and Indianapolis, 46.6%. Muncie has no available record of last year's business.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL BONDS

NOTICE OF BOND SALE.

Notice is hereby given that at 1:30 o'clock P. M., on Friday, May 18, 1923, at the office of Gary & Bohannon at Rushville, Indiana, Henry W. Beckner, as Trustee of Jackson Township, Rush County, Indiana, will offer for sale to the highest bidder an issue of \$51,000.00 of bonds of Jackson School Township, Rush County, Indiana. Sealed bids will be received up to the hour of sale.

Said bonds shall be 51 in number, dated May 1, 1923, of \$1,000.00 each and bearing interest at the rate of 5% per annum, payable semi-annually, one of which bonds shall be due and payable on August 1, 1924, and two of said bonds shall become due and payable on each February 1st and August 1st thereafter until all of said bonds are paid. The first interest on said bonds shall be payable on August 1, 1924, and every six months thereafter and shall be evidenced by coupons attached to same and said bonds and interest shall be payable at the office of the Peoples National Bank, of Rushville, Indiana. Said bonds have been issued strictly in compliance with the law of the State of Indiana, and pursuant to an order of the Advisory Board of Jackson School Town-

ownership. The plans and specifications may be examined at the office of the Township Trustee and at the office of Architect Karl P. Henkle, 108-110 Heinemann Bldg., Connersville, Indiana. A deposit of \$15.00 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of said architect, which amount will be returned in full in case the same are returned on the day of the letting and a bona fide bid is submitted by the contractor. Should the bidder fail in one requirement only, the sum of Five (\$5.00) Dollars only shall be returned to him, but should he fail in the observance of both conditions, he shall forfeit the whole amount of said deposit. Each bidder shall stamp or write his name on the back of the drawing or cover of the specifications used by him in preparing his proposals. Said contract will be let in four parts as stated above, to the lowest responsible bidder who, upon the award of a contract, shall give a bond to the approval of the Trustee and Advisory Board for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of such bidder failing or neglecting to perform the work awarded him by such Trustee, and to pay for all labor and materials furnished him or any of said contractors in the construction of said work. The bidder shall have the right and privilege in connection with his bid for the general construction of said building, to make a bid for the purchase of the old school building.

Dated this 10th day of April, 1923.

NOTICE TO BIDDERS ON THE UNDERGROUND STEAM DISTRIBUTION SYSTEM KNOWN AS PART 1 OF THE NEW SERVICE PLANT FOR THE INDIANA STATE SOLDIERS HOME

Sealed proposals to the Board of Trustees of the Indiana State Soldiers Home for the furnishing of labor and materials for a new underground steam distribution system, in accordance with the plans and specifications prepared by R. W. Noland, consulting engineer, will be received by the Board of Trustees, c/o Secretary of the Board, Mrs. Caroline B. Morrison, at 422 North Seventh Street, Lafayette, Indiana, up to 10 a. m. on the 10th day of May, 1923, at which time the bids will be opened.

be publicly opened in the Board's room in the Indiana State Soldiers Home. Commandant's residence at the Indiana State Soldiers Home.

Proposal No. 1

This proposal shall include all labor and material for a complete underground steam distribution system as shown on the plans and specified.

Proposal No. 1A, Trenching and Backfilling

This proposal shall include all labor and materials included in the paragraph in the specifications headed Trenching and Backfilling.

The trustees reserve the right to reject any and all bids.

The successful bidders will each be required to execute a contract on a form provided by the Board of Trustees. Each successful contractor will also be required to furnish satisfactory Surety Company's Bond to the amount of the Contract Price to secure the fulfillment of the Contract.

Plans and specifications relating to any of the above work may be consulted daily at the Commandant's Office at the Indiana State Soldiers' Home.

All communications and references to the above proposals or contracts should be addressed to the undersigned:

the undersigned:
BOARD OF TRUSTEES, STATE SOLDIERS'

HOME, c/o Sec. of the Board, Mrs. Caroline B. Morrison, 422 No. 7th St., Lafayette, Indiana. (Each bidder is required to furnish a check for fifteen dollars (\$15.00), made payable to the engineer, upon receipt of the plans and specifications, and to warrant the return of the plans and specifications. This check will be returned to the bidder when the plans and specifications are used for making up the bids are returned to the engineer. The plans and specifications must be turned in with the bid.)

POWER HOUSE EQUIPMENT

NOTICE TO BIDDERS.

Bids will be received by the Board of Trustees of the Indiana State Normal School at 8:00 P. M., May 7, at the Roberts Hotel, Muncie, Ind., for the erection and completion of a power house, tunnel, etc., at the Eastern Division, Indiana State Normal School, Muncie, Indiana. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by a certified check equal to five (5%) per cent of the amount of the bid. Separate bids must be received for the following items: First, for the erection of the power house, estimated cost \$26,500.00; second, for the construction of the pipe tunnel, estimated cost, \$17,500.00; third, for the erection of the chimney, estimated cost, \$6,500.00; fourth, for the main steam supply and return pipes, estimated cost \$14,000.00; fifth, for furnishing and erecting two boilers, estimated cost \$15,000.00. Bids must be made in accordance with provisions of specifications prepared by Kibele & Gerard, Architects, Muncie, Indiana. Copies of plans and specifications may be found at the office of the Dean of the Faculty, Eastern Division, Indiana State Normal School, Muncie, Indiana; at the office of Kibele & Gerard, Architects, 335 The Johnson Building, Muncie, Indiana, and at the office of the Registrar of the Indiana State Normal School, Terre Haute, Indiana.

DIRECTORS' MEETING AT EVANSVILLE OF ESPECIAL INTEREST TO SOUTHERN INDIANA ARCHITECTS.

To Be a Regional Gathering.

Now that arrangements have been made to hold the next regular bimonthly meeting of the Board of Directors of the Indiana Society of Architects at Evansville, Saturday, May 12, the officers announce that this affair will be in the nature of another regional gathering of architects such as was held at Ft. Wayne last fall and again at Terre Haute two months later.

The May meeting, while intended to bring the architects of southern, southwestern and western Indiana together, is also open to all the state architects who wish to attend.

These regional meetings so far have proved most successful in that they have afforded the architects of a given region and also from over the state a chance to become better acquainted, have attracted those of the profession who had never before sat in at an I. S. A. meeting, and offered an open forum for a general discussion of business and professional practices, also problems that it developed were mutual regardless of locations.

It is hoped that many of the state architects will avail themselves of this opportunity to gather in Evansville, but especially it is desired that those of the profession in the announced designated region will make an extra effort to attend the May meeting.

INDIANAPOLIS ARCHITECTS REVIEW WAR MEMORIAL COMPETITION EXHIBITS.

Favorably Impressed With Results Obtained.

The regular monthly meeting of the Indianapolis Architects' Association was made an informal affair, the members gathering at the John Herron Art Institute to view the exhibits submitted in the War Memorial Architectural Competition as a result of which Walker & Weeks, Cleveland, Ohio, were selected to prepare the final plans.

There are twenty-six sets of drawings tastefully displayed about the walls of one of the numerous galleries, well ar-

ranged to permit of a satisfactory inspection of each exhibit.

After their review of the display the Indianapolis architects were loud in their praise of the high architectural average of the many plans submitted and their standard of excellence both in conception and execution.

There seems to be general satisfaction over the final award in the selection of the architects who are to handle the consummation of the monumental War Memorial project and the manner in which the competition was handled is pointed to as an example of the success to be obtained through regulated competition in securing the highest class of design and architects thoroughly competent to handle the work.

INDIANA CHAPTER NAMES DELEGATES TO A. I. A. CONVENTION IN MAY.

To Be Held In Washington, D. C.

Plans have been made whereby the Indiana Chapter, American Institute of Architects will send a delegation to the annual convention of the Institute to be held at Washington, D. C., May 16 to 18.

The Indiana Chapter, according to the constitution and by-laws, is allowed three delegates, to consist of the president and secretary and one other member. As the result of a recent mail vote Robert Frost Daggett, Indianapolis, was named as the third delegate with John W. Gaddis, Vincennes, and Herbert L. Bass, Indianapolis, to act as alternates. President Herbert Foltz and Secretary Fernor S. Cannon, both of Indianapolis, are the other two official delegates.

TO ANNOUNCE ADMINISTRATIVE BUILDING COUNCIL APPOINTMENTS SOON.

Selection of Candidates Up to President Mahurin.

Since provision is made for the representation of the Indiana architectural profession on the Administrative Building Council of Indiana, a body recently established by the passage of a new state building construction law, President Mahurin of the Indiana Society of Architects is now devoting careful thought to that matter.

The law calls for an administrative committee to be composed of the chairman of the State Industrial Board, Secretary of the State Board of Health and the State Fire Marshall, together with twelve appointive members, who shall be known as the advisory committee of the building council.

The advisory committee shall be composed of three engineers, three architects, three contractors and three building mechanics, all of whom are representative of the building industry and engaged in actual practice and construction, submitted from the membership of their respective organizations; Indiana Engineering Society, Indiana Society of Architects, Associated Building Contractors of Indiana and jointly by the Indiana State Building Trades Council and Indiana State Council of Carpenters, all of whom must be approved by the administrative committee and also the Governor of the state.

The task of appointing the architect members to serve on the new body was delegated to President Mahurin by the board of directors and he is now engaged in making his selections which will be announced shortly.

STATE ARCHITECTS SOCIETY TO HAVE REPRESENTATION AT A. I. A. CONVENTION.

Delegates to Be Named At Evansville Meeting.

An invitation has been extended to the Indiana Society of Architects to send delegates to the annual convention of the American Institute of Architects at Washington in May.

Several years ago the A. I. A., at its Nashville, Tenn., convention went on record as favoring the encouragement of state associations of architects in addition to chapter organizations. Since then the institute has opened its annual meetings to the State Architects' Societies, whose members do not belong to the A. I. A. Though the delegates from the state organizations have no voting power, nevertheless they are permitted to participate in the discussions that arise if they so desire.

The delegates to be sent to Washington this year by the I. S. of A. are to be appointed by the directors at their Evansville meeting.

GREAT ACTIVITY RESULTS FROM CONTINUED HEAVY ISSUANCE OF BUILDING PERMITS

Evansville Construction Interests Never Busier

Not only did the building permits in Evansville for March equal five times the total permits of March of any other year, but the contractors are the busiest they have been in years as a result of the great volume of work that has grown from month to month since the first of the year. In February and March a total of \$804,358 in new buildings was recorded here. More than \$1,600,000 has been recorded since the first of the year.

The local Associated Building Contractors' Association is advertising in fourteen of the leading newspapers of the south in an effort to get workmen in the building trades to come to Evansville. Workmen in many lines are receiving premiums to stay on the job, according to George L. Miller, president of the association. At present members of the building trades estimate that more than 250 homes in Evansville are in the process of construction. More than ten buildings in the big building class are under construction.

While crowded some by the force of the reawakened building activity the contractors have the situation well in hand and are putting forth every effort to keep ahead of the flood of work. In this latter connection the material supply dealers are extending hearty co-operation to the contractors and are rushing supplies forward with expediency which is doing much to prevent a jam.

As for the workmen, they, too, are right on the job every moment and are doing their bit nobly. There is, however, a scarcity of bricklayers, carpenters, plasterers and painters. The bricklayer and plasterer shortage is not uncommon to Evansville alone, for reports from all over the country reveal a like situation in practically all cities.

CHIPS AND SHAVINGS

At the new half million dollar Benjamin Bosse high school the brick walls have been completed on the east section to the second floor and a new force of

bricklayers has been added for the west section. Forms are being placed for the second floor concrete slab on the eastern section of the building. Steel girders to support the auditorium balcony are being set. Some of the ventilating fans are being lowered into the basement.

General Contractors Scarborough-Davies Co. are roofing the new addition for the Farmers Dairy Co. at Main and Michigan streets. The same firm of builders is ready to start the brick walls for the Franklin garage on West Franklin street.

Brick continues to hold its own in the construction of attractive and better class homes. More new homes are being built of brick this year than has been the case so early in the season for many years, according to John Andres, secretary-treasurer of the Standard Brick Co.

Work on a five-room bungalow for William Andres at 1523 West Ohio street was begun last week by Matt Hallenberger, general contractor.

NOT FORT WAYNE'S PROBLEM ALONE

Situation All Can Well Think Over

Most any citizen in any city of any size is aware of what may be termed the plague of filling stations that is sweeping the country. Desirable corner sites everywhere are being gobbled up by the gasoline men regardless of surrounding property and about the only check put upon them is in cities where city planning is in effect.

Fort Wayne would seek to check this mad scramble and her action gave rise to the following editorial in the Journal-Gazette, an article full of good logic:

Filling Stations—Where?

An effort is under way to procure a city ordinance for Fort Wayne setting prohibitions against the indiscriminate location of gasoline filling stations. It is purposed to deny these enterprises locations near churches and school buildings. There is reason in the objection raised to the placing of filling stations near

churches. There is perhaps better reason for the protest against having them near school houses. There is superior objection to having too many of them anywhere.

Motor traffic requires gasoline and the business of purveying requires places where it can be dispensed. There is reason that these places should be situated in such places and with such frequency as will serve all essential public convenience. But there can be an overdoing of the filling station business. It begins to look as though that was already beginning to be the case in this as well as in many other cities. Of course, it will be argued that to limit filling stations would be to set metes and bounds to competition. That would not be a wise public policy if that view were strictly accurate. And it is not strictly accurate. Competition is mainly a rivalry of flare; not a contest of prices.

There seems to be something in the present rivalry for gasoline stations that is analogous to the old rivalry of liquor interests in the days that are dead and gone. The result then was too many saloons—so many, indeed, that they just naturally crowded themselves out altogether. A saloon set up in a new location was the almost invariable sign that there would be another across the street if not alongside. You see something of the working out of that idea in the multiplication of filling stations. Of course, it is possible to get too many of them—meaning by that more than are needed.

INCREASED BUILDING SHOWS ITS EFFECT IN CEMENT FIGURES

Heavy Demand Put Upon That Commodity

In view of the record building figures being turned in all over the country, an item to which Fort Wayne has generously contributed, the demand that has been put upon the cement manufacturing industry is interestingly shown by the following, though the enormous production can not be said to be due to building construction alone, for highway improvement and bridge work has had quite an influence.

Production of Portland cement during March was unusually heavy for this season of the year. Mills of the country produced nearly 9,900,000 barrels, almost 2,000,000 barrels more than in February and nearly 50 per cent more than in March, 1922. Production for the quarter ending March 31 was considerably more than 25,000,000 barrels as compared with an average of slightly over 17,000,000 for that quarter during the five-year period, 1919-1923.

PLANS ON FILE.

None this week.

WAIVER OF LIEN.

None filed with Marion County Recorder this week.

CORRELATED BUSINESSES AC-COUNT FOR UNUSUAL ACTIVITY.

Both Building and Realty Circles Show Much Life.

Building construction and real estate activities, more or less kin, are maintaining their relationships and stepping along at a lively pace at Indianapolis.

Without exaggerated stimulation, which might endanger sound real estate investments, an active real estate market prevails in Indianapolis, while a tabulation of the building permits issued by the city building commissioner from April 14th to April 20th, inclusive, shows a total valuation of improvements for the six days of \$665,951. The permits issued numbered 424, most of them for new homes and spring repairs to houses. The strong demand for business locations continues about the same as it has since the first signs of spring.

An unusually large number of real estate transfers were recorded during the week, further reflecting sound business conditions in the city. Up to Friday night 336 real estate transfers had been recorded. Many were for a nominal consideration, as permitted under the law, thereby making it impossible to estimate the aggregate value of property which changed title during the week.

An interesting comparison of business development last spring in this city and that of this year is gained from totals, though unofficial, showing the building permits issued from January 1 to April 13. In 1922 for that period the total valuation of improvements for which permits were granted was \$4,575,858.06. For the same number of days this year it was \$8,863,849.71, almost double that of a year ago.

ASSOCIATION WORK DRAWS NEW INTEREST FROM NORTHERN INDIANA CONTRACTORS.

Are Turning Out Strong At Meetings.

Contractors in building circles in northern Indiana are showing more than unusual interest in organized effort this spring. At Hammond, Gary, South Bend and Michigan City the meetings are being well attended and new members are being taken right along.

An interesting feature has developed in the latter city where inquiries are being received from surrounding town contractors to learn if they will be permitted to take out membership in the A. B. C.'s of Michigan City. No decision has been reached as yet, the matter having been taken under advisement.

The Michigan City association held a meeting April 16, at which there was a 95% membership attendance. "Jack" Owens of the State A. B. C.'s was present and in addition to congratulating the local men on the successful way they handled the state convention in January, spoke on the legislative activities of the A. B. C.'s of Indiana and current building conditions about the state.

SOUTH BEND CONTRACTORS PROPOSE PROGRESSIVE IDEAS.

Will Endeavor to Put Real Function Into Local Builders' Exchange.

Interesting news comes from South Bend where the members of the Builders' Exchange and their guests, in all 144, representing the city's building interests, gathered at the new Hotel La Salle, Tuesday evening, April 24 to enjoy the organization's annual banquet.

It was officially announced that the Exchange is soon to launch somewhat of a departure from the usual routine of association life; a scheme that when fully explained was enthusiastically received.

The plan consists of the establishment of an employment bureau in connection with the exchange, whereby both the employer needing help and the employee out of work will be taken care of. Another feature pertains to the institution of a credit bureau for the collection of bad accounts. It is also planned to arrange for an estimating room and for the filing of plans at the Exchange when open competition in bidding is desired.

The Exchange also has gone on record as favoring hearty co-operation with the architects of the city in all matters pertaining to the building industry when such co-operation is desired.

The meeting was presided over by Pres. Walter Fassnacht and talks were made by the new secretary of the Exchange, E. H. Hyman, and Field Representative of the Associated Building Contractors of Indiana, J. H. Owens, Indianapolis. Music was furnished by the Big Five Orchestra of Notre Dame.

BUILDING PERMITS.

Week of April 19th to 26th.
(\$5,000 and Over)

J. Wesley Reed President
E. E. Cole Secretary108 Citizens National Bank Bldg.,
Hammond, Indiana**VISITORS MADE FOR A PLEASANT
AND INSTRUCTIVE EVENING****Calumet Contractors Entertain**

While there was only routine business, and little of that, to require the attention of the members of the B. T. E's A., more than ordinary attention attached to the regular monthly meeting of the association Tuesday, April 17, due to the fact that there were quite a few out-of-town visitors present, among them being Frank L. Dykema, Grand Rapids, Mich., secretary of the Associated Building Contractors of Michigan; J. H. Owens, Indianapolis, field representative of the A. B. C.'s of Indiana; O. C. Holtz, Chicago, general manager of the Builders & Manufacturers Mutual Casualty Co.; Harry Meyers, also of the same firm, and several others from Chicago who are interested in the building industry.

The evening's program was turned over to the visitors who regaled the Calumet contractors with accounts of what the builders in Michigan, Indiana and Illinois are doing in an effort to encourage building conditions that will stabilize the industry and lend impetus to building construction operations. It was interesting to have this information brought to the Calumet contractors by men who are in direct touch with the situations that are ruling in the outside territories and to learn that that which the local builder is up against is much the same the country over.

Following the talks, lunch was served, cigars were passed around and sociability held sway till the hour grew late to mark finis to a most enjoyable gathering.

**THE ONE AND ONLY WAY TO
CHECK DEFIANCE****How Association Bridged a Threatening Breach**

Gary contractors who recently organized a new association have proved they have the right conception of the purpose in view, and by lining up solidly were able to hold their own when the gauntlet was thrown down to them.

The hod carriers and building laborers came out with a wage ultimatum demanding \$1 and \$1.10 per hour. The new association members bucked, called a halt on all building work and shut things down tight. As a final result, the recalcitrant tradesmen withdrew from the building district council and made an agreement with the employers on a compromise basis of 97½ cents per hour for hod carriers and 87½ cents for laborers.

It is to be hoped that the Gary con-

tractors will not overlook the victory won through association means, but will continue to stand by the guns ever preparing for the next assault that labor difficulties may hurl against them.

This most recent settlement is surely a real accomplishment for an organization that is but thirty days old. Hats off to Gary!

NEVER SO MUCH ACTIVITY BEFORE**Calumet Building Booming**

Surprise was in store for a party of Calumet building men who in company with the secretary and Mr. Owens made a survey of the district the other day. The trip revealed an enormous amount of building construction operations under way. It was known that things were moving along at a brisk pace, but seeing is believing and a true conception of the building situation was only possible through such a trip as was indulged in. One and all on the journey were convinced that at this time there is more building activity in the Calumet district than ever before.

CALUMET BUILDING PROGRESS

The contract to move the Central school building from Hohman street to Russell street and place it on a new foundation was awarded to J. Wesley Reed at a figure close to \$60,000.

General Contractors Rhoades and Graves have begun work on the erection of a \$20,000 flat building on Indiana avenue for Mr. Greiger. The structure will be of brick, two stories, 26x52.

ANXIOUS TO KNOW**Would Prevent a Recurrence**

Why is it a fellow can weather a mean, dreary, wet, chilling winter, and then, when the first warm days of spring set in finds himself all encumbered with a cold? Address all answers to the secretary as he is anxious to file them away for use as a preventative next year about this time.

**NOT UNLIKE THE EXPERIENCE OF
OTHERS****Contractors Themselves Erect Their Own
Barriers**

Organization among contractors in Muncie, a great deal as is similar in other cities, finds its crux in the matter of dues, that on which many organizations have been crucified. Nor is such

an assertion personal as to Muncie, rather is she used as an abstract example. Her contractors are no different from the rest the country over. They can be split up into four classes: the men who believe in and know what organization will mean to the whole and who are willing to back every move both actively and financially; those who will ride along actively but neglect the financial support; those who will go just so far but wilt under stress, forget the ideals for which they were contending and run for cover; lastly comes the contractor who figures he can go it alone, holds aloof from the association move, shows no interest, plays both ends against the middle and follows the lines of least resistance. However, the latter is only too glad to take advantage of the situation when propitious conditions are effected by the organized contractors. This is the fellow who profits at the expense of the other fellow.

Such is the experience of organization amongst contractors. Here are men who are faced with the great power of organized building trades labor, a power frequently brought to bear upon them, and great in its strength because the mechanic realizes the force of unity and supports it through thick and thin both morally and financially without question.

The Muncie Association suffered from the influences brought about by the different ways of thinking of her contractors, but the organization adherents have not lost hope, they still have faith in theory and are seeking to rebuild, that in time unity of purpose and principle may be effected among the local contractors.

**HOW FRAME HOUSE BUILDING MA-
TERIALS ABSORB EACH DOLLAR****Interesting Figures Advanced by De-
partment of Commerce**

Through investigations, the housing division of the Department of Commerce has learned that each dollar spent for materials used in a six-room frame house goes as follows:

Lumber, 45 cents; brick, 4.2 cents; cement, 3.5 cents; sand, 2.4 cents; lime, 2.2 cents; glass, 2.3 cents; lath, 2.6 cents; plumbing, 10.3 cents; heating equipment, 8.4 cents; electric equipment, 3.6 cents; roofing, 5.6 cents; finished hardware, 2.5 cents; paint and varnish, 4 cents; miscellaneous, 3.4 cents.

In a house, built with some degree of legitimate costs and which is sold at \$5,000, it has been estimated that the expense for materials is \$1,500. In such a house, figured on the Department of Commerce report, the dollars would go as follows:

Lumber, \$675; brick, \$63; cement, \$52.50; sand, \$36; lime, \$33; glass, \$34.50; lath, \$39; plumbing, \$154.50; heating equipment, \$126; electric equipment, \$54; roofing, \$84; finishing hardware, \$37.50; paint and varnish, \$60; miscellaneous, \$51.

WAVE OF PROSPERITY GAINING IN VOLUME

Promises to Sweep Entire Country

E. E. COLE, Secy.,
Building Trades Employers' Assn.,
Calumet District.

It is cheering to us of the Calumet District as well as to those in other parts of the country to feel that the country today is facing one of the brightest futures in its history. Such a conclusion is arrived at by a perusal of the reports that come in from the East, West, North and South showing a generally increasing industrial output and growing activity in most every line of business.

High prices, stoppage of building growth, strikes, and the evils of misgovernment, added to the uncertainties and waste of war, led the nation right to the brink of a crisis. The pendulum then began to swing back and now seems to be gaining momentum to carry things back to a new zenith of prosperity.

Building operations are increasing everywhere and relief will come. However building shortage is telling and its effect will be felt for some little time. The inconvenience and hardship it imposed through increased rents and poor accommodations is still in evidence. This applied not only to housing but to industrial construction the lapse of which, for a time impeded factory and office expansion also cut down employment opportunities and production volume.

The basic industries such as the production of coal, steel, copper, petroleum, lumber and food stuffs are thriving at a remarkable rate, and yet they have not reached the stage that meets the nations requirements. There is a demand for more than the farms and factories are producing. That demand arises from the shortage superinduced by the war period, a shortage never

quite made up, and from the needs of an ever increasing population.

The growth of the United States and the prosperity of its people constitutes a market which far excels the entire remainder of the world so far as American producers are concerned. If they can meet the needs of the United States they need not worry over Europe's demands, although, in normal times the continental countries serve as a nice balance wheel in that they will absorb the surplus of the United States markets.

The only cloud on the horizon has to do with the radical element. If the people will be conservative and not let their desires run away with their reason, and not demand wages that will cripple or prohibit production, there is no question but that we should have several years of great prosperity. The prosperity of the Nation is in the hands of the producer and it is up to him as to what the conditions will be.

INDIANAPOLIS MATERIAL FIRM TOO MUCH FOR LAFAYETTE ARCHITECTS AT BOWLING.

Interesting Inter-City Matches Rolled by Building Interests.

The old days of aloofness have gone, the days when men of certain businesses went along each in their own way passing up the broader vision, good fellowship and better understandings that were to be obtained by intermingling. The old order has given way to a new one, a plane where men meet as man to man cast aside business cares, forget competition and together seek recreation that later makes for better work.

The realm of sport has made a common meeting ground and is fast being developed by varied business interests for recreational purposes for their men. Bowling has offered great opportunities in that direction and serves to relieve the long tedium of winter. Nor has the building construction fraternity neglected the chance. At Indianapolis the architects, contractors and material supply men have their own bowling organization known as the Builders' League, that has wiped away the old barriers of prejudice that formerly existed between the varied interests and brought into effect a real spirit of co-operation.

And now the new order has extended out into the state. Teams representing Hugh J. Baker & Co., Indianapolis, and Architects Nicol, Scholer and Hoffman, Lafayette, have just completed an inter-city match of six games, three played

at Indianapolis and three at Lafayette. Though the Bakers won handily, nevertheless, the rivalry was intense, the sport keen, and "the breaks of the game" had much to do with the ultimate triumph.

The games were rolled at Lafayette April 21 and at Indianapolis, April 28. The Bakers took two of the three games at Lafayette with a total pinnage margin of 112, and repeated at Indianapolis with two more games and a pinnage margin of 243.

High single game, team score, Bakers, 1010. High individual single game, Creswell (N. S. & H.), 244. High individual score, 3 games, Creswell, 640, Brafford (H. J. B.), 637. High total scores, six games, Creswell, 1,234; Brafford, 1,100; Retseck (H. J. B.), 1,063; Church (N. S. & H.), 961; Rich (H. J. B.), 955; Fatout (H. J. B.), 934; Shearer (H. J. B.), 905; Scholer (N. S. & H.), 890; Hoffman (N. S. & H.), 816; Maltby (N. S. & H.), 699.

Creswell (N. S. & H.) had 5 double century games; Brafford (H. J. B.), had 3; Retseck (H. J. B.), had 2, and Rich (H. J. B.) had 1.

Summary of the series:

At Lafayette—April 21.

Teams	Scores
Hugh J. Baker & Co.	668-802-870
Total pins	2,340
Nicol, Scholer & Hoffman	657-836-735
Total pins	2,228
Baker's margin	112

At Indianapolis—April 28

Teams	Scores
Hugh J. Baker & Co.	799-808-1,010
Total pins	2,617
Nicol, Scholer & Hoffman	789-813-772
Total pins	2,374

NEW FIRM OPENS OFFICE.

To Go After Terrazzo Business.

A new terrazzo and tile firm has entered the Indiana field under the name of the Indiana Terrazzo Co., with offices at 1019-20 Lemcke Bldg, and started off with a couple of good sized contracts, among them being the Indianapolis Athletic Club and the Physicians and Dentists Building.

Those interested in the new concern are A. M. Vandiver, for a number of years connected with Indianapolis architectural and contracting circles, and D. M. Santarossa, of years of terrazzo experience both in Europe and this country, of late years operating in Evansville, Terre Haute and Indianapolis.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL BONDS

NOTICE OF BOND SALE.

Notice is hereby given that at 1:30 o'clock P. M., on Friday, May 18, 1923, at the office of Gary & Bohannon at Rushville, Indiana, Henry W. Beckner, as Trustee of Jackson Township, Rush County, Indiana, will offer for sale to the highest bidder an issue of \$51,000.00 of bonds of Jackson School Township, Rush County, Indiana. Sealed bids will be received up to the hour of sale.

Said bonds shall be 51 in number, dated May 1,

1923, of \$1,000.00 each and bearing interest at the rate of 5% per annum, payable semi-annually, one of which bonds shall be due and payable on August 1, 1924, and two of said bonds shall become due and payable on each February 1st and August 1st thereafter until all of said bonds are paid. The first interest on said bonds shall be payable on August 1, 1924, and every six months thereafter and shall be evidenced by coupons attached to same and said bonds and interest shall be payable at the office of the Peoples National Bank, of Rushville, Indiana. Said bonds have been issued strictly in compliance with the law of the State of Indiana, and pursuant to an order of the Advisory Board of Jackson School Township, Rush County, Indiana, and duly entered of record on January 29, 1923, authorizing said bonds to be issued for the purpose of providing bonds for the construction of a school house in said township.

Said bonds will be sold according to law to the highest and best bidder for not less than par and face value; the right is reserved to reject any and all bids.

HENRY W. BECKNER, Trustee,
Jackson Township School, Rush County,
Indiana, R. R. 3, Rushville, Indiana.

April 28-May 5-May 12.

SCHOOL HOUSE

NOTICE TO CONTRACTORS.

Notice is hereby given that on Friday, May 11th, 1923, sealed bids will be received at the office of the Township Trustee of Wabash Township, in the town of Mecca, Parke County, Indiana, up to the hour of 10:30 o'clock a. m., of said day, for the erection, construction and completion of an addition to the school building in Mecca, Indiana. Separate bids will be received as follows:

One bid on the general construction of said addition.

One bid on heating and ventilation.

One bid on plumbing.

All to be erected and constructed in strict accordance with the plans and specifications now on file in the office of said Trustee.

A bidder may bid on one or more of the above items separately or by a lump bid. All bids should be made on forms as approved and recommended by the State Board of Accounts, and each bid shall be properly filled out and signed by the bidder or bidders and acknowledged before a notary public. Each and every bid must be sealed and plainly addressed to the undersigned Trustee of Wabash Township, Parke County, Indiana, and shall have notation on the envelope as to the nature of the bid, whether for general construction, for heating and ventilation, for plumbing, or for all. Each bid must be accompanied with a certified check for three per cent. (3 per cent.) of his bid, made payable to the Trustee of Wabash Township, Parke County, Indiana, and to be held by him as liquidated damages in case the successful bidder fails to enter into a contract and furnish bond to the approval of said trustee. The successful contractors will be required to furnish approved surety bonds equal to the contract price, conditioned for the faithful performance and execution of same, and the payment of all bills, including all labor and materials and other expenditures had by the contractor in connection with said work. Each bidder must in all things comply with the requirements of the law of In-

Ornamental and Miscellaneous Iron

SCHOOL HOUSE. NOTICE TO CONTRACTORS

Notice is hereby given, that on the 19th day of May, 1923, at the Hebron School House on Lincoln Avenue, in Knight Township, Vanderburgh County, Indiana, the undersigned trustee of Knight school township, Vanderburgh County, Indiana, in conjunction with the Advisory Board of said township, will receive sealed bids, furnishing all labor and material for the construction of a one-story and basement brick school building in said Knight Township, known as "Lodge School," in accordance with the plans and specifications now on file in the office of said trustee, R. R. 4, Newburg, Indiana, and in the office of Alfred E. Neucks, architect, 515 Peoples Bank Building, Evansville, Indiana. Said bids will be received up to two o'clock P. M., of said 19th day of May, 1923.

The estimated cost of said construction is \$22,000.00.

Said trustee, in conjunction with said Advisory Board, will examine said bids and award the contract for said construction to the lowest and best bidder therefor; and the successful bidder will be required to enter into a written contract with said school trustee for the furnishing of all labor and materials for the construction of said school house in accordance with said plans and specifications, and to give bond, with surety to be approved by said school trustee, for the faithful performance of said contract.

Each bidder will be required to submit a certified check in an amount equal to three per cent of bid submitted, said check to be forfeited to the township trustee in the event that the successful bidder refuses or fails to enter into a proper contract with proper surety.

The school trustee and Advisory Board hereby reserve the right to reject any and all bids.

FRED MANN,
Trustee of Knight School Township,
Vanderburgh County, Ind.

ARTHUR C. STONE,
Attorney for Trustee.
April 28, May 5, May 12th, 1923.

SCHOOL BONDS. NOTICE OF BOND SALE.

Notice is hereby given by the undersigned as Trustee of Ripley School Township of Rush County, Indiana, that at the hour of 3:00 o'clock P. M., on Saturday, May 26, 1923, at the office of said Trustee in the Town of Carthage, Indiana, he will offer for sale to the highest bidder an issue of \$78,000.00 of bonds of Ripley School Township, Rush County, Indiana. Sealed bids will be received up to the hour of sale.

71 of said bonds shall be in denomination of \$1,000.00 each. 14 of said bonds shall be in the denomination of \$500.00 each. Said bonds shall bear interest at the rate of 5% per annum payable semi-annually and shall be dated May 15, 1923. Two of the \$1,000.00 bonds and one \$500.00 bond shall be due and payable on August 1, 1924, and each six months thereafter a like number and denomination of bonds shall be due and payable until February 1, 1931, at which time three of the \$1,000.00 bonds shall be due and payable and each six months thereafter a like number and denomination of bonds shall be due and payable until August 1, 1931, inclusive and on February 1, 1938, three of said \$1,000.00 bonds and one \$500.00 bonds shall be due and payable.

The first interest on said bonds shall be payable on August 1, 1924, and each six months thereafter until all are paid. Said interest shall be evidenced by coupons attached to said bonds bearing the fac simile signature of the trustee and said bonds shall bear the signature of the Trustee and Advisory Board. Said bonds have been ordered by the Advisory Board of said township and are issued for the purpose of providing funds for the construction of a school house and

remodeling of another school house in Carthage, Indiana. Sealed bids will be received and the highest bidder shall be awarded said bonds provided said bid is not less than par and accrued interest. The right is reserved to reject any and all bids.

THOMAS J. PASSWATER,
Trustee of Ripley School Township,
Rush County, Indiana.

May 5-12-19: 1923.

SCHOOL HOUSE NOTICE TO CONTRACTORS.

Notice is hereby given by Thomas J. Passwater, as Trustee of Ripley School Township of Rush County, Indiana:

That at the hour of 10:00 o'clock, A. M., on Saturday the 26th day of May, 1923, at the office of said Trustee in the town of Carthage, Rush County, Indiana, he will receive sealed proposals for the construction of a school building in said town of Carthage and also for the remodeling of the present school building in said town. At the same time and place bids will also be received for the installation of

- Heating and ventilating system
- Plumbing and sewerage system
- Electric wiring

All in accordance with the plans and specifications heretofore adopted and approved by said Trustee and Advisory Board of said township, which plans and specifications are on file in the office of said Trustee and of the State Board of Accounts and of John Parrish, Castle Hall, Indianapolis, Ind., the architect. The estimated costs of the proposed building and remodeling of the present building is \$78,000.00. All bids must be in writing on forms prescribed by the State Board of Accounts and bids on the general contract shall be accompanied by a certified check for \$500.00, payable to said Trustee as a guarantee of good faith in submitting said bid. Each bid for the heating and ventilating contract shall be accompanied by a certified check for \$300.00. Each bid for the plumbing and sewerage disposal shall be accompanied by a certified check for \$200.00. Each bid for the electric wiring shall be accompanied by a certified check for \$200.00. The checks of the unsuccessful bidder will be returned when the contract is awarded and entered into by the successful bidder, but should the successful bidder fail to enter into a contract and execute such bond he shall forfeit such certified check as liquidated damages for the use and benefit of said township.

Plans and specifications may be examined at the office of the Township Trustee in Carthage, Indiana, and at the office of John Parrish, architect, at Castle Hall, Indianapolis, Indiana.

The Trustee reserves the right to reject any or all bids.

Dated at Carthage, Indiana, this 2nd day of May, 1923.

THOMAS J. PASSWATER,
Trustee Ripley School Township,
Rush County, Ind.

May 5-12-19: 1923.

RAISING ROADS AND BRIDGES NOTICE TO BIDDERS

Sealed bids for all operations involved in raising ten steel bridges on the Tippecanoe River and its tributaries near Monticello, Indiana, including enlarging of masonry abutments and piers, making earth fills and gravel surfacing approaches, will be received at the Commissioners' Room in the Court House in the City of Monticello, Indiana, until 11 o'clock a. m., May 15th.

Plans and specifications may be seen at the County Engineers Office, Monticello, Indiana, and copies may be obtained from Paul Ward, County Engineer, or from Roger M. Freeman, Cons. Engineer, 8 West 40th Street, New York City, on receipt of certified check for \$15.00 which will be returned when contracts are awarded. Estimated total cost of work \$55,000.

May 5, 1923.

CHURCH NOTICE TO BIDDERS.

Bids will be received for the erection of the Flora M. E. Church until 10 o'clock A. M., May 15, 1923. Plans and specifications are on file at the residence of the Pastor, Rev. R. W. Knight, Flora, Indiana, and at the office of Carl J. Horn, Architect, Logansport, Indiana. Copies of the plans can be arranged for with the Pastor. Each general contractor shall file with his bid a certified check payable to G. E. Voorhees, Chairman of the Building Committee, of not less than five (5%) per cent of the amount of his bid, which check will be forfeited to the Building Committee if the contract is awarded and the contractor fails to enter into contract according to his bid within ten (10) days from May 10,

1923. The old church is to be torn down and the new building is to be completed on or before the first day of January, 1924. The general contractor will be required to give a surety bond equal to the full amount of his contract. Separate bids will be received for the Heating, and for the Plumbing.

May 5, 1923.

NOTICE TO BIDDERS ON THE UNDERGROUND STEAM DISTRIBUTION SYSTEM KNOWN AS PART 1 OF THE NEW SERVICE PLANT FOR THE INDIANA STATE SOLDIERS HOME.

Please note the following instructions governing the filing of proposals and the awarding of contracts:

Sealed proposals to the Board of Trustees of the Indiana State Soldiers Home for the furnishing of labor and materials for a new underground steam distribution system, in accordance with the plans and specifications prepared by R. W. Noland, consulting engineer, will be received by the Board of Trustees, c/o Secretary of the Board, Mrs. Caroline B. Morrison, at 422 North Seventh Street, Lafayette, Indiana, up to 10 a. m. on the 10th day of May, 1923, at which time the bids will be publicly opened in the Board's room in the Commandant's residence at the Indiana State Soldiers Home.

One main proposal and one sub-proposal shall be made and if both proposals are accepted, two separate and distinct contracts for the work will be executed. The proposals shall be as follows:

Proposal No. 1

This proposal shall include all labor and material for a complete underground steam distribution system as shown on the plans and specified.

Proposal No. 1A, Trenching and Backfilling

This proposal shall include all labor and materials included in the paragraph in the specifications headed Trenching and Backfilling.

The trustees reserve the right to reject any and all bids.

A Bidder's Bond is to accompany each and every bid.

The successful bidders will each be required to execute a contract on a form provided by the Board of Trustees. Each successful contractor will also be required to furnish satisfactory Surety Company's Bond to the amount of the Contract Price to secure the fulfillment of the Contract.

Plans and specifications relating to any of the above work may be consulted daily at the Commandant's Office at the Indiana State Soldiers' Home.

All communications and references to the above proposals or contracts should be addressed to the undersigned:

BOARD OF TRUSTEES, STATE SOLDIERS'

HOME, c/o Sec. of the Board, Mrs. Caroline B. Morrison, 422 No. 7th St., Lafayette, Indiana. (Each bidder is required to furnish a check for fifteen dollars (\$15.00), made payable to the engineer, upon receipt of the plans and specifications, to guarantee the return of the plans and specifications. This check will be returned to the bidder when the plans and specifications used for making up the bids are returned to the engineer. The plans and specifications must be turned in with the bid.)

April 21-28; May 5, 1923.

POWER HOUSE EQUIPMENT NOTICE TO BIDDERS.

Bids will be received by the Board of Trustees of the Indiana State Normal School at 8:00 P. M., May 7, at the Roberts Hotel, Muncie, Ind., for the erection and completion of a power house, tunnel, etc., at the Eastern Division, Indiana State Normal School, Muncie, Indiana. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by a certified check equal to five (5%) per cent of the amount of the bid. Separate bids must be received for the following items: First, for the erection of the power house, estimated cost \$26,500.00; second, for the construction of the pipe tunnel, estimated cost, \$17,500.00; third, for the erection of the chimney, estimated cost, \$6,500.00; fourth, for the main steam supply and return pipes, estimated cost \$14,000.00; fifth, for furnishing and erecting two boilers, estimated cost \$15,000.00. Bids must be made in accordance with provisions of specifications prepared by Kibele & Gerard, Architects, Muncie, Indiana. Copies of plans and specifications may be found at the office of the Dean of the Faculty, Eastern Division, Indiana State Normal School, Muncie, Indiana; at the office of Kibele & Gerard, Architects, 335 The Johnson Building, Muncie, Indiana, and at the office of the Registrar of the Indiana State Normal School, Terre Haute, Indiana.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,

Helen C. Benbridge, Secretary.

TO ELIMINATE LONG BUSINESS DISCUSSIONS FROM CON- VENTION PROGRAM.

A. I. A. Sessions to Be Made Most Attractive.

The plan for the program of the A. I. A. convention at Washington, D. C., May 16, 17, 18, has been shaped with the one idea of condensing as far as possible the purely business sessions of the convention so that the rest of the time can be left for developing an atmosphere more architectural in character than that which ordinarily pervades the convention room when old and long discussed subjects have the floor.

It has been figured out that the delegates who undertake to be present at the A. I. A. convention sessions at considerable expense of time, money and energy are entitled to something more broadly inspiring and recreational than an attendance upon meetings devoted more or less continuously to discussions of ethical or business implication, important as they may be.

So far as the sessions of the convention are concerned, it has been decided that the morning sessions are to be devoted to administrative business. The rest of the time is to be set apart for various exhibitions, special meetings, illustrated addresses and other features of a semi-social character.

ON TO EVANSVILLE.

Indiana Architects to Meet There Next Saturday.

Indiana architects! Don't forget that the regular bi-monthly meeting of the Board of Directors of the I. S. of A. is to be held at Evansville, Saturday, May 12.

In addition to the business session of the directors there will also be a regional meeting held in conjunction with this event, to which all Indiana architects are invited. Especially are the members of the profession located in southern and southwestern Indiana urged to attend.

An interesting program is being arranged and it has been proposed that a boat trip on the Ohio River be included in the entertainment features. The regional meetings that have been held have proved beneficial and most enjoy-

able, and have done much to create a greater fellowship in the ranks of the architectural profession in Indiana. They are well worth the effort put forth in their behalf.

TRIBUTE TO GENIUS.

A. I. A. Medal Presentation Pageant to Be An Elaborate Event.

One of the most interesting features of the approaching A. I. A. convention will be a pageant arranged for the presentation of the Institute Gold Medal to Architect Henry Bacon, who is to become the possessor of this distinguished emblem as a tribute for his design of the Lincoln Memorial.

The general scheme of the Pageant as proposed provides for an imposing procession composed of the Officers and Members of the Chapters present at the Convention, together with representatives of the groups composing the Fine Arts, and the Craft and Building organizations that participated in the work of executing the building. It is anticipated that the participants in the procession, marshalled under groups, will assemble at the conclusion of the Convention dinner, to be held in a great pavilion or marquee at the East end of the Lagoon, and proceed in columns on each side toward the Memorial to positions assigned on the approaches and steps. Each Chapter has been asked to provide a special banner and pennon, significant of the State from which they come and embodying such traditions as may be effectively symbolized. To add to the note of color furnished by the banners suitable robes of design and color to differentiate the various groups of participants will be provided by the Pageant Committee. Slow burning torches to be used as decorative illumination during the progress of the processions on each side of the Lagoon will contribute a fantastic note by their reflection in the water. Coincidentally with the movement of the processional groups from the point of departure the recipient of the medal attended by the high officials of the Institute will be embarked upon a barge of honor which will be decorated in a manner reminiscent of barges used on historic State occasions abroad. This barge which will also car-

ry the musicians will be propelled by oars or towed by properly designated individuals in the processional groups to the west end of the Lagoon where the guest of honor and officials will disembark, the music remaining on board. From this point the entire procession will proceed to the designated stations on the steps leading to the Memorial preceded by Mr. Bacon and the group of high officials. The presentation ceremony and addresses will then follow. The arrangements for a dramatic electric illumination of the spectacle are already under way and it is anticipated that a high note of beauty will be struck, to be ineffaceably impressed upon the memory of the occasion.

Official Washington will be represented at the ceremony, and it is unquestionably true that the setting offered by the location of the Memorial, which faces the Lagoon and the Washington Monument, and the far stretch of the Mall on one side, with the Potomac River and the wooded hills of Arlington on the other, is one nobly designed to lend an impressive architectural aspect to the event, which is planned to take place on the evening of May 18th.

I. S. A. WORK ENHANCES WASH- INGTON VISIT.

Knowledge of Architecture Added In- terest to Trip.

Architecture, and her intimate touch with the profession for several years, according to Miss India J. Wilson, secretary to Secretary Merritt Harrison of the Indiana Society of Architects, who has just returned from Washington, D. C., made her visit to the Nation's Capital all the more enjoyable.

Miss Wilson, who is director of the Girl Scouts of the Indianapolis District, attended the national convention of Girl Scout officers at Washington. While greatly impressed by the many interesting features, she says it was the architecture that appealed most to her and was a revelation. She enthusiastically referred to the majesty of the government buildings, the sublime grandeur of the Lincoln Memorial and the stately simplicity and captivating beauty of Mount Vernon with its wonderful view of the Potomac.

Office, 411 Sycamore St.

APRIL ESTABLISHED GREATEST MONTHLY BUILDING RECORD IN EVANSVILLE'S HISTORY.

Permits Amounting to Nearly One Million Dollars Issued.

The steady pressure behind Evansville building construction operations that has been increasing month after month ever since the first of the year to roll up building figures approaching local record levels finally in April sent them soaring over the top for the highest point ever recorded in one month in the history of the city building inspection department.

There were 270 permits granted for a total of \$968,875. This far exceeded the business of April, 1922, when 255 permits involving \$230,889, were granted. The estimated valuations for the past month this year show a gain of 319.6% over the same item for the corresponding period a year ago, and a 210.4% increase over the April, 1921 valuations when 116 permits were issued. The business for the month just past gained 57 in the number of permits issued and \$615,410 in the matter of estimated valuations over the building business of March, this year.

Some idea of the great wave of residential construction work that is sweeping over the city may be gained when attention is called to the fact that 92 permits were granted in April for new residences at an estimated valuation of \$260,850.

ALL HAIL THE WEATHERMAN.

He Gets In a Few Good Licks for Building.

The excellent weather conditions of recent date have been a great aid to contractors all over the city. Great progress has been made on every job according to the builders.

Many jobs which had been delayed by poor weather conditions have caught up with their schedules and are moving along rapidly, according to the local builders.

CHIPS AND SHAVINGS.

John Nellis, general contractor, was awarded the work of remodeling the

Mead-Johnson building consisting of interior alterations for office purposes.

The heavy demand upon the material supply market together with delayed shipments of late is having an effect on building operations, tending to slow them up. C. Kanzler & Son, have had some experience along the above line while erecting the Max De Jong residence, non-arrival of stone causing some delay.

General Contractor Henry W. Carl has completed the \$33,000 Harwood School.

Evansville contractors and material men were interested the past week in two new bank buildings on which bids were received. One was to be built at Poseyville and the other at Petersburg.

ALMOST TWO MILLION FOR BUILDING IN FT. WAYNE IN APRIL.

183 New Homes Started.

With a building estimate of \$1,925,125 during the month of April, Fort Wayne is promised one of the greatest building years in its history. The fact that 1923 is beginning the building season with great promise is indicated that in spite of the fact that 1922 was considered a bumper year the April estimate was only \$582,335. This month's estimate exceeds that of March, when the figures were placed at \$1,409,125.

During the month a total of 373 permits were issued, of which number 183 were for new homes. According to the records of the building inspector this is the largest number of permits for homes ever before issued in the city during one month. Two large permits were issued just before the month's record was closed. The one permit was for \$525,000, for the new Masonic temple and two others amounted to \$125,000, for a new apartment house.

HANDMAIDENS OF PROSPERITY.

Both Tripping Along in Sprightly Fashion in Ft. Wayne.

Hand-in-hand Ft. Wayne business and building are swinging along at a steady

cheering gait. Building construction prospects continue bright and promising with residential work showing no diminution. At the same time business is good as is shown by the weekly bank clearings that show a decided increase over those of the corresponding periods of the previous year. Just last week the clearings exceeded \$2,000,000, being \$461,959.83 ahead of the same week in 1922.

FOOLPROOF SERVICE SWITCH BOXES ORDERED AT ONCE.

Ft. Wayne Electrical Inspection Department Receives Word From State Fire Marshall.

City Electrical Inspector Wm. Shondell has received an order from the State Fire Marshal's office, effective May 1st, stating that the service entrance switches must not only be externally operated of the safety enclosed type, but must also provide means for sealing the enclosure containing the main switch and fuses.

An explanation for the order states: "Accumulated evidence has proven that one of the most frequent causes of fires is the substitution of high melting point metals such as steel, brass, etc., in place of blown fuses. This is done by persons who are entirely uninformed regarding the properties of electric current and the function of the fuse, which is to prevent sustained overloads. This overloaded condition of the circuits may be temporary, due to accident, or permanent, due to accident, or the addition of appliances until a point is reached far beyond the capacity of the circuits as originally installed. Result, heat and fire.

"Such practices contribute largely to the annual toll of fire losses attributed to electrical installations, the third largest item in the causes of fires reported each year and the one that in 1922 was responsible for \$618,849 of loss in Indiana alone.

"The remedy lies in requiring that service entrances shall be so installed that the main cutout fuses shall be accessible only to persons who are thoroughly familiar with the dangers of overloading."

It is the opinion of Mr. Shondell that the new order is an excellent and pertinent one from a safety standpoint. He further says that he has had numerous cases where the main fuses were blown out and where someone placed a penny, bits of tinfoil or other material in place of the fuse. The city inspector said that he would use every effort to force the compliance with the order.

General Contractors meet second Friday each month.

WAIVER OF LIEN.

Laban C. Johnson & Co., Inc., as contractor and D. S. Menasco as owner of part of lots 308, 309, Osgood's Forest Park 5th sec. add. to erect a dwelling house for \$10,000.00.

Laban C. Johnson & Co., Inc., as Contractor and D. S. Menasco as owner of part of lot 308, 309, Osgood's Forest Park sec. 5 add., to erect a dwelling house for \$10,000.00.

TWO MORE BUILDING CRAFTS SIGN UP AND CALL OFF STRIKE.

Plasterers Still Out.

May Day came dawning in upon Indianapolis bright and fair and when the sun had set it left behind it a cheerier glow to flicker in building construction circles than had been apparent for the past four weeks.

April had been torn by wage scale dissensions between the building trades employers and the various craftsmen. As the weeks slipped away differences of opinion were adjusted one by one until by the end of the month all but three of the crafts had fallen into line and signed up both on scale and working agreement matters. The three crafts who held out were the plasterers, lathers and electricians.

Negotiations were continued and early the past week the lathers signed up at \$1.02½ per hour. Diligent and untiring efforts by the electrical contractors, members of the Building Contractors' Association, finally reached an understanding with the Electrician's Union and on May 1 came to an agreement resulting in an end to the wage controversy. The electricians have signed up on the following basis, to November 30, \$1.10 per hour, and from December 1st to March 31, 1924, \$1.12½.

The latest developments have greatly

cleared up the local building construction situation, leaving the plasterers as the only craft out on a strike. Except for work that was started in the winter and early spring and has reached the plastering stage the present strike will have no immediate effect on local building construction. However, unless the differences with the plasterers are adjusted before long building activity will suffer, for there is a vast volume of work piling up daily that must be taken care of and gotten out of the way if a building jam later is to be prevented.

SOME ARE WONDERING.

Suggest That Eastern Danger Signal Be Heeded.

Just how long will Indianapolis and Indiana building weather the tide of rising construction costs? That is the question that has come to many who are interested in building construction in this territory.

There has been a record volume of building construction operations in Indiana this spring, far beyond that of any other previous year, and to date little diminution to the impetus behind this volume has been noticed because of cost.

However, there are keen observers of building conditions who sense a danger from pyramiding prices and fear that things may get top heavy and cause the whole building structure to topple. These men have taken their cue from the apparent handwriting on the wall as it has loomed in the East where, in New York, heavy increased costs of building material supplies and advanced wages have deterred further extensive building operations.

If a halt is called on the great activity that is now prevalent in Indiana building circles the men who have demanded high wages and those who tilt material prices will have no one to blame but themselves, they will have no alibi, for the Public has proved its desire and willingness to build if encouraged by reason.

START WORK ON ANOTHER LARGE DOWN TOWN OFFICE BUILDING AT ONCE.

Bank to Build.

Another big building project announcement the past week for a fine banking and office structure in the heart of the city's business district was sprung on Indianapolis citizens to impress upon them the constant healthy growth of the city.

The news came suddenly and concerns the intent of the Continental National Bank to erect a new \$750,000 home. The building will be located on Meridian street just south of Monu-

ment Circle, will be 9 stories high, 60x125 and is to contain handsome banking quarters on the ground floor with shops and office suites above.

Plans for the structure have been prepared, the contract has been let and the work of clearing the site will be begun at once.

BUILDING PERMITS (\$5,000 and Over)

Week of April 26th to May 3d.

Residences (2) \$13,000 total. 625 and 627 East 59th. Owner, Adolph Schmidt, 137 No. Penn. Contract let to Pike Bros., 4031 Park Ave.

DECIDED STAND TAKEN.

Majority of Calumet Contractors Line
Up in Opposition to Big Wage
Increase Demanded by
Laborers.

May Day came once more with all its beauty but not without its trials and tribulations. Arrayed in battle formation, at least lined up to contest the wage proposition were the hod-carriers and building laborers in the Calumet District. Every indication seemed to foretell for the contractors that the man who fought and ran away would have to fight again some other day. Things had gotten down to a basis where a reasonable settlement was compulsory if building construction was to proceed. Hence, the contractors after several meetings and considerable missionary work passed a resolution to notify the Laborers' Union that beginning with May 1st the wage scale for hod-carriers and building laborers would be 87½¢ per hour.

Further, at a meeting of contractors on April 24, an agreement was reached and signed by the contractors present that they would stick to the agreed scale. A committee was then appointed to call on all contractors not in attendance at the meeting in an effort to swing them into line for a definite stand one way or another.

A check-up on April 28 showed that contractors employing over 85% of building labor in the Calumet District had given the decision to stand by the proposed scale. As a result the Laborers' Union was notified by special delivery of the contractors' final decision.

If the employers will but maintain a stiff back and a solid front they should not fear the outcome as they are only contending for reason in holding for a figure that building investment can stand.

There is one promising feature to the current situation, there are contractors now lined up with those of the B. T. E. A. in the present contention whom it was impossible to interest heretofore. Instead of holding aloof this year and allowing the other fellow to do all the scrapping, then to come forward to reap any benefits that might accrue, these men have stepped in to do their bit. They will have a chance to show their mettle and will greatly strengthen the men who for years have been carrying the burden that the building industry might prosper.

KNOW A GOOD THING WHEN THEY SEE IT.

Gary Neighbors Take a Flyer in Hammond Real Estate.

Gary investors without losing faith in their own bailiwick are, nevertheless, beginning to realize the future possibilities of Hammond and are purchasing considerable real estate in our section. Homer Lee, Gary, last week closed a deal whereby he acquired possession of 123 lots in West Hammond. He contemplates erecting a number of bungalows this summer on the newly acquired site.

CALUMET BUILDING PROGRESS.

The contract for the construction of an apartment building, to accommodate 12 families, was awarded recently to Graves & Rhoades. The structure, to be erected on Indiana Ave., will be two stories, 27x120, and is estimated to cost \$35,000.

The Roth Garage contract was given to Ahlborn & Bates at \$25,000.

Plans are being prepared by Architect Mac Turner for a 1 sty. store building, cost \$16,000, to be built in Whiting by Wm. Vater.

Five thousand dollars are to be spent for the remodeling of the old Chamber of Commerce rooms, which are to be occupied by the Northern States Life Insurance Co. Archt. Mac Turner is preparing plans.

Archt. Turner has finished the plans for the Griffith School on which bids are now being asked.

ORGANIZATION EFFORT IN INDIANA THIS SPRING BENT ON BUILDING ENCOURAGEMENT.

Wages Increased As Means of Husbanding Local Labor Supplies.

It is gratifying to know that the various city contractors' associations affiliated with the State A. B. C.'s are sticking to their knitting and are holding firmly to their resolve to do their best to lend encouragement to building operations by seeking to keep the situation in hand.

The reports that have been coming in indicate that the building trades employers realized that unusual conditions were prevailing and have dealt fairly with the mechanics in granting increases in wages owing to the heavy demand for skilled mechanics. This is in line with the action taken in other states and simply guarantees to Indiana a quota of building trades craftsmen to

care for the work, a quota that would have been scattered to other sections to leave the state denuded of workmen had wage allowances on an increased scale not been granted.

Except in a few instances no strong arm methods were employed by Labor, instead, when it came to final settlements both employers and employees agreed to compromises that bear every evidence of affording satisfaction to both sides.

Muncie, like many other small cities, stood firm for reason in the wage adjustment and did not skyrocket the scales, but the contractors did grant increases to protect themselves in order to keep the workmen at home that local building activities might not suffer through a dearth of building trades mechanics.

THE COUNTRY OVER.

Building Situation and Conditions Laboring Under Rising Material Prices and Wages.

The money value of building construction in 1922 was the largest recorded in the building industry of the country, it is claimed by those who have kept track of the business. The value of new contracts awarded since January 1st of this year has been larger than during the same time in either of the two preceding years, and predictions are freely being made that this year the volume of building, on a valuation basis, will exceed even the high record of 1922.

Whether or not these expectations will be realized depend on building costs. They are already high and the price of building materials and wages is rising. Under these conditions there is always the possibility that as the result of high costs those who are using their own funds will prefer to delay building and that construction dependent upon borrowed money will be hampered by the unwillingness of lenders to accept current levels as a proper basis for long time loans with the consequent restriction of such loans to so low a percentage of construction costs as will make it difficult for owners to finance their undertakings.

Superficially, the conclusion might be drawn that a famine of building materials and supplies is imminent, but such a conclusion omits the price factor. Buildings represent a long time investment and over and over again it has been demonstrated that no industry is more susceptible than is the construction to the effects of price advance. Since last March the upward climb of building material prices has been rapid. The building labor situation is similar to that of building materials. There is a shortage of labor, both skilled and unskilled. This is the combined results of the competition in the industry. The shortage of skilled labor, combined with effective organization, has made for monopoly wages. As building costs mount, they will reach a point at which home builders of small means can not meet them. Already there are reports of cancellations of loans for this purpose because the amounts arranged for have proved insufficient to meet rising costs.—(Monthly Bulletin of Associated Builders of Chicago.)

SCHOOL BONDS

NOTICE OF BOND SALE.

Notice is hereby given that at 1:30 o'clock P. M., on Friday, May 18, 1923, at the office of Gary & Bohannon at Rushville, Indiana, Henry W. Beckner, as Trustee of Jackson Township, Rush County, Indiana, will offer for sale to the highest bidder an issue of \$51,000.00 of bonds of Jackson School Township, Rush County, Indiana. Sealed bids will be received up to the hour of sale.

Said bonds shall be 51 in number, dated May 1, 1923, of \$1,000.00 each and bearing interest at the rate of 5% per annum, payable semi-annually, one of which bonds shall be due and payable on August 1, 1924, and two of said bonds shall become due and payable on each February 1st and August 1st thereafter until all of said bonds are paid. The first interest on said bonds shall be payable on August 1, 1924, and every six months thereafter and shall be evidenced by coupons attached to same and said bonds and interest shall be payable at the office of the Peoples National Bank, of Rushville, Indiana. Said bonds have been issued strictly in compliance with the law of the State of Indiana, and pursuant to an order of the Advisory Board of Jackson School Township, Rush County, Indiana, and duly entered of record on January 29, 1923, authorizing said bonds to be issued for the purpose of providing bonds for the construction of a school house in said township.

Said bonds will be sold according to law to the highest and best bidder for not less than par and face value; the right is reserved to reject any and all bids.

HENRY W. BECKNER, Trustee,
Jackson Township School, Rush County,
Indiana, R. R. 8, Rushville, Indiana.

April 28-May 5-May 12.

SCHOOL HOUSE.

NOTICE TO CONTRACTORS

Notice is hereby given, that on the 19th day of May, 1923, at the Hebron School House on Lincoln Avenue, in Knight Township, Vanderburgh County, Indiana, the undersigned trustee of Knight school township, Vanderburgh County, Indiana, in conjunction with the Advisory Board of said township, will receive sealed bids, furnishing all labor and material for the construction of a one-story and basement brick school building in said Knight Township, known as "Lodge School," in accordance with the plans and specifications now on file in the office of said trustee, R. R. 4, Newburg, Indiana, and in the office of Alfred E. Neucks, architect, 515 Peoples Bank Building, Evansville, Indiana. Said bids will be received up to two o'clock P. M., of said 19th day of May, 1923.

The estimated cost of said construction is \$22,000.00.

Said trustee, in conjunction with said Advisory Board, will examine said bids and award the contract for said construction to the lowest and best bidder therefor; and the successful bidder will be required to enter into a written contract with said school trustee for the furnishing of all labor and materials for the construction of said school house in accordance with said plans and specifications, and to give bond, with surety to be approved by said school trustee, for the faithful performance of said contract.

Each bidder will be required to submit a certified check in an amount equal to three per cent of bid submitted, said check to be forfeited to the

township trustee in the event that the successful bidder refuses or fails to enter into a proper contract with proper surety.

The school trustee and Advisory Board hereby reserve the right to reject any and all bids.

FRED MANN,

Trustee of Knight School Township,
Vanderburgh County, Ind.

ARTHUR C. STONE,
Attorney for Trustee.
April 28, May 5, May 12th, 1923.

SCHOOL BONDS.

NOTICE OF BOND SALE.

Notice is hereby given by the undersigned as Trustee of Ripley School Township of Rush County, Indiana, that at the hour of 3:00 o'clock P. M., on Saturday, May 26, 1923, at the office of said Trustee in the Town of Carthage, Indiana, he will offer for sale to the highest bidder an issue of \$78,000.00 of bonds of Ripley School Township, Rush County, Indiana. Sealed bids will be received up to the hour of sale.

71 of said bonds shall be in denomination of \$1,000.00 each. 14 of said bonds shall be in the denomination of \$500.00 each. Said bonds shall bear interest at the rate of 5% per annum payable semi-annually and shall be dated May 15, 1923. Two of the \$1,000.00 bonds and one \$500.00 bond shall be due and payable on August 1, 1924, and each six months thereafter a like number and denomination of bonds shall be due and payable until February 1, 1931, at which time three of the \$1,000.00 bonds shall be due and payable and each six months thereafter a like number and denomination of bonds shall be due and payable until August 1, 1931, inclusive and on February 1, 1933, three of said \$1,000.00 bonds and one \$500.00 bonds shall be due and payable.

The first interest on said bonds shall be payable on August 1, 1924, and each six months thereafter until all are paid. Said interest shall be evidenced by coupons attached to said bonds bearing the fac simile signature of the trustee and said bonds shall bear the signature of the Trustee and Advisory Board. Said bonds have been ordered by the Advisory Board of said township and are issued for the purpose of providing funds for the construction of a school house and remodeling of another school house in Carthage, Indiana. Seal bids will be received and the highest bidder shall be awarded said bonds provided said bid is not less than par and accrued interest. The right is reserved to reject any and all bids.

THOMAS J. PASSWATER,
Trustee of Ripley School Township,
Rush County, Indiana.

May 5-12-19: 1923.

SCHOOL HOUSE

NOTICE TO CONTRACTORS.

Notice is hereby given by Thomas J. Passwater, as Trustee of Ripley School Township of Rush County, Indiana:

That at the hour of 10:00 o'clock, A. M., on Saturday the 26th day of May, 1923, at the office of said Trustee in the town of Carthage, Rush County, Indiana, he will receive sealed proposals for the construction of a school building in said town of Carthage and also for the remodeling of the present school building in said town. At the same time and place bids will also be received for the installation of

- (a) Heating and ventilating system
- (b) Plumbing and sewerage system
- (c) Electric wiring

All in accordance with the plans and specifications heretofore adopted and approved by said Trustee and Advisory Board of said township, which plans and specifications are on file in the office of said Trustee and of the State Board of Accounts and of John Parrish, Castle Hall, Indianapolis, Ind., the architect. The estimated costs of the proposed building and remodeling of the present building is \$78,000.00. All bids must be in writing on forms prescribed by the State Board of Accounts and bids on the general contract shall be accompanied by a certified check for \$500.00, payable to said Trustee as a guarantee of good faith in submitting said bid. Each bid for the heating and ventilating contract shall be accompanied by a certified check for \$300.00.

Each bid for the plumbing and sewerage disposal shall be accompanied by a certified check for \$200.00. Each bid for the electric wiring shall be accompanied by a certified check for \$200.00. The checks of the unsuccessful bidder will be returned when the contract is awarded and entered into by the successful bidder, but should the successful bidder fail to enter into a contract and execute such bond he shall forfeit such certified check as liquidated damages for the use and benefit of said township.

Plans and specifications may be examined at the office of the Township Trustee in Carthage, Indiana, and at the office of John Parrish, architect, at Castle Hall, Indianapolis, Indiana.

The Trustee reserves the right to reject any or all bids.

Dated at Carthage, Indiana, this 2nd day of May, 1923.

THOMAS J. PASSWATER,
Trustee Ripley School Township,
Rush County, Ind.

May 5-12-19: 1923.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the School Board in the Courthouse, Liberty, Indiana, until 2 o'clock p. m., Monday, June 11, 1923, by the Board of School Trustees of the Consolidated School District of the School Town of Liberty and Center School Township, Union County, Indiana, for the construction of a new High School Building and for the alterations to the Liberty Grade School Building all in accordance with plans and specifications for same prepared by Wilson B. Parker, Architect, 620 State Life Building, Indianapolis, Indiana, now on file at this office and at the office of the School Board at Liberty, Indiana.

Separate bids will also be received at this time for the heating and ventilating, plumbing and electric wiring and fixtures for the new High School, Grade School remodeling, plumbing and heating of the grade school and the demolishing of the present High School Building.

The estimates on the cost are approximately as follows: General contract, including remodeling of Grade Building and tearing down old High School, \$74,000; heat and plumbing of High School, \$17,000; heat and plumbing of grade School, \$4,000; electric wiring, High School, \$1,000.

All proposals to be in accordance with Form 10 of the State Board of Public Accounts and none will be considered unless complying with such forms. Proposals shall be enclosed in an envelope with name of bidder and class of work named in the proposal placed on the outside thereof.

Each bidder must submit with his proposal a certified check from a reliable bank or trust company in a sum equal to the amount of 3% of each proposal, made payable to Dr. Franklin T. Dubois, president of the Board. In case any bidder whose bid shall be accepted shall not within five days after notice of acceptance enter into a written contract with the Board to perform the bid and secure the contract by a Surety Company Bond in the form and to the approval of the Board, his check and its proceeds shall be and remain the property of the Board as liquidated damages for such failure, and the bidder shall not be liable for anything beyond the proceeds of the check for such failure. The School Trustees reserve the right to reject any or all bids received for this work.

Plans and specifications may be obtained on application to Wilson B. Parker, Architect, 620 State Life Building, Indianapolis, Indiana, if accompanied by a check for \$10, which will be returned on receipt of the plans and specifications in good order.

(Signed)

FRANKLIN T. DUBOIS, President,
PHILIP B. NYE, Secretary,
HOWARD W. HIGGINS, Treasurer,

School Trustees of the Consolidated School District of Liberty School Town and Center School Township, Union County, Indiana.

May 12-19-26, 1923.

NOTICE OF ISSUE AND SALE OF SCHOOL BONDS

Notice is hereby given, by the School Trustees of the Consolidated School District of Liberty School Town and Center School Township, of Union County, in the State of Indiana, that the School Trustees of the Consolidated School District of Liberty School Town and Center School Township, in Union County, in the State of Indiana, will create and incur an indebtedness of the said Liberty School Town, amounting in the aggregate to Thirty-eight Thousand Two Hundred and Forty Dollars (\$38,240.00), by issuing the bonds of said Liberty School Town to and in the aggregate amount of Thirty-eight Thousand Two Hundred Forty Dollars (\$38,240.00). Such bonds shall be in denominations of One Thousand Dollars (\$1,000.00) each, except one bond which matures January 1, 1925, which shall be of the denomination of Two Hundred Forty Dollars (\$240.00) and shall bear interest at the rate of four and three-quarter (4¾) per cent per annum; and such interest will be payable semi-annually on the first day of January and the first day of July each year; and the said indebtedness so to be created and the said bonds so to be issued, shall become due and payable as follows:

Bonds numbered one (1), two (2) and three (3) payable on January 1, 1925; and bonds numbered four (4) and five (5) payable on January 1, 1926; and two of said bonds as numbered, consecutively, shall be due and payable on the 1st day of January, thereafter, until said bonds are paid in full; all of said bonds being in like amounts, except, however, bond numbered one (1), the first of such issue, which will be due and payable on the 1st day of January, 1925, and is in the sum of Two Hundred Forty Dollars (\$240.00); all of said bonds shall bear date of the 1st day of July, 1923.

Notice is hereby further given that the School Trustees of the Consolidated School District of Liberty School Town and Center School Township, in Union County, State of Indiana, will create and incur indebtedness of the said Center School Township, amounting in the aggregate to Fifty-seven Thousand Seven Hundred Sixty Dollars (\$57,760.00) by issuing the bonds of said Center School Township to and in the aggregate amount of Fifty-seven Thousand Seven Hundred Sixty Dollars (\$57,760.00). Such bonds shall be in denominations of One Thousand Dollars (\$1,000.) each and shall bear interest at the rate of four and three-quarter (4¾) per cent per annum and such interest will be payable semi-annually on the 1st day of January and the 1st day of July of each year and the said indebtedness so to be created and the said bonds so to be issued shall become due and payable as follows:

Bonds numbered one (1), two (2), three (3) and four (4) payable on January 1, 1925; bonds numbered five (5), six (6) and seven (7) payable on January 1, 1926; and three of said bonds as numbered consecutively, shall be due and payable on the 1st day of January, thereafter, until said bonds are paid in full; all of said bonds being in like amounts, except, however, bond number one (1), the first of such issue, which will be due and payable on January 1, 1925, is in the sum of Seven Hundred Sixty Dollars (\$760.00); all of said bonds shall bear date of July 1, 1923.

All of said bonds shall be payable at the Citizens Bank, of Liberty, Indiana, and all interest shall be evidenced by coupons, in the proper amounts and maturities, attached to and made a part of said bonds and all of said bonds being issued under the provisions of the laws of the State of Indiana governing the borrowing of moneys and issuing bonds therefor by Consolidated School Districts and being issued for the purpose of providing funds to pay for the construction and erection of a new High School Building and for alterations to the Liberty Grade School Building with all equipment and for the purpose of providing means to purchase for school purposes all necessary heating and plumbing therefor.

Said bonds will be offered for sale at the office of Philip B. Nye, Secretary of said Board of School Trustees, in the Courthouse, in the town of Liberty, Indiana, at the hour of 11 o'clock a. m. on Monday the 11th day of June, 1923. All bids made for all of such bonds must be sealed and filed with said Board on or before the hour above stated, on said 11th day of June, 1923; said bonds will be sold to the highest and best

bidder and for not less than the par value and accrued interest to date of transfer. The expense of printing said bonds shall be borne by said board. The right is reserved to reject any and all bids.

Dated this the 8th day of May, 1923.

FRANKLIN T. DUBOIS, President,
PHILIP B. NYE, Secretary,
HOWARD W. HIGGINS, Treasurer,

Board of School Trustees of the Consolidated School District of Liberty School Town and Center School Township; Union County, Indiana.

May 12-19-26, 1923.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned trustee of Jackson Township, Washington County, Indiana, will receive bids at his office in said township, until 2 o'clock p. m., on Saturday, June 2, 1923, for the erection and construction of a one-story and basement, frame, shingle roof, three-room school house in the Town of Martinsburg, Indiana, in accordance with the plans and specifications now on file in the office of said trustee, the estimated cost of which is \$11,000.00. All bids must be accompanied by certified check of bidder for a sum equal to three per cent of the amount bid to insure execution of contract. Said trustee hereby reserves the right to refuse any or all bids.

LAFAYETTE BROCK,
Trustee of Jackson Township, Washington County, Indiana.
May 12, 1923.

COUNTY HOSPITAL NOTICE TO CONTRACTORS

Notice is hereby given that the Board of Trustees of the Morgan County Memorial Hospital, Martinsville, Ind., will receive sealed proposals for the improvement of a certain hospital in said county as set out in the plans and specifications now on file at the office of the auditor of said county, by and under the laws of the State of Indiana. Said sealed proposals will be opened and the contract awarded for said improvement on the second day of July, 1923.

Bids or proposals will be received up to 2 o'clock p. m. on said date.

Bids are to be submitted as follows:

First—For the construction of the building (general contract).

Second—For the installation complete of heating and ventilating system.

Third—For the installation complete of plumbing, gas and sewer work.

Fourth—For the installation complete of elevator.

Fifth—Or for any combination of the above.

Said hospital to be improved is located in Washington Township in Morgan County, Indiana, and is to be known as the Morgan County Memorial Hospital when so improved.

Bids will be for the completion of the said improvement in accordance with the plans and specifications in the office of the auditor of said County, and shall include all labor and material for said work. In no case will extra compensation be allowed for any additional work alleged to have been done by the contractor or contractors to whom is awarded the contract.

Each bid shall be accompanied by a personal or surety bond in a sum equal to the amount of the bid filed for the work bid on, to be approved by the Board of Hospital Trustees of said County. Said bonds shall be conditioned for the faithful performance of the work; the sureties, if personal, shall be resident freeholders of the State of Indiana, one of whom shall be a resident of Morgan County.

Said bond shall be for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of any such bidder failing or neglecting to enter into contract or neglecting to enter into contract to perform such work awarded by the Board of Hospital Trustees, or to carry out the same in any particular or to pay for any labor or material which may have been furnished to any such Contractor or Contractors or to any subcontractor, agent or superintendent under him, in the construction of said work.

Said improvement will be let as a whole to the lowest responsible bidder upon affidavit of noncollusion, which must be submitted with the bids and upon failure to submit such affidavit such proposal or bid will be rejected by the Board; and the Board reserves the right to reject any and all bids. Time for completion of

said work will be agreed upon after the letting of said contract by said Board of Hospital Trustees and successful bidder.

Given by the order of the Board of Hospital Trustees, Morgan County, Indiana.
May 12-19-26, 1923.

SCHOOL HOUSE NOTICE TO CONTRACTORS.

State of Indiana, County of Wayne, ss:
Office of the Trustee of Wayne School Township, Wayne County, Indiana, Richmond, Indiana.
Notice is hereby given that Wayne School Township, of Wayne County, Indiana, by the Advisory Board and Trustee thereof, will receive sealed bids at the office of said Trustee, Courthouse, City of Richmond, Wayne County, Indiana, until 2 o'clock p. m., of Saturday, May 26, 1923, at which time and place the same will be opened, read and considered for reconstruction of school building and addition to heating, plumbing and electric wiring system, all in improvement of present building, situated in District No. 6 of said School Township, and all for the uses of the said School Township, at the above numbered school district and on premises now occupied; and all by and according to the plans and specifications as provided therefor, and as further approved by the State Board of Accounts of Indiana and the State Board of Health of Indiana.

The plans and specifications are on file for the inspection of bidders, and all persons concerned, at the office of the School Township Trustee, in said Township at Courthouse, City of Richmond, Indiana, and at the office also of Charles E. Werking & Son, architects, Palladium Building, said City of Richmond, and copies thereof are available to bidders for their own use upon deposit with architects of \$10 to guarantee return of same on or before the opening of bids. Bidders must familiarize themselves with such plans and specifications before bidding, as no departure from same will be considered.

Bidders in submission of bids may submit the same as follows:

(1) For the construction of additions to building (general contract.)

(2) For the installation of additions to heating system.

(3) For the installation and additions to plumbing system.

(4) For the installation of additions to electric wiring system.

Bidders at the same time in the same bid may submit bids for any two or more of the above divisions, but in so doing must indicate the amounts at which the respective divisions are bid, and in this way bidder is only required to submit his bid for such portion or portions of the total improvement as he may desire.

All bids shall be accompanied by the certified check of the bidder in sum equal to at least five percentum of his gross bid or bids, conditioned upon his entering into his written contract with approved surety if he is the successful bidder, according to his proposal. The surety offered with the contract to be of approved Surety Company authorized to transact its business in the State of Indiana.

All bids and proposals shall be upon the forms prescribed by the State Board of Accounts of Indiana, and unless bids are upon such forms, accompanied by certified checks as above, no consideration will be given proposal.

The successful bidder will be required to enter into his written contract and to deliver his bond as above stated with and to Wayne School Township, of Wayne County, Indiana, in sum equal to the amount of contract and as usually conditioned for faithful compliance.

The bidder will be required to complete his work without delay and under the supervision of superintendent appointed by School Township.

Immediately following the receipt of bids, if accepted, the School Township will conclude its proper steps for provision of funds through the sale of bonds with which to make payment for contract and execution of contract will abide approval of bond issue.

The estimated cost of said proposed additions, heating system, plumbing system and electric wiring system is in the total sum of Thirty-four Thousand Dollars.

The Board and Trustee specifically reserve the right to reject any and all bids submitted, without giving additional reason therefor.

EVANSVILLE PREPARED FOR THE ENTERTAINING OF STATE ARCHITECTS.

I. S. A. Regional Meeting There Saturday.

Extensive preparations have been made by the Evansville architects for the holding of the bi-monthly meeting of the Board of Directors of the Indiana Society of Architects in that city, Saturday, May 12th. In addition to the regular routine business session, plans were made to make the affair a regional gathering for the members of the architectural profession of southern and western Indiana, particularly while an invitation was extended to all Indiana architects to be present. Acceptances have been received from many of the architects and a good sized crowd was expected, practically every section of the state to be represented.

Quite a few of the architects met at Indianapolis and joined a party from that city who left for Evansville at 11:50 p. m. Friday.

An effort was made to secure the drawings submitted in the War Memorial competition as a special exhibition feature for the Evansville meeting, but since it was impossible to secure the originals, photographic prints were made and put on exhibit.

The program for the day as planned was to be as follows:

- 10 a. m.—Director's meeting.
- Noon—Luncheon for visiting architects and their hosts at the Chamber of Commerce.
- 1:30 p. m.—Sight-seeing tour of the city to conclude with a ride on the Ohio River to the new Henderson Dam and return to the city.
- 6:30 p. m.—Dinner at Hotel McCurdy, to be followed by a good fellowship meeting.

For the evening meeting an attractive program was arranged consisting of short remarks by prominent citizens and the visiting architects.

DEATH TAKES ONE OF INDIANAPOLIS' EARLY ARCHITECTS.

Sam Hastings Passes On.

Another one of the older generation of Indiana architects has answered the last call.

Samuel Hastings, for many years a practicing architect at Indianapolis, who had been in poor health for some time, died last week.

He had been connected with some branch of construction work all his life, his father having been a railroad contractor. As a young man, Mr. Hastings worked with his father years ago in the West when the big railroads were reaching out into the then sparsely settled sections of the country.

Later he returned to Dayton, Ohio, his former home, where he took up architecture.

In those days Indianapolis began to attract attention and the promise she offered held a lure for young Hastings who moved to the Indiana capitol and began professional practice, maintaining same till his death.

A. I. A. CONVENTION NEXT.

Indiana Architects Preparing to Attend Washington Gathering.

Indiana is to be right there with representation at the annual convention of the American Institute of Architects at Washington, D. C., May 16, 17, 18. Both the Indiana Chapter and the Indiana Society of Architects will send delegates. The former body as a member of the A. I. A., will have an official voice in the convention if it cares to raise it. On the other hand, the Society will be but an invited guest and will have no vote in the proceedings. All the state architects' associations not affiliated with the A. I. A. have been extended invitations to attend the convention as a means, by the Institute, of encouragement for a spirit of better fellowship among the members of the architectural profession.

The chapter delegates will be, Fernor S. Cannon, Robert Frost Daggett and Herbert Foltz, all of Indianapolis. Delegates to represent the I. S. A. are to be named Saturday at the regional meeting at Evansville.

Mr. Cannon will leave in time to attend the national meeting of the Small House Service Bureau of the U. S., at which plans are to be discussed for the extension of the service. Mr. Cannon is president of the Lakes Division of the Small House Service Bureau.

INDIANAPOLIS ARCHITECTS TO MEET MAY 16.

Regular Monthly Session of City Architect's Association.

The regular monthly meeting of the Indianapolis Architect's Association will be held next Wednesday evening, May 16, at the Columbia Club. Preceding the meeting there will be a dinner at 6:30 p. m.

INDIANA ARCHITECT WITH HIS TEAM-MATE LANDS STATE DOUBLES BOWLING CHAMPIONSHIP.

Cresswell of Lafayette Wins Honors.

There was a time when it was a far cry from the architectural professional ranks to bowling circles but, since then, the order of things has changed greatly and as a result the architectural profession of Indiana is harboring one of the bowling champions of the state.

This champion is T. Cresswell, Lafayette, connected with the firm of Nicol-Scholer & Hoffman, architects, of that city. He with his team partner flashed across the firmament of the State Bowling Tournament just concluded at Indianapolis and carried off the doubles championship with a score of 1211, ten pins in front of their nearest competitors. The significance of this victory can be realized more readily when one stops to consider that there were over 500 doubles teams who rolled in the tournament. Practically every bowling star of the state participated in the event, and many of them have taken honors in national bowling events.

Just last week the Recorder carried a story of an inter-city match of six games rolled between the Nicol-Scholer & Hoffman and Hugh J. Baker teams, during which contests Cresswell hung up a score of over 1,200, rolling five games each over 200 out of the six games. The fact that he came right back in the State Tournament and, with his partner landed one of the championships, demonstrates that this Indiana architect is a real star of the maple runways.

FORMER LOCAL BUILDING EFFORTS SEEM PYGMEAN IN FACE OF THIS YEAR'S SHOWING.

1921 Volume Surpassed While That of 1922 Is Promised a Like Fate.

Now that the local building figures for April have been written into the records, it is interesting to note that there has been a tremendous increase in the volume of operations for each month since the first of the year over the monthly volumes for the corresponding periods in 1922. The result is that for the first third of this year a big gain is shown over the like period a year ago both in permits granted and the total estimated valuation. There were 134 more permits issued, while the amount of money involved was 207% greater.

Further, the volume of building construction started so far this season in Evansville is 52% greater than the volume for the entire year of 1921. Also, the work begun during the first four months of 1923 is equal to 64% of all the building started in Evansville in 1922.

The local building records month by month for the first third of 1922 and 1923 are as follows:

1922		
Month	Per.	Est. Val.
January	66	\$ 85,432
February	92	98,138
March	146	231,090
April	255	230,889
Total	559	\$645,549
1923.		
Month	Per.	Est. Val.
January	116	\$ 208,000
February	94	450,898
March	213	353,465
April	270	968,875
Total	683	\$1,981,238

CHIPS AND SHAVINGS.

Anderson and Veatch, general contractors, have been awarded the contract for the erection of a brick, colonial type, home for Phil Siegel in Lincolnshire, the new restricted residence subdivision.

C. Kanzler & Son, are busy with the

remodeling of the George Saunders building on Third, between Main and Sycamore streets.

There were 92 building permits issued last month for the erection of new residences. The amount of money required for the work was estimated at \$260,850. Nine daily was the average rate at which permits were issued throughout the month of April.

Local Shriners are considering the purchase of the Crescent Club, with a view to remodeling it into a regular Shrine home.

The Y. W. C. A. is contemplating the erection of a new \$300,000 building. The drive to finance same has been on for several weeks and a building committee composed of prominent local citizens has just been named to handle the building program details.

BUILDING OPERATIONS AT FORT WAYNE RUNNING FAR AHEAD OF THOSE OF 1922.

Big Gains Recorded.

As the months roll on and the local building construction figures pile up, Ft. Wayne bids fair to record a volume of work that will place her right up among the leaders among the cities of her size when the final tabulation for the year is made.

A check over of the April Permits issued shows that 383 were granted for a total estimated valuation of \$1,939,275 a figure that exceeds any other of like nature ever recorded in Ft. Wayne. The nearest approach to this last total was made in September last year when the estimated valuations for permits granted amounted to \$1,774,930.

A resume of the building operations in Ft. Wayne for the first four months of 1923 shows a grand total of 824 permits issued involving \$4,200,490 as against 538 permits for \$1,483,455 for the same period in 1922, a gain in permits of 286 and 183.1% in the matter of estimated valuations.

The total for the first four months

this year lacks but 12.4% of equaling the entire amount of valuations recorded in 1922, and equals 43.6% of the estimated valuations turned in during the twelve months last year.

The building figures for Ft. Wayne covering the first four months of 1923 and 1922 are:

1923		
Month	Per.	Est. Val.
January	99	\$ 390,885
February	61	420,330
March	281	1,450,000
April	383	1,939,275
Total	824	\$4,200,490

1922		
Month	Per.	Est. Val.
January	42	\$ 136,660
February	47	191,035
March	180	573,375
April	269	582,385
Total	538	\$1,483,455

WITH AN EYE ON THE FUTURE.

Greater Ft. Wayne To Be Well Provided For.

Nothing is being left undone to make Ft. Wayne a safe, convenient, well-arranged city for future generations. In view of the fact that the building construction volume of the city is growing by leaps and bounds certain building restrictions are being rigidly enforced, building lines are being established and new fire zones calling for fire resistive construction are being definitely provided for.

Just recently the city council committee on rules recommended an extension to the primary fire zone limits and an ordinance to that effect, is to be introduced soon before the council for passage.

NO TIME TO SPARE.

Entire Ft. Wayne Building Fraternity on the Jump.

The activity that is sending building operations ahead in Ft. Wayne with a rush is putting a heavy tax on the local building labor supply market. Any good mechanic need not loaf these days and as far as common laborers goes they are quite scarce.

The Ft. Wayne architects' offices were never busier as the members of the profession have about all they can handle at the present time. There is a big demand being made upon all contractors for estimates on proposed work and this together with the operations they have under way is keeping the builders busy day and night.

It is the biggest building year Ft. Wayne has ever known.

PLANS ON FILE.

None this week.

WAIVER OF LIEN.

None filed with Marion County Recorder this week.

STRIKE OVER

Last Vestige of Trouble In Building Field Removed When Plasterers Sign Up.

By dint of perseverance and an earnest desire not to jeopardize the building prospects by a long drawn out strike, with a consequent stoppage of work, the members of the Indianapolis Building Contractors' Association stuck to their knitting right through the thick of the wage scale adjustment controversy and, craft by craft, succeeded in reaching satisfactory wage and working agreements with the Union representatives of the building trades employes.

The former wage scales expired April 1st, and previous to that date agreements were reached with the majority of the crafts that were satisfactory. However, some of them were obdurate and in the final shuffle three of the crafts held out and it looked for a time as if they might gum up the machinery.

There was a strike on hand with five of the crafts out. These were the plumbers, plasterers, electricians, iron workers, and lathers. The first to fall into line were the iron workers, then the plumbers, next the lathers, to be followed by the electricians. The plasterers stuck to the last and then, after a month's strike, came across and signed up May 4th, at \$10.50 per day.

That finished the strike and brought a breath of relief to those in Indianapolis interested in building construction. There was such a volume of business under way, and so much in prospect, that the industry could ill afford to be tied up by a protracted spell of labor trouble.

As matters stand now building affairs are in better shape in Indianapolis at this time of the year than they have been heretofore for the same period in years past.

Great credit for the successful and early conclusion reached in the matter

of the wage scale readjustment is due to the builders' association which held the bosses in line and kept them in close contact with the Union element, exerting every effort to getting the two factions together on an amicable settlement.

APRIL CONTRIBUTES BIG BOOST TO YEAR'S BUILDING VOLUME AT INDIANAPOLIS.

Increases Recorded All Around.

Coming through with a \$3,215,976 estimated valuation for the new work started in Indianapolis, April, 1923, was the third highest building month recorded at the city building inspector's office in the past 30 months.

The above amount was established by the 1761 permits that were issued during the month. This was 68 more permits than were granted in April a year ago, while the estimated valuations showed a 25.3% gain over the figures for the same period. There were 323 more permits issued in April than in March this year, the gain in the valuation being 6.1%.

Since January 1st, there have been 4363 permits granted in Indianapolis as against 3890 during the corresponding period in 1922. The individual estimated valuations for both spans of time are, 1923, \$9,867,235, and 1922, \$6,382,537, an increase of \$3,484,698, or a 54.6% gain for the first four months of 1923.

The official figures, as issued by City Building Inspector F. F. Hamilton, are:

Month	Per.	Est. Val.
January	619	\$2,021,138
February	545	1,601,282
March	1438	3,028,839
April	1761	3,215,976
Total	4363	\$9,867,235

Month	Per.	Est. Val.
January	403	\$ 580,706
February	576	1,170,398
March	1218	2,065,051
April	1693	2,566,382
Total	3890	\$6,382,537

HITTING THE BALL.

South Bend Contractors Speeding Up Their Local Organization.

The recently regenerated Builders Exchange of South Bend has adopted a real slogan, not mere words, rather, a combination pertinent with truth.

"United We Stick—Divided We're Stuck"

Those at the head of the exchange are seeking to put real life into the organization, to create a real interest, to instill an appeal.

Last Monday night the members enjoyed "A Night At the Iron Works," at which time a trip was made to the new plant of the Edwards Iron Works. The crowd was made up of those interested in the local building business and a fine dinner and entertainment was put on by the company for the enjoyment of the guests.

President Walter Fassnacht and Secretary-Manager E. H. Hyman are bending every effort to make the Builders' Exchange at South Bend the best in

the state, a real organization of, for and by the local builders.

STILL ARRAYED AGAINST EACH OTHER.**Contractors and Laborers Can't Agree**

The contractors and building laborers in the Calumet District are still wide apart on the wage question. The building trades employers made what they considered a reasonable proposition to the employes and have stood with an unbroken front to all the assaults that have been directed against them to break down their defense. There has been all kinds of propaganda circulated and even heavy pressure has been brought to bear to break the ranks of the contractors, but, the latter have stood firmly in their tracks and refused to vary in their offer of 87½ cents per hour to the building laborers.

It is a fact that some of the jobs have been closed down because of the controversy, but the majority of the contractors have been able to man their work with non-union help of which there is an abundance. There are any number of men leaving the mills to get outside work at the high wages being offered.

One Chicago contractor, who is operating in this district was unable to get his work started because he could not find the man properly fitted to take the lead. Every morning while fussing around trying to get things started the Union delegates would induce the men to leave the job. Finally the contractor went to Chicago to see if he could not get some aid from the Citizens Committee, and while he was gone two of our local contractors organized a gang, got the concrete mixers going and when the contractor returned from Chicago he found his work going along at full swing.

All it takes is determination. That is what the Unions employ. If all the contractors would put the pep and determination into these difficulties that the Unions do, they would make more progress. The thing to do is to make a decision, stick to it, then go ahead and not dilly-dally around listening to all the wildcat tales that are broadcasted about.

CALUMET BUILDING PROGRESS.

The swamp land in and around Lake George about which there has been so much altercation because it was proposed to sell it has finally been sold. It has been bought by The East Chicago Land Company, acting for the Jones-Laughlin Steel Co., who owns the adjoining land which they have been holding as a future plant site. Now that the

big steel company has acquired this big tract of land, everyone is wondering just how soon they will begin to develop it for building purposes.

Announcement has just been made by Jacob Mohler, who with Leo Deutsch is building a large apartment house on S. Hohman street, that plans are being prepared for a second apartment building adjacent to the one now going up. The newly proposed building will occupy a frontage of 98 feet in Hohman street, and will contain twenty, three and four-room flats. These men also own another large parcel of land and are negotiating for more upon which to erect more apartment buildings. This may give some idea of the housing needs of Hammond and the faith certain men entertain regarding flat buildings as an investment proposition.

The contract for the construction of the new \$75,000 theatre at Indiana Harbor has been awarded to H. B. Olney.

Plans for the W. C. Paxton building on Hohman street, are being revised. Bids were received on this job but they ran too high, hence, the decision to revise the plans. The building is to contain three store rooms and is estimated to cost \$20,000.

The Greek Orthodox Catholic Church will build a new edifice and parsonage in East Hammond, plans for which are being prepared by Architect A. C. Berry & Co.

GOING UP!**Building Activity In Muncie Took a Big Jump in April.**

It looks as if the much promised building construction work, indicated earlier in the season by the prospective talk that went the rounds in Muncie has arrived. Activity picked up considerably in March with the issuing of 54 permits, and then along came April with a greatly increased volume of business to mark one of the best building periods Muncie has known in a long time.

The new building code that is in operation this year requiring all owners who desire to build to first secure a building permit from the city engineer is providing an interesting means whereby it is possible to keep a close tab on, and an official record of, the city's building construction progress. This is something new in the city's official record as heretofore there was no way of recording the building activity for future reference.

As against 54 permits issued in March there were 155 issued in April an increase of 101 permits, or approximately three times the amount of building that was started the month previous. The

increased volume of permits sent the amount of money involved soaring for a gain over March of 211.6 per cent.

The figures for the two months are:

Month	Per.	Est. Val.
March, 1923	54	\$ 89,775
April, 1923	155	279,730

ALL IN A DAY**Weather Reflects Conditions As They Sway The Building Industry.**

The sample of weather dished out Tuesday might be likened to the physical conditions that arise in the spring to confront the building construction industry. There was the cloudy period, uncertainty, then the rain with its attendant gloom, to be followed by chill and snow, stoppage, and, when things seemed at their worst, then the clouds parted and the sunshine came bursting through to cheer, to warm and send everything pulsing forward with a new impetus.

Just so with building, the clouds of labor troubles loom, to create uncertainty, and, as it were, a dampness follows, than coldness as the factions of employers and employes drift farther apart on the wage problem. When everything seems bleak and cold, reason seems to temper the atmosphere that has enveloped the bosses and the men, the clouds are brushed away and understandings come just as does the sunshine and things move on.

OTHERS ARE ENCOURAGING APPRENTICES.**Is Indiana?**

Remember all that was said at the State A. B. C.'s convention at Michigan City last January about the apprentice problem and the encouragement to be given the boys to enter the building trades? It is to be hoped that all that good intention has not gone to seed. How about a report from around the State as to what the contractors have done about taking the boys on? We have heard no more on the subject and the thought has occurred that a general report on the matter would prove interesting.

In this connection an illuminating report has come in from Chicago where a building trades mechanics school is thriving under the guidance of the Citizens' Committee, an outgrowth of the Landis Award.

Many young boys have been enrolled in the school and are showing much enthusiasm as they are being taught the rudiments of carpentry, brick-laying, sheet metal work and painting. As the boys are taken in they are carefully watched and it is not hard to size up the lad who will make good. The laggards are soon weeded out and dropped. If it is thought a boy is not adaptable to a trade he is told so. The best boys are kept and given a thorough training and then passed on to the contractors.

Some definite action along some such line if instituted in Indiana would more than pay in a few years in that real skilled mechanics of youth and enthusiasm would be turned out to replenish a much overtaxed labor supply.

How about it? Have you Indiana contractors lived up to your Michigan City pledge?

POSITION as building construction superintendent with general contractor by married man. Thoroughly understands plans; can do own engineering and detail work. Experienced in reinforced concrete construction. Can furnish best of references. Address D. L. Davis, P. O. Box 96, Clermont, Ind.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL BONDS.

NOTICE OF BOND SALE.

Notice is hereby given by the undersigned as Trustee of Ripley School Township of Rush County, Indiana, that at the hour of 3:00 o'clock P. M., on Saturday, May 26, 1923, at the office of said Trustee in the Town of Carthage, Indiana, he will offer for sale to the highest bidder an issue of \$78,000.00 of bonds of Ripley School Township, Rush County, Indiana. Sealed bids will be received up to the hour of sale.

71 of said bonds shall be in denomination of \$1,000.00 each. 14 of said bonds shall be in the denomination of \$500.00 each. Said bonds shall bear interest at the rate of 5% per annum payable semi-annually and shall be dated May 15, 1923. Two of the \$1,000.00 bonds and one \$500.00 bond shall be due and payable on August 1, 1924, and each six months thereafter a like number and denomination of bonds shall be due and payable until February 1, 1931, at which time three of the \$1,000.00 bonds shall be due and payable and each six months thereafter a like number and denomination of bonds shall be due and payable until August 1, 1931, inclusive and on February 1, 1932, three of said \$1,000.00 bonds and one \$500.00 bonds shall be due and payable.

SCHOOL HOUSE NOTICE TO CONTRACTORS.

Notice is hereby given by Thomas J. Passwater, as Trustee of Ripley School Township of Rush County, Indiana:

That at the hour of 10:00 o'clock, A. M., on Saturday the 26th day of May, 1923, at the office of said Trustee in the town of Carthage, Rush County, Indiana, he will receive sealed proposals for the construction of a school building in said town of Carthage and also for the remodeling of the present school building in said town. At the same time and place bids will also be received for the installation of

- (a) Heating and ventilating system
- (b) Plumbing and sewerage system
- (c) Electric wiring

All in accordance with the plans and specifications heretofore adopted and approved by said Trustee and Advisory Board of said township, which plans and specifications are on file in the office of said Trustee and of the State Board of Accounts and of John Parrish, Castle Hall, Indianapolis, Ind., the architect. The estimated costs of the proposed building and remodeling of the present building is \$78,000.00. All bids must be in writing on forms prescribed by the State Board of Accounts and bids on the general contract shall be accompanied by a certified check for \$500.00, payable to said Trustee as a guarantee of good faith in submitting said bid. Each bid for the heating and ventilating contract shall be accompanied by a certified check for \$300.00. Each bid for the plumbing and sewerage disposal shall be accompanied by a certified check for \$200.00. Each bid for the electric wiring shall be accompanied by a certified check for \$200.00. The checks of the unsuccessful bidder will be returned when the contract is awarded and entered into by the successful bidder, but should the successful bidder fail to enter into a contract and execute such bond he shall forfeit such certified check as liquidated damages for the use and benefit of said township.

Plans and specifications may be examined at the office of the Township Trustee in Carthage, Indiana, and at the office of John Parrish, architect, at Castle Hall, Indianapolis, Indiana.

The Trustee reserves the right to reject any or all bids.

Dated at Carthage, Indiana, this 2nd day of May, 1923.

THOMAS J. PASSWATER,
Trustee Ripley School Township,
Rush County, Ind.

May 5-12-19: 1923.

COUNTY HOSPITAL NOTICE TO CONTRACTORS

Notice is hereby given that the Board of Trustees of the Morgan County Memorial Hospital, Martinsville, Ind., will receive sealed proposals for the improvement of a certain hospital in said county as set out in the plans and specifications now on file at the office of the auditor of said county, by and under the laws of the State of Indiana. Said sealed proposals will be opened and the contract awarded for said improvement on the second day of July, 1923.

Bids or proposals will be received up to 2 o'clock p. m. on said date.

Bids are to be submitted as follows:

- First—For the construction of the building (general contract).
- Second—For the installation complete of heating and ventilating system.
- Third—For the installation complete of plumbing, gas and sewer work.
- Fourth—For the installation complete of elevator.

Fifth—Or for any combination of the above.

Said hospital to be improved is located in Washington Township in Morgan County, Indiana, and is to be known as the Morgan County Memorial Hospital when so improved.

Bids will be for the completion of the said improvement in accordance with the plans and specifications in the office of the auditor of said County, and shall include all labor and material for said work. In no case will extra compensation be allowed for any additional work alleged to have been done by the contractor or contractors to whom is awarded the contract.

Each bid shall be accompanied by a personal or surety bond in a sum equal to the amount of the bid filed for the work bid on, to be approved by the Board of Hospital Trustees of said County. Said bonds shall be conditioned for the faithful performance of the work; the sureties, if personal, shall be resident freeholders of the State of Indiana, one of whom shall be a resident of Morgan County.

Said bond shall be for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of any such bidder failing or neglecting to enter into contract or neglecting to enter into contract to perform such work awarded by the Board of Hospital Trustees, or to carry out the same in any particular or to pay for any labor or material which may have been furnished to any such Contractor or Contractors or to any subcontractor, agent or superintendent under him, in the construction of said work.

Said improvement will be let as a whole to the lowest responsible bidder upon affidavit of noncollusion, which must be submitted with the bids and upon failure to submit such affidavit such proposal or bid will be rejected by the Board; and the Board reserves the right to reject any and all bids. Time for completion of said work will be agreed upon after the letting of said contract by said Board of Hospital Trustees and successful bidder.

Given by the order of the Board of Hospital Trustees, Morgan County, Indiana.
May 12-19-26, 1923.

ORPHANS' HOME.

NOTICE TO CONTRACTORS

The Board of Commissioners, County of Madison, State of Indiana, will until 10 o'clock A. M., June 21, 1923, receive sealed proposals for the construction of a two story brick and concrete building to be used as an Orphans' Home, according to the plans and specifications duly adopted by said Board and now on file in the Auditor's office at the Court House in Anderson, Indiana.

All bids to be made out on blanks furnished by the Auditor and accompanied by a good and sufficient bond, in a sum equal to the amount of the bid submitted. All bids will be opened and inspected at the office of the Board of Commissioners at the Court House, Anderson, Indiana, at 10 o'clock A. M. on the 21st day of June, 1923.

Bids to be submitted and received as follows:
First—General contract including the memorial arch forming the entrance to the Orphans' Home grounds; plans and specifications for which are included in the general plans and specifications.

Second—Heating.
Third—Plumbing and Sewage.

Fourth—Electric wiring and fixtures.
Copies of plans and specifications may be had at the office of E. R. Watkins, Architect, Union Building, Anderson, upon the deposit of the sum of \$15.00 for the general plans and of \$10.00 for each of the special plans.

Estimated cost of said building and arch, \$125,000.00.

The Board of Commissioners reserve the right to reject any and all bids.

Given by order of the Board of Commissioners of Marion County, Indiana, this 7th day of May, 1923.

HENRY P. HARDIE,
Auditor of Madison County.

May 19-26, 1923.

ASYLUM

NOTICE TO BIDDERS.

Bids will be received by the Board of Trustees for the Indiana Farm Colony for Feeble Minded, Butlerville, Indiana, at the office of Herbert Foltz, Architect, 843 Consolidated Building, Indianapolis, until 2 o'clock P. M., of Monday, June 4, 1923, for the construction of and the steam heating, plumbing and electric installations in a new brick Colony Building to be erected on the Institution grounds at Butlerville, Indiana.

Drawings and specifications will be on file on and after Friday, May 18th, 1923, in the office of the Superintendent of said Institution at Butlerville and releases will be made to bidders from

the office of the architect in Indianapolis on and after said date.

The estimated cost of the building without equipment is \$40,000.00.

Proposals shall be made according to the form attached to the specifications and each shall be delivered in a sealed envelope addressed to the President of the Board of Trustees, marked "Proposal," bearing the title of the work and the name of the bidder.

Separate proposals will be considered on each branch of the work, also on any combination of branches.

Each proposal must be accompanied by a certified check payable to the Board of Trustees in a sum equal to three per cent (3%) of the amount of the proposal, in accordance with conditions included in the proposal form, which check shall be forfeited in case of failure of any bidder to enter into a contract and furnish a satisfactory bond within eight (8) days after notification of the acceptance of his proposal.

The Board of Trustees is not obligated to accept the lowest or any other bid submitted, but reserves the right to reject any or all proposals and to defer such acceptance or rejection for a period not to exceed eight (8) days.

A deposit of Five Dollars (\$5.00) will be required of prospective bidders for drawings and specifications for each branch of work taken from the Architect's office, which amount will be returned in full upon the return of the drawings and specifications in good order within seven (7) days from the date of their release and the delivery to the Board of Trustees of a bona-fide proposal at the time and place fixed for receiving bids. Should any bidder fail in the observance of either or both of these conditions, he shall forfeit the amount of his deposit.

By order of the Board of Trustees,

W. P. KELLER, President.

May 19, 1923.

SCHOOL HOUSE. NOTICE TO CONTRACTORS.

Notice is hereby given that sealed bids will be received by the undersigned, Trustee of Adams School Township, Carroll County, Indiana, at his office in said township, county and state, until one o'clock P. M. on

SATURDAY, JUNE 2, 1923

for the furnishing of all materials and labor for the building, erection and completion of a one-story and basement brick school building in and for said township according to plans and specifications on file in my office.

Said building to be erected on a plot of ground in section No. thirteen (13).

Each bid to be accompanied by a certified check in the sum of \$00.00 payable to T. O. Peterson, trustee, as a guaranty that the bidder to whom contract is awarded will enter into written contract and provide bond within ten days after notice that contract has been awarded him, and upon failure to do so, the proceeds of this check to become the property of the above named township.

At the same time and place, sealed bids will be received for the heating and ventilation for said building, bid to be accompanied by a certified check in the sum of \$200.00, payable to T. O. Peterson, trustee, conditioned as for general contract.

At the same time and place, sealed bids will be received for the plumbing and water supply in said building, bid to be accompanied by a certified check in the sum of \$200.00, payable to T. O. Peterson, trustee, conditioned as for general contract.

At the same time and place, sealed bids will be received for the electrical work in said building, bid to be accompanied by a certified check in the sum of \$200.00, payable to T. O. Peterson, trustee, conditioned as for general contract.

Separate bids will be received for each of the above contracts, but a joint bid may be made on any or all of the last three named

Plans and specifications for the use of individual bidder may be had from the trustee, or the architect, Samuel Young, Monticello, Ind., upon a deposit of \$10.00 for general plans, and \$5.00 each for heating and ventilation, plumbing and water supply, and electrical work, all of which will be returned upon return of plans and specifications on or before date of letting of contract.

The estimated cost of said building is \$35,000. The right is reserved to reject any or all bids.

T. O. PETERSON, Trustee,
Adams School Township,
Carroll County, Indiana.

MILTON CROWELL,
W. B. MUNSON,
W. S. FRYE,

Advisory Board.

E. E. PRUITT,
Attorney.

Dated May 10, 1923.

Viskalt

~Pliant Under Stress~

MEMBRANE ROOFS

A firm, tight roof *even under sweltering heat*

You recall in the old fable that although stormy winds failed to tear off the traveler's coat, the sun's heat soon removed it.

The same holds true of your roof. Even though it resists terrific storms, the temperature of summer may yet melt off its waterproof coating.

Surprisingly free from this defect is the waterproofing bitumen, Viskalt. It is scientifically blended so as to remain firm, not only through years of severe storms, but under the sweltering heat of summer as well.

Viskalt insures a permanent waterproof covering for your structures. It is made by a firm backed by over fifty years of manufacturing experience—The Richardson Company of Lockland, (Cincinnati) Ohio; Melrose Park, (Chicago) Illinois; New Orleans, Louisiana.

For complete details and estimates, consult any good roofing contractor.

EVANSVILLE PLAYS HOST TO
STATE ARCHITECTS SOCIETY.

Regional Meeting Proves Interesting.

Once more those who have advocated the carrying of the Indiana Society of Architects right to the architects, by means of regional meetings that those of the profession might be brought into closer contact with the organization, have been vindicated. The latest demonstration took place at Evansville, Ind., May 12, when the Board of Directors of the I. S. of A. met there and held the third regional meeting since the system was inaugurated.

The local architects turned out strong and were greatly interested in that which transpired. Not only that but they showed great enthusiasm in an effort to entertain their professional guests.

The regular meeting of the directors was held in the morning at the Chamber of Commerce. The members of the board present were: President Guy Mahurin, Ft. Wayne; First Vice-President Wilson B. Parker, Indianapolis; Second Vice-President Harry E. Boyle, Evansville; Secretary Merritt Harrison, Indianapolis; Walter Scholer, Lafayette; Geo. W. Allen, Laporte; Warren W. Miller, Terre Haute. The invitation extended by the American Institute of Architects to the I. S. of A. to send a representative to the institute convention at Washington was accepted and A. F. Wickers, Gary, was named to act in that capacity. He also represented the Society at the session of the National Council of Architectural Registration Boards held in Washington, May 15th, just previous to the A. I. A. convention.

Reviewing the work of the I. S. of A. the directors expressed themselves as gratified with that which had been accomplished since the organization was originated and the state of permanency that had been reached. The report of the secretary showed that quite a few members are in arrears with their dues, and since the Society has put across some exceedingly constructive matter that has and will accrue to the benefit of every practicing architect in Indiana, it is felt that all the architects owe it to the organization to at least keep their dues paid up. The Society has been at considerable expense and notices are to

be sent out to all delinquent members who in failing to respond will be dropped from the membership.

Another matter discussed was the recent War Memorial Competition, it being the consensus of opinion of the directors that the result was satisfactory in assuring Indiana a majestic memorial and it was moved and carried that the I. S. of A. send a communication to the State War Memorial Board commending it upon the efficient way in which the competition was conducted.

In view of the fact that the annual election of officers will take place at the Society meeting at Indianapolis, Saturday, June 23, these committees were named to nominate two tickets to be voted upon at the discretion of the members:

President's Ticket: Walter Scholer
Fritz Anderson, Geo. W. Allen. Board's Ticket: Fernor S. Cannon, Wilson B. Parker, Merritt Harrison.

As soon as candidates are named ballots will be sent to all members for a mail vote to be returned in time for tabulation at the annual meeting. It was also proposed that a move be made in June for an amendment to the constitution of the I. S. of A. to provide for the progressive election of board members' tenures of office to extend from one to three years, thus having men on the board at all times who were familiar with the working plans of the organization.

In line with the work being done by the New York Building Congress toward the standardization of live loads throughout the state and thus providing for uniform state building requirements, the board members voted to have the Indiana Society of Architects exert its influence in that direction for a similar establishment in Indiana. Such a condition will be possible through the institution of the recently authorized Administrative Building Council of Indiana created by a law passed by the last State Legislature.

During the afternoon the Evansville architects took their guests for an auto tour of the city and then a boat ride up the Ohio River to the Green River. Returning to the city the architects gathered at the Chamber of Commerce again, where they were joined by the draftsmen of the local architects' offices and the members of the Evansville Engi-

neers' Association, all of whom partook of a delightful banquet at 6:30 p. m. Architect Harry E. Boyle acted as toastmaster and called upon President Mahurin and the various directors for speeches. Other speakers were Prof. Waldo Mitchell and Dr. H. J. Bassett, both of the faculty of Evansville College. A pleasing feature of the evening was the musical program rendered by Prof. Otto Schacht, tenor; Frank Schmidt, violinist, and Harland Foulke, pianist.

Architects present in addition to the above named officers and directors were: J. W. Gaddis, Vincennes; Fritz Anderson, Gilbert Karges, A. E. Neucks, Edward Thole, C. L. Troutman, C. W. Thurgood, Geo. Wahnseidler, Eli Stingle. These with the members of the Evansville Engineering Association and local architectural draftsmen went to make up a crowd of fifty or more who were assembled for the evening program.

SPECIAL MEETING TO BE HELD BY
INDIANAPOLIS ARCHITECTS'
ASSOCIATION.

State Architects to Be Invited In.

A most enjoyable meeting was held by the Indianapolis Architect's Association at the Columbia Club, Wednesday evening, May 16, one of the features of which was the decision to call a special meeting the latter part of May at which time drawings submitted in the Chicago Tribune Building Architectural Competition are to be on exhibit at the John Herron Art Institute, Indianapolis. The dates of the exhibition will extend from May 23 to May 30. The time for the special meeting to which all members of the Indiana Society of Architects are invited will be decided upon soon and notices sent out.

Messrs Walker and Stedman of the architectural firm of Walker & Weeks, Cleveland, Ohio, who were the successful contestants in the Indiana War Memorial competition in landing the commission to prepare the plans for the \$2,000,000 War Memorial, spent some time with the Indianapolis architects at their meeting Wednesday night. Informally they discussed the competition and interestingly told of how they developed the scheme and plans that eventually were awarded first prize.

LOCAL BUILDING TELLS AN INTERESTING STORY.

Nature of Operations Marks the City's Progress.

The wide and varied scope of Evansville's building endeavor has been most gratifying. The outstanding feature of the season's work to date is that the city's development along building lines is not lopsided, rather it is well balanced and comprehensive, being evenly distributed and in good proportion over a wide field of structures as they bear relation to each other.

Naturally new residences predominate, a natural state in a growing city. Apartment building work, while not as great in volume as some of the other types of construction, has received some attention and will aid in remedying local housing conditions. There has been considerable activity in the direction of mercantile and commercial buildings, especially in the way of remodelings, alterations, and additions.

Church and school construction operations also have figured in this season's work, over a million dollars being invested in two new high schools now in course of erection. Last but not least, considerable industrial building has been started and is now under way.

All of which but reflects the constantly increasing growth of Evansville, creating ever-increasing demands upon her building construction fraternity.

FUTURE TREND OF BUILDING IS UP TO ITS OWN FRATERNITY.

Public Balking at High Prices.

Relative to building conditions the Evansville Courier-Journal says:

"A 'buyers' strike' appears to be developing in the building industry, which has been enjoying a tremendous boom. A survey of 242 American cities and towns shows that April undertakings fell off 16 per cent from the March figures, and May is expected to show a greater decrease.

Recent developments in New York city have shown the tendency in a striking way. Within a few days big projects involving more than \$50,000,000 of con-

struction work have been postponed indefinitely because of high costs. They include a \$4,000,000 orphan asylum, a \$10,000,000 addition to Columbia university, a \$2,000,000 Y. M. C. A. building, an \$11,000,000 extension of the New York Telephone Company, and other enterprises of similar nature.

Public buildings, public utilities and charities are first to yield from the pinch of high building prices. Office structures and homes may follow. It is inevitable, with material and wages soaring. Philanthropy can not afford the cost and investment can not take the risk of building at the peak and losing through a subsequent slump.

It may be that nobody is to blame for the return of war-boom building costs. There has been such a great demand for construction that builders have been bidding eagerly for labor and materials, and in the cases of labor at least, often paying big bonuses to get what they needed promptly. That kind of competition is bound to raise costs.

The result is so unwholesome and unsafe that a relaxing of the demand is a good thing, if it does not go too far. The labor unions, building material men and contractors can keep it from going too far if they want to by concerted effort to give reasonable value, in goods and labor, for money paid.

MATERIAL SUPPLY MARKET IS IN GOOD SHAPE.

Few Delays Occasioned This Year.

With the exception of a temporary shortage of lath, due to delays in shipments from the south, Evansville is well stocked up with building material for the season of 1923.

AT TOP SPEED.

Ft. Wayne Building Interests All Busy.

Though there has not been any marked activity in the awarding of new building construction contracts, or any especially large ones signed up, nevertheless, Ft. Wayne building conditions continue good with a prospect for some good projects later on.

Right now throughout the city there are more building operations under way than at any time during the past year, a situation that is making building construction labor hard to secure in order to start more new work. Practically every contractor in the city is going at top speed to keep up with the demand for new building.

The architects report a nice volume of work on the boards, and estimating on residence work particularly is quite heavy. In addition to the residential work that passes through the architects' offices and then on to the contractors, the realty and home-building firms are erecting hundreds of homes.

The city building inspector's office, as a consequence of the whirling building activity, was never busier since the request for permits is exceedingly heavy and inspections are innumerable.

BY A NOSE

South Bend Leading Ft. Wayne In This Year's Building Race.

Again referring to the activity that is prevailing around the city building in- prevailing around the city building in- building operations for April in Ft. Wayne, as far as the amount of money involved was concerned, ran ahead of those of South Bend, her northern Indiana sister city. The volume of building work in each of these two municipalities each year runs very close and the race between the two is quite interesting. In January this year Ft. Wayne led, then was crowded back by South Bend in both February and March only to step to the fore again in April when her total estimated valuations on new building work was \$503,113 more than those of her rival.

Despite the burst of speed put on at Ft. Wayne and though she gained handsomely on South Bend, the latter is still breezing along in front as regards her building figures for the first four months of 1923.

The records of the two cities for the first third of the year are:

Cities	Per.	Est. Val.
South Bend	1636	\$4,258,612
Ft. Wayne	824	4,200,490

South Bend's margin 812 \$ 58,122

ADDITIONAL SUBDIVISION FOR HOME SITES OPENED.

A new residential section known as Norwood Heights has just been opened, adding one more attractive location for suburban homes. The site occupies an elevated position north of State boulevard with a beautiful view overlooking Driving Park and Forest Park additions.

FIRST STATE A. B. C.'s QUARTERLY
CONFERENCE FOR 1923 TO BE
BASED ON CONSTRUCTIVENESS.

Contractors to Meet at Indianapolis
June 6.

Preliminary plans have been started at headquarters of the Associated Building Contractors of Indiana for the holding of a regular quarterly conference of the organization at Indianapolis June 6. This arrangement is in accordance with the resolution passed at the annual convention of the State A. B. C.'s at Michigan City in January, these quarterly conferences to take the place of the monthly conferences that were held throughout 1922.

While the monthly gatherings accomplished the purpose for which they were instituted and were most successful, it was the sense of those at the convention that there were not enough important changes in conditions or matters arising every thirty days to justify the expense and time required in the holding of conferences so frequently, hence, the decision to change the order from monthly to quarterly.

The calling of these meetings is left to the discretion of the Executive Committee and it has been decided to start this year's activities along that line with the Indianapolis meeting, June 6. As now planned, it is the intention to hold the succeeding quarterly A. B. C.'s gatherings at Terre Haute, South Bend and Ft. Wayne at dates to be named later. In choosing the above named cities for meeting purposes the committee felt that they were the logical locations because of geographical and transportation facilities and would enable all contractors of the state, so minded, to attend at least two conferences a year, in addition to the annual convention, thus being enabled to keep in more direct

touch with the state organization and enjoy a greater personal contact with the individual membership.

Since the last assemblage of the A. B. C.'s at Michigan City several important things of interest to the contractors have been accomplished, chief of which was the successful completion of the legislative program, and the averting of any serious strike in the Indiana building field when the time came for wage scale adjustments this spring. Both results are traceable to the organized effort of the contractors.

That was but the beginning, other constructive plans are in contemplation and will probably be advanced at the June conference for consideration.

Every city association affiliated with the State A. B. C.'s will be expected to send its secretary and at least one member of its executive board to the approaching meeting. However, there is no limit to the attendance privilege and it is hoped that each city will send in a good delegation of members.

There is one essential point to keep in mind, all those who contemplate attending are urged to come prepared to advocate constructive programs that will make for greater activity, influence and prominence for the A. B. C.'s in the Indiana building field, to create a power for fairness, justice and co-operation that can not be denied.

REMEDIES ADVANCED TO CHECK
SOARING BUILDING COSTS.

Realized Something Should be Done.

Since ominous rumblings concerning high construction costs are beginning to be heard here and there about the country, somewhat as thunder clouds begin to loom in threatening aspect, many building men are giving serious consideration to this matter that does not bode well for future building construction operations.

The monthly bulletin of the National Lumber Manufacturers Association touching on the subject says:

"Among the remedies suggested, officially and semi-officially by the General Contractors, for relieving the present high cost of construction, are the stabilizing of prices on the part of producers and of wages on the part of labor; the removal of restrictions on labor output; purchasing of such building materials only as are actually needed and the construction of fewer public works by the Federal Government."

EFFECT OF CALLING OFF STRIKE
READILY APPARENT.

End of Wage Controversy Brings
Spirited Action.

Building activity in the down town business section where there are some large projects under way has assumed new impetus now that the wage scales have been settled for 1923.

When April 1st came the unsettled state of conditions caused a slowing down of operations on the big work, especially where the iron workers, plumbers, plasterers and electricians were involved. Gradually as the various crafts were appeased the work was

resumed but the holding out of the plasterers and electricians until May 1st had quite an influence on the work that had gotten along toward completion, resulting in a dead stop.

However, now that these two latter crafts have signed up, things are moving along again at a good clip.

BUILDING PERMITS

Week of May 10th to May 17th.
(\$5,000 and Over)

*Business Building and Garage: \$100,000. 884 Mass. Ave. Owner, Mass. and Pratt Realty Co., 1/4 City Trust Co. General contractor, Service Construction Co., Castle Hall Bldg. Brick. Starting work.

J. Wesley Reed -----President
E. E. Cole -----Secretary108 Citizens National Bank Bldg.,
Hammond, Indiana**REINFORCEMENT PROMISED.****Chamber of Commerce to Take a Hand
in Calumet Building Labor
Wage Agreement.**

Another week has run its course, another chapter has been written into the 1923 labor story dealing with the contention between the building trades employers and laborers regarding what the wage scale should be.

Both sides are arrayed strongly against each other and, though some of the weak, lame, and timid contractors have fallen by the wayside, the old, tried and true veterans of former wage campaigns are holding their line shoulder to shoulder presenting a solid front to all assaults.

A new angle has presented itself in that the Board of Directors of the newly reorganized Chamber of Commerce at a meeting Friday, May 11, assured the contractors they would back them up in every reasonable effort to better building conditions. Heretofore, the C. of C. has always side-stepped the issue in the building construction situation where the contractor and Labor was concerned, even though the contractors showed it was not their fight but a fight for the city, its future, and the prospective builders who would build up the city but are hindered by excessive wage demands that send construction costs soaring beyond the bounds of reason.

The new directors evidently have been convinced that it is time for them to act in the building situation if construction operations are not to be throttled. The C. of C. is to use its influence and will lend its assistance to the contractors in an endeavor to end the wage controversy with the laborers.

WHEN THERE WAS NO PROHIBITION.**No Trouble Getting Bracers for Weak
Knees.**

One can not but recall that in the olden days fighters before going into the fray were given a big shot of rum and gunpowder to brace them up. From the looks of things in the Calumet District it seems as if there were a few contractors who could stand to advantage about four good shots of rum. But, then, where is a fellow to get the rum these days?

STOP, LOOK, HEED!**Danger Ahead.**

Look out! See what the high prices

are doing. New York reports that \$100,000,000 worth of new construction work in contemplation has been called off, laid over, and indefinitely postponed because of leaping, bounding material prices and advancing wages. Then Chicago climbs into the center of the stage with the information that many large buildings that were contemplated for the Loop District, a volume of work amounting to \$50,000,000, has been shelved on account of high prices.

DRAWS, AS SUGAR DOES FLIES.**Men Flock to Wage Lure.**

The word seems to have gotten out that the Calumet District is paying big wages, and as a result the contractors report an over abundance of men applying for work.

CALUMET BUILDING PROGRESS.

The latest corrected information coming into the B. T. E. A. is that instead of the general contract for the construction of the new theatre job at Indiana Harbor going to H. B. Olney, it was awarded to James Johnston.

Ahlborn & Bates, general contractors, picked off the general contract for the construction of the new Morrillia Building in State street. This structure, one story high, is to contain three store rooms and is estimated to cost \$24,500.

The contract for Mueller Sons, Sheet Metal Shop was awarded to Morris Bros. at \$8,375. The building will be two stories, 25 by 50 feet.

Harry L. Potts, the plastering contractor, is having a new \$7,500 brick bungalow built in West Hammond. Rhoades & Graves are the general contractors.

AS A MATTER OF SELF-DEFENSE.**Smaller Cities Refuse to Stand Back on
Building Wage Matters and Take
What Is Left.**

There seems to have been less difficulty in Indiana this year than in many previous seasons in the adjusting of new wage scales in building construction circles.

Muncie contractors realizing that the issue must be met and met as soon as possible in order to save time and get building under way right from the opening of the spring season, went into the wage matter early and got things whipped into shape so that there have been no delays at all in local building opera-

tions. Practically all the crafts fell into line and reached satisfactory agreements with the contractors.

It is true that local scales were advanced to some extent, but such action on the part of the contractors was inspired from a motive of self preservation, self defense, and in the interest of the city's building industry. There was a time when Muncie contractors stood out for low scales, and their action was sincere in the belief that the city was entitled to a lower scale than was paid in the larger cities. However, living costs seem to know no confines these days, they have jumped to where they are as much in the small places as in the larger municipalities, and low wage scales mean that skilled building mechanics are going to migrate to the places that pay, most all other factors being equal.

Muncie has experienced years when her building labor supply was cut down to inadequacy because Indianapolis, Ft. Wayne, South Bend and other cities were paying greater wages to building trades mechanics. In the parlance of the cartoonist, "Them days is gone forever." Muncie contractors need good men, the city demands good buildings, her citizens are entitled to workmanship second to none when they invest in building construction, and to that end the Muncie building trades employers agreed this year to pay at a rate that would assure the city a good supply of skilled mechanics for the carrying on of the work that might arise.

That Muncie was not alone in her conclusion as to building trades wages, nor not far wrong, is attested by the fact that many of her sister cities have done the same as she, and, one can not but believe that the absence of far-flung labor troubles in Indiana building circles this year is due to this wise decision of the contractors to protect their own territories from inroads from other sections that unevenly balanced wage scales would have caused.

A DANGER SIGN.**Banker Showing Concern at Advancing
Building Loans.**

Bankers about the country are beginning to show concern about the building situation. It is the situation caused by a rapid rise in material prices and Labor wages that has drawn their attention. Many of them do not consider advancing construction costs as conducive to healthy construction and are inclined to call a halt on building loans in order to protect their institutions and the prospective builder as well. At the inflated cost level the question is growing, is building on the present basis a good investment? Finances are attracted in proportion to the soundness of an investment and those interested in building would do well to consider that feature before they plunge on in an effort to boost prices regardless, only in the end to bring the great building industry structure toppling down upon them.

Indiana Architects

Make more sure the awarding of the contracts on your public building projects by placing the legal advertisements for bids in the

THE WORM WILL TURN.

Building Industry Now Housing Such
a Worm.

E. E. COLE

Sec'y Bldg. Trades Employers' Assn.,
Calumet District.

Judging conditions from press reports, the thing that was predicted earlier in the year has come to pass. Particularly does this apply to New York, Chicago, and other large cities. Hardly had the new year begun than indications pointed to a tendency on the part of Labor and material supply manufacturers to slip a wedge under wages and quotations and pry them up. Such procedure was counseled against, and yet it seems the advice fell on deaf ears, that the better judgment of men was crowded into the background by the ever-growing volume of building construction. The lure for a killing, inspired more or less by greed, has caused certain elements in the building industry to pyramid wages and prices to such an extent that construction costs have reached almost prohibitive levels. There was no getting away from the fact that such methods were dangerous, and now the reaction has set in. Building operations can no longer be financed with ease owing to the fact that inflated costs cut the former down to negligible paying propositions. It is true that the demand for labor and material was enormous but, though the supply was limited, there was a vanishing point for that demand when reason ceased to exist. Already the demand is falling away.

At a meeting of the National Construction Council at New York recently a resolution was adopted to curtail building operations until lower prices prevailed. Bankers all over are sanding the tracks on building loans, in fact, some are refusing to be interested at all in speculative building.

Had a more conservative course been followed, instead of an attempt at wholesale-tilting of prices to the top notch, promising and prosperous conditions would not have been blighted; instead, it is probable that they would have ruled right along for several years, there would have been plenty of business, to say nothing of continued and steady employment for the building trades mechanic.

SOUTH BENDERS IN EARNEST.

Working Along Constructive Lines to
Establish Best Builders' Exchange
in the State.

Members of the South Bend Builders' Exchange are now busy completing their membership campaign. In their drive to build up their organization they have

issued a neat twelve-page booklet that sets forth the objects of the Exchange and what a Building Exchange can do for the contractors of a city.

They are also installing an employment bureau through which to supply the contractors with competent help; a Credit Bureau for collecting bad accounts and keeping tab on the people who are slow in paying their account to the contractors; Architects' Department, where plans for buildings may be filed and put on exhibit for all contractors to go over in making their bids; Free Information Bureau, for securing information of all kinds for members from other cities of the United States.

They also are going to make their Exchange the headquarters for all crafts of the building industry, letting them meet in our rooms on such nights as they may select.

APRIL BUILDING VOLUME IN INDIANA BOOMED ALONG TO SURPASS EVEN MARCH'S RECORD HEIGHT.

April in keeping with the custom of recent months came through with flying colors and as a result Indiana's high monthly building record was once more smashed. Though March figures from ten of the State's leading cities ran up to, and trickled over, the nine million dollar mark, far and away ahead of any other previous monthly total, the succeeding month, April, came right back and even topped the previous high record by \$221,443, a gain of 2.4%.

In view of the fact that there is a tendency to hold up future building operations about the country until there is some recession in construction costs, and even now an indication in that direction is evident in Indiana it would not be surprising if the April building figures will stand out as the monthly peak for some time to come.

Comparisons between the collective and individual building performances of the ten cities show that in April there were 863 more permits issued than in March this year though only four of the municipalities showed gains in the matter of estimated valuations. As compared with the April period a year ago there were 947 more permits granted in April, 1923, and every city showed increased estimated valuations running up a total increase of \$3,980,159 or a gain of 75.2% over the April 1922 figures.

Individually the various cities in ranking order of gain in estimated valuations and increased permits granted are as follows: Evansville, 369.6%, 72 permits; Ft. Wayne, 232.9% gain, 114 permits; Richmond, 123.4%, 50 permits; Terre Haute, 112.6% gain, 100 permits; Elkhart, 110.2%, 12 permits; Gary, 108.8%, 29 permits; Hammond, 60.9%, 27 permits; Indianapolis, 25.3%, 68 permits; South Bend, 20.7%, 320 permits; Muncie, no record for 1922.

Indianapolis, Ft. Wayne and South Bend were well within the million dollar class, while Evansville just failed to reach the select company.

Here are the April building figures:

Cities	Per	1923		1922	
		Est. Val.	Per.	Est. Val.	Per.
Elkhart	38	\$ 123,300	26	\$ 58,650	
Evansville	270	969,175	198	206,350	
Ft. Wayne	383	1,939,275	269	582,385	
Gary	110	406,777	81	194,750	
Hammond	133	408,075	106	253,575	
Indianapolis	1761	3,215,976	1693	2,566,382	
Muncie	155	279,730		No Record	
Richmond	97	145,120	47	64,957	
South Bend	672	1,436,162	352	1,189,871	
Terre Haute	360	327,524	260	154,035	
Total	3979	\$9,251,114	3032	\$5,270,955

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE. NOTICE TO CONTRACTORS.

Notice is hereby given that Metamora School Township, Franklin County, Indiana, by Louis R. Foster, trustee of said township and the Advisory Board thereof, will receive sealed bids at the office of said trustee in the Directors' Room of the Farmers Bank, in the town of Metamora, Metamora Township, Franklin County, Indiana, on

TUESDAY, JUNE 19, 1923,
at 1:00 o'clock P. M. of said day, for the construction of a new joint elementary and high school building at the town of Metamora, in District No. One for the accommodation of all pupils of school age residing in said District No. One, and District No. Three, in said township and for the construction of a new one-roomed school building known as the Elm Grove School in District No. Two in said township, for instruction in the elementary branches of study, and at the same time and place bids will also be received for the installation of the heating and ventilating system for said buildings; the plumbing and sewerage system and the electric work and electric plant, for each of said buildings.

All in accordance with the plans and specifications heretofore adopted and approved by the trustee and advisory board of said township which plans and specifications are now on file in the office of said trustee and in the office of the State Board of Trustees of the State of Indiana.

Said Metamora School Building in District No. One to be a two story structure and the one in District No. Two to be a one-roomed frame building, both with basements. District No. One building to be located on lands now owned by J. C. Gordon, in Section 36 in said township, and District No. Two on lands now owned by C. C. Shaker, in said school district.

The estimated cost of the proposed buildings complete and the purchase of the necessary grounds therefor is \$28700.00. Said bids will be received jointly or separately for the construction of said buildings. All bids must be in writing on forms prescribed by the laws of

the State of Indiana, and delivered to said trustee on or before the time mentioned herein. Each bid on the general construction of said Metamora School in District No. One shall be accompanied by a certified check of the bidder in the sum of \$500.00, and for the one-roomed school building in District No. Two, by a certified check of the bidder in the sum of \$300.00, all other bids for heating and ventilating system, plumbing and sewerage system, electric work and electric plant by a certified check of the bidder in the sum of \$200.00, for each item bid on therein.

These certified checks to be held by said trustee as a guarantee of good faith by the bidder and that he will enter into a contract and execute a bond for the full amount of his bid, approved by the Trustee and Advisory Board, for the due performance thereof, if his bid be accepted. The checks of the unsuccessful bidders will be returned to them when the contracts are awarded and entered into. Should the successful bidder fail to enter into such contract to execute said bond, he shall forfeit said certified check as liquidated damages for the use and benefit of said township. The plans and specifications may be examined at the office of said trustee or at the office of Karl P. Henkel, Architect, 108-110 Heinemann Bldg., Connerville, Ind. A deposit of \$15.00 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of said architect, which amount will be returned in full provided the same is returned on the day of the letting and a bona fide bid is submitted by the contractor. Should the bidder fail in one requirement only the sum of \$5.00 only shall be returned to him, but should he fail in the observance of both conditions, he shall forfeit the whole amount of said deposit. Each bidder shall endorse or stamp his name on the back of the drawing or cover of the specifications used by him in preparing his proposals. Said bids or proposals will be considered jointly and severally, and will be let to the lowest responsible bidder, who upon the award of a contract, shall give a bond to the approval of the Trustee and Advisory Board, for the benefit of any person, firm or corporation, who shall suffer any loss or damage by reason of such bidder failing or neglecting to perform the work awarded him by such Trustee, and to pay for all labor and materials furnished him or any of such contractors in the construction of said work. The trustee reserves the right to reject any and all bids.

Dated this 22nd day of May, 1923.

LOUIS R. FOSTER, Trustee Metamora School Township, Franklin County, Indiana.
P. O. Address, Metamora, Ind.
GEO. R. FOSTER, Atty.,
Metamora, Indiana.

May 26, June 2-9, 1923.

COUNTY HOSPITAL NOTICE TO CONTRACTORS

Notice is hereby given that the Board of Trustees of the Morgan County Memorial Hospital, Martinsville, Ind., will receive sealed proposals for the improvement of a certain hospital in said county as set out in the plans and specifications now on file at the office of the auditor of said county, by and under the laws of the State of Indiana. Said sealed proposals will be opened and the contract awarded for said improvement on the second day of July, 1923.

Bids or proposals will be received up to 2 o'clock p. m. on said date.

Bids are to be submitted as follows:

First—For the construction of the building (general contract).

Second—For the installation complete of heating and ventilating system.

Third—For the installation complete of plumbing, gas and sewer work.

Fourth—For the installation complete of electric.

Fifth—Or for any combination of the above.

Said hospital to be improved is located in Washington Township in Morgan County, Indiana, and is to be known as the Morgan County Memorial Hospital when so improved.

Bids will be for the completion of the said improvement in accordance with the plans and specifications in the office of the auditor of said County, and shall include all labor and material for said work. In no case will extra compensation be allowed for any additional work alleged to have been done by the contractor or contractors to whom is awarded the contract.

Each bid shall be accompanied by a personal or surety bond in a sum equal to the amount of the bid filed for the work bid on, to be approved by the Board of Hospital Trustees of said County. Said bonds shall be conditioned for the faithful performance of the work; the sureties, if personal, shall be resident freeholders of the State of Indiana, one of whom shall be a resident of Morgan County.

Said bond shall be for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of such bidder failing or neglecting to enter into contract or neglecting to enter into contract to perform such work awarded by the Board of Hospital Trustees, or to carry out the same in any particular or to pay for any labor or material which may have been furnished to any such Contractor or Contractors or to any subcontractor, agent or superintendent under him, in the construction of said work.

Said improvement will be let as a whole to the lowest responsible bidder upon affidavit of noncollusion, which must be submitted with the bids and upon failure to submit such affidavit such proposal or bid will be rejected by the Board; and the Board reserves the right to reject any and all bids. Time for completion of said work will be agreed upon after the letting of said contract by said Board of Hospital Trustees and successful bidder.

Given by the order of the Board of Hospital Trustees, Morgan County, Indiana.

May 12-19-26, 1923.

ORPHANS' HOME. NOTICE TO CONTRACTORS

The Board of Commissioners, County of Madison, State of Indiana, will until 10 o'clock A. M., June 21, 1923, receive sealed proposals for the construction of a two story brick and concrete building to be used as an Orphans' Home, according to the plans and specifications duly adopted by said Board and now on file in the Auditor's office at the Court House in Anderson, Indiana.

All bids to be made out on blanks furnished by the Auditor and accompanied by a good and sufficient bond, in a sum equal to the amount of the bid submitted. All bids will be opened and inspected at the office of the Board of Commissioners at the Court House, Anderson, Indiana, at 10 o'clock A. M. on the 21st day of June, 1923.

Bids to be submitted and received as follows:

First—General contract including the memorial arch forming the entrance to the Orphans' Home grounds, plans, and specifications for which are

SCHOOL HOUSE.

NOTICE TO CONTRACTORS.

Notice is hereby given that sealed bids will be received by the undersigned, Trustee of Adams School Township, Carroll County, Indiana, at his office in said township, county and state, until one o'clock P. M. on

SATURDAY, JUNE 2, 1923

for the furnishing of all materials and labor for the building, erection and completion of a one-story and basement brick school building in and for said township according to plans and specifications on file in my office.

Said building to be erected on a plot of ground in section No. thirteen (13).

Each bid to be accompanied by a certified check in the sum of \$500.00 payable to T. O. Peterson, trustee, as a guaranty that the bidder to whom contract is awarded will enter into written contract and provide bond within ten days after notice that contract has been awarded him, and upon failure to so do, the proceeds of this check to become the property of the above named township.

At the same time and place, sealed bids will be received for the heating and ventilation for said building, bid to be accompanied by a certified check in the sum of \$200.00, payable to T. O. Peterson, trustee, conditioned as for general contract.

At the same time and place, sealed bids will be received for the plumbing and water supply in said building, bid to be accompanied by a certified check in the sum of \$200.00, payable to T. O. Peterson, trustee, conditioned as for general contract.

At the same time and place, sealed bids will be received for the electrical work in said building, bid to be accompanied by a certified check in the sum of \$200.00, payable to T. O. Peterson, trustee, conditioned as for general contract.

Separate bids will be received for each of the above contracts, but a joint bid may be made on any or all of the last three named

Plans and specifications for the use of individual bidder may be had from the trustee, or the architect, Samuel Young, Monticello, Ind., upon a deposit of \$10.00 for general plans, and \$5.00 each for heating and ventilation, plumbing and water supply, and electrical work, all of which will be returned upon return of plans and specifications on or before date of letting of contract.

The estimated cost of said building is \$35,000. The right is reserved to reject any or all bids.

T. O. PETERSON, Trustee,
Adams School Township,
Carroll County, Indiana.

Attorney.

Dated May 10, 1923.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given, that the undersigned, Trustee of Washington Township and ex officio Trustee of Washington School Township of Delaware County, Indiana, at the office of the Trustee in the Town of Gaston, in said Washington Township, Delaware County, Indiana, in conjunc-

tion with the members of the Advisory Board of said township, up until the hour of 2:30 p. m. on Saturday, June 16, 1923, will receive sealed bids for the erection and construction of a new addition to and the remodeling of a School Building in the Town of Gaston, in School District No. 10, in said Washington Township, Delaware County, Indiana, and being a two-story brick school building and addition to be erected and constructed upon the present site belonging to said School Township, and to be erected and completed according to the plans and specifications now on file in the office of the Trustee of said township and in the office of Charles W. Taylor, Architect, 206 Maxim Building, in the City of Newcastle, Indiana.

Bids will be received for the erection and construction of said work and building complete according to said plans and specifications.

All materials in such old building that is in first-class condition and subject to the approval of the Architect or Superintendent of Construction can be used in the new building as provided in said plans and specifications.

The estimated cost of such construction is approximately \$62,000.00, including new heating, plumbing, lighting, ventilating and drainage systems.

Bids will also be received on a new steam heating, ventilating and plumbing system according to the plans and specifications and shall be received separate from the general contract. Each bid must be sealed and accompanied with a certified check for the sum of 3% of the contract price, payable to the Trustee of Washington School Township, to be held by him as liquidated damages in case the successful bidder fails to enter into contract.

Each contractor will be required to furnish a bond in the amount of his bid conditioned for the faithful performance and execution of his contract and the payment for all work and labor done and performed in and about such work and all materials that may enter into the construction of said building and work, or any part or portion thereof and subject to the approval of said Trustee and Advisory Board of said township. That said bond, if a personal bond, shall be signed by at least one freehold surety resident in the County of Delaware, in the State of Indiana, but a surety bond signed by a Surety Company will be preferable.

Each bid shall be filed on Form Ten as prescribed for bidders by the State Board of Accounts and to be legally sworn to as required by law and each bid and bidder shall in all things comply with the requirement of the law relating to the letting of contracts under the Act of the General Assembly of the State of Indiana entitled "An Act concerning Town and Township Business" approved February 27, 1899, and all acts supplemental thereto and amendatory thereof.

The said work and all of the same is to be done subject to the approval of the Architect and the Township Trustee and also subject to the approval of the State Board of Health.

The right to reject any and all bids is reserved.

The successful bidder will be required to commence and complete the work without delay and under the supervision of the architect, and will be required to enter into a contract in writing according to law.

Dated at Gaston, Ind., May 22, 1923.

HENRY M. LONG,

Trustee of Washington Township, Delaware County, Indiana, and ex officio Trustee of Washington School Township of Delaware County, Indiana.

CLAUD LEACH,
JOHN W. GILMER,
EVERETT E. CLOCK,
Advisory Board.

Francis A. Shaw, Attorney.
May 26, June 1, 9, 1923.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that until the 15th day of June, 1923, the undersigned, Jesse F. Phillippi, as Trustee of Eagle Civil and School Townships, Boone County, Indiana, and the Advisory Board of said Eagle Township, will receive sealed bids for the construction and completion of a new two-story and basement, brick, grade school building, and also for the construction and installation of heating and ventilating, plumbing and water supply system therefor, and electric wiring and bell system therefor and therein, for the use of said school township. All in accordance with the plans and specifications heretofore adopted and approved therefor by the said Trustee and Advisory Board, which are on file in the office of said Trustee located on Meridian Street in the Town of Zionsville, said Township, County and State. Copies of said plans and specifications also may be seen at the office of the Indiana State Board of Accounts at the State House in the City of Indianapolis, Indiana, and at the office of The Elmer E. Dunlap Company, the architect, at 1050 North Delaware Street, Indianapolis, Indiana. Bidders desiring duplicate copies of the plans and specifications may obtain same by a deposit of \$25.00 to cover return in good condition of the general construction documents, not later than the day of letting contract.

The estimated cost of the entire work is \$90,000.00.

All bids must be on Form 96 prescribed by the State Board of Accounts and the same will be received at the office of the said Trustee up to two o'clock in the afternoon on said date, at which time and place said bids will be publicly opened and read and the letting of said contract will begin, subject, however, to all rights of said Trustee and said Advisory Board, as provided by law, and as herein set forth.

Bids may be submitted for the general construction of said building and separate bids may be submitted for (1) heating and ventilating, (2) plumbing and water supply, (3) electric wiring and bell system, or any one or all of the same. The contract will be awarded in such manner as to be the best interest of said School Township. Each bid must be accompanied by a certified check for not less than three (3) per cent of the gross bid submitted, payable to said Trustee who shall have the right to cash the check of the successful bidder and the money so obtained by said Trustee shall be retained by him as liquidated damages in event said bidder fails, within ten (10) days after acceptance of his bid, to execute a contract in the form and with the provisions desired by said Trustee and approved by said Advisory Board, covering the construction and completion of said work, and at the same time to deliver to said Trustee a good and sufficient bond, in an amount and with security to be approved by said Trustee, conditioned as required by law.

The right is expressly reserved by said Trustee and said Advisory Board to reject any and all bids and to take reasonable time to investigate both the bids and the qualifications of the bidders. Dated this the 24th day of May, 1923.

JESSE E. PHILLIPPI,

As Trustee of Eagle Civil and School Township, Boone County, Indiana.

NOTEWORTHY EVENT.

Medal Presentation by A. I. A. Attended by Elaborate Ceremonies.

As a fitting wind-up to the most successful annual convention ever held by the American Institute of Architects, a gathering held at Washington, D. C., last week, was the presentation of the Institute gold medal to Architect Henry Bacon, of New York, symbolic of the best architectural execution performed during the year by any member of the profession in the country.

Colorful ceremonies within the shades of Mr. Bacon's great work, the Lincoln Memorial, marked the presentation, which was made by President Warren G. Harding, while a representative gathering of architects from every section of the country looked on.

Standing almost within the portals of the imposing monument dedicated a year ago to the memory of Lincoln, the President paid an expressive tribute to Mr. Bacon as the one who put into material form, as far as mortal man can, the loving regard of the American people for one of its greatest presidents. After his brief address, Mr. Harding formally presented to Mr. Bacon the medal, which only twice in the past has been awarded by the institute to one of its members.

Impressive as was the presentation, the ceremonies which preceded it were scarcely less impressive and filled with color. Soon after darkness descended on the great granite memorial and the quiet Potomac flowing beside it, a procession representative of the groups which together built the monument passed down alongside the great reflecting pool. Burning torches illuminated the way and cast reflections in the water as the procession passed along, bearing banners denoting that it was composed of architects, painters, sculptors, engineers and members of the building trades and crafts.

Procession Escorts Barge.

The procession in fact was an escort for a barge, decorated in a manner reminiscent of the state barges of olden times and carrying Mr. Bacon and William B. Faville, of San Francisco, presi-

dent of the Institute. Arriving in the lagoon in front of the memorial, the occupants of the barge disembarked and were received by Chief Justice Taft, chairman of the Lincoln Memorial Commission, who presented Mr. Bacon to President Harding.

In his address of presentation, the President said Mr. Bacon and those who worked with him had reared a "structure whose dignity and character have won it rank among the architectural jewels of all time."

"It is not for me to speak knowingly of art or architecture," Mr. Harding said, "but I am very sure I do not err when I assume that no man could have seen in his mind's eye the vision of this supremely appealing structure, or could have conceived it as the most appropriate memorial to the life and work of Lincoln, unless he was so fortunate as to sense the genius, the character, the simple aims and unquestioning integrity which were the dominant traits of the emancipator."

Part of Nation's Debt.

"It is part, and a great part, of the debt which, as a nation, we owe to Lincoln, that because of his service and devotion we are a nation capable of bringing forth such genius in conception, such capacity for realization, as are here attested. The place of Lincoln in the affections of our people has no doubt been determined in large part by that idealism which cynics are wont to call sentimentalism, but which is so vital a factor in the national character."

"We may readily enough convince ourselves that Lincoln, the Lincoln of flesh and blood and human emotions, if he could view this memorial, would find his chiefest satisfaction, not in the recognition which it bespeaks for him, his life and his labors, but in the thought that the nation he loved and served has vindicated his aspirations for it, by bringing forth such a proof of lofty aim and of capacity for achievement. For that, after all, is the thing which is memorializing in this nobility of design, this purity of detail, this perfection of execution."

Lincoln's Place Secure.

"Lincoln occupies a place secure in the moral forces of the ages. He occupies

because he was at once instinct with recognition of eternal truths, and able to enlist us of commoner clay in behalf of his highest purposes. His was the genius of the architect, the talent of the draftsman, the industry and resourcefulness of the builder. His was the faith and confidence of all them combined. From every viewpoint he is typified in this triumph of the constructive arts.

"Here are typified the qualities which made Lincoln at once the dreamer and the doer, the designer and the builder. That so much of sturdy greatness and of modest beauty have here been brought together is proof that the high inspiration of his life had touched all whose labors contributed to this consummation. Surely, as we survey it, we may hope that, in building the institutions of the nation which Lincoln saved, there may be a like fidelity to the ideals which guided him. Each and every one of those which were planned and built have helped to carve an admonition to such fidelity, such devotion, such faith, as that which showed the way to the great emancipator."

ARCHITECTURAL ORGANIZATIONS OF INDIANA SENT DELEGATES TO A. I. A. CONVENTION.

Both Chapter and Society Represented.

Indiana was on hand at the A. I. A. Convention at Washington, D. C., last week. Architects F. S. Cannon, R. F. Daggett and Herbert Foltz, Indianapolis, represented the Indiana Chapter, A. I. A., while A. F. Wickes, Gary, represented the Indiana Society of Architects.

NEW ARCHITECTURAL OFFICE AT SOUTH BEND.

Willard M. Elwood, South Bend, for some time architectural and structural engineer with H. G. Christman Co., general contractors, that city, has resigned and announces the opening of an office for general architectural practice at 204-206 Russell Bldg., 220 W. Jefferson St. He will be pleased to receive catalogues and building material samples.

EVANSVILLE BUILDING OPERATIONS HOLDING TO GOOD DEGREE OF ACTIVITY.

Much Work In Progress.

So far the slow down in building activity reported from some sections has not made itself felt perceptibly in Evansville, though it is not entirely unexpected by some building men at a later date if costs continue to hold at the present level or show a further tendency to mount.

The city was behind, and still is, in its building requirements and it has been that demand that has forced the unusual activity that has prevailed locally all spring.

The new work of all descriptions under way is showing satisfactory progress and is being hurried along without interruption thus making room for additional projects that are continually pushing themselves to the fore.

Local architects are busy on new plans and are constantly calling upon the contractors for a steady flow of estimates, while a fair share of contracts are being awarded.

House construction still rules active, the estimated valuations covering a wide range from the modest modern home to the more pretentious residences.

Taken all in all the building construction business that is being transacted in Evansville this season was never better.

DEMAND UPON LABOR FOR BUILDING OPERATIONS HAS TAKEN UP ALL THE SLACK IN THE SUPPLY.

Shortage Now Being Felt.

The activity that has seized upon building circles in the Evansville and southwestern Indiana district has levied a heavy demand upon the available labor supply and things have reached the stage where a shortage is beginning to make itself felt. Practically every able bodied man who is capable of handling building tools in any craft need not wait for employment. In fact, there don't appear to be an idle building mechanic in "the Pocket."

As in other localities there is a scarcity of brick-layers and plasterers due to the fact that the ranks of these crafts are limited and few apprentices have been taken on in late years. Some folks blame the Unions, others the contractors, for such conditions and yet more liberal minded men of experience attribute the shortage of apprentices to the youths themselves. It may be a rather severe indictment but contractors who have endeavored to encourage the boys to take up the work say that experience has shown theme that the attitude of many of the boys is adverse to the hard work entailed and the working conditions. Some contractors allege that the boys seem to fear the fact that they may get a little dirty. Be these things as they may the promise of a good wage upon the attainment of skill seems to fail to attract the boys.

BRICK MEN TO GATHER AT EVANSVILLE IN JUNE.

The Indiana and Illinois division of the American Face Brick association will meet in Evansville, Monday, June 1, at the Hotel McCurdy. This will be the first time the association has met in Evansville. A visit will be made to Evansville brick making plants. A superintendents' meeting will be held in conjunction with the regular meeting.

TAKEN AS A MATTER OF FACT.

Large Building Volume Through Continued Repetition No Longer Attracts As it Once Did.

One is inclined to wonder if people really appreciate what a million dollars' worth of building means in the life of a city the size of Ft. Wayne. Construction operations have run so to enormous volumes that, in speaking of building, "A Million Dollars" is more or less just a trite remark. Strange as it may seem, such references do not entail exaggeration either.

It is not so long since that a total of \$1,000,000 worth of building for a single month was a noteworthy event in Fort Wayne. It excited much more than passing comment and was really a noteworthy achievement.

It was cited, with a sort of bated breath, as indisputable proof of the progress of the city. And it was and is, but, the feature has been lost in that it has become customary for Ft. Wayne to turn in million dollar or close to it, building records almost monthly.

As a means of backing up that assertion here is the city's record for the past sixteen months.

\$15,000,000.

That is, in round figures, what Fort Wayne has done in building since January 1 one year ago.

For every month of the 16 since that date the city has averaged almost \$1,000,000 of construction.

But \$1,000,000 for any single month has ceased to be a seven-day wonder in the city. Such a total pales into relative insignificance when the city has hit such a stride of growth that that figure represents the monthly average over a protracted period of time.

April almost doubled that amount. With a total of \$1,939,275, it was the greatest month in building in the history of the city. It exceeded the March record by more than \$500,000.

No better barometer of the business health of the city could be wished for than this fine building record, nor a finer indication of the substantial growth of the city for it is that health and growth that creates a demand that only building operations can meet.

BUSINESS WENT BIG DESPITE WEATHER INTERFERENCE.

Bank Clearings Reach Good Total.

Although weather conditions were not favorable last week for active business operations, the big Ft. Wayne banks had a good week nevertheless. The clearings for the period amounted to almost as much as they did the previous week. In fact, the clearings of some of the Fort Wayne banks for the week were more than those of the week before.

The report of the clearing house for the week shows the total, \$2,607,485.44 to be more than a half million dollars ahead of the corresponding week last year.

MORE AMUSEMENT.

Plans in Making to Give City a New Movie House.

Ft. Wayne is in line for a new theatre according to a recent announcement that plans have been completed for a \$50,000 motion picture house to be built at the northwest corner of Calhoun and Pontiac streets. James Heliotis and Charles Lambrakis recently acquired the above site for such a purpose.

None this week.

WAIVER OF LIEN.

None filed with Marion County Recorder this week.

INDIANA ACTION TOWARD INTENSIVE BUILDING INDUSTRY CO-OPERATION IN KEEPING WITH EFFORTS OF OTHERS.

New Yorkers Seek to Establish General Blanket Code of Ethics.

Much has been said and done, not only in Indianapolis, but throughout Indiana, toward effecting better co-operation between the Architect and Builder looking to the constructive advancement of the building industry through the institution of fair and just principles, and the creation of a common meeting ground where the problems that beset the industry could be threshed out.

That such action is in line with the progressive thought that is now actuating building men the country over is attested by the efforts being put forth by the New York Building Congress, a branch of the National Congress of the Building and Construction Industry.

The New York body has appointed a committee on codes, composed of representatives of the various groups of business interests connected with the practice of building. This committee was formed for the general purpose of looking into ethical problems in the building industry.

OBJECTS.

The objects of this Committee shall be the carrying forward of the principles embodied in the Code of Ethics already adopted by the Building Congress, and to investigate problems which come before it.

"Ethics" shall be understood to be as defined in the Code of Ethics of the Building Congress as follows:

"The science of right conduct and character—the science which treats of the nature and grounds of moral obligation and of the rules which ought to de-

termine conduct in accordance with this obligation; the doctrine of man's duty in respect to himself and the rights of others."

SCOPE OF WORK.

It shall be the duty of this Committee to look into practices not in harmony with the Code of Ethics, with the view of a better understanding of the underlying principles of the building industry, thus leading to the elimination of methods demonstrated to be detrimental to the interests of the building industry and the public.

The following are examples of the type of subjects which this Committee will investigate, all of which are embodied in the Code of Ethics, and have been subscribed to by the various elements of the industry.

IT IS UNETHICAL:

The Owner.

To endeavor to improperly influence the Architect's or Engineer's decisions as to contract obligations.

The Banker.

To fail to acquaint the borrower with all conditions (especially as to approval of materials and constructions) under which the loan is made.

The Real Estate Broker.

To advise a type of development opposed to the community interest.

The Architect and Engineer.

To act in any other than a judicial capacity in determining contract obligations; or to fail to require full performance equally by Owner and Contractor.

The Contractor.

To fail to recognize his moral obligation to sub-contractors whose bids he has used in making his own proposal.

Sub-Contractors and Material Dealers and Manufacturers.

To knowingly mislead through trade customs or terms, as to the real cost or quality of work or materials, and to mislead as to the time of completion of work or delivery of materials at times that cannot be fulfilled.

Labor.

To increase the cost of building through arbitrary rules limiting the choice of materials or output.

NEW STATE BUILDING COUNCIL TO HOLD FIRST MEETING MAY 28.

Organization The Aim.

The first move toward putting into actual effect the new Administrative Building Council of Indiana Law, passed by the 1923 State Legislature, is to be taken Monday when a meeting will be held Monday, May 28, for the purpose of organizing the new body.

The council will be composed of the chairman of the Industrial Board, the Secretary of the State Board of Health, and the State Fire Marshall, to be known as the administrative committee, and an advisory committee consisting of twelve appointive members as follows: three architects, three engineers, three contractors and three labor men, all members of their respective state organizations and engaged in actual practice and construction. These appoint-

ments are to be made by the administrative committee with the approval of the Governor. The names of the candidates for appointment have been submitted and are to be acted upon at once.

MICHIGAN CONTRACTORS ENLARGE THEIR ORGANIZATION MONTHLY BULLETIN.

All it takes is a little time.

Some months ago the Associated Building Employers of Michigan put a secretary on the job, and then he in turn put a monthly bulletin to work for the organization. It was a snappy little chatter box of four pages covering matters of interest to Michigan contractors.

Came May, also that month's A. B. E., Bulletin, but, it had grown from four to eight pages and it was even more interesting than before.

Congratulations, members of the Michigan Associated Building Employers! Continued growth to you and your paper!

BUILDING PERMITS

NOT OUT OF THE TRENCHES YET.**Labor Battle at Hammond Still
at Issue.**

While no tangible results have been reached in the Calumet District Laborers' wage controversy, nevertheless, the situation is less tense than for the past three weeks. Co-operation among the contractors, aided by a little pressure from the right place, has helped wonderfully.

And 'mid the dead and dying were some grown old in wars,
The death-wounds on their breasts the last of many scars;
But some were young, and suddenly beheld life's more decline,
And some had come from Hammond, Hammond on the line.

**SEEMS SOME DELIGHT IN
TEMPTING FATE.****Calumet District Bending to the Stress
Put on Building.**

Even the Calumet District has felt the slowing down process that has been applied to the wheels of the building construction train. There were several industrial plants in that section that had extensive building projects in contemplation, but, when estimates were made the owners, after some difficulty, recovered their health from the unexpected blow dealt them and tossed the sponge in the ring and quit cold.

At present much of the Calumet volume of building consists of speculative home construction work, and if this is impeded by those who make a practice of financing such projects, look out for a decided slump. Such a break at this time would be a serious one for the district, as there are no vacant houses and the storage houses are full of furniture belonging to new citizens who have moved in, found no houses, and have been forced to room. A surcease of home construction will throw things back again as just after the Great War and it will take years again to catch up. Should such conditions come to pass the damage done can be attributed to those short-sighted men who were obsessed of the idea of getting all they could and even more, too, while the getting was good. There is just so much elasticity to all business conditions, much as in a rubber band, nor is the building industry immune, stretched beyond a certain point there is bound to be a break. Building affairs have not snapped yet, but it would seem they were mighty close to that point.

**ONE OF THE BIG FELLOWS
STOPPED IN TO SAY "HELLO."**

A. W. Dickson, Executive Secretary of the National Building Trades Employers' Association, dropped in unannounced Saturday forenoon, May 19, at the Calumet B. T. E. A. headquarters, a visit most pleasant and informative.

CALUMET BUILDING PROGRESS.

Architects J. T. Hutton & Son, Hammond, are preparing plans for a \$250,000 Masonic Temple to be built at Gary. Estimates from contractors will be asked about June 15.

The contractor who has the moving of the high school building expects to have it in shape to start on its journey about the 25th. There is a great deal of interest and speculation among the people who are watching the proceedings as to the success of the venture. It is something new to see a building so large moved to another site.

The architects report a slackening up of inquiries for plans. While some tentative sketches are being made, the demand has dropped off considerably owing to high prices.

ONE SORT OF A REMEDY.**New Antidote Proposed.**

They had all been talking over the building situation, every man was a contractor well up in the business with years of experience behind him. All admitted they had seldom seen such a promising year as 1923 seemed destined to be, and the hope was expressed that nothing untoward might occur to mar the prospects.

These men were optimists by nature, but not foolish optimists; they believed in calling a spade a spade, and sticking to facts. Despite their hope they did not allow it to deceive or cause them to ignore the dangers that a good strong building boom might entail. As a result, their discussion turned to mounting construction costs and, as against that, their inability to hold their estimates down to where prospective owners had been led to believe figures should be. The mechanic's demand for more wages, and the material manufacturer's increased quotations for his wares were forces against which the contractor was powerless and, in his estimating, all agreed, he was swept along on the rising tide. How to stem that tide was the question.

Then a man wise in the whys and wherefores of contracting spoke up, his auditors smiled at first, then grew serious, and though sensing the peril of such logic admitted the truth of it.

He said, "Put an end to this uncertainty. It would be a drastic measure, but there are those who must be brought to their senses. Sometimes it takes more than reason to cause some men to think. Take all wage scales at a certain figure and boost them 25 per cent, those above the first level and tilt them another 25 per cent, then add a fixed per cent to all present material prices—"

"But—" chipped in some of the men. "But, nothing," spoke up the first speaker, "there are no buts, such inflations will create a convulsion and put the whole crowd out of its misery. That accomplished, readjustments can be made with sanity."

The above remedy was suggested weeks ago, in the meantime pyramiding has gone right on, and from the symptoms appearing about they were dangers appearing about the country it looks as if the convulsion has set in.

Some may claim this is of a pessimistic vein, but, no. Optimism is the doctrine or view that everything in nature and history of mankind is ordered for the best, the order of things in the universe being adapted to produce the highest good. Who can say that that which is now transpiring in the building field will not work to the good of the industry in the end?

**RUMBLE OF THE STORM STILL
TO BE HEARD.****Carpenters Break Over the
Horizon Now.**

One hears, has heard, much about devastated France; but how about the devastated building fields of the United States? Maybe the latter is a little strong, but, unless some sort of a halt is called, it does seem that there are forces at work set upon devastating a sphere that is one of the best producers of livelihood in this country. And speaking of France, is not the situation in the U. S. somewhat an outgrowth of the war. Some people seem to have gone money-mad; they want it, they cry for it, they seem determined to have it, regardless.

Such tactics have been frowned upon by discerning men of the building industry who have set the semaphore against this headlong dash of greed, and yet, the very men who would protect not only the industry but those who are dependent upon it, are being ignored week after week by those who would seek to get by even though a crash was imminent.

In the face of all that has been said and done in an effort to avoid a jam up of building affairs, the word has just come out of Chicago to this effect:

"Unless Chicago contractors and carpenters accede to the demands of workmen and establish a \$1.25 hourly rate for carpenters after June 1, a nation-wide strike of the 400,000 union carpenters is likely, Harry Jensen, president of the Carpenters' District Council here, declared Monday.

"Announcement had been made of advancement to \$1.15 from the \$1 hourly award of Judge Landis made last year. Carpenters who have been free to work or not under the Landis award will demand the \$1.25 rate after June 1, Jensen said, adding that Chicago sets the scale for the nation."

Entered as second class matter August 29, 1919,
at the Post Office at Indianapolis, Indiana, under
the Act of March 3, 1879.

ACTION STARTED TO PUT NEW IN- DIANA BUILDING LAW INTO OPERATION.

Administrative Committee Organizes and Recommends Advisory Appoint- ments to the Governor.

In accordance with the provisions set forth in the recently enacted Administrative Building Council of Indiana Law the administrative committee met Monday, May 28th at the State House and organized by naming Dr. W. F. King, Secretary of the State Board of Health, Chairman, and Judge Samuel D. Artman, Chairman of the State Industrial Board, Secretary. Newman T. Miller, State Fire Marshal, is the other member of the committee.

The law also calls for an advisory committee, to be composed of three architects, three engineers, three contractors and three building trades mechanics, said committee to be appointed by the administrative committee and approved by the governor. The members of the advisory committee are to serve one each from each organization for various periods ranging from, two, to three, and four years, and the law specifically states that these men must be representative of the building industry and engaged in actual practice and construction, and further, they must be members in good standing in the following organizations, Indiana Society of Architects, Associated Building Contractors of Indiana, Indiana Engineering Society, and jointly the Indiana State Building Trades Council and the Indiana State Council of Carpenters.

The appointments to the advisory

committee made Monday and sent to the governor for approval are:

4-Year Term.

Dewitte Moore, Indianapolis, Engineer.

Fermor S. Cannon, Indianapolis, Architect.

Wm. F. Wilson, Indianapolis, Building Trade Mechanic.

Walter W. Wise, Indianapolis, Mason Contractor.

3-Year Term.

Wm. H. Knapp, Lafayette, Engineer.

M. H. Johnson, Jr., Terre Haute, Architect.

Chas. B. Sims, Indianapolis, Building Trades Mechanic.

O. A. Toelle, Terre Haute, Plumbing Contractor.

2-Year Term.

Clifford Shopbell, Evansville, Engineer.

Robert Frost Daggett, Indianapolis, Architect.

Charles D. Kern, Indianapolis, Building Trades Mechanic.

Max Irmscher, Ft. Wayne, General Contractor.

Building Trades Employers' Association,
Calumet District.

Why play with fire? It is dangerous business; one who does, at some time or other, is most liable to get burned.

One who is in a position to know, William J. Burns, head of the Federal Bureau of Investigation, reports that the Red Government at present in power in Russia is directing a studied campaign in the United States for the ultimate overthrow of our government. He says that the Soviet agents have caused the distribution of countless circulars advising American workers to engage in mass action against the government. He further advises that several schools for the teaching of radicalism have been established with Soviet money. He states that there is a well organized plot to get Red agents into the army and navy, and that there are six hundred and eleven radical publications doing their best (one might say worst) in the United States.

So far in this country the followers of

the communist idea haven't done much else but talk, but in Europe the Red glare is a real menace. However, with regard to our country, the unsettled conditions that prevail, together with the fact that the radical elements are becoming more bold and are forging to the front, make it appear that it is about time for some drastic action to snuff out the creeping, crackling, burning danger unless we would experience the same conditions that have made shambles of Russia.

How long will the government stand for the insidious, dirty, trickery that that foreign element would perpetrate upon the American workman to tear from him the fruits that earnest endeavor since 1776 has sought to bestow upon him. With all the evidence at hand it does look as if the powers that be at Washington should decide upon some definite action to curb the efforts of those who would destroy the institutions that have made life worth the living to American wage earners.

GENERAL EXPANSION.

South Bend Building Forces Extension of Business Districts..

E. H. HYMAN, Secretary
South Bend Builders' Exchange

South Bend still continues to climb in the building line. Now comes forth the plans for another half million dollar structure on Michigan St., corner of Colfax, where the old Exchange Block was burnt August 13, 1922. This vacant property has long been an eyesore and now it will be replaced with a ten-story building, which will be built by the Poledor Brothers, candy manufacturers. Freyermuth & Maurer are the architects.

The city is rapidly stretching out in her business center. It is safe to predict that within two years it will expand west on Colfax Ave., Washington Ave. and Jefferson Boulevard and on North Main street. The Realtors of South Bend predict that the business district will be one-third larger in that length of time. The impetus for carrying business north of LaSalle Ave. was the selection of the site for the new Masonic Temple, which will occupy a half block on north Main street. H. G. Chrisman Co. of South Bend was awarded the contract for the construction of the \$2,000,000 foundry for the Studebaker Corporation. It has been announced last week that construction

work on this mammoth foundry will start at once, and will be rushed to early completion. The plant will have a capacity of 180 tons of casting per eight-hour day. Cupolas and other equipment have been so arranged that this amount can be increased to 240 tons per day. The building will be 720 feet long by 680 feet wide with upper floors and mezzanines. It will contain 570,000 square feet or 13 acres of floor space. It will be equipped for the production of 45,000 pounds of casting per hour, or a total of 544,000 pounds per eight-hour working day.

A splendid business block is just now being completed opposite the Masonic Temple by Thd. M. Talcott, and there is still another to go up immediately, which will be built by Ward L. Mack. There is much talk of another building to go up in this vicinity. The Mar-Main Apartment building, a mammoth structure, is nearing completion and this is the cause of the building on property

surrounding this location, where small shops would do well and profit by this location.

DATA BOOK ON CONCRETE BUILDING UNITS ISSUED.

Ready Reference for Files Now Available.

Architects, builders and contractors have long wanted a comprehensive, yet practical, book on the use of concrete building units—a book which would tell how to distinguish well-made units and how to use them.

Such a book has now been published by the Portland Cement Association in "A Manual of Concrete Masonry Construction."

Special attention, in this volume, is directed to the many excellent illustrations of construction details, the tables of manufacturers of block and tile machines, together with shapes and dimen-

sions of units made by them, and the specifications for concrete block and tile and Portland cement stucco.

This 32-page book is of letter size—convenient for filing. Copies may be obtained free by addressing the Portland Cement Association, 111 West Washington Street, Chicago.

INDUSTRIAL SHEET METAL WORK DATA BOOK OUT.

Indianapolis Firm Issues Reference Book for Architects and Contractors.

An interesting catalogue, from a data and information standpoint, covering sheet metal specialties and complete pneumatic systems for various purposes, has just been issued by the Tarpenning-La Follette Co., engineers and sheet metal contractors, Indianapolis.

This booklet of Standard A. I. A. file size should appeal to architects and contractors, and is now available for distribution upon application.

News of the Week

The asterisk (*) prefix to an item indicates additional information to report published in previous issue.

INDIANAPOLIS.

Club House: \$1,000,000. Archt., Rubush and Hunter, 428 American Central Life Building. Owner, The Columbia Club, Monument Circle. Plans nearing completion, ready for bids soon. Bedford stone.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, a publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

ST. MARY'S CATHOLIC SCHOOL. NOTICE TO CONTRACTORS.

Notice is hereby given that the Trustees of Saint Mary's Catholic Parish of Decatur, Ind., will receive sealed bids, at the Saint Mary's Catholic School building in the City of Decatur, Indiana, on Friday, June 22, 1923, up to two o'clock p. m. on said day for the furnishing of all material and performing of all labor necessary to erect and complete a new school building according to the plans and specifications made and furnished for this work by Herman J. Gaul, architect, 228 East Superior St., Chicago, Ill., which plans and specifications are on file with Chas. N. Christen, Decatur, Ind.

Notice is also given that at the same time and place sealed bids will be received for furnishing all material and performing all labor in strict compliance with said plans and specifications for each of the following items separately or for any two or more of said items jointly, to-wit:

Item No. 1—For the erection and construction of said building excluding the heating and ventilating plant, system and apparatus; the plumbing for water and sewerage system; the electric wiring.

Item No. 2—For the installation of the heating and ventilating plant, system and apparatus.

Item No. 3—For the plumbing, water system and sewerage.

Item No. 4—For the electric wiring.

The right is reserved to reject any or all bids and also to accept bids for the whole of said work or in parts as set out above.

Each bidder shall deposit with his bid a certified check equal to two per cent of his bid, which check shall be made payable to C. S. Niblick, treasurer, as a guarantee that the said bidder will, if awarded the contract, enter into a contract and file a bond equal to his bid, which bond shall meet the approval of the said trustees. Said bond and contract shall be made and filed within ten days after said bidder is notified that he has been awarded the contract.

All communication relative to plans and specifications shall be addressed to Chas. N. Christen, Decatur, Ind.

Estimate cost of building, \$200,000.

TRUSTEES OF ST. MARY'S PARISH,
Decatur, Indiana.

June 2nd-June 9th.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that on the 2nd day of July, 1923, at the temporary Lodge Avenue School House on Green River Road, in Knight Township, Vanderburgh County, Indiana, the undersigned trustee of Knight Township, Vanderburgh County, Indiana, in conjunction with the Advisory Board of said Knight Township, will receive sealed bids for the furnishing of all labor and materials for the construction and installing of all wiring in said school building, and will also receive bids for the furnishing of all labor and material for the construction of the heating plant. Said wiring and said heating plant to be installed in the brick building that is to be built in said township and which is known as the Lodge Avenue School. Said work to be done in accordance with the plans and specifications now on file in the office of said trustee, R. R. 4, Newburg, Indiana, and in the office of Alfred E. Neucks, architect, 516 Peoples Bank Building, Evansville, Indiana. Said bids will be received up to 8 o'clock p. m., of said 2nd day of July, 1923.

Said trustee, in conjunction with said Advisory Board, will examine said bids and award the contract for said construction to the lowest and best bidder therefor; and the successful bidder will be required to enter into a written contract with said school trustee for the furnishing of all labor and materials for the construction of said wiring and heating in accordance with said plans and specifications and to give bond with surety to be approved by said school trustee, for the faithful performance of said contract.

Each bidder will be required to submit a certified check in an amount equal to three per cent of the bid submitted, said check to be forfeited to the township trustee in the event that the successful bidder refuses or fails to enter into a proper contract with proper surety.

The school trustee and Advisory Board hereby reserve the right to reject any and all bids.

FRED MANN,
Trustee of Knight School Township,
Vanderburgh County, Indiana.

A. C. STONE,
Atty. for Trustee.
June 2, 1923.

SCHOOL HOUSE. NOTICE TO CONTRACTORS.

Notice is hereby given that Metamora School Township, Franklin County, Indiana, by Louis R. Foster, trustee of said township and the Advisory Board thereof, will receive sealed bids at the office of said trustee in the Directors' Room of the Farmers Bank, in the town of Metamora, Metamora Township, Franklin County, Indiana, on

TUESDAY, JUNE 19, 1923,

at 1:00 o'clock P. M. of said day, for the construction of a new joint elementary and high school building at the town of Metamora, in District No. One for the accommodation of all pupils of school age residing in said District No. One, and District No. Three, in said township and for the construction of a new one-roomed school building known as the Elm Grove School in District No. Two in said township, for instruction in the elementary branches of study, and at the same time and place bids will also be received for the installation of the heating and ventilating system for said buildings; the plumbing and sewerage system and the electric work and electric plant, for each of said buildings.

All in accordance with the plans and specifications heretofore adopted and approved by the trustee and advisory board of said township which plans and specifications are now on file in the office of said trustee and in the office of the State Board of Accounts of the State of Indiana.

Said Metamora School Building in District No. One to be a two story structure and the one in District No. Two to be a one-roomed frame building, both with basements. District No. One building to be located on lands now owned by J. C. Gordon, in Section 36 in said township, and District No. Two on lands now owned by C. C. Shaker, in said school district.

The estimated cost of the proposed buildings complete and the purchase of the necessary grounds therefor is \$28700.00. Said bids will be received jointly or separately for the construction of said buildings. All bids must be in writing on forms prescribed by the laws of the State of Indiana, and delivered to said trustee on or before the time mentioned herein. Each bid on the general construction of said Metamora School in District No. One shall be accompanied by a certified check of the bidder in the sum of \$500.00, and for the one-roomed school building in District No. Two, by a certified check of the bidder in the sum of \$300.00, all other bids for heating and ventilating system, plumbing and sewerage system, electric work and electric plant by a certified check of the bidder in the sum of \$200.00, for each item bid on therein.

These certified checks to be held by said trustee as a guarantee of good faith by the bidder and that he will enter into a contract and execute a bond for the full amount of his bid, approved by the Trustee and Advisory Board, for the due performance thereof, if his bid be accepted. The checks of the unsuccessful bidders will be returned to them when the contracts are awarded and entered into. Should the successful bidder fail to enter into such contract to execute said bond, he shall forfeit said certified check as liquidated damages for the use and benefit of said township. The plans and specifications may be examined at the office of said trustee or at the office of Karl P. Henkel, Architect, 108-110 Heinemann Bldg., Connersville, Ind. A deposit of \$15.00 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of said architect, which amount will be returned in full provided the same is returned on the day of the letting and a bona fide bid is submitted by the contractor. Should the bidder fail in one requirement only the sum of \$5.00 only shall be returned to him, but should he fail in the observance of both conditions, he shall forfeit the whole amount of said deposit. Each bidder shall endorse or stamp his name on the back of the drawing or cover of the specifications used by him in preparing his proposals. Said bids or proposals will be considered jointly and severally, and will be let to the lowest responsible bidder, who upon the award of a contract, shall give a bond to the approval of the Trustee and Advisory Board, for the benefit of any person, firm or corporation, who shall suffer any loss or damage by reason of such bidder failing or neglecting to perform the work awarded him by such Trustee, and to pay for all labor and materials furnished him or any of such contractors in the construction of said work. The trustee reserves the right to reject any and all bids.

Dated this 22nd day of May, 1923.

LOUIS R. FOSTER, Trustee Metamora School Township, Franklin County, Indiana.
P. O. Address, Metamora, Ind.
GEO. R. FOSTER, Atty.,
Metamora, Indiana.

May 26, June 2-9, 1923.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given, that the undersigned, Trustee of Washington Township and ex officio Trustee of Washington School Township of Delaware County, Indiana, at the office of the Trustee in the Town of Gaston, in said Washington Township, Delaware County, Indiana, in conjunc-

tion with the members of the Advisory Board of said township, up until the hour of 2:30 p. m. on Saturday, June 16, 1923, will receive sealed bids for the erection and construction of a new addition to and the remodeling of a School Building in the Town of Gaston, in School District No. 10, in said Washington Township, Delaware County, Indiana, and being a two-story brick school building and addition to be erected and constructed upon the present site belonging to said School Township, and to be erected and completed according to the plans and specifications now on file in the office of the Trustee of said township and in the office of Charles W. Taylor, Architect, 206 Maxim Building, in the City of Newcastle, Indiana.

Bids will be received for the erection and construction of said work and building complete according to said plans and specifications.

All materials in such old building that is in first-class condition and subject to the approval of the Architect or Superintendent of Construction can be used in the new building as provided in said plans and specifications.

The estimated cost of such construction is approximately \$62,000.00, including new heating, plumbing, lighting, ventilating and drainage systems.

Bids will also be received on a new steam heating, ventilating and plumbing system according to the plans and specifications and shall be received separate from the general contract. Each bid must be sealed and accompanied with a certified check for the sum of 3% of the contract price, payable to the Trustee of Washington School Township, to be held by him as liquidated damages in case the successful bidder fails to enter into contract.

Each contractor will be required to furnish a bond in the amount of his bid conditioned for the faithful performance and execution of his contract and the payment for all work and labor done and performed in and about such work and all materials that may enter into the construction of said building and work, or any part or portion thereof and subject to the approval of said Trustee and Advisory Board of said township. That said bond, if a personal bond, shall be signed by at least one freehold surety resident in the County of Delaware, in the State of Indiana, but a surety bond signed by a Surety Company will be preferable.

Each bid shall be filed on Form Ten as prescribed for bidders by the State Board of Accounts and to be legally sworn to as required by law and each bid and bidder shall in all things comply with the requirement of the law relating to the letting of contracts under the Act of the General Assembly of the State of Indiana entitled "An Act concerning Town and Township Business" approved February 27, 1899, and all acts supplemental thereto and amendatory thereof.

The said work and all of the same is to be done subject to the approval of the Architect and the Township Trustee and also subject to the approval of the State Board of Health.

The right to reject any and all bids is reserved. The successful bidder will be required to commence and complete the work without delay and under the supervision of the architect, and will be required to enter into a contract in writing according to law.

Dated at Gaston, Ind., May 22, 1923.

HENRY M. LONG,
Trustee of Washington Township, Delaware County, Indiana, and ex officio Trustee of Washington School Township of Delaware County, Indiana.

CLAUD LEACH,
JOHN W. GILMER,
EVERETT E. CLOCK,
Advisory Board.

Francis A. Shaw, Attorney.
May 26, June 1, 9, 1923.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that until the 15th day of June, 1923, the undersigned, Jesse F. Phillippi, as Trustee of Eagle Civil and School Townships, Boone County, Indiana, and the Advisory Board of said Eagle Township, will receive sealed bids for the construction and completion of a new two-story and basement, brick, grade school building, and also for the construction and installation of heating and ventilating, plumbing and water supply system therefor, and electric wiring and bell system therefor and therein, for the use of said school township. All in accordance with the plans and specifications heretofore adopted and approved therefor by the said Trustee and Advisory Board, which are on file in the office of said Trustee located on Meridian Street in the Town of Zionsville, said Township, County and State. Copies of said plans and specifications also may be seen at the office of the Indiana State Board of Accounts at the State House in the City of Indianapolis, Indiana, and at the office of The Elmer E. Dunlap Company, the architect, at 1050 North Delaware Street, Indianapolis, Indiana. Bidders desiring duplicate copies of the plans and specifications may obtain same by a deposit of \$25.00 to cover return in good condition of the general construction documents, not later than the day of letting contract.

The estimated cost of the entire work is \$90,000.00.

All bids must be on Form 96 prescribed by the State Board of Accounts and the same will be received at the office of the said Trustee up to two o'clock in the afternoon on said date, at which time and place said bids will be publicly opened and read and the letting of said contract will begin, subject, however, to all rights of said Trustee and said Advisory Board, as provided by law, and as herein set forth.

Bids may be submitted for the general construction of said building and separate bids may be submitted for (1) heating and ventilating, (2) plumbing and water supply, (3) electric wiring and bell system, or any one or all of the same. The contract will be awarded in such manner as to be the best interest of said School Township. Each bid must be accompanied by a certified check for not less than three (3) per cent of the gross bid submitted, payable to said Trustee who shall have the right to cash the check of the successful bidder and the money so obtained by said Trustee shall be retained by him as liquidated damages in event said bidder fails, within ten (10) days after acceptance of his bid, to execute a contract in the form and with the provisions desired by said Trustee and approved by said Advisory Board, covering the construction and completion of said work, and at the same time to deliver to said Trustee a good and sufficient bond, in an amount and with security to be approved by said Trustee, conditioned as required by law.

The right is expressly reserved by said Trustee and said Advisory Board to reject any and all bids and to take reasonable time to investigate both the bids and the qualifications of the bidders. Dated this the 24th day of May, 1923.

JESSE E. PHILLIPPI,
As Trustee of Eagle Civil and School Township, Boone County, Indiana.

NO IGNORING THE FACT.

Society Fulfills Obligation to State
Architects Though Some Fail to
Appreciate its Efforts.

The Indiana Society of Architects as an organization is here to say, having proved its claim to recognition through that which it has accomplished, such is the conviction of the Board of Directors who met recently at Evansville.

Now and then propositions have been advanced that the I. S. of A. be discontinued and its membership be absorbed by the Indiana Chapter, American Institute of Architects. Not long ago just such another suggestion was advanced and created considerable comment. As a result of the suggestion the directors of the society in meeting at Evansville approved the following resolution:

That the Indiana Society of Architects now numbering in its membership over 80% of the architects in the state is fully representative of the architectural profession in Indiana;

That it fulfills a function never undertaken by other similar organizations, by handling problems peculiar to local and State conditions;

That its accomplishments have been noteworthy;

1st. In legislative efforts, as evidenced by the recent success in the passage of the bill providing for a State Administrative Building Council;

2nd. In aiding in securing the approval of the State Board of Accounts to a Standard Form of contract between architect and owner on public building projects;

3rd. In being instrumental in providing the architects of the state with a weekly architectural bulletin, an official page in the Construction Recorder, a weekly feature no other State Architects' Association has;

4th. In amalgamating its membership into a harmonious and thorough working organization;

5th. In the publication of a valuable hand book;

6th. In the handling of Public Architectural Exhibits;

7th. In the assistance rendered in Public Competitions;

8th. In the absorbing of younger members of the profession, giving them opportunities for acquaintance with older members, and the fundamentals of good ethics;

9th. In the holding of frequent meetings, providing speakers of distinction, and the recent and very successful regional meetings held in various cities and largely attended by engineers, men of other professions, and leading material men;

10th. In securing a co-operation of effort, a closer acquaintance leading to a better understanding of current issues.

Further, that there is an abundant field for the existence of both State and Institute organizations, without duplication of effort, and that the former, by its strength and achievements can now be termed an established fixture, and any attempt to minimize its value, or to countenance its disruption would be combatted by the great majority of the architectural profession in Indiana.

THEREFORE, Be it Resolved, that this board should redouble its efforts to enlarge and strengthen the scope of activities of the Society rather than consider the remotest possibility of its dissolution.

These architects, members of the directorate, know whereof they act for they have followed the actions of the Indiana Society of Architects from its inception, had a hand in each progressive move and have seen the organization grow in scope and power. They know from the councils in which they have sat how the interest of the profession as a whole has been advanced. That which has been done has required thought, increasing effort and considerable expenditure of money and, through the effort that has been exerted, the cause of every individual architect has been advanced. Some may deny this, or seek to, but there is no way of dodging the fact that the profession has drawn to itself greater prestige and any man of the profession has profited accordingly.

The Society is just getting started and before it stretches a broad field of

endeavor. The co-operative effort now a fact between the Associated Building Contractors of Indiana and the Indiana Society of Architects for the advancement of progressive, constructive principles in the State Building Industry has brought these two great elements to a better understanding with a more wholesome respect for each other and given unto each a greater dignity.

When, heretofore, have building men had a say in the state regulation of building construction? Yet now, today, from a seed sown years ago by the I. S. of A., and nourished through a never allowed to die effort toward co-operation between architects, engineers and contractors, there is an Administrative Building Council of Indiana at the State House, composed of state officials, architects, engineers, contractors and building trades mechanics whose duty it will be to devise standard building requirements and see that they are administered. This is the greatest constructive measure ever put forth by the Indiana Building Industry, and it was the Indiana Society of Architects that made it possible for the architect to have a say in that matter. The Society has made the Indiana architect more than just an architect, it has made him a real element, it has raised the profession to a standing of power.

And all this because certain architects gave of their time and money. Many joined the Society, then failed to pay their dues and sat supinely by failing, let us say, to realize and appreciate the effort that the Society was putting forth in their behalf.

Many now are far in arrears with their dues. The I. S. of A. has even greater work before it and will need funds to carry on its campaign of progress for the architect.

Why not pay up, shoulder the obligation that your profession entails and stand shoulder to shoulder with your fellow architects in an effort to advance that profession.

EVANSVILLE TRAILING CITIES OF SIMILAR SIZE IN BUILDING OPERATIONS.

In Position to Make Up Ground by Tak-
ing Advantage of Favorable
Conditions.

While Evansville has apparently been having quite a building boom during the past year and so far this year, in comparison with cities her size she has been falling considerably short and in fact barely keeping pace with normal expansion, not to say anything regarding the huge volume of building she is short. Making a comparison with Fort Wayne, a city of practically the same population, two and one-half times more volume of building was done in the northern city last year than in Evansville. At the present time Evansville ranks fourth in the state in building. Both Fort Wayne and South Bend each have more work in progress so far this year, according to permits issued, than was done in Evansville during the entire year of 1922.

The average city in the United States is estimated to be four years behind in building, particularly in residence and apartments. To make up this deficiency, and at the same time take care of what would be the normal demand, will take ten years or more at least. As Evansville is even further behind than the average city it will probably take her a longer period of time. Any cessation in building construction simply adds a greater burden upon the builders of the nation which they will have to shoulder a few weeks or a few months hence.

At Low Level.

Unlike some of the larger cities, particularly those in the East, Evansville has succeeded in keeping labor and material prices at a comparatively low level. It is true that contractors have been handling a fairly large volume of business, yet nothing like capacity of production has been reached and at no time has material supply or transportation been a problem. And should the proposed curtailment of large building operations until fall in the larger cities become a fact, Evansville should take advantage of her opportunity to build

as much as she can during the summer months before large buying interests invade the markets in October.

CHIPS AND SAVINGS.

J. Bippus and Son announce good and steady progress on the Freund Apartments at Scholz and Blackford avenues. The same firm is remodeling a duplex apartment at 113 Powell avenue, and is completing the brick work for a residence and store at Lincoln and Runnymede avenue for Geo. W. Brown.

Ed Duber picked off the general contract for the construction of a new residence for Dr. J. C. McClurkin at 2nd and Howard streets.

C. Kanzler & Son, who have the general contract to build the two Miller residences in Bayard Park Drive have completed the roofing.

Samuel Johnson is rapidly cleaning up several residential contracts he has been working on of late.

With a large additional force of men at work on the new Benjamin Bosse high school, Washington and Harlan avenues, has been pushed. Bricklayers have been added. Brick work on the west section of the building has been completed to the second story. Preparations are being made to pour the second story concrete slab.

General contractors Geo. L. Miller & Son, the past week started construction operation on a couple of new bungalows one to cost \$6,000 and the other \$7,000.

Architects in Evansville continue busy and are calling steadily on the contractors for new estimates. Between building and estimating the local builders are kept on the jump.

NEW BUILDING LINE ALONG MAIN STREET PROPOSED.

Property Owners Petition for Same.

The proposed widening of West Main street was given a boost a few days ago when the board of works considered a petition to establish building lines on

that street, from Calhoun street west to Broadway.

An act authorizing the city to establish building lines was passed at the last session of the state legislature. The act says that after the lines are established no new buildings may be erected over the lines and that old buildings built before the lines were established may be maintained and repaired, but cannot be replaced or reconstructed.

NEW STATE HIGHWAY ENGINEER FOR FT. WAYNE DISTRICT.

Goshen Man Appointed.

O. B. Kircher, of Goshen, has been appointed engineer of the Fort Wayne district of the state highway department to succeed Walter T. Horn, resigned.

Mr. Kircher has had considerable highway engineering experience, having at one time been previously connected with the Indiana State Highway Department, the Federal Bureau of roads in Texas and the Illinois State Highway Department.

The territory which Mr. Kircher will have includes several counties of northern Indiana. He will have an office in the courthouse.

FT. WAYNE ENGINEERS VISITED BIG HYDRO-ELECTRIC PLANT AT MONTICELLO, IND.

Special Trip Arranged.

The Ft. Wayne section of the American Institute of Electrical Engineers made an inspection trip to the water power development on the Tippecanoe river at Monticello on Sunday, May 27.

Transportation of members was arranged by S. W. Greenland, retiring chairman of the section, and a buffet lunch was served at the dam by members of the entertainment committee. All members gathered at the interurban station at 6 o'clock on Sunday morning and left by special cars to Monticello, where G. W. Hamilton, engineer in charge of the development, explained the project, which is the largest water power development in Indiana.

NEW HIGH CLASS RESIDENTIAL SECTION SOON TO BE DEVELOPED.

Planned to Increase City's Beauty.

Another move was made recently by Ft. Wayne men prominent in business affairs of the city to develop another local high class restricted residence section out on South Broadway. Illsley Place will be the name of the new subdivision and it is planned to make it one of the most exclusive residential sections of the city.

CONTRACTORS CONFERENCE AT INDIANAPOLIS JUNE 6.

State A. B. C.'s Representatives to Meet Next Week.

The Associated Building Contractors of Indiana will hold the first regular quarterly conference of 1923 at Indianapolis, Wednesday, June 6. The meeting will take place at State A. B. C.'s headquarters, 320 Peoples Bank Bldg., opening at 10:30 a. m.

Since this is the first conference to be held since the state convention at Michigan City in January, the discussions developed should be of much interest. In the interim some very important matters bearing on the building contracting business have been transacted, chief of which was the successful legislative effort put forth by the state contractors organization in conjunction with other building interests, resulting in the passage of a new state building law. Reports on the progress of this action and the organization of the Administrative Building Council are to be made.

Then, too, reports will be called for from the various localities of the state relative to the successful conclusions reached in wage scale adjustments, which entailed no serious strikes or stoppages of construction of work.

Also, the building situation will be gone into and analyzed for the purpose of bringing out thoughts of procedure that will act to preserve to Indiana, as far as possible, the big building volume that has been promised. It is the consensus of opinion among the contractors that something definite must be done to stabilize construction costs if building is to be kept moving on a reasonable basis, and also labor must be conserved and must produce, in order to meet and handle the demand that is being put upon it.

Every city contractors' association affiliated with the State A. B. C.'s is expected to send in delegates and already many affirmative responses have been received. The privilege of attendance is not restricted to regular delegates however, as any Indiana contractor so minded to attend will be welcomed.

The State A. B. C.'s has continually endeavored to give to the Indiana contractors the best thought and practices that will improve conditions for the Hoosier builders by suggesting certain things that will improve the understandable contact between the various localities to care for the interest of the builders in Legislative matters, and otherwise effect a real function for the association.

There are builders in Indiana who have been associated for years in this fraternity of contractors and they have acknowledged their profit from such association the aim of which is to share the same progressive aims, problems, and solutions, working at all times in sympathy for mutual betterment and co-operative protection on a state-wide scale.

That a greater co-operation may be brought about amongst the contractors themselves and with the other allied interests of the state building industry is one of the greatest purposes of the State A. B. C.'s and to further that purpose is the aim of these quarterly conferences, one of which is called for next Wednesday at Indianapolis.

PUBLIC LIABILITY.**A Feature Well Worth Watching.**

When a general contractor carries public liability insurance, and a sub-contractor does not, and an accident occurs for which the sub-contractor would be liable, the general contractor could be held only in case a joint law suit was started against both contractors and it could be shown that the general contractor was responsible for the accident.

In public liability cases, under the common law, the employer would be liable only when it could be shown that he or his employee caused the accident.

If it could be shown that the injured person assumed a risk or contributed to the accident, there would be no liability as far as the employer is concerned. In public accident cases, it would have to be shown that a person held liable must in some way be responsible for the accident which has happened.

If a general contractor loans equipment to a sub-contractor, then, if the sub-contractor were not financially responsible, the general contractor could be held. It is a dangerous practice for one contractor to loan equipment or tools to another.

A general contractor should insist that all sub-contractors carry public liability insurance, because, should a public liability accident occur, for which the sub-contractor were responsible and a law suit resulted, it would probably mean that final settlement would be withheld until the case was disposed of.

It may also cause a joint suit to be started against the owner, architect and general contractor, which is very often

the case. Every general contractor should insist on a certificate of insurance from the sub-contractor, for both compensation and public liability, before the contracts are signed. —(Bulletin, Associated Building Employers of Michigan.

HALF MILLION DOLLAR PROJECT SOON TO ARISE.**Big Contract Awarded.**

Add another good sized project to the contract awarded column for Indianapolis.

While building affairs were fairly active the past week the feature event was the awarding of the contract to the Hall Construction Co. for the erection of a half million freight house for the Monon Railroad. The building, a fireproof structure of reinforced concrete construction, is to be 3 stories high, 50x450.

BUILDING PERMITS

*** PROSPECT BRIGHTER****Threatened Building Strike at Chicago Voted Down**

Since the Calumet District is so close to Chicago, and is under the union jurisdiction of that city, the word that has come out of that municipality with regard to the labor situation there as it affects the building field is encouraging. It seems that the Building Trades Council over there has voted not to call a strike when the Landis Wage Award Agreements expire June 1st. Though only nine of the crafts out of nineteen have so far signed new agreements negotiations are under way toward clearing up the other differences and it is expected that matters will be settled by or not long after June 1st.

CALUMET CONTRACTORS AND LABORERS STILL AT GRIPS**No Settlement Yet**

While other places seem to have gotten their labor troubles straightened out little old Hammond is having her troubles with her building laborers. The breach is still as wide as ever. The Building Trades Council has voted to pull all union men off work where non-union laborers are employed. Last week the contractors started several more projects with the aid of non-union men and aroused the ire of the union forces. However, this new threat of the laborers won't affect the bricklayers and carpenters.

The laborers' dissension has had a tendency to band the big contractors together and this latest decision of the Building Trades Council will probably bring the whole matter to a real showdown. Great stuff when a crowd of unskilled men can set themselves up and be dictators to the skilled workmen, prospective owners and contractors, and say that building efforts shall not go ahead unless their demands are agreed upon. It looks as if 87½ cents and 97½ cents per hour is a fair wage to common labor, but the laborers can't see it that way.
